PREFACE

This book completes the Loeb translation of Hippocrates. The work of preparing the volume has taken all my leisure for over five years, the most laborious part being the collation of the manuscripts Urb. 64, A, M, V, θ , C', Holkhamensis and Caius $\frac{50}{37}$. I have not quoted all the variants, perhaps not the greater number of them; the rule I have tried to follow is to record only those readings that are intrinsically interesting and those that seriously affect the meaning. The readings recorded by my predecessors are often wrongly transcribed, knowing by experience the 11sk of mistakes in collations, however carefully done, I am sure that there are some errors in the notes in this volume. The readings of Urb 64 are here printed for the first time, as also are many from the manuscripts M, V.

I wish to thank my pupil, Mr. A. W. Poole, for help in preparing the index.

W. H. S. J.

T

INTENTIONAL OBSCURITY IN ANCIENT WRITINGS

To a modern it appears somewhat strange that a writer should be intentionally obscure. An author wishes to be easily understood, knowing that neither critics nor readers will tolerate obscurity of any kind. But in ancient times the public taste was different; the reader, or hearer, was not always averse to being mystified, and authors tried to satisfy this appetite for puzzles.

It was probably the oracles, with their ambiguous or doubtful replies, that set the fashion, which was followed most closely by those writers who affected an oracular style. The difficulties of Pindar and of the choral odes of Aeschylus, who was imitated in this by later dramatists, were not entirely or even mainly due to the struggle of lofty thought seeking to find adequate expression in an as yet inadequate medium. They were to a great extent the result of an effort to create an atmosphere congenial to religion and religious mystery So Plato, who can when it suits his purpose be transparently clear, affects an almost unnatural obscurity when he wishes to attune his readers' mind to truths that transcend human understanding. Much of the Phaedrus and of the Symposium, the Nuptial Number in the Republic, and a great part of the Timaeus, are oracular

utterances rather than reasoned argument, taking their colour from the difficulty of their subject. But prose remained comparatively free from intentional obscurity; lyric poetry, on the other hand, at any rate the choral lyric, seems to have been particularly prone to it. In Alexandi ine times obscure writing became one of the fads of literary pedants, and Lycophron is a warning example of its folly when carried to extremes.

There must have been something in Greek mentality to account for the persistence of this curious habit, which appears all the more curious when we remember how fond the Greeks were of clear-cut outlines in all forms of art. The reason is probably to be found in the restless activity of the Greek mind, which never had enough material to occupy it fully. The modern has perhaps too much to think about, but before books and other forms of mental recreation became common men were led into all sorts of abnormalities and extravagances The unoccupied mind broods, often becoming fanciful, bizarre or morbid To quote but two instances out of many, the "tradition" condemned by Jesus in the Gospels, and the elaborate dogmas expounded at tedious length by the early Fathers, were to some extent at least caused by active brains being deprived of suitable material. It is a tribute to the genius of the Greeks that they found so much healthy occupation in applying thought to everyday things, thus escaping to a great extent the dangers that come when the mind is insufficiently fed. tendency to idle speculation is the only serious fault that can be found with Greek mentality; indulgence in intentional obscurity is perhaps a fault, but only

a slight and venial one As has been said above, oracular responses seem to have started the fashion of purposely hiding thought, but it was kept up by the Greeks' love of solving puzzles, of having something really difficult with which to exercise their brains.

It has already been pointed out, in the introduction to Decorum, that certain (probably late) tracts in the Corpus are intentionally difficult, but the reason for their difficulties may well be due to a desire to keep secret the ritual or liturgy of a guild; Decorum, Precepts and Law are in a class by themselves. This explanation, however, will not apply to the obscure passages in Humours. This work has nothing to do with secret societies. is a series of notes which, however disjointed or unconnected, are severely practical Their obviously utilitarian purpose makes their obscurity all the more difficult to understand; a text-book, one might suppose, ought at least to be clear. Yet when we have made allowances for hasty writing and for the natural obscurity of all abbreviated notes, there remains in Humows a large residue of passages in which the difficulties appear to be The fact that these passages 1 are sometimes written in a rather lofty style seems to suggest an explanation of them. Humours is akin, though not closely so, to Nutriment; it is aphoristic after the manner of Heracleitus "the dark." This thinker adopted the oracular style when expounding his philosophical system, and certain later thinkers

¹ I seem to detect the characteristics to which I refer chiefly in Chapter I, and in the various lists of symptoms, etc.

followed his example. Perhaps it was thought that a "dark" subject required a "dark" medium of expression. The writer of Nutriment, who was striving to wed Heracleiteanism and physiology. succeeds in producing a not altogether incongruous result. But Heracleitean obscurity is sadly out of place in a work entirely free from philosophy, whether Heracleitean or other, and the modern reader is repelled by it. The ancients, however, appear to have been attracted, for Humours is often referred to, and commentators upon it were numerous. It is interesting to note that the author, or compiler, of Aphonisms, who was a really great scientific thinker, while adopting the oracular aphorism as a medium of expression, and keeping the lofty style appropriate to it, makes no use of intentional obscurity, realising, consciously or unconsciously, how unsuitable it is in a work intended to instruct medical students and practising physicians.

THE FORM AND CONSTRUCTION OF CERTAIN HIPPOCRATIC WORKS

Many books in the Hippocratic Collection are not strictly "books" at all; they consist of separate pieces written continuously without any internal Already, in Volume I, we have disbond of union. cussed the curious features presented by Epidemics I and III, and by Aus Waters Places. The aphoristic works, being at best compilations, exhibit a looseness of texture which makes additions and interpolations not only easy to insert but also difficult to detect. Nature of Man and Regimen in Health appear as one work in our MSS., and the whole has been variously divided by commentators from Galen onwards. Humours has scarcely any texture at all, and the disjointed fragments of which it is composed can in not a few places be traced to other works in the Corpus

The scholars who have devoted themselves to the study of Nature of Man—Humours, probably because of its hopeless obscuity, has been very much neglected—seem to make, perhaps unconsciously, a more than doubtful assumption. They suppose the present form of the book to be due to a compiler,

¹ Vol. I. pp. 141, 142.

² Vol. I. p. 66.

who acted on some definite purpose. It is, however, quite possible that the "conglomerates," as they may be called, are really the result of an accident A printed book goes through a fixed routine, which fact is apt to make us forget that a papyrus roll may well have been a chance collection of unconnected fragments. In the library of the medical school at Cos there were doubtless many rough drafts of essays, lecture notes, fragments from lost works, and quotations written out merely because a reader happened to find them interesting. Some tidy but not over-intelligent library-keeper might fasten together enough of these to make a roll of convenient size, giving it a title taken perhaps from the subject of the first, or perhaps from that of the longest fragment. Later on, scribes would copy the roll. and the high honour in which the Hippocratic school was held would give it a dignity to which it was not entitled by its intrinsic value

Of course these remarks are mere guess-work. Positive evidence to support the hypothesis is very slight, but it should be noticed that a work in the Corpus often ends with a fragment taken from work Take, for instance, Regimen in There are seven chapters of good advice Health on the preservation of health. The subject is treated in an orderly and logical manner, but the reader feels that at the end of the seventh chapter there is an abrupt break in the description of regimen for athletes. For the eighth chapter is a fragment from the beginning of the second book of Diseases, and gives some symptoms of "diseases arising from the brain," and the ninth chapter is a fragment from the beginning of Affections, which

insists on the importance of health and of making efforts to recover from illnesses. Here Regimen in Health ends.

Several points need careful consideration:-

(1) Regimen in Health proper ends abruptly

and is apparently unfinished;

(2) This unfinished work has two short fragments tacked on to it, the second of which is but slightly connected, and the first quite unconnected, with the subject matter of the first seven chapters;

(3) These fragments are taken from the beginnings of other works in the Corpus.

Is it possible for such a conglomerate to be the result of design? What author or editor could be so stupid as to complete an incomplete work by such unsuitable additions? What particular kind of accident is responsible nobody could say for certain, but it is at least likely that some librarian, and not an author, added the two fragments. It must be remembered that the parts of a book that get detached most easily, whether the books be a roll or composed of leaves, are the beginning and the end. These places are also the most convenient for making additions. Suppose that the end of Regimen in Health was lost and the beginnings of copies of Diseases II and of Affections became detached: surely it is not unreasonable to suppose that a librarian preserved the latter by adding them to the former.

Nature of Man is similar in construction, but the fragments added to the main piece are longer; Regimen in Health, in fact, is itself one of them.

First we have seven chapters treating of the four humours, which end with the relation between these humours and the four seasons. The eighth chapter 1 deals with the relation between the seasons and diseases. The ninth chapter 2 begins with the cure of diseases by their opposites. After three sentences a complete break occurs, and a fresh start is made, beginning with at δε νοῦσοι γίνονται: and the rest of the chapter, about 50 lines, is concerned with a classification of diseases into (1) those arising from regimen and (2) those caused by the atmosphere. Incidentally it may be noted that the first part of this section is paraphrased in Menon's Iatrica V. 15 and attributed to Hippocrates. tenth chapter briefly postulates a relationship between the virulence of a disease and the "strength" of the part in which it arises. Then comes the famous passage dealing with the veins, which Aristotle in Historia Animalium III. 3 attributes to Polybus. The twelfth chapter deals with the cause, in the case of patients of thirty-five years or more, of "pus" in sputa, urine or stools. The thirteenth chapter contains two unconnected remarks, the first to the effect that knowing the cause of a disease enables the physician to forecast better its history, the second insisting upon the necessity of the patient's co-operation in effecting a cure. The fourteenth

¹ There is an unfulfilled promise in την δὲ περίοδον αὖτις φράσω τῶν ἡμερέων, which Fredrich would delete as an interpolation

This chapter has two references to passages that are not extant, ἄσπερ μοι πέφρασται καὶ ἐτέρωθι, and ἄσπερ μοι καὶ πάλαι εἴρηται If Nature of Man consists of sections taken from works now lost, these cross-references are easily explained.

chapter deals with deposits in urine. The last chapter contains a very brief classification of fevers.

It requires a special pleader, biased by a subconscious conviction that a Greek book must be an artistic whole, to maintain that this aggregate follows any logical plan. Yet Fredrich, an excellent scholar and a keen student of Hippocrates, sums up his opinion in these words: "Vir quidam, medicus videlicet, in usum suum collegit et composuit res memoria dignas : complures de origine morborum et curatione sententias (π φύσ. ἀνθρ.; c. 1x, 1; ix, 2; 10; 13) dissertationes de venis (c. 11) de pure (12) de urina (14) de febribus (15) de diaeta (1-7) de capitis doloribus (8) principium sanandi (9); et haec quidem duo capità addidit fort, quod initia librorum ei carorum erant." 1 There is nothing unreasonable in assigning the collection of extracts to "medicus quidam", a physician is perhaps as likely a person as a librarian. But "composuit" does not in the least describe the work of the collector. tions are not "arranged"; if any effort was made to put them in order it was a very unsuccessful It is a far more likely hypothesis to suppose that fragments of papyrus were fastened together by someone, perhaps a physician, perhaps a library attendant, to prevent their getting lost.

A similar problem faces us when we examine *Humous*, but here the *distecta membra* are even more incongiuous and disordered. An analysis of the work may prove useful.

Chapter I The humours, and how to divert or deal with them when abnormal.

¹ C. Fredrich, de libro περὶ φύσιος ἀνθρώπου pseudippocrateo, p. 15.

Chapters II-IV. A mass of detail the physician should notice when examining a patient

Chapter V How to find the κατάστασις of a disease. What should be averted and what encouraged.

Chapter VI. The proper treatment at paroxysms and crises. Various rules about evacuations.

Chapter VII. Abscessions.

Chapter VIII. Humours and constitutions generally: their relation to diseases

Chapter IX. Psychic symptoms and the relation between mind and body.

Chapter X External remedies.

Chapter XI. The analogy between animals and plants.

Chapter XII. The fashion of diseases, which are congenital, or due to districts, climate, etc.,

Chapters XIII-XVIII Seasons, winds, rains, etc., and their influence on health and disease.

Chapter XIX. Complexions.

Chapter XX. Quotation from Epidemics VI. 3, 23, dealing chiefly with abscessions and fluxes.

There are many quotations or paraphrases from various Hippocratic treatises.

Chapter III Aph IV 20, Prognostic II. Chapter IV. I. Prorrhetic 39; Joints 53

Chapter VI Aph. I. 19; 20; Eps I. 6; Aph. I. 22; 21; 23; 24

Chapter VII. Aph. IV. 31; Eps VI. 7, 7; Aph IV 32; Em. VI 1, 9; IV. 48; Aph IV. 33; Epi. IV. 27 and 50; Epi. VI. 1, 9; 3, 8;

7,7;7,1;7,7

Chapter X. Epi II. 1, 7; 5, 9, Epi. IV. 61.

xviii

Chapter XII. Aph. III 4; Airs, Waters, Places 9, 7 and 9.
Chapter XIII. Epi. II. 1, 5; Aph. III. 8; 6;

Epi. I. 4.

Chapter XIV. Aph. III 5, 21 and 5.

Chapter XV. Aph. III. 1.

Chapter XX. Eps VI 3, 23, to 4, 3.

In other words the following passages are quoted:—

Aph II 19; 20; 21; 22; 23; 24. Aph III 1; 4; 5; 6, 8; 21.

Aph. IV. 20; 31, 32; 33. Epi I. 4.

Epi II. 1, 5; 1, 6; 1, 7; 5, 9.

Eps. IV. 27; 48; 50; 61.

.Em. VI. 1, 9; 3, 8; 3, 23 to 4, 3.

Epi VII. 1; 7.

Prognostic II.

I. Prorrhetic 39.

Joints 53.

Airs, Waters, Places 7 and 9.

In all there are thirty-five borrowed passages.

The analysis of *Humours* given above is by no means adequate; a careful reader will note many omissions of details. It is, in fact, impossible to analyse what is itself in many places an analysis. Some parts of the book read just like lecture notes, or heads of discourse to be expanded orally by a teacher or lecturer. It is indeed hard to believe that the lists in Chapters II, III, IV, V, IX are not either such notes or else memoranda made by a student for his own guidance. How and why the

other parts were added it is impossible to say, with the possible exception of the first chapter and the last. As has already been said, the beginning and end of an ancient scrap-book are the places where additions are most easily made. The first chapter, while similar in character to the rest of the book, is separated from it by the words $\sigma\kappa\epsilon\pi\tau\epsilon\alpha$ $\tau\alpha\hat{v}\tau\alpha$, with which the second chapter begins. These words may well have been the title, as it were, of the memoranda which we assume form the basis of the whole work. The last chapter is obviously a fragment added to the end of the roll by somebody who did not wish it to be lost.

Neither Humours nor Nature of Man must be judged by the canons used in appreciating literature. They are not literary compositions, and only the first chapters of Nature of Man are artistically written. Humours is not only martistic but also often ungrammatical. The writer, or writers, wrote down rough notes without thinking of syntactical structure. Not intended for publication, these jottings show us that the Greek writers were sometimes inaccurate or inelegant in speech. The textual critic, deprived of one of his most powerful weapons. that a faulty expression is probably due to the carelessness of a scribe, is forced to pause and think. If the scientists were often shpshod, perhaps the literary writers were occasionally so. A linguistic error in the text of, say, Demosthenes may be due, not to the mistake of a scribe, but to the inaccuracy of Demosthenes himself. Even the greatest artists are not infallible

In conclusion, it should be remembered that a papyrus roll could contain no foot-notes, and that

marginal notes did not come into general use before the age of the scholiasts. No author annotated his own works; he worked any necessary annotations into the text itself, and these might consist of illustrative passages from other works. As one reads Humours the conviction grows that many of its apparently irrelevant passages are really notes of this type A good example occurs in Chapter XIV. subject is the influence of south winds and of north winds on health, and the author concludes his remarks at μᾶλλον. Some note, however, is required, to deal with a special case. This special case brings in (1) the question of droughts and (2) the humours. So two fresh notes are added, one stating that either wind may accompany drought, and the other that humours vary with season and district. Between the two notes is inserted a remark (διαφέρει γαρ καὶ τάλλα οὖτω μέγα γὰρ καὶ τοῦτο), the connection of which is very obscure. It may refer to the effects of winds (as in the translation), or it may mean that other things beside winds influence the character So there are apparently four notes, one of diseases. at least of which is a note added to the first note.

But this explanation of irrelevant passages must not be pushed too far. It cannot account for the amorphous construction of many Hippocratic treatises, which is almost certainly due to the welding together of detached or separate fragments of various sizes in order to preserve them in book form.

III

SCIENCE AND IMAGINATION

THE progress of scientific thought depends upon One is the collection of facts by two factors observation and experiment; the other is constructive imagination, which frames hypotheses to interpret these facts. The Greek genius, alert and vigorous, was always ready with explanations, but it was too impatient, perhaps because of its very quickness, to collect an adequate amount of evidence for the framing of useful hypotheses. This fault was not altogether a bad thing; the constructive imagination needs to be developed by practice if progress is to be possible But imagination needs also training and education, and the Greek mind was so exuberant that it shinked this necessary The drudgery of collecting facts, and discipline. of making sure that they square with theory, proved Experiment was entirely, or almost too laborious. entirely, neglected. The hypotheses of early Greek thought are mere guesses, brilliant guesses no doubt, but related to the facts of experience only in the most casual wav Medicine, indeed, did usually insist on the collection and classification of phenomena, but guesses mar all but the very best work in the Hippocratic Corpus, and it was not until Aristotle

and Theophrastus laid the foundations of biology that the importance of collecting sufficient evidence was fully realised.

It is interesting in this connection to note that the arts were distinguished from the sciences only when Greek thought was past its zenith. The word τέχνη can mean either "art" or "science," though it inclines more towards the former, sometimes in a slightly derogatory sense ("knack"). Socia is almost equally ambiguous, and we have to wait until Aristotle, completing the work of Plato, gave a new, specialised meaning to ἐπιστήμη before there is a word approximately equivalent to our "science" without any additional notion of "art." Now the arts demand much more imagination and freedom of thought than do the sciences, and the Greeks' having the same word for both is a sign that the discipline necessary for accurate science was not appreciated.

Greek imagination was not only luxuriant; it was also picturesque, and demanded artistic detail. A Greek philosopher felt bound to paint a complete picture when he formulated a theory, however few were the certain facts that he could use in its construction. So a Greek philosophical system is likely to contain many details, not indeed incongruous, but unscientific in the modern sense of the term. The Greek love of a completed picture is well illustrated by the "myths" of Plato's dialogues. When a theory cannot be finished, because of the limitations of the human intellect, a myth is added to fill up the ugly gap. The reason, for instance, can prove that the soul never really dies if we admit Plato's Ideas. In the Phaedo this proof is elaborated, but

there is an inevitable hiatus in the account. Granted that the soul exists in the next world, what sort of a life does it pass there? This cannot be told by reason, so that an imaginary story is added for the sake of completeness

Nobody would interpret Revelation as one would Darwin's Origin of Species. An important principle of interpretation follows. A Greek theory cannot always be treated like a truly scientific account. Conformity with experience, a sine qua non of scientific reasoning, is not to be demanded of works

in which imagination plays a large part.

The medical treatises of the Hippocratic Collection sometimes contain a philosophic element. Nutriment, translated in Volume I, is an attempt to apply the principles of Heracleitus, using the language of Heracleitus, to the problems of food and its as-Parts of Regimen, a treatise translated in the present volume, are similar in character. although following a different philosophic system We must not expect of them too much consistency, too much conformity with experience, too much scientific method. We must realise that they are in part works of imagination, often figurative, allusive and metaphorical They portray truth, or what the writers consider to be truth, in an allegorical guise. Like a modern futurist picture, they try to express reality by a mass of detail which does not strictly correspond with objective fact. Provided that he produces the general impression he desires, the writer is not over-careful about the patches of colour that make up the whole.

What is true of Nutriment and Regimen is a fortion true of the fragments of Heracleitus in this volume.

They attempt to explain the material universe in a style that is largely poetical. Heracleitus, like most Greek writers, failed to confine himself to a single rôle. He is a philosopher and a scientist, but he cannot help being at the same time an artist, a prose poet, and a religious reformer.

IV

NATURE OF MAN

Nature of Man and Regimen in Health formed one work in ancient times and are joined together in our Galen comments on the whole work, manuscripts. dividing it into three main parts. Chapters I-VIII. IX-XV and XVI to the end.1 It is clear that in Galen's time the book had the form it has now, but we do not know when that form was first received. Aristotle 2 refers to the description of the veins in Chapter XI, ascribing it to Polybus, the son-in-law of Hippocrates, and to the same Polybus is ascribed by Menon 3 three chapters at least of the first section, which has given a name to the whole composition, On the other hand, this same Menon 4 quotes, or rather paraphrases, the passage in Chapter IX that begins with at δε νοῦσοι γίνονται, and prefaces the quotation with άλλὰ γὰρ ἔτι φησὶν Ἱπποκράτης κ.τ. ἔ. If Menon knew Nature of Man as a unity, he would surely not have attributed one part to Polybus and another part to Hippocrates.

¹ See Villaret's discussion of Galen xv. 9 foll. (op. cnt. pp. 4-6).

² Hist Animal. III 3.

³ Iatrica, XIX, Diels, pp. 33, 34. Chapters II, III, and IV are referred to

⁴ Iatrica, VII. 15. See Diels, pp. 10, 11.

Galen is convinced that the first section is referred to by Plato in the famous passage in the *Phaedrus*, and that the whole work, in spite of Aristotle, should be assigned to Hippocrates himself. It should be noted in passing that neither the first section nor the second is complete. The former contains an unfulfilled promise, the latter back references to a discussion of regimen no longer extant.

Most of our difficulties disappear if we look upon Nature of Man and Regimen in Health as a chance collection of fragments, varying in size and completeness, and perhaps put together by a librarian or book-dealer Aristotle and Menon may be referring to the complete works from which the extant frag-

ments were taken.

We must now consider the internal evidence. In Chapter I Melissus the Eleatic, who flourished about 440 s.c., is mentioned in such a way as to show that his doctrines were not yet forgotten or out of date, and throughout the first eight chapters the influence of Empedocles is strong. We ought then to postulate for the first section a date not earlier than 440 s c and not later than (say) 400 s c. The style is clear and forcible, pointing to a time when proseform had already received careful attention, some years later, in fact, than the lise of Sophistic rhetoric. Finally, even a superficial reader will notice the general likeness of the first section of Nature of Man

¹ 270 C-E. See Vol. I. pp xxxiii-xxxv.

3 VIII την δε περίοδον αδτις φράσω την των ημερέων

² See Littré, Vol I. pp ²97, 298, 346 Littié himself is convinced that the *Phaedrus* passage refers, not to *Nature of Mun*, but to *Ancient Mediume*

⁴ ΙΧ · ἄσπερ μοι πέφρασται καλ έτέρωθι and ἄσπερ μοι καλ πάλαι είρηται

to Ancient Medicine. It is difficult to resist the conclusion that they were written at approximately the same time, that is, during a period of an eclectic revival of the older philosophies.

The smaller fragments that follow show no reliable clues as to their date, except the similarity of the section on veins to Sacred Disease (VI foll). Regimen in Health ends in two fragments from other treatises in the Corpus— $\pi\epsilon\rho$ ì νούσων II and $\pi\epsilon\rho$ ì $\pi a\theta$ âν—either stray strips of papyrus added by chance or the result of repeated wrong division of works written as though one treatise were the continuation of the preceding. The main portion belongs to that period, referred to by Plato in his polemic against medicine in the Republic, when men grew "fussy" about their health and followed elaborate rules in order to ward off diseases and keep themselves fit. It is not unreasonable to suppose that its date falls within the first quarter of the fourth century B C.

The main interest of Nature of Man lies in the Empedoclean doctrine contained in the first eight chapters. The four humours are not the four elements of Empedocles, but they are analogous and perform analogous functions. It is their $\kappa\rho\hat{a}\sigma_{is}$ that produces a healthy body, and the whole argument implies that they are elemental and in themselves unchangeable. There was something vital in the philosophy of Empedocles, and as a basis of physics it reappears, modified but not essentially changed, in Plato's Timaeus and in Aristotle's Physics Modern chemistry, with its theory of "elements," is nearer akin to Empedocles than it is to atomism. The number of elements may be four or four hundred—the number

is immaterial—but the essential factor, whether it is called $\mu \hat{i} \xi_{is}$, $\kappa \rho \hat{a} \sigma_{is}$ or combination, remains constant. Nature of Man is a striking, though minor, instance of perennial vitality in the thought of Empedocles ¹

Modern scholars have found the treatise more attractive than most of the others in the Hippocratic Collection. Carl Fredrich wrote a doctoral thesis on its composition, and published further research five years later. More recently an excellent edition was published as a doctoral thesis by Villaret Galen has given us a full and interesting commentary

The chief manuscripts are A, M and V. The first shows its usual superiority in most cases where the manuscripts differ, but sometimes MV gives a preferable reading. In particular, there are several omissions in A almost certainly due to careless copying.

copjing.

\mathbf{v}

HUMOURS

This work is perhaps the most puzzling in the Hippocratic Collection. It is obviously a scrap-book of the crudest sort; it has no literary qualities and it is obscure to a degree. Yet in ancient times Humours attracted great and continued attention. Apparently Bacchius worked on it, and it was familiar to Glaucias. Zeuxis and Heracleides of Tarentum There are three Galenic commentaries, which recent German scholarship maintains are a Byzantine compilation containing, however, certain passages from the commentary, now lost, which Galen actually did As the genuine Galenic commentary has been replaced by a forgery, one is tempted to suppose that the ancient Humours has suffered a similar fate. But there can be no doubt that our Humours was the work known to Erotian by that name 2

Humours is then ancient, but only a few of the old critics attributed it, or parts of it, to Hippocrates

¹ See Galen, XIX 35 One of the passages in the extant commentaries supposed to be genuine contains the mention of Zeuxis and Glaucias

² See e g. under πεπασμός, αὐασμός, ἀπαρτί, πινώδεσι, αἴρεται and φῦσα in Nachmanson's edition of Eiotian

himself.1 Its true genesis is a matter of doubt; I have already suggested that it may be a haphazard collection of fragments put together by a careful but uncritical librarian.

The popularity 2 of Humours in ancient times may be due in part to its very difficulty; it was, as it were, a challenge to the ingenuity of an ingenious people. A riddle provokes many answers, and Humours is a continuous riddle. But it has merits of its own, in addition to the provoking nature of its problems; it is more utilitarian than many of the treatises in the Hippocratic Corpus. Prognosis is for once in the background. If we omit those portions that are identical with other passages in the Corpus, the remainder are chiefly concerned with the treatment and the prevention of disease This is a refreshing change from the somewhat arid but otherwise similar propositions in Aphorisms Particularly interesting are the catalogues or lists which appear in Chapters II-V. Are they heads of discourses, lecture-notes made by a professor to facilitate his instruction of a medical class, or are they analyses made by a student attending such a class? The reader inclines to this view or to that according to his mood at the time. but however doubtful their origin, nobody can doubt the value of such lists at a time when pathology had not yet been systematised and treatment was still lacking in breadth and thoroughness Catalogues, by enumerating the possibilities, widened the outlook of the practitioner and made it less unlikely that favourable opportunities would be overlooked.

See Littré, Vol I. pp 369, 370
 Cf. Littré, I. 369 "En lisant ce livre, on s'explique difficilement la faveur dont il a joué dans l'antiquité."

The title of the book is deceptive. After the first sentences there is little mention of the humours; indeed Nature of Man is the only Hippocratic work that deserves to be called $\pi\epsilon\rho$ $\chi\nu\mu\hat{\omega}\nu$. The true nucleus seems to be the catalogues beginning $\sigma\kappa\epsilon\pi\tau\epsilon\hat{a}$ $\tau\hat{a}\hat{\nu}\tau\hat{a}$ (Chapter II), and the name was probably taken from the opening sentence and given to the whole scrap-book by some ignorant librarian.

The first edition came out in 1555, and few modern scholars have paid any serious attention to the work. Ermerins leaves whole chapters untranslated, with a brief remark in Latin that they are hopeless. Littré has very little to say about it, and his translation is often both unintelligible and unfaithful.

The chief manuscripts are A and M I have collated both of these and also the Caius manuscript $\frac{50}{27}$.

VI

APHORISMS

This is the best known work in the whole Hippocratic Collection. From the earliest times it has been regarded with a reverence almost religious. Its authority was unquestioned until the breakdown of the Hippocratic tradition. The Greek manuscripts are more numerous than those containing any other work, while there are translations into Hebrew, Arabic, Syriac and Latin. Editions abound in almost every modern language "The titles alone," says Adams, "occupy ten pages in the edition of Littré, and still more in that of Kuhn." The most lavish praise has been bestowed upon the collection; Suidas says, $dv\theta\rho\omega\pi(v\eta\nu)$ $\delta\pi\epsilon\rho\beta\alpha(vov\sigma)$ $\sigma\dot{v}\nu\epsilon\sigma u\nu$, and as late as the nineteenth century it has been called "the physicians' Bible."

Yet it must be confessed that a modern reader finds Aphorisms disappointing; the promise of its dignified opening is scarcely fulfilled. The propositions are not arranged after any definite system, and the seven "sections" into which, since the time

¹ There are 140 Greek MSS, 232 Latin, 70 Arabic, 40 Hebrew and 1 Syriac Besides Galen, the ancient commentators include Meletius, Stephanus of Athens and Theophilus. See further Pauly-Wissowa, s.v. Hippocrates, 16, p. 1845

of Galen, they have been grouped, are somewhat arbitrary. While containing much accurate and interesting information, Aphorisms is not useful enough to account for its astounding popularity Why did it thrust Regimen in Acute Diseases and Prognostic into comparative obscurity? It may be urged that these are treatises, text-books in the shape of essays, and therefore not easily committed to memory by dull medical students. In this argument there is much truth; the aphorism is naturally popular with minds of a certain type at a particular stage of their development. We might therefore expect the aphoristic works to find greater favour with students than monographs, but why should Aphorisms be so much preferred before Coan Prenotions and Prorrhetic I, or even before the Cnidian books, with their short and clear rules for diagnosis and treatment? Moreover, for sheer utility the later compilers of medical works, such as Celsus and Aretaeus, might be supposed far superior in meeting the needs of the general practitioner.

The problem must remain somewhat of a puzzle, but a few reasons may be suggested why Aphorisms enjoyed so long a vogue. In the first place it carried all the authority of a great name, and until comparatively modern times authority exerted an overwhelming influence in all regions of thought. The tradition is that Hippocrates composed it in his old age as a summary of his vast experience, and there is no reason to doubt that this tradition, with certain reservations, is essentially true. Then again it is a very comprehensive work, dealing with most

sides of medical, if not of surgical practice

The ancient testimony in favour of the Hippocratic

authorship of Aphorisms is overwhelming, and points at least to an intimate connection between the collection and Hippocrates himself. Yet very many of the propositions obviously belong to the mass of medical aphorisms traditionally current in the schools of ancient Greece. These have come down to us in a number of collections, including Coan Prenotions, Prorrhetic I, Nutriment, Dentition and parts of Epi-Sometimes the same aphorism appears twice, with slight differences of form. Aphorisms. for instance, has 68 propositions found in Coan Pienotions. So it may represent a collection of aphorisms made by Hippocrates from the vast number current either in literature or in tradition. Many new ones were probably added from the store of his personal experience, and several seem to be old anhorisms corrected and improved.

The various propositions are grouped according to subject, those, for instance, dealing with fevers being classed together. One proposition is sometimes a natural sequel to another, and so finds its final place.² How the groups of propositions are themselves arranged it is difficult to say. An alphabetical arrangement would be ideal for reference, as a book of aphorisms is more akin to a dictionary than to a text-book, but a close inspection fails to detect any such order in Aphorisms. Perhaps the writer did not see any reason for arranging the sections in any particular order, and so contented himself with

an arrangement of the propositions.

¹ See my Hippocrates, II pp. xx-xxix. ² In the case of one aphoristic book, Dentition, it can be shown that the order is an alphabetical one, depending on key-words. See Vol II pp. 318, 319.

A few details may be noticed here. The first aphorism is certainly from the hand of the "great" Hippocrates, and was placed by him in a position of prominence to mark the importance to the physician of the truths that are contained in it. The first section shows a fondness for the adjective σφαλερός. which occurs in I, III (four times), IV, V (twice) Here we have obviously an author's "pet" word. and, occuring where it does, it may be the favourite of Hippocrates himself. Finally, the section on fevers (IV. xxvii-lxxiii) ends with the sentence èv πυρετοίσι δὲ ταῦτα (γίνεται) This appears to apply, not to the proposition in which it occurs (LEXIII), but to the whole section It means, "These are It means, "These are points to observe in fevers" We seem to have here the compiler's note to mark the end of a section. Again, IV. xiii begins with πρός τους έλλεβόρους (which seems to be a title), and V. xx1 closes with θέρμη δὲ ταῦτα δύεται, possibly a misplaced title belonging to the long aphorism that follows Perhaps most sections were never finished, and so received no note to mark their beginning or their end

Aphoristic works invite interpellation, and many such additions are suspected in *Aphorisms*. I have generally noted these, and likewise those passages which occur again in other parts of the Hippocratic

Corpus

In an earlier volume I have given reasons for supposing that *Aphorisms* was written about 415 B.C.¹

Ancient commentaries were numerous and careful,² the best now extant being those of Galen and Theophilus. The first edition appeared in 1488,

¹ See Vol II pp. xxviii and xxix.

² See Pauly-Wissowa, VIII. 2, p. 1845.

the last was Beck's German translation published in 1907. F. Adam's second volume contains a good English translation with an excellent commentary, to which I am very much indebted. The texts of Ermerins and Reinhold I refer to under the abbreviations "Erm." and "Rein."

I have myself collated all the chief manuscripts containing Aphorisms. They are C', V, M and Urbinas 64 (referred to in notes as "Urb."). The last is a tenth or eleventh century manuscript in the Vatican, containing, among other things, the text of Aphorisms with the commentary of Theophilus. I do not think that its readings have been noted before, and the same applies to much of V and M. Littré relied on C' and the Paris manuscripts, many of which are so closely related to either V or M that few of the readings of the latter were unknown to Littré, although he could not know their authority.

¹ They bear a strong resemblance to those of Littre's S, and the two manuscripts are probably closely related.

VII

REGIMEN I

The long work called Regimen attracted little attention in early times Erotian does not mention it, and Galen, though he makes several references 1 to it, is not an enthusiastic admirer. The second book, he says, might reasonably be considered worthy of Hippocrates, but the first is entirely divorced from his way of thinking.²

There were apparently two editions, one beginning with Book I and the other with Book II; of the latter, some copies began with $X\omega\rho i\omega\nu$ dè $\theta \epsilon\sigma i\nu$ and others with $\Sigma\iota\tau i\omega\nu$ dè $\kappa\alpha i$ $\pi o\mu a\tau\omega\nu$ dévamur. The first of these editions was called $\pi\epsilon\rho i$ de $i\nu$ de $i\nu$

The three (or four) books are evidently closely connected in subject, though a special pleader might argue that they are not all by the same hand. They deal with what the author calls his "discovery"

¹ The chief passages are V 881; VI. 455, 473, 496, 541, 543; XV. 455; XVII A. 214; XVIII. A 8. They are discussed by Fredrich, Diels and the writer in Pauly-Wissowa. ² VI. 473

³ Galen, VI 473.

($\epsilon \tilde{\nu} \rho \eta \mu a$), how, that is, one may learn from symptoms which of the two factors of health, food and exercise, is in excess, and to take precautions against the diseases that may spring from such excess. This thesis is developed in the third book (with *Dreams*), while the second book gives the characteristics of various foods and exercises. The first book, after setting forth the subject that the author intends to treat, goes on to discuss the nature of man and of the universe of which man forms a part. This attempt to explain physiological processes by the principles of philosophic physics explains why scholars have found $\pi \epsilon \rho \lambda \delta a t \tau \eta s$ I interesting in spite of its amazing difficulties.

It has been pointed out already that the difficulty is partly intentional, being due to the fashion of imitating oracular responses. But it is also partly caused by the author's carelessness; the details are sometimes blurred because they are not regarded as essential to the main argument. There is always a danger of over-systemisation in explaining ancient philosophy; the parts do not in every case fit exactly into their places, for a philosopher was sometimes inconsistent with himself. It is a great mistake for an interpreter to insist on making all the detail harmonise exactly. The work may be thus analysed.

The author complains of want of comprehensiveness in the work of his predecessors (Chap I).

¹ See especially III. 1 (LXVII); ἀλλὰ γὰρ αἱ διαγνώσιες ἔμοιγε ἐξευρημέναι εἰσὶ τῶν ἐπικραπεόντων ἐν τῷ σώματι, ἤν τε οἱ πόνοι ἐπικραπέωσι τῶν σίτων, ἤν τε τὰ σῖτα τῶν πόνων, καὶ ὡς χρὴ ἐκαστα ἐξακεῖσθαι, προκαταλαμβάγειν τε ὑγείην, ὥστε τὰς νούσους μὴ προσπελάζειν κ.τ.ἔ,

Correct dieting presupposes a knowledge of physiology. Health is due to the correct correspondence

between food and exercise (Chap. II).

All things are composed of two different but complementary elements, fire and water The δύναμις of fire is to cause motion, that of water is to nourish

These elements are continually encroaching one on the other, but neither ever completely masters the other (Chap. III).

These elements are themselves logically capable of

analysis into-

(a) the hot and dry (fire);(b) the cold and the moist (water).

Fire, however, has some moisture from water, and water some dryness from fire. It is the mingling and separating of these elements that are inaccurately termed birth, death, decay and change (Chap. IV)

All nature is in a state of constant flux; there is a perpetual swinging of the pendulum, and a swaying

from one opposite to the other (Chap. V).

Man, both body and soul, consists of fire and water, and there is a give and take in his case also, like "parts" joining like "parts" and rejecting the

unlike (Chap VI).

Diet must contain all the "parts" of man, otherwise there could be no growth. The taking in of nutriment, and the resulting growth and evacuation, are like the up-and-down motions of sawing a log. One implies the other (Chap. VII).

How the elements behave in the processes of generation and growth; there is no real birth and

decay, but only increase and diminution (Chap. VIII-X).

The processes of the arts and crafts are copies of those of the universe and of the nature of man, the apparent opposites are merely different aspects of the same thing (Chap. XI-XXIV).

The soul of man, a blend of fire and water, helps to feed the body, and the body helps to feed the

soul (Chap XXV)

The development of the embryo (Chap. XXVI). Males (inclining to fire) and females (inclining to water) generate offspring that are male or female according to the predominance of the male or female element

- (1) Male from man and male from woman: brilliant men.
- (2) Male from man mastering female from woman: brave men.
- (3) Male from woman mastering female from man hermaphrodites.
- (4) Female from both man and woman: lovely women.
- (5) Female from woman mastering male from man: bold but modest women.
- (6) Female from man mastering male from woman: brazen women.

The generation of twins (Chap. XXX).

Superfetation (Chap. XXXI).

The various constitutions of man due to the character of the water and fire of which the body is composed. The following combinations are considered —

(1) finest fire and rarest water;

strongest fire and densest water,

(3) densest water and finest fire,

(4) moistest fire and densest water;

(5) strongest fire and finest water;

(6) raiest fire and driest water (Chap. XXXII).

The composition of the body at the various ages (Chap. XXXIII).

Sex and the composition of the body (Chap.

XXXIV).

xlii

The intelligence (sensitiveness) of the soul in relation to the blend of fire and water (Chap. XXXV)

What regimen can, or cannot, do to effect a

change in the soul (Chap. XXXVI).

The weakness of the writer's thesis is plain to all. He takes an unproved postulate and builds upon it a detailed theory of health and disease—the very fault attacked by the author of Ancient Medicine. This defect tends to vitiate the very sensible observations in the second and third books dealing with foods, drinks, exercise and regimen generally. Had the writer confined himself to these, and worked out his scheme without any bias due to the supposed effects of fire and water, he would have achieved a more useful result without in the least weakening his boasted εύρημα.

It should be noticed, however, that Dr. Peck maintains that the εδρημα was just this point—the expression of health-factors in their fire-and-water values enables a man accurately to adjust the proportion of food to exercises. But in Chapter II (Book I) and again in Chapters LXVII and LXIX

(Book III) the "discovery" is clearly identified with προδιάγνωσις, how to tell beforehand, by symptoms, whether food or exercise is in excess, and by so doing προκαταλαμβάνειν τὴν δγείην. When the details of the discovery are discussed, in Chapters LXX-LXXXV, fire and water come in only in so far as want of exercise is supplemented by warmth, and want of nourishment by a "moist" diet. The mere equation of exercise with fire and of food with water does not,

and could not, carry the author very far.

But in spite of this inherent fault the theory is worked out most cleverly. The philosophic position is that of an intelligent and progressive eclectic, who combines, instead of merely adding together, the results reached by his predecessors. The perpetual flux of Heracleitus and his harmony through opposition; the four "opposites" of Empedocles; the brilliant theory of change elaborated by Anaxagorasall these are worked up into a system that appears like the creation of a single mind. Recent criticism 1 has shown a close resembance between the account of the soul and certain parts of Plato's Timaeus.2 The latter may be from Pythagorean sources, and it is interesting to note that Chapter VIII, and perhaps other places also, shows strong Pythagorean influence.3 Yet there is no patchwork effect, so skilfully are the parts woven together.

¹ Especially the doctoral thesis of A. L. Peck, not yet published.

³ E.g. the dualism of fire)(water.

² See especially 37 B, C; 71 B-79 B · 81 E-86 A (diseases of the body); 86 B-87 B (diseases of the soul depending on bodily condition); 91 A (the seed) Peck notices also a resemblance between the account of generation and that given in the treatise $\pi \epsilon \rho l$ $\gamma o \nu \bar{\eta} s$.

The writer's theory becomes a little planer if we look upon the universe as the mutual and alternating encroachment upon each other of fire and water. These elements (whether they are regarded as limited in amount is not quite clear) contain the four traditional opposites:—

(a) fire contains the hot, the dry and the moist;

(b) water contains the cold, the moist and the dry Fire advances, sets water in motion and turns it to steam: then it retires and the steam condenses to water. But there are limits to this advance and retirement; the water is never completely "mastered," nor is the fire ever completely quenched. various things of this world, including animals, are all the result of this alternate swaying, and represent, so to say, various stages in a never-ending process. The writer gives a few details, but hastens on to the application of this general theory to living bodies. Both body and soul contain fire and water, but presumably soul is the more "fiery" of the two fire is regarded as the cause of the circulation of food, which enters the body, causes growth, and then is (at least partly) evacuated. Here "give and take" is continually and clearly illustrated. If it were not for the entering in of certain nourishment and the going out of excreta and secreta, the animal would die. Any abnormality, any grit in the machinery, any disproportion between the incomings and the outgoings, results in disease. Life, in fact, is identified with change, and change with biological, organised growth, as distinct from mere quantitative increase or decrease.

So far the picture is fairly clear, but when the writer proceeds to explain growth he becomes xliv

obscure. It is obviously not quantitative increase only, as in Chapter VII growth is said to imply the existence of all the "parts" of the body in the foods that nourish it. What are these parts? Are they the blood, flesh and marrow, etc. of Anaxagoras? so, how do they become fixtures, what differentiates the proportion of fire and water which makes up blood from the same proportion before it is blood? What is it, in fact, that makes blood "breed true," and have a permanent existence as a specific substance? In general terms, what is it that causes specific differences, separating for ever blood from marrow, horse from man, and rose from daisy? No clear answer is given, but in Chapter VIII it seems to be implied that it is all a matter of "attunement." 1 Water and fire, if they attain one attunement, become one thing, if another attunement, another thing. As a modern chemist might say, one attunement of oxygen and hydrogen produces water, another attunement hydrogen peroxide. Exact proportions in favourable conditions produce, not mechanical mixture, but chemical change 2

The name of the author will probably never be known to us. Even in Galen's time there was no manner of agreement among students. Some indeed attributed $\pi \epsilon \rho i \delta u i \tau \eta_5$ to Hippocrates himself; others, however, considered the writer to be Philistion, or

of the pillars of his system

¹ This doctrine of attunement $(\delta\rho\mu\rho\rho\eta)$ was Pythagorean in origin, but was developed by Heracleitus, who made it one

² Dr. Peck thinks that the crucial passage is the first part of Chapter VI, where δλα δλων may refer to the chemical attunements (if I may so call them) that differentiate species from species, and μέρεα μερέων to those that differentiate one "part" of the body from another.

Ariston, or Euryphon, or Phaon, or Philetas. Modern scholars are equally uncertain in their opinions. Littré would attribute it to Hippocrates himself, were it not for the weight of ancient authority against that view. Fredrich assigns it to a "Compilator" who lived at the end of the fifth century B.C. Peck does not assign the treatise to any particular author, but sees close affinities to Philiston, Diocles, Plato and the author of $\pi\epsilon\rho i \gamma o\nu\eta s$. Teichmuller would assign the work to the period between Heracleitus and Anaxagoras, Zeller to the period between 420 and 380 B C.

One may be fairly certain that the date of composition is not far from 400 s.—all the lines of evidence point to that date—but the author cannot be identified with any certainty or even probability. He must, however, have belonged to that school of "health-faddists" of whom Plato 3 speaks in such disparaging terms. Perhaps the work owes to Herodicus of Selymbria "who killed fever-patients by excessive exercise," 4 more than is yet generally conceded 5

See Galen, VI. 473, and XV. 455. In XVIII. A 9 Pherecydes is mentioned as one to whom the work was sometimes ascribed.

² See Hippoli atische Unterswehungen, p. 223: "Der Verfasser hat zweifellos nach Heraclit, nach Anaxagoras gelebt und ist ein—vielleicht etwas jungerer—Zeitgenosse eines Archelaos, Kratylos und Herodikos von Selymbria Das weist auf das Ende des funften Jahrhunderts."

See Republic, 406 B-D.
Epidemics, VI (Littre, V 302)

⁵ But see Fredrich, op. cit, pp. 217-221. I may add that it is somewhat difficult to decide whether the author was a practising physician or not No passages can be quoted that are really conclusive, but the general conclusion suggested by Books II and III is that the author was a "health expert," and not a professional doctor.

One more point remains to be noticed. The great importance attached to regimen in this treatise is characteristic of all that is best in Greek medicine. Upon it the physician relied, both to preserve health and to heal diseases. Drugs, of which he had only a few, and these chiefly purges, were regarded as of secondary importance only. "Live a healthy life," said the Greek doctor, "and you are not likely to fall ill, unless you have an accident or an epidemic occurs If you do fall ill, proper regimen will give you the best chance of recovery" It is not surprising that Regimen has close affinities to other works in the Corpus, notably Ancient Medicine, Regimen in Acute Diseases and Regimen in Health. ever much they may differ in scope and detail, all these works are written under the conviction that medicine is merely a branch of dietetics.

The first book of Regimen has attracted many modern scholars. Bywater included Chapters I—XXIV in his Herachit Ephesii reliquiae. Carl Fredrich has fully discussed the work, in many places reconstructing the text, in his Hippokratische Untersuchungen H Diels has published two interesting papers in Hermes, and a great part of the text appeared in his Herakleitos ion Ephesos Several other less important contributions are mentioned in the article Hippokrates (16) in Pauly-Wissowa But

Oxford, 1877.

all these are superseded by a masterly discussion of the whole of the first book, in its relation to Greek philosophic thought, submitted by Dr. A. L. Peck in 1928 for the degree of Ph.D. This work is not yet published, and I must express my gratitude to Dr. Peck for allowing me to read it at my leisure, and for discussing with me difficult points of interpretation

The chief manuscripts are θ and M, both of which have been specially collated for this edition of the text. There is an old Latin translation, Paris. lat 7027, which may have been made in the sixth century, although the manuscript itself is of the tenth century. A very interesting manuscript, which unfortunately I have been unable to collate, is the manuscript referred to by Littré as K'. It almost certainly gives the right reading in Chapter XXXVI, where both θ and M go astray.

¹ See Diels, *Hupp Forschungen*, 1, p. 137. Readings from this manuscript are occasionally given by Littré.

VIII

REGIMEN II-IV

The last three books of Regimen leave the translator very uneasy. It is not that they are full of mysterious puzzles, as are Regimen I, Precepts and Decorum. These stare one in the face, and cannot be overlooked; but the greater part of Regimen is full of concealed traps, into which even an experienced translator may fall unawares. The Greek is somewhat curious, and a temptation exists to apply the strict rules of criticism and interpretation that are applied to Plato The result is often to force on and Demosthenes the original a meaning that makes indifferent sense. Again, the writer is fond of using common words in a semi-technical sense, difficult to apprehend. after a study of Dr. A. L. Peck's Pseudo-Hippocrates Philosophus one is in great doubt as to the meaning, in Regimen, of δύναμις, περίοδος, ἀπόκρισις, and many other words. Synonyms present an equal difficulty. There may be, for instance, a subtle danger in translating both γυμνάσια and πόνοι by "exercises"; but it is just as dangerous to discriminate between them by rendering the former "gymnastics," while to suggest in an English translation the right amount of effort or fatigue implied in $\pi \acute{o} \nu o s$ is past the ability xlix

of the present translator, at any rate. Even a casual reader will be worried by the author's use of $\pi\rho\sigma\sigma\dot{\alpha}\gamma\omega$. one of his favourite words. Does it always imply, as Littré and Ermerins indicate by their translations, a gradual increase? Such a progression is certainly signified by the phrase έκ προσαγωγής, but I have felt most disquieting doubts when so rendering the simple verb without the addition of κατὰ μικρὸν or έξ ολίγου. A similar uncertainty perplexes the mind when our best manuscript presents a reading at variance with the received canons of Greek grammar or of Greek idiom. In the case of a second-rate writer, not over-careful in style, which of the two is to be preferred: (1) a slipshod expression in a very faithful manuscript or (2) a more elegant and accurate expression in manuscripts presenting every appearance of having been emended by zealous editors or scribes? Each case has to be decided on its merits, and into every decision enters a disquieting amount of guess-work

It is pleasant to turn from these troublesome, if minor, details to the general purpose of the work, which is a justification and exposition of προδιάγνωσις, "the nipping of a disease in the bud." Plato, indeed, attacks with justice the hypochondriacism that turns life into a lingering death, but nothing but praise is due to the man who first conceived the idea of anticipating disease, of meeting it half-way, and of attempting to check it before it can get a fatal hold. The author, in fact, was the father of preventive medicine; ἀλλὰ χρὴ προθυμεῖσθαι is his oft-repeated slogan. His ment is all the greater when we remember that the most famous Hippocratic works know nothing of προδιάγνωσις but only of

πρόγνωσις. They take a fatalistic view, and assume that every disease must take its course The author of Regimen says: "No, the course can be cut short, and the severity of the disease mitigated." In this view there is a large element of truth. By taking care in good time many a patient suffering from a cold has prevented a fatal bronchitis or pneumonia; many a "weak-chested" person has by similar precautions kept away consumption. On the other hand, some diseases must run their course with but slight, if any, modification Typhoid and measles, for example, can never be completely aborted when once they have been definitely introduced into the human system. It is more than doubtful whether the author of Regimen, or any Greek of the classical period, knew the ordinary zymotic diseases, but had he done so he could never have understood (nobody could understand before Pasteur) why the εξρημα was inapplicable to at least one large class of maladies.

In fact προδιάγνωσις, while marking an advance, does not go far enough. To abort a disease is good; to prevent it altogether is far better. The Greek had experience enough to outline a course of regimen designed to preserve in ordinary circumstances a fan standard of health, but he had not the experience required to prevent an outbreak of epidemic disease.

It would be beyond the scope of the present edition to discuss in detail the qualities assigned in the second book to foods, drinks, exercises and so forth, or to appreciate the value of the prescriptions in the third book for undoing the mischief caused by excess of food or by excess of exercise. A lengthy volume would be required to do even moderate justice to these questions, and even a full discussion

could lead only to the unsatisfactory conclusion that the author has twisted facts wholesale to make them square with his theory. The same remarks reply to the fourth book, sometimes called *Dieams*. One or two details, however, call for a passing notice because of their intrinsic interest.

Dreams contains the first occurrence in classical literature—at least I can discover no earlier one—of a supposed connection between the heavenly bodies and the fates of individual human lives. The connection, indeed, is not clearly defined; we are not told that these bodies actually interfere with the course of events. But it is definitely stated that to dream about them, at any rate to see certain dreams in which they behave in certain ways, means health or a risk of illness. To a modern it is indeed strange that dreams of this sort occupy so large a portion of the book. But a modern, unless he be an astronomer, knows or cares little about the stars. Clocks and watches, the compass, calendars and almanacs have made star-lore quite unnecessary for most people. But the ancients were forced, by the very exigencies of existence, to contemplate the heavens carefully and continuously. The sun, moon and stars entered largely into their conscious and subconscious life, and we need not be surprised that celestial phenomena figured largely in their dreams.

Regimen is the only book in the Hippocratic Corpus that lays any emphasis on prayer to the gods. There is, indeed, a passing reference in Prognostic, Chapter I, deleted by modern editors, to the possibility of there being $\tau\iota$ $\theta\epsilon\hat{\iota}o\nu$ in certain cases of illness, while Chapter VI of Decorum appears to regard the gods as the cause of cures in medicine and

surgery, the doctor being only the means. But to the author of Regimen prayer seems to be an integral

part of many prescriptions 1

A mention should be made of the importance attached to walking as a means of attaining health or of preserving it. Even after violent exercise a walk is prescribed in many cases, possibly or perhaps probably to avoid stiffness and to allow the body to cool slowly. Early-morning walks, and walks after dinner, are recommended constantly. It is unnecessary to point out how wise this advice is, and how well it agrees with the best modern methods of training.

There are many features of Regimen that strike us as strangely modern. Unconsciously we are in the habit of putting massage among newly-discovered methods of therapeutics. Yet $\tau\rho\hat{\iota}\psi$ in the fifth century before Christ was both popular and long-established. What can $\phi\omega\nu\hat{\eta}$ is $\pi\acute{o}\nu\iota$ represent except breathing exercises and the like? And even modern hydropathy must confess that the Russian bath has a very near relative in the $\pi\nu\rho\dot{\iota}a$. The $\dot{a}\nu a\kappa o\dot{\nu}\dot{\phi}\iota\sigma\mu a$ was certainly not "relief" (new Liddell and Scott), but a raising of the body from the prone position by using the arms, a well-known form of exercise.

I have not tried to distinguish between $\sigma\iota\tau\dot{\iota}a$ and $\sigma\hat{\iota}\tau a$; indeed M regularly prefers the former word and θ the latter. While translating both by "food" I am aware that farinaceous foods are usually meant. Similarly I have rendered $\delta\phi a$ by "meats," although

¹ See e.g. Chapters LXXXVIII and XC. It is interesting to note that a reader (possibly a reviser or even the original scribe) of the MS. θ tried to erase the names of heathen dettes.

fish is included under the term. Any attempt to be pedantically accurate, besides being awkward, results in more confusion being introduced than that which is removed.

One or two technical terms of the gymnasium present special difficulties. Few expressions in Regimen are more common than $\tau\rho\delta\chi$ os (or $\tau\rho\sigma\chi\delta$ s, as it is spelt in our manuscripts) and $\kappa\alpha\mu\pi\tau\sigma$ i $\delta\rho\delta\mu\sigma$ oi. Yet our dictionaries and books of reference either neglect them or describe them in a most uncertain way. Sometimes $\tau\rho\delta\chi$ os is assumed to be a mere equivalent of $\delta\rho\delta\mu$ os, a view perhaps derived from such passages as Euripides Medea 46 and Hippolytus 1133; the old translators, followed by Littré and Ermerins, make out the $\tau\rho\delta\chi$ os to be a round track.

The $\kappa a \mu \pi \tau \delta_{\rm S}$ $\delta \rho \delta \mu \sigma_{\rm S}$ is even more perplexing. It is obviously a "bent" track, but what was the nature of the bend? Was it a zig-zag? Or was it a turning, as the name suggests, round the $\kappa a \mu \pi \tau \eta \rho$ to the starting-point? Was the $\kappa a \mu \pi \tau \delta_{\rm S}$ $\delta \rho \delta \mu \sigma_{\rm S}$, in other words, the generic word for a type of track of which the $\delta (a \nu \lambda \sigma_{\rm S})$ was a specific instance? Whichever answer we see fit to give, the puzzle remains that the Greeks placed $\kappa a \mu \pi \tau \sigma_{\rm S}$ $\delta \rho \delta \mu \sigma_{\rm S}$ in one class and the straight course in another, although why a straight quarter of a mile should differ essentially from two hundred and twenty yards there and then back is indeed a curious enigma.

Regimen contains many passages in which occurs the same difficulty as that which is to be found so often in Epidemics I and III. Do the plurals of $\pi o \lambda \dot{v}_{S}$ and $\dot{o} \lambda \dot{v}_{S} \dot{v}_{S}$ refer to size or frequency? Does $\pi \epsilon \rho i \pi a \tau o \iota \pi o \lambda \lambda o \iota$ mean "many walks" or "long walks"? The same answer, it seems to me, should

be given as I gave in the General Introduction to Vol. I, p. lxi. In the great majority of cases size, not frequency, is referred to, and, unless the general sense is against this interpretation, $\pi o \lambda \lambda o \hat{i}$ and $\delta \lambda i \gamma o i$ should be translated by "long" and "short."

THE MANUSCRIPTS AND DIALECT OF THE HIPPOCRATIC COLLECTION

A CAREFUL reader will observe that whereas I have not materially changed my opinion of the relative value of our manuscripts—A, θ, C' are our primary authorities—I am somewhat dubious about the rules for spelling given by Kuhlwein in the *Prolegomena* to the Teubner edition of Hippocrates, Vol. I, pp. lxvi-cxxvii. In my first volume of the Loeb series I accepted without question the following principles for determining the orthography of the Hippocratic *Corpus*.—

- (1) That the pronominal forms in δκ- should be avoided:
- (2) ε + ε contract, but not ε + ο;

(3) γίνεσθαι not γίγνεσθαι,

(4) various rules for ν ἐφελκυστικόν;

(5) the pseudo-ionisms αὐτέφ, etc., are to be avoided;

(6) σύν not ξύν.

A prolonged study of the manuscripts has made me feel very doubtful about some of these principles, and my doubts appear to be shared by I L Heiberg, who edited the first volume of Hippocrates in the Corpus Medicorum Graecorum. Heiberg indeed does

not follow strictly any of these rules; my own view is that two are correct and the others more or less uncertain. The pseudo-ionisms have very little authority, nor has γίγνεσθαι. The form ξύν is very doubtful, and I have printed in every case σύν. without, however, being confident that no Hippocratic writer ever wrote ξύν. The case is much the same with $\epsilon + \epsilon$, which I always contract, and with $\epsilon + o$, which I rarely contract to ev For the pronominal forms I follow usually the best MS authority in each case. There is a tendency for our earliest manuscripts not to use the δκ- forms, but it is only a tendency, and ought not, I think, to be narrowed to a rigid As for ν ἐφελκυστικόν, Kuhlewein's "rules" are so complicated that they can scarcely have been followed by the not over-careful writers whose works are contained in the Corpus

I believe, in short, that those scholars are mistaken who attribute strict uniformity to the authors, and indiscriminate carelessness to the scribes and copyists. It is very hard to be convinced that all the writers, of various degrees of ability, and living at various times and (apparently) at various places, were perfectly at home in a dialect obviously artificial, kept up simply out of respect for tradition. Surely a more probable supposition is that our manuscripts exhibit a slight but varying carelessness on the part of the writers, made even more confusing by greater carelessness on the part of many generations of scribes. In brief, we cannot determine exactly the Ionic of the Hippocratic collection; the most we can do is to observe tendencies

The conviction that I expressed in the preceding volumes, that at some period or periods the manu-

scripts were copied with but slight regard for verbal accuracy, has grown stronger with prolonged study. In my critical notes I have quoted in full the readings of our chief manuscripts in places which put, I think, my contention beyond all reasonable doubt.

DESCRIPTION OF PLANE TREE

(Frontispiece)

This ancient plane tree stands in the agora of the chief town of Cos, and it is connected in local tradition with Hippocrates, who is said by the Coans to have taught under its shade. The branches spread over the whole market-place, being supported by marble columns from the site of the temple of Asclepios: the bark has now grown over them so that they seem to be a natural part of the tree. Hermocrates (4th century B.C.) mentions a plane tree as a landmark of Cos.

οἶσθα δὲ καὶ τὸν ἀοιδόν, ὃν Εὐρυπύλου πολιῆται Κῷοι χάλκειον θῆκαν ὑπὸ πλατάνφ.

Alexander the Great must have stood beneath this tree, and Paul of Tarsus, to name but two of the host of historical persons who have passed that way. There is no reason to doubt that it is more than 2500 years old.

Sir George Birdwood said as much, in a letter to *The Times* of August 16, 1906, where he gives a long list of ancient trees, many of them older than this.

NATURE OF MAN

I. HE who is accustomed to hear speakers discuss the nature of man beyond its relations to medicine will not find the present account of any interest. For I do not say at all that a man is air, or fire, or water, or earth, or anything else that is not an obvious constituent of a man; such accounts I leave to those that care to give them. Those, however, who give them have not in my opinion correct knowledge. For while adopting the same idea they do not give the same account Though they add the same appendix to their idea—saving that "what is" is a unity, and that this is both unity and the all-yet they are not agreed as to its name One of them asserts that this one and the all is air, another calls it fire, another, water, and another, earth; while each appends to his own account evidence and proofs that amount to nothing. The fact that, while adopting the same idea, they do not give the same account, shows that their knowledge

too is at fault. The best way to realise this is to be present at their debates. Given the same debaters and the same audience, the same man never wins in the discussion three times in succession, but now one is victor, now another, now he who happens to have the most glib tongue in the face of the crowd. Yet it is right that a man who claims correct knowledge about the facts should maintain his own argument victorious always, if his knowledge be knowledge of reality and if he set it forth correctly. But m my opinion such men by their lack of understanding overthrow themselves in the words of their very discussions, and establish the theory of Melissus 1

Il. Now about these men I have said enough, and I will turn to physicians. Some of them say that a man is blood, others that he is bile, a few that he is phlegm. Physicians, like the metaphysicians, all add the same appendix. For they say that a man is a unity, giving it the name that severally they

¹ A philosopher of the Eleatic School, who appears to have flourished about 440 B.C. He maintained that Being is eternal, infinite, invariable and a unity. The disputants referred to in the text "established the theory of Melissus" by showing how many difficulties are involved in equating Being with any one of the four elements

NATURE OF MAN, n.

wish to give it; this changes its form and its power.1 being constrained by the hot and the cold, and becomes sweet, bitter, white, black and so on. But in my opinion these views also are incorrect. Most physicians then maintain views like these, if not identical with them; but I hold that if man were a unity he would never feel pain, as there would be nothing from which a unity could suffer pain. And even if he were to suffer, the cure too would have to be one. But as a matter of fact cures are many. For in the body are many constituents, which, by heating, by cooling, by drying or by wetting one another contrary to nature, engender diseases; so that both the forms 2 of diseases are many and the healing of them is manifold. But I require of him who asserts that man is blood and nothing else, to point out a man when he does not change his form or assume every quality, and to point out a time, a season of the year or a season of human life, in which obviously blood is the only constituent of man. For it is only natural that there should be

² A. E. Taylor (Varia Socratica, p. 229) thinks that this phrase must mean "there are many substances in which disease arises," i.e. disease is not necessarily "diseased state

of the blood "

¹ By "power" (δύναμις) is probably meant the sum total of a thing's characteristics or qualities. See Vol. I. pp. 338, 339. Recent research, however, makes it likely that in the medical writers δύναμις is often used with iδϵη or φύσις to form a tautological phrase meaning "real essence."

¹⁰ A has αἷμα μόνον εἶναι τὸν ἄνθρωπον καὶ ἄλλο μηδὲν εἶναι δεικυύειν αὐτὸν μήτε ἀλάσσοντα τὴν ἰδέην μήτε. Ermerins reads αὐτὸ (sc. τὸ αἷμα) μὴ μεταλλάσσειν. Villaret has μήτε μεταλλάσσοντα . . . μήτε γινόμενον, probably rightly.

ΠΕΡΙ ΦΥΣΙΟΣ ΑΝΘΡΩΠΟΥ

ἐν ἢ φαίνεται αὐτὸ ἐφ' ἑαυτοῦ ἐνεόν.¹ τὰ αὐτὰ δὲ λέγω καὶ περὶ τοῦ φάσκοντος φλέγμα² εἶναι τὸν ἄνθρωπον, καὶ περὶ τοῦ χολὴν φάσκοντος εἶναι. ἐγὼ μὲν γὰρ ἀποδείξω, ἃ ἄν φήσω τὸν ἄνθρωπον εἶναι, καὶ κατὰ τὸν³ νόμον καὶ κατὰ τὴν³ φύσιν, ἀεὶ τὰ αὐτὰ ἐόντα ὁμοίως,⁴ καὶ νέου ἐόντος καὶ γέροντος, καὶ τῆς ὅρης ψυχρῆς ἐούσης καὶ θερμῆς, καὶ τεκμήρια παρέξω, καὶ ἀνάγκας ἀποφανῶ, δὶ ας ἔκαστον αὕξεταί τε καὶ φθίνει 37 ἐν τῶ σώματι.

ΙΙΙ. Πρώτον μεν οὖν ἀνάγκη τὴν γένεσιν γίνεσθαι μὴ ἀφ' ενός πως γὰρ ὰν εν γ' εόν τι γεννήσειεν, εἰ μή τινι μιχθείη; ἔπειτα οὐδ', ἐὰν τὰ μὴ ὁμόφυλα ἐόντα μίσγηται καὶ τὴν αὐτὴν ἔχοντα δύναμιν, γεννῷ, οὐδ' ὰν ταῦτα ἡμῦν συντελέοιτο. καὶ πάλιν, εἰ μὴ τὸ θερμὸν τῷ ψυχρῷ καὶ τὸ ξηρὸν τῷ ὑγρῷ μετρίως πρὸς

¹ εἰκὸς γὰρ ἔς τινα (corrected to ἔστιν τινὰ) ὅρην ἐν ἢ φαίνηται αὐτὰ ἐν ἑαυτῶ ἐὸν ὁ ἐστιν Α (with εἰκὸς γὰρ εἶναι ὅρην in margin) εἰκὸς γὰρ εἶναι μίαν τινὰ ὅρην ἐν ἢι φαίνεται αὐτὸ ἐν ἑωντῶι ἕνεόν, followed by ὅ τι ἐστὶν erased, Μ, which has μίαν also written over an erasure. V agrees with Μ, except that it has ἐὸν for ἕνεὸν without ὅτι ἐστίν Littré with Galen would read μίαν γέ τινα and with Foes ἐφ' ἑωντοῦ. Villaret reads ἐφ' ἑωντοῦ ἐόν, ὅ ἐστιν.

² After φλέγμα A has μόνον written underneath the line.
³ Villaret brackets τὸν and τήν. So Van der Linden and Fredrich

⁴ τὰ αὐτὰ ὅμοια ἐόντα Α εὶ ταῦτα ἐόντα ὅμοια MV. The text is Littré's, who follows certain later MSS. in reading åεὶ and ὁμοίως.

5 εἴ ποῦ δ' ἐὰν (with 8 over εἴ) Α ἔπειτα οὐδὲ ὰν MV:

έπειτα οὐδ' ἐὰν Littré . ἐπεὶ οὐδ' ἐὰν Wilamowitz

6 A has γενναι with αν written over αι It also omits ταῦτα, for which Galen reads τὰ αὐτά. I give Littré's text, but I suggest that the true reading is ὅπου δ' ἀν μὴ ὁμόφυλα

NATURE OF MAN, II.-III.

one season in which blood-in-itself appears as the sole constituent ¹ My remarks apply also to him who says that man is only phlegm, and to him who says that man is bile. I for my part will prove that what I declare to be the constituents of a man are, according to both convention and nature, ² always alike the same; it makes no difference whether the man be young or old, or whether the season be cold or hot. I will also bring evidence, and set forth the necessary causes why each constituent grows or decreases in the body.

III. Now in the first place generation cannot take place from a unity. How could a unity generate, without copulating. Again, there is no generation unless the copulating partners be of the same kind, and possess the same qualities; nor would there be any offspring. Moreover, generation will not take place if the combination of hot with cold and of dry

1 Probably Villaret's reading is correct, and we should translate, "in which the real element appears in its proper form"

² This strange phrase apparently means "in name as well as in essence," or rather "as much in essence as they are in name." People agree in giving certain names to the constituents of the human body. These names correspond to real entities. Galen explains κατὰ νόμον to mean "according to received opinion"

3 The translation of the emendation which I propose will be · "And when the copulating partners are not of the same kind, and do not possess the same generating qualities, we

shall get no result "

έδντα μίσγηται και την αὐτην έχοντα δύναμιν γεννᾶν, οὐδὲν ὰν ήμῖν συντελέοιτο. Ermeims would read ἔπειτα δέ, ἐὰν . . . δύναμιν, γέννα οὐδ' ὰν οὕτω ἡμῖν ξυντελέοιτο. Villaret has εἶτ' οὐδ' ἐὰν . γέννα οὐδ' ὰν μία συντελέοιτο.

NATURE OF MAN, III.-IV.

with moist be not tempered and equal-should the one constituent be much in excess of the other, and the stronger be much stronger than the weaker. Wherefore how is it likely for a thing to be generated from one, when generation does not take place from more than one unless they chance to be mutually well-tempered? Therefore, since such is the nature both of all other things and of man, man of necessity is not one, but each of the components contributing to generation has in the body the power it con-Again, each component must return to its own nature when the body of a man dies, moist to most, dry to dry, hot to hot and cold to cold. Such too is the nature of animals, and of all other things All things are born in a like way, and all things die in a like way. For the nature of them is composed of all those things I have mentioned above, and each thing, according to what has been said, ends in that from which it was composed. that too is whither it departs.

IV. The body of man has in itself blood, phlegm, yellow bile and black bile; these make up the nature of his body, and through these he feels pain or enjoys health. Now he enjoys the most perfect health when these elements are duly proportioned to one another in respect of compounding, power and bulk, and when they are perfectly mingled Pain is

⁵ ἀποφανεῖναί οἱ A (Littré says ἀποφανῆναί οἱ out of ἀποφανεῖν αἰεί, but the rotograph only shows that εἰ is

NATURE OF MAN, 1v.-v.

felt when one of these elements is in defect or excess, or is isolated in the body without being compounded with all the others. For when an element is isolated and stands by itself, not only must the place which it left become diseased, but the place where it stands in a flood must, because of the excess, cause pain and distress. In fact when more of an element flows out of the body than is necessary to get rid of superfluity, the emptying causes pain. If, on the other hand, it be to an inward part that there takes place the emptying, the shifting and the separation from other elements, the man certainly must, according to what has been said, suffer from a double pain, one in the place left, and another in the place flooded

V. Now I promised to show that what are according to me the constituents of man remain always the same, according to both convention and nature. These constituents are, I hold, blood, phlegm, yellow bile and black bile. First I assert that the names of these according to convention are separated, and that none of them has the same name as the others; furthermore, that according to nature their essential forms are separated, phlegm being quite unlike blood, blood being quite unlike bile, bile being quite unlike phlegm. How could they be like one another, when their colours appear not alike to the sight nor does their touch seem alike to the hand? For they are

NATURE OF MAN, v.-vi.

not equally warm, nor cold, nor dry, nor moist. Since then they are so different from one another in essential form and in power, they cannot be one, if fire and water are not one. From the following evidence you may know that these elements are not all one, but that each of them has its own power and its own nature If you were to give a man a medicine which withdraws phlegm, he will vomit vou phlegm: if you give him one which withdraws bile, he will vomit you bile. Similarly too black bile is purged away if you give a medicine which withdraws black bile. And if you wound a man's body so as to cause a wound, blood will flow from him. And you will find all these things happen on any day and on any night, both in winter and in summer, so long as the man can draw breath in and then breathe it out again, or until he is deprived of one of the elements congenital with him. Congenital with him (how should they not be so?) are the elements already mentioned. First, so long as a man lives he manifestly has all these elements always in him; then he is born out of a human being having all these elements, and is nursed in a human being having them all. I mean those elements I have mentioned with proofs.

VI Those who assert that man is composed of one element seem to me to have been influenced by the following line of thought. They see those who drink drugs and die through excessive purgings vomiting,

NATURE OF MAN, VI.

in some cases bile, in others phlegm; then they think that the man is composed of that one thing from the purging of which they saw him die. Those too who say that man is composed of blood use the same line of thought They see men who are cut1 bleeding from the body, and so they think that blood composes the soul of a man. Such is the evidence they all use in their discussions. Yet first, nobody yet in excessive purgings has vomited bile alone when he died. But when a man has drunk a drug which withdraws bile, he first vomits bile, then phlegm also. Afterwards under stress men vomit after these black bile, and finally they vomit also pure blood. The same experiences happen to those who drink drugs which withdraw phlegm. First they vomit phlegm, then yellow bile, then black, and finally pure blood, whereon they die. For when the drug enters the body, it first withdraws that constituent of the body which is most akin to itself, and then it draws and purges the other constituents. For just as things that are sown and grow in the earth, when they enter it, draw each that constituent of the earth which is nearest akin to it—these are the acid, the bitter, the sweet, the salt and so onfirst the plant draws to itself mostly that element which is most akin to it, and then it draws the other constituents also Such too is the action of drugs in the body. Those that withdraw bile first evacuate absolutely pure bile, then bile that is mixed.

Literally, "have their throat cut."

NATURE OF MAN, vi.-vii.

Those that withdraw phlegm first withdraw absolutely pure phlegm, and then phlegm that is mixed. And when men are cut, the blood that flows is at first very hot and very red, and then it flows with more

phlegm and bile mixed with it.

VII. Phlegm increases in a man in winter; for phlegm, being the coldest constituent of the body, is closest akin to winter. A proof that phlegm is very cold is that if you touch phlegm, bile and blood, you will find phlegm the coldest. And yet it is the most viscid, and after black bile requires most force for its evacuation. But things that are moved by force become hotter under the stress of the force. Yet in spite of all this, phlegm shows itself the coldest element by reason of its own nature. That winter fills the body with phlegm you can learn from the following evidence. It is in winter that the sputum and nasal discharge of men is fullest of phlegm; at this season mostly swellings become white, and diseases generally phlegmatic. And in spring too phlegm still remains strong in the body, while the blood increases. For the cold relaxes, and the rains come on, while the blood accordingly increases

¹ τὰ αἵματα Α αἵμα MV.

NATURE OF MAN, vii.

through the showers and the hot days. For these conditions of the year are most akin to the nature of blood, spring being moist and warm. You can learn the truth from the following facts. It is chiefly in spring and summer that men are attacked by dysenteries, and by hemorrhage from the nose, and they are then hottest and red And in summer blood is still strong, and bile rises in the body and extends until autumn. In autumn blood becomes small in quantity, as autumn is opposed to its nature, while bile prevails in the body during the summer season and during autumn. You may learn this truth from the following facts. During this season men vomit bile without an emetic, and when they take purges the discharges are most bilious. It is plain too from fevers and from the complexions of men. summer phlegm is at its weakest. For the season is opposed to its nature, being dry and warm. But in autumn blood becomes least in man, for autumn is dry and begins from this point to chill him black bile which in autumn is greatest and strongest When winter comes on, bile being chilled becomes small in quantity, and phlegm increases again because of the abundance of ram and the length of the nights. All these elements then are always comprised in the body of a man, but as the year goes round they become now greater and now less, each in turn and

² μείνειεν Α· μενηιεν τουτέων M: μενεῖ τουτέων V. Holkhamensis 282 reads μενεῖ, but according to Littré C has μένει,

NATURE OF MAN, vii.-viii.

according to its nature. For just as every year participates in every element, the hot, the cold, the dry and the moist-none in fact of these elements would last for a moment without all the things that exist in this universe, but if one were to fail all would disappear, for by reason of the same necessity all things are constructed and nourished by one another-even so, if any of these congenital elements were to fail, the man could not live. In the year sometimes the winter is most powerful, sometimes the spring, sometimes the summer and sometimes the autumn. So too in man sometimes phlegm is powerful, sometimes blood, sometimes bile, first vellow, and then what is called black bile. The clearest proof is that if you will give the same man to drink the same drug four times in the year, he will vomit, you will find, the most phlegmatic matter in the winter, the moistest in the spring, the most bilious in the summer, and the blackest in the autumn.

VIII. Now, as these things are so, such diseases as increase in the winter ought to cease in the summer, and such as increase in the summer ought to cease in the winter, with the exception of those which do not depart in a period of days—the period of days I shall speak of afterwards. When diseases arise in spring, expect their departure in autumn. Such diseases as arise in autumn must have their

departure in spring. Whenever a disease passes these limits, you may know that it will last a year. The physician too must treat diseases with the conviction that each of them is powerful in the body according to the season which is most conformable to it.

IX. Furthermore, one must know that diseases due to repletion are cured by evacuation, and those due to evacuation are cured by repletion; those due to exercise are cured by rest, and those due to idleness are cured by exercise. To know the whole matter, the physician must set himself against the established character of diseases, of constitutions, of seasons and of ages; he must relax what is tense and make tense what is relaxed. For in this way the diseased part would rest most, and this, in my opinion, constitutes treatment. Diseases 1 arise, in some cases from regimen, in other cases from the air by the inspiration of which we live. The distinction between the two should be made in the following way Whenever many men are attacked by one disease at the same time, the cause should be assigned to that which is most common, and which we all use most. This it is which we breathe in. For it is clear that the regimen of each of us is not the cause, since the disease attacks all in turn, both younger and older, men as much as women, those who drink wine as much as

teetotallers, those who eat barley cake as much as those who live on bread, those who take much exercise as well as those who take little. regimen could not be the cause, when no matter what regimen they have followed all men are attacked by the same disease. But when diseases of all sorts occur at one and the same time, it is clear that in each case the particular regimen is the cause, and that the treatment carried out should be that opposed to the cause of the disease, as has been set forth by me elsewhere also, and should be by change of regimen. For it is clear that, of the regimen the patient is wont to use, either all, or the greater part, or some one part, is not suited to him This one should learn and change, and carry out treatment only after examination of the patient's constitution, age, physique, the season of the year and the fashion of the disease, sometimes taking away and sometimes adding, as I have already said, and so making changes in drugging or in regimen to suit the several conditions of age, season, physique and disease. But when an epidemic of one disease is prevalent, it is plain that the cause is not regimen but what we breathe, and that this is charged with some unhealthy exhalation During this period these

are the recommendations that should be made to patients. They should not change their regimen, as it is not the cause of their disease, but rather take care that their body be as thin and as weak as possible, by diminishing their usual food and drink gradually. For if the change of regimen be sudden, there is a risk that from the change too some disturbance will take place in the body, but regimen should be used in this way when it manifestly does no harm to a patient. Then care should be taken that inspiration be of the lightest, and also from a source as far removed as possible, the place should be moved as far as possible from that in which the disease is epidemic, and the body should be reduced, for such reduction will minimise the need of deep and frequent breathing.

X. Those diseases are most dangerous which arise in the strongest 1 part of the body. For should the disease remain where it began, the whole body, as the strongest limb in it feels pain, must be in pain; while should the disease move from a stronger part to one of the weaker parts, the riddance of it proves difficult. But when diseases move from weaker parts to stronger parts, it is easier to get rid of

¹ I follow Galen and Littré in taking "the strongest parts" to be those which are naturally, ic constitutionally, the most healthy members of the body.

them, as the strength of the stronger part will easily consume the humours that flow into them.

XI. The thickest of the veins have the following nature. There are four pairs in the body. One pair extends from behind the head through the neck, and on either side of the spine externally reaches to the loins and legs, and then stretches through the shanks to the outside of the ankles and to the feet So bleeding for pains in the back and loins should be made on the outside, behind the knee or at the ankle. The other pair of veins extend from the head by the ears through the neck, and are called jugular veins. They stretch right and left by the side of the spine internally along the loins to the testicles and thighs, then on the inside through the hollow of the knee, and finally through the shanks to the ankles on the inside and to the feet. Accordingly, to counteract pains in the loins and testicles, bleeding should be performed in the hollow of the knee and in the ankles on the inner side. The third pair of veins passes from the temples through the neck under the shoulder-blades, then they meet in the lungs and reach, the one on the right the left side, and the one on the left the right. The right one reaches from the lungs under the breast both to the spleen and to the kidneys, and the left one to the right from the lungs under

the breast both to the liver and to the kidneys, both of them ending at the anus. The fourth pair begin at the front of the head and eyes, under the neck and collar-bones, passing on the upper part of the arms to the elbows, then through the forearms to the wrists and fingers, then back from the fingers they go through the ball of the hand and the forearm upwards to the elbow, and through the upper arm on the under side to the armpit, and from the ribs above one reaches to the spleen and the other to the liver, and finally both pass over the belly to Such is the arrangement of the the privy parts thick yeins From the belly too extend over the body very many veins of all sorts, by which nourishment comes to the body. Veins too lead from the thick veins to the belly and to the rest of the body both from the outside and from the inside; they communicate with one another, the inside ones outside and the outside ones inside. Bleeding then should be practised according to these principles. The habit should be cultivated of cutting as far as possible from the places where the pains are wont to occur and the blood to collect. In this way the change will be least sudden and violent, and you will change the habit so that the blood no longer collects in the same place.

NATURE OF MAN, x11.

XII. Such as expectorate much pus without fever, or have a thick sediment of pus in the urine without pain, or whose stools remain stained with blood. as in dysentery, during a long period, being thirty-five years or older, all these are ill from the same cause, For these patients must have been in their youth hardworking, diligent and industrious; afterwards when delivered from their labours they must have put on soft flesh very different from their former flesh, and there must be a wide difference between the previous condition and the hypertrophied condition of their body, so that there is no longer harmony. Accordingly when a disease seizes men in such a condition, at first they escape, but after the disease the body in time wastes and serous matter flows through the veins wherever it finds the broadest passage. Now if the flux be to the lower bowel, the stools become very like the matter shut up in the body, because as the passage slopes downwards the matter cannot remain long in the intestine. When the flux is to the chest the patients suffer suppuration, because since the purging is along an upward passage and abides a long time in the chest it rots and turns to pus. When the matter empties itself into the bladder, owing to the warmth of the place the matter becomes hot and white, and separates itself

NATURE OF MAN, x11.-x111.

The finest part becomes seum on the top. while the thickest sinks to the bottom and is called pus. Stones too form in children because of the heat of this place and of the whole body, but in men stones do not form because of the coldness of the body. For you must know that a man is warmest on the first day of his existence and coldest on the last. For it must be that the body is hot which grows and progresses with force; but when the body begins to decay with an easy decline it grows cooler. It is on account of this that a man, growing most on his first day, is proportionally hotter then; on his last day, decaying most, he is proportionally cooler. Most patients in the condition described above recover their health spontaneously forty-five days from the day on which they began to waste. Such of them as exceed this period, should no other illness occur, recover spontaneously in a year.

XIII. Diseases which arise soon after their origin, and whose cause is clearly known, are those the history of which can be foretold with the greatest certainty. The patient himself must bring about a cure by combating the cause of the disease, for in this way will be removed that which caused the disease in the body.

NATURE OF MAN, xiv.-xv.

XIV. Patients whose urine contains a deposit of sand or chalk suffer at first from tumours near the thick vein, with suppuration; then, since the tumours do not break quickly, from the pus there grow out pieces of chalk, which are pressed outside through the vein into the bladder with the urine. Those whose urine is merely blood-stained have suffered in the veins. When the urine is thick, and there are passed with it small pieces of flesh like hair, you must know that these symptoms result from the kidneys and arthritic complaints. When the urine is clear, but from time to time as it were bran appears in it, the patients suffer from psoriasis of the bladder.

XV. Most fevers come from bile. There are four sorts of them, apart from those that arise in distinctly separate pains. Their names are the continued, the quotidian, the tertian and the quartan. Now what is called the continued fever comes from the most abundant and the purest bile, and its crises occur after the shortest interval. For since the body has no time to cool it wastes away rapidly, being warmed by the great heat. The quotidian next to the continued comes from the most abundant bile, and ceases quicker than any other, though it is longer than the continued, proportionately to the lesser quantity of bile from which it comes; moreover the body has a breathing space, whereas in the continued there is

¹ That is, apart from fevers which accompany certain specific diseases and various wounds The four kinds of fevers are those now recognised as malarial.

NATURE OF MAN, xv.

no breathing space at all. The tertian is longer than the quotidian and is the result of less bile. The longer the breathing space enjoyed by the body in the case of the tertian than in the case of the quotidian, the longer this fever is than the quotidian. The quartans are in general similar, but they are more protracted than the tertians in so far as their portion is less of the bile that causes heat, while the intervals are greater in which the body cools. It is from black bile that this excessive obstinacy arises. For black bile is the most viscous of the humours in the body, and that which sticks fast the longest. Hereby you will know that quartan fevers participate in the atrabilious element, because it is mostly in autumn that men are attacked by quartans, and between the ages of twenty-five and forty-five.1 This age is that which of all ages is most under the mastery of black bile, just as autumn is the season of all seasons which is most under its mastery. Such as are attacked by a quartan fever outside this period and this age you may be sure will not suffer from a long fever, unless the patient be the victim of another malady as well.

REGIMEN IN HEALTH

I THE layman 1 ought to order his regimen in the following way. In winter eat as much as possible and drink as little as possible; drink should be wine as undiluted as possible, and food should be bread, with all meats roasted; during this season take as few vegetables as possible, for so will the body be most dry and hot. When spring comes, increase drink and make it very diluted, taking a little at a time; use softer foods and less in quantity; substitute for bread barley-cake; on the same principle diminish meats, taking them all boiled instead of roasted, and eating when spring comes a few vegetables, in order that a man may be prepared for summer by taking all foods soft, meats boiled, and vegetables raw or boiled. Drinks should be as diluted and as copious as possible, the change to be slight, gradual and not sudden. In summer the barley-cake to be soft, the drink diluted and copious, and the meats in all cases boiled. For one must use these, when it is

5 Here V has τρέφεσθαι.

¹ By "layman" ($i\delta i \omega \tau \eta s$) in this passage is meant the ordinary, normal person, whose business does not require, as does that, e g, of the professional athlete, special diet and exercise.

⁴ καὶ μὴ μεγάλη Α: καὶ ὅκως μὴ μεγάλη (ὅκως above line in another hand) Μ: καὶ ὅκως μὴ μεγάλη V. Villaret omits ὅπως and reads ἔστω for ἔσται.

ΠΕΡΙ ΔΙΑΙΤΉΣ ΥΓΙΕΙΝΉΣ

τούτοισιν, ὅταν θέρος ἢ, ὅπως τὸ σῶμα ψυχρὸν καὶ μαλακὸν γένηται ἡ γὰρ ὥρη θερμή τε καὶ ξηρή, καὶ παρέχεται τὰ σώματα καυματώδεα καὶ αύγμηρά δεί οθν τοίσιν επιτηδεύμασιν άλεξασθαι. κατὰ δὲ τὸν αὐτὸν λόγον, ὥσπερ ἐκ τοῦ χειμῶνος ἐς τὸ ἢρ, οὕτω ἐκ τοῦ ἦρος ἐς τὸ θέρος καταστήσεται, τῶν μὲν σιτίων ἀφαιρέων, τῷ δὲ ποτῷ 30 προστιθείς ούτω δε και τὰ εναντία ποιέοντα καταστήσαι έκ τοῦ θέρεος ές τὸν χειμώνα. ἐν δὲ τῷ Φθινοπώρω τὰ μὲν σιτία πλέω ποιεύμενον καὶ Επρότερα καὶ τὰ όψα κατὰ λόγον, τὰ δὲ ποτὰ έλάσσω καὶ ἀκρητέστερα, ὅπως ὅ τε γειμὼν άναθὸς 2 ἔσται καὶ ὥνθρωπος διαχρήσεται τοῖσί τε πόμασιν ακρητεστάτοισι και ολίγοισι και τοίσι σιτίοισιν ώς πλείστοισί τε καλ ξηροτάτοισιν ούτω γάρ αν καὶ ύγιαίνοι μάλιστα καὶ ριγώη 39 ήκιστα· ή γαρ ώρη ψυχρή τε καὶ ύγρή.

REGIMEN IN HEALTH, I.-II.

summer, that the body may become cold and soft. For the season is hot and dry, and makes bodies burning and parched. Accordingly these conditions must be counteracted by way of living. On the same principle the change from spring to summer will be prepared for in like manner to that from winter to spring, by lessening food and increasing drink. Similarly, by opposing opposites prepare for the change from summer to winter. In autumn make food more abundant and drier, and meats too similar, while drinks should be smaller and less diluted, so that the winter may be healthy and a man may take his drink neat and scanty and his food as abundant and as dry as possible. For in this way he will be most healthy and least chilly, as the season is cold and wet

II. Those with physiques that are fleshy, soft and red, find it beneficial to adopt a rather dry regimen for the greater part of the year. For the nature of these physiques is moist. Those that are lean and sinewy, whether ruddy or dark, should adopt a moister regimen for the greater part of the time, for the bodies of such are constitutionally dry. Young people also do well to adopt a softer and moister regimen, for this age is dry, and young bodies are firm. Older people should have a drier kind of diet,

 ϵ s τὸ θέρος καταστήσαι A. In some respects the reading of A is preferable, except for the use of ϵ ως.

* καὶ τὰ σώματα πέπηγεν MV (πέπηγε M): πέπηγεν ἔτι A.

² Å omits $d\gamma \alpha \theta \partial s$ here The sentence which follows seems a rather idle repetition of the preceding, and possibly the whole from $\delta \pi \omega s$ $\delta \tau \epsilon \chi \epsilon \iota \mu \dot{\omega} \nu$ to $\xi \eta \rho \sigma \tau d \tau \sigma \iota \sigma \iota \nu$ should be deleted as a gloss

REGIMEN IN HEALTH, 11.-1v.

for bodies at this age are moist and soft and cold. So in fixing regimen pay attention to age, season, habit, land, and physique, and counteract the prevailing heat or cold. For in this way will the best health be enjoyed.

III. Walking should be rapid in winter and slow in summer, unless it be under a burning heat. Fleshy people should walk faster, thin people slower. Bathe frequently in summer, less in winter, and the lean should bathe more than the fleshy. In winter wear unoiled cloaks, but soak them in oil in summer.

IV. Fat people who wish to become thin should always fast when they undertake exertion, and take their food while they are panting and before they have cooled, drinking beforehand diluted wine that is not very cold. Their meats should be seasoned with sesame, sweet spices, and things of that sort. Let them also be rich. For so the appetite will be satisfied with a minimum. They should take only one full meal a day, refrain from bathing, lie on a hard bed, and walk lightly clad as much as is possible. Thin people who wish to become fat should do the opposite of these things, and in particular they should never undertake exertion when fasting.

curious difference between Holkhamensis and C (both copies of V), and agreement of C with a MS of a totally different class, cannot be due to mere chance As both C and Holkhamensis were copied by the same scribe from V, it looks as though C had been "edited"

REGIMEN IN HEALTH, v.

V. Emetics and clysters for the bowels should be used thus. Use emetics during the six winter months, for this period engenders more phlegm than does the summer, and in it occur the diseases that attack the head and the region above the diaphragm. But when the weather is hot use clysters, for the season is burning, the body bilious, heaviness is felt in the loins and knees, feverishness comes on and colc in the belly. So the body must be cooled, and the humours that rise must be drawn downwards from these regions. For people inclined to fatness and moistness let the clysters be rather salt and thin; for those inclined to dryness, leanness and weakness let them be rather greasy and thick. Greasy, thick clysters are prepared from milk, or water boiled with chick-peas or similar things. Thin, salt clysters are made of things like brine and sea-water. Emetics should be employed thus. Men who are fat and not thin should take an emetic fasting after running or walking quickly in the middle of the day Let the emetic consist of half a cotyle of hyssop compounded with a chous 1 of water, and let the patient drink this, pouring in vinegar and adding salt, in such a way as to make the mixture as agreeable as possible. drink it quietly at first, and then more quickly. Thinner and weaker people should partake of food

If the chous contained 12 cotylae or 5\frac{3}{4} pints it is plain that the prescription gives the proportions of the mixture rather than the size of the dose. A dose of 6 pints seems heroic.

³ A omits καὶ μὴ ἰσχνοί.

δσοι δὲ μὴ ἀνεμέουσι τὰ σιτία, ἡ καὶ κοιλίας

REGIMEN IN HEALTH, v.-vi.

before the emetic in the following way. After bathing in hot water let the patient first drink a cotyle of neat wine; then let him take food of all sorts without drinking either during or after the meal, but after waiting time enough to walk ten stades, give him to drink a mixture of three wines, dry, sweet and acid, first rather neat, and taken in small sips at long intervals, then more diluted, more quickly and in larger quantities.

He who is in the habit of taking an emetic twice a month will find it better to do so on two successive days than once every fortnight, though the usual custom is just the contrary. Those who benefit from vomiting up their food, or whose bowels do not easily excrete, all these profit by eating several times a day, partaking of all sorts of food and of meats prepared in every way, and by drinking two or three sorts of wine. Those who do not vomit up their food, or have loose bowels, all these profit by acting in exactly the opposite way to this.

VI. Infants should be washed in warm water for a long time, and be given to drink their wine well diluted and not altogether cold, and such that will least swell the belly and cause flatulence. This must be done that they may be less subject to convulsions, and that they may become bigger and of a better colour. Women should use a regimen of a rather dry character, for food that is dry is more adapted to the softness of their flesh, and less diluted drinks are better for the womb and for pregnancy.

¹ A omits δέ. 2 A omits δέ ³ A omits 7á. ⁴ κυστροφίας Littré, slightly altering two inferior MSS. A reads σκιητροφίαs and MV σκιατροφίας Littré's reading certainly seems correct, but the other one must be very old, going back to the archetype of AM and V.

ΠΕΡΙ ΔΙΑΙΤΗΣ ΥΓΙΕΙΝΗΣ

REGIMEN IN HEALTH, VII.

VII. Athletes in training should in winter both run and wrestle: in summer they should wrestle but little and not run at all, walking instead a good deal in the cool. Such as are fatigued after their running ought to wrestle; such as are fatigued by wrestling ought to run. For by taking exercise in this way they will warm, brace and refresh best the part of the body suffering from fatigue. Such as are attacked by diarrhea when training, whose stools consist of undigested food, should reduce their training by at least one-third and their food by one-half For it is plain that their bowels cannot generate the heat necessary to digest the quantity of their food. The food of such should be wellbaked bread crumbled into wine, and their drink should be as undiluted and as little as possible, and they ought not to walk after food. At this time they should take only one meal each day, a practice which will give the bowels the greatest heat, and enable them to deal with whatever enters them. This kind of diarrhea attacks mostly persons of close flesh, when a man of such a constitution is compelled to eat meat, for the veins when closely contracted cannot take in the food that enters. This kind of constitution is apt sharply to turn in either direction, to the good or to the bad, and in bodies of such a sort a good condition is at its best only for a while. Physiques of a less firm flesh and inclined to be hairy are more capable of forcible feeding and of fatigue, and their good condition is of

5 For μᾶλλον A has μάλιστα.

REGIMEN IN HEALTH, vii.-viii.

longer duration. Such as throw up their food the day after, whose hypochondria are swollen because of the undigested food, are benefited by prolonging their sleep, but apart from this their bodies should be subjected to fatigue, and they should drink more wine and-less diluted, and at such times partake of less food. For it is plain that their bellies are too weak and cold to digest the quantity of food. When people are attacked by thirst, diminish food and fatigue, and let them drink their wine well diluted and as cold as possible. Those who feel pains in the abdomen after exercise or after other fatigue are benefited by resting without food; they ought also to drink that of which the smallest quantity will cause the maximum of urine to be passed, in order that the veins across the abdomen may not be strained by repletion For it is in this way that tumours and fevers arise

VIII.¹ When a disease arises from the brain, at first a numbness seizes the head and there is frequent passing of urine with the other symptoms of strangury; this lasts nine days. Then, if water or mucus break out at the nostrils or ears, the illness ceases and there is no more strangury. The patient passes without pain copious white urine for the next twenty days. His headache disappears, but his vision is impaired.

² ὰνθέων Α: ἀνθέῶν Μ.

¹ δς αν αιπωτίς (changed into ανθήτω τίς) Α: ὅκου μη αμπωτίς Μ.

³ Here A has ούδεμία εὐλάβεια οὖ δεῖ.

¹ I translate the text, which is Littré's It goes back to the Galenic commentary, which gives three rather forced explanations. (1) Like flowers, humours have their proper colour; (2) the colour of humours is "florid"; (3) consider the colour of humours when they have not left the surface of the flesh leaving it sapless. The repetition of xumur and the variant in A for άμπωτις suggest that the original was either το χρώμα των χυμών ώσπερ ανθέον (the corrector of M wrote o over ω of ἀνθέων) or το χρώμα τών χυμών, δε αν ἀνθη. The verb ἀνθώ, as in Sacred Disease VIII (Vol. II, p. 155), seems to mean ἐξανθῶ, "break out," in sores, etc. The sense would be "judge of the colour of humours from an outbreak." ἄσπερ ἀνθέον and às ἀν ἀνθη look like the alternative readings which so many places in the Corpus show as a "conflated" whole. The Galenic commentary mentions an ancient reading, τὸ χρώμα τῶν χυμῶν, ὅπου οὐκ ἔστι ταραχή αὐτῶν, Εσπερ τῶν ἀνθῶν ἐν διαδοχή τῶν ἡλικιῶν ὑπαλλάττεται-an obvious paraphrase. 62

HUMOURS

I. The colour of the humours, where there is no ebb of them, is like that of flowers. They must be drawn along the suitable parts whither they tend, except those whose coction comes in due time. Coction tends outwards or inwards, or in any other necessary direction. Caution. Lack of experience. Difficulty of learning by experience. Falling out of hair. Emptiness of bowels, for the lower, repletion, for the upper, nourishment. Tendency upwards; tendency downwards Spontaneous movements upwards, downwards; beneficial,

2 I take § with τῶν συμφερόντων χωρίων, which is partitive. Littré reads διὰ τῶν συμφερόντων χωρίων, with the footnote "διὰ om Codd" I find it, however, in the Caius MS. §§.

The meaning is most uncertain, and the variant in A suggests either corruption in the vulgate or an attempt at paraphrase. The Galenic commentary quotes with approval the reading εὐλαβείη ἀπειρίη, "caution for inexperience." One is very tempted to think that the original was εὐλαβείη δυσπειρίη, "be cautious when it is difficult to judge by experience," and that ἀπειρίη is a gloss.

⁴ I leave these extraordinary phrases as they are printed in Littré, our MSS showing no important variants. However, my own feeling is that we ought to read: πλαδαρότης σπλάγχνων, κενότης τοῖοι κάτω, πλήρωσις τοῖοι άνω· τροφήκτλ. ''Flabbiness of the bowels means emptiness in the lower bowels, fulness in the upper"—not a bad description of certain forms of dyspepsia.

5 Apparently of the humours, and similarly with the

other nouns in the present context.

καὶ βλάπτει· ξυγγενὲς εἰδος, χώρη, ἔθος, ἡλικίη, 10 ὅρη, κατάστασις νούσου, ὑπερβολή, ἔλλειψις, οἰσιν ὁπόσον λείπεται, ἡ οὖ· ² ἄκη· ἔκκλισις· παροχέτευσις ἐς κεφαλήν, ἐς τὰ πλάγια, ἡ μάλιστα ῥέπει· ἡ ἀντίσπασις, ἐπὶ τοῖσιν ἄνω, κάτω, ἄνω, ἐπὶ τοῖσι κάτω· ἡ ξηρῆναι· ἡ οἶσι τὰ κάτω, ἡ ἄνω ἐκπλύνεται, ἡ οἶσι παρηγορήσεται· 3 μὴ τὰ ἐκκεχυμωμένα ἐς τὸ ἔσω ἀπολαμβάνειν, ἀλλὰ τὰς ἀφόδους ξηραίνειν. τάραξις, κατάκλυσις, διάνιψις, οἶσιν ἀποστήσεται πρὸς ἔδρην, ὅθεν ἀθέλγεται, ἡ φάρμακον, ἡ ἕλκος, ἡ χυμός τις 20 συνεστηκώς, ἡ βλάστημα, ἡ φῦσα, ἡ σῖτος, ἡ 21 θηρίον, ἡ καῦμα, ἡ ἄλλο τι πάθος.

ΙΙ. Σκεπτέα ταῦτα· τὰ αὐτόματα λήγοντα, ἢ οἶον αἱ ἀπὸ καυμάτων ἐπεγειρόμεναι φλύκτεις,

2 A reads & for οἶσιν ὅποσον and omits ħ οῦ Littré adds κάθαρσις καὶ κένωσις before ἄκη (from the Galenic commentary).

έξαθέλγεται Α΄

² For κατάστασις see Vol. I, p 141

3 With the reading of A, "defect, and the nature of the deficiency."

¹ μαδαρότης σπλάγχνων κενότης τοῖσι πλείστοισιν ἡ τοῖσι κάτω πλήρωσις τοῖσιν ἄνω τροφή τὰ αὐτόματα ἄνω κάτω ὡφελέει καὶ βλάπτει Δ: μαδαρότης σπλάγχνων κενότης τοῖσι κάτω πλήρωσις τοῖσιν ἄνω τροφή ἀναρροπίη, καταρροπίη τὰ αὐτόματα ἄνω καὶ κάτω ' ὰ ὡφελέει καὶ βλάπτει Μ.

³ ή οίσιν άνω παρηγορήσεται Α: ή οίσι παρηγορήσεται Μ.

¹ είδος here seems equivalent to φύσις See A. E. Taylor, Varia Socratica, p. 228

^{*} This means apparently that "loose" humours in the body ought not to be confined within it, but dried up as

HUMOURS, 1.-11.

harmful. Congenital constitution,1 country, habit, age, season, constitution of the disease,2 excess, defect, the deficient and the amount of the deficiency, or the contrary.3 Remedies. Deflection. Deviation, to head, to the sides, along the route to which the chief tendencies are Or revulsion. downwards when there is an upwards tendency, upwards when there is a downwards tendency. Drying up Cases in which the upper parts, or the lower, are washed out; cases for soothing remedies. Do not shut up extravasated humours inside, but dry up the evacuations.4 Disturbance; flooding out, washing through,5 for those who will have an abscession to the seat, whereby is withdrawn poison,6 or sore, or solidified humour, or growth, or flatulence,? or food, or creature.8 or inflammation, or any other affection.

II Observe these things: symptoms which cease of themselves, or for example the blisters that rise

evacuations Littré has "par des moyens siccatifs faciliter les voies"—a very doubtful rendering Personally I think that the original was τῆσιν ἀφόδοις (ἀφόδοις and ἀφόδους are very similar) and that the meaning is "dry up by evacuations."

The Caius MS. $\frac{54}{2}$ omits $\delta i d \nu i \psi i s$, and it is probably a gloss on $\kappa a \tau d \kappa \lambda \nu \sigma i s$, or vice versa. The general meaning of this passage I take to be that a $\tau d \rho a \xi i s$ of the humours calls for a clyster, should there be signs that the trouble will be resolved to the seat. $\tau a \rho a \chi \dot{\eta}$ and its cognates are generally used of bowel trouble

⁶ φάρμακον in the Corpus generally means "purge" The meaning here (substance délétere, Littré) seems unique in the

Hippocratic corpus.

τ Erotian says (Nachmanson, p. 90) ἐν δὲ τῷ Πειλ Χυμῶν τὸ ἐμφύσημα λέγει.

8 Apparently worms

emptying, warming, chilling, within or without, in some cases but not in others. When that which causes the colic is below the navel the colic is slow and mild, and vice versa.

IV The evacuations, whither they tend; without foam, with coction, without coction, cold, fetid, dry, moist In fevers not ardent, thirst that was not present before, brought about neither by heat nor by any other cause, unne, wetness of the nostrils Prostration, dryness or fulness of the body; rapid 1 respiration; hypochondrium; extremities; eyes sickly; change of complexion; pulsations; chills; palpitations; hardness of the skin, muscles, ioints, voice, mind; 2 voluntary posture; hair; nails; power, or the want of power, to bear easily what is necessary. These are signs :- smell of the skin, mouth, ear, stools, flatulence, urine, sores, sweat, sputum, nose; saltness of skin, sputum, nose, tears, or of the humours generally. In every way similar the things that benefit, the things that harm.3 The dreams the patient sees, what he does in sleep; if his hearing be sharp, if he be interested in information.4 In estimating signs take the majority that are more important and more promi-

¹ The word $\theta a \lambda \epsilon \rho \delta s$ is poetic in the sense of "frequent" $(\theta a \lambda \epsilon \rho \delta s \gamma \delta os$ in Odyssey). But this is no objection when the style is aphoristic $\theta o \lambda \epsilon \rho \delta v$ would mean "troubled," poetic again in this sense.

² If φωνης and γιώμης are not mere slips for φωνή and γνώμη, σκληρυσμός must be used metaphorically with them to signify a rigidity of voice and thought not uncommon in serious cases of illness.

³ I take this to mean that all good signs show a similarity, and so do all bad signs

The reading πείθεσθαι would mean "is readily obedient to orders"

nent-those that denote recovery are more seasonable than the others 1 If the patients perceive everything with every sense and bear easily, for example, smells, conversation, clothes, postures and Symptoms which benefit even when they manifest themselves spontaneously (and sometimes these too bring about a crisis), such as flatulence and urine, of the right kind, of the right amount, and at the right time.2 What is contrary avert, combat it. Parts near and common to affected places suffer lesions first and most.

V. In examining the constitution of a disease look to the excretions in the initial stages, the nature of the urine, the state of collapse, change of colour, diminution of respiration and the other symptoms besides The abnormal conditions that must be known: passage of urine, menstruation, sputum, nasal discharge, eyes, sweat, discharge from tumours, from wounds, from eruptions, what is spontaneous and what artificial; for all critical symptoms follow a norm, as do those that help, those that harm and those that kill. They must be known, that the bad may be shunned and

1 I translate the reading of A, but I suspect that a gloss has crept into the text, possibly τὰ σψζοντα τῶν έτέρων Littre's translation, "les plus nombreux, les plus forts et les plus considérables," is surely impossible

² I have punctuated from σχήματα to οἶον roughly as it is in A Littré puts a full-stop at σχήματα and a comma at εὐφόρωs, translating, "Il y a bonne tolérance, quand les symptômes survenant spontanément soulagent, et quand ils font crise, et quand ils sont suffisants en qualité et en quantité, comme les gaz, etc " In any case the sentence is broken, but the vulgate, which Littré follows, is intolerable

HUMOURS, v.-vt.

averted, and that the good may be invited, encouraged and welcomed. Similarly with other symptoms, of the skin, extremities, hypochondria, joints, mouth, eye, postures, sleep, such as denote a crisis, and when symptoms of this kind must be provoked. Moreover, abscessions of a helpful character must be encouraged by foods, drinks, smells, sights, sounds, ideas, evacuations, warmth, cooling, moist things, dry things, moistening, drying, anointings, ointments, plasters, salves, powders, dressings, applications [postures, massage, leaving alone, exertion, rest, sleep, keeping awake], breaths from above, from below, common, particular, artificial 2—not, however, when paroxysms are present or imminent, nor when the feet are chilled, but when the disease is declining.

VI. At the periodic paroxysms do not give nourishment; do not force it on the patient, but diminish the quantity before the crisis. Do not disturb a patient either during a crisis or just after one, either by purgings or by other irritants; do not try experiments either, but leave the patient

It is hard to see how these nominatives came to be included among the datives. Perhaps they are an addition to the text from a marginal note of a commentator. The dictionaries do not recognise $\tilde{\epsilon}a\sigma is$, but, although the editions read $i\eta\sigma is$, the word is correctly formed from $\hat{\epsilon}d\omega$ and makes excellent sense in this passage

² These difficult words I take to mean (a) letting the air play upon the patient from different directions; (b) taking long or deep breaths, and (c) the use of a fan. It seems to be better to take κουοίσω τεχνητοΐοω as agreeing with

πνεύμασιν, and not as separate substantives

HUMOURS, vi.

alone. [Critical signs of an improvement ought not to be expected to appear at once.] Purge or otherwise disturb concocted, not crude, humours, and avoid the onset of a disease, unless there be orgasm, a thing which rarely occurs then. Evacuate the humours that have to be evacuated in the direction in which they mostly tend, and by the convenient passages. Judge of evacuations, not by bulk, but by conformity to what is proper, and by the way in which the patient supports them. When occasion calls for it, reduce the patient, if need be, to a fainting condition, until the object in view be attained. If then there be need of anything further, shift your ground, dry up the humours. moisten them, treat by revulsion, if, that is, the strength of the patient permits Take as your tests 2 the following symptoms: the dry will be hot, and the moist cold, purgatives will produce the opposite effect. This is what usually happens. On odd days evacuations should be upwards if the periods and the constitution of the paroxysms be odd. On even days they are generally downwards, for so they are beneficial even when spontaneous, if the periods cause the paroxysms on the even days. But when the circumstances are not such,3 evacuations should be upwards on even days, downwards

¹ This apparently means that if there be a flux of the humours to one part of the body, they should be "drawn back" by medicines or applications. Eg a flow of blood to the head should be treated by hot water applied to the feet

² To find out, that is, whether your treatment has been successful.

³ That is, if the paroxysms and evacuations are neither both odd nor both even

¹ That is, constitutions when paroxysms are on odd days and purges on even days, or *vice versa*. The cases considered seem to be these:—

HUMOURS, vi.-vii.

on odd days Such constitutions are rare, and the crises are rather uncertain. Prolonged illnesses must be similarly treated—for example, those which last thirteen or fourteen days; purge on the thirteenth day downwards, on the fourteenth upwards (to do so is beneficial for the crisis), and similarly with diseases of twenty days, except when purging should be downwards. Purging must be copious, and not near the crisis but some time before it. Rarely in acute diseases must evacuation be copious.

VII. Generally, in cases of fever with prostration, abscessions are most likely to occur at the joints and by the jaw, in each case near to the part where the pains are, more often, in fact generally, to an upper part. If the disease be sluggish and incline to the lower parts, the abscessions too collect in a

(a) A purge is necessary on an odd day. If paroxysms occur on odd days, purge upwards. If paroxysms occur on even days, purge downwards.

(b) A purge is necessary on an even day. If paroxysms occur on even days, purge downwards. If paroxysms occur

on odd days, purge upwards

² The readings in the text connect these cases with the rare cases mentioned above, where a necessity for purging occurs on a day when a paroxysm is not due. The usual cases are referred to in $\pi\lambda \eta \nu$ for $\kappa d\tau \omega$. This is very strange, or at least awkward, and the reading of A, which transposes $\kappa \dot{\alpha} \tau \omega$ and $\ddot{\alpha} \nu \omega$, is certainly more natural, but it makes $\pi\lambda \dot{\gamma} \nu$ for $\kappa \dot{\alpha} \tau \omega$ absuid. It is possible that these words are a marginal note which has slipped into the text, and that they should be deleted, $\kappa \dot{\alpha} \tau \omega$ and $\ddot{\alpha} \nu \omega$ being transposed as in A

3 The Galenic commentary joins τοῦσι κοπώδεσι with άγειν. Lattré points out that Aphorism IV. 31 is the source of the present passage, and in it τοῦσι κοπιώδεσιν occurs in close

conjunction with έν τοίσι πυρετοίσιν

⁴ For the meaning of "abscession" see Vol. I (Introduction), p liii.

ἀποστάσιες· μάλιστα δὲ πόδες θερμοὶ κάτω σημαίνουσι, ψυχροὶ δὲ ἄνω. οἶσι δὲ ἀνισταμένοις ἐκ τῶν νούσων, αὐτίκα δὲ χερσὶν ἢ ποσὶ πονήσασιν, ἐν τούτοις ἀφίστανται· ἀτὰρ καὶ ἤν 10 τι προπεπονηκὸς ¹ ἢ, πρὶν ἢ νοσεῖν, ἐς ταῦτα ἀποστηρίζεται, οἶον καὶ τοῖσιν ἐν Περίνθω βηχώδεσι καὶ κυναγχικοῖσιν· ποιέουσι γὰρ καὶ αἱ βῆχες ἀποστάσιας, ὥσπερ οἱ πυρετοί· ταῦτα ² κατὰ τὸν αὐτὸν λόγον ἢ ἀπὸ ³ χυμῶν, ἢ σώματος 15 συντήξιος καὶ ψυχῆς.

VIII. ¹ The reading of A seems to be an attempt to make the grammar square with $\tau a \hat{v} \tau a$ later on But the accusative $\tau v v a$ is a curious "accusative of the part affected," and probably $\tau a \hat{v} \tau a$ is a simple anacoluthon

² A reference to Epidemics VI 7, 7 (Littré v 341)

³ This seems to mean that abscessions may be the result of

HUMOURS, vii.-viii.

lower part. Hot feet especially signify a lower abscession, cold feet an upper abscession. When patients, on rising after an illness, suffer immediately pains in arms or feet, abscessions form in these parts. Moreover, if a part suffer pain before the illness, it is in it that the humours settle, as was the case with those who in Perinthus 2 suffered from cough and angina. For coughs, like fevers, cause abscessions. These results are the same, whether they come from humours or from wasting of body and soul. 3

VIII. Know in what seasons the humours break out, what diseases they cause in each, and what symptoms they cause in each disease. As to the body generally, know to what disease the physical constitution most inclines. For example, a swollen spleen produces a certain effect, to which the constitution contributes something. It is much the same with an evil complexion, or the body is parched, and so on. Be practised in these things 4

wasting diseases as well as of those caused by "peccant humours"

4 This chapter towards the end is full of difficulties, and is so irregular, not to say violent, in grammar that I have printed the text between daggers. The general sense of the whole chapter is that the physician must know (1) the effect of the humours in various seasons and in various diseases, and (2) the disease to which an individual constitution is most inclined. Then it seems to be implied that a bad complexion, or a parched, hot skin may also denote a tendency to a particular disease. The sentence δlov ... $\phi \dot{\nu} \sigma \iota s$ is strange, both $\tau \iota$ (before $\sigma \pi \lambda \dot{\eta} \nu$) and $\tau o \dot{\nu} \tau \omega \nu$ being irregular. It would perhaps be a slight improvement to punctuate δlov $\tau \iota \sigma \pi \lambda \dot{\eta} \nu \delta los \iota v$ $\delta \iota v$ in the next sentence the valuants $\sigma \iota v \rho \iota v$ $\delta

HUMOURS, IX.-X.

IX. Among psychical symptoms 1 are intemperance in drink and food, in sleep, and in wakefulness, the endurance of toil either for the sake of certain passions (for example, love of dice) or for the sake of one's craft or through necessity, and the regularity or irregularity of such endurance. States of mind before and after changes. Of moral characteristics: diligence of mind, whether in inquiry or practice or sight or speech; 2 similarly, for example, griefs, passionate outbursts, strong desires. Accidents grieving the mind, either through vision or through hearing. How the body behaves: when a mill grinds the teeth are set on edge; the legs shake when one walks beside a precipice; the hands shake when one lifts a load that one should not lift, the sudden sight of a snake causes pallor. Fears, shame, pain, pleasure, passion and so forth: to each of these the appropriate member of the body responds by its action. Instances are sweats. palpitation of the heart and so forth.

X. Of remedies that may help or harm those applied externally include anointing, affusions,

The genitive ψυχης ("belonging to the soul are, etc.") is rather strange, and one is strongly tempted to adopt the reading of A. ἀγυμναστίη ψυχης, "lack of self-control." Unfortunately this reading leaves ταῦτα without any construction

 $^{^2}$ This phrase has no grammatical construction with the rest of the sentence, and the manuscript M, with its cognates, reads $\zeta\eta\tau\eta\sigma \ell\omega^{}$ or $\zeta\eta\tau\dot{\eta}\sigma\epsilon\omega^{}$ Glaucias, an old commentator, not understanding the words, added the negative $\mu\dot{\eta}$ before the participles.

¹⁶ A reads καταχρίσεις· καταχύσεις altered to the singular apparently by the original scribe So with the next two words.

HUMOURS, x.-x11.

inunction, cataplasms, bandages of wool and the like; the internal parts of the body react to these remedies just as the external parts react to remedies applied internally. Moreover, a bed made out of unwashed fleeces, and the sight or smell of the cumin called "royal." Things that purge the head are disturbing, conversation, voice and so forth Breasts, seed, womb are symptomatic at the various ages; in chokings and in coughs, fluxes to the testicles.

XI. As the soil is to trees, so is the stomach to animals. It nourishes, it warms, it cools, as it empties it cools, as it fills it warms. As a soil that is manured warms in winter, so the stomach grows warm. Trees have a slight, dry bark, but inside they are of dry texture, healthy, free from rot, durable; so among animals are tortoises and the like. In their ages animals are like the seasons and the year. They do not wear out, but improve with moderate use. As a water-pot, when new, lets the liquid pass through it, but holds it as time goes on, so the stomach lets nourishment pass, and like a vessel retains a sediment.

XII. The fashions of diseases. Some are congenital and may be learned by inquiry, as also may those

conform to the Galenic commentary, which says that there is a comparison implied with the membranes of the stomach. Perhaps it is from here that M got its reading of the preceding sentence.

¹¹ After τρίβεται A adds τὰ ζώντα.

¹² A omits βελτίω

 $^{^{13}}$ A has $\delta i \alpha \pi \epsilon i$ ϵi $\delta \epsilon i$, but the ϵi is cramped and was apparently added after the other words had been written

HUMOURS, x11-x111.

that are due to the district, for most people are permanent residents there, so that those who know are numerous. Some are the result of the physical constitution, others of regimen, of the constitution of the disease, of the seasons. Countries badly situated with respect to the seasons engender diseases analogous to the season. Eg when it produces irregular heat or cold on the same day, diseases in the country are autumnal, and similarly in the case of the other seasons. Some spring from the smells of mud or marshes, others from waters, stone, for example, and diseases of the spleen; of this kind are waters because of winds good or bad.

XIII. What the character of a season's diseases and constitutions will be you must foretell from the following signs. If the seasons proceed normally and regularly, they produce diseases that come easily to a crisis. The diseases that are peculiar to the seasons are clear as to their fashions. According to the alterations in a season, the diseases such as arise in this season will be either like or unlike their usual nature. If the season proceeds normally, similar or somewhat similar to the normal will be the diseases, as, for example, autumnal jaundice;

¹ The difference between A and M suggests corruption, M appearing to be an attempt to improve on A. Perhaps of should be omitted before πολλοί

² So Littré, who bases his interpretation on Airs, Waters, Places, IX, where winds are said to give various characteristics to waters Possibly, however, we should read with M $\tau \grave{\alpha}$ $\delta \acute{\epsilon}$ instead of $\tau o a \hat{\alpha} \tau \alpha$

³ Or, "unlike the seasons"

HUMOURS, xiii.-xiv.

for cold spells succeed to hot spells and heat to cold. If the summer prove bilious, and if the increased bile be left behind, there will also be diseases of the spleen. So when spring too has had a bilious constitution, there occur cases of jaundice in spring also For this motion 1 is very closely akin to the season when it has this nature When summer turns out like to spring, sweats occur in fevers; these are mild, not acute, and do not parch the tongue. When the spring turns out wintry, with after-winter storms, the diseases too are wintry, with coughs, pneumonia or angina. So in autumn, should there be sudden and unseasonable wintry weather, symptoms are not continuously autumnal, because they began in their wrong season, but irregularities occur 2 So seasons, like diseases, can fail to show crisis or to remain true to type, should they break out suddenly, or be determined too soon, or be left behind. For seasons, too, suffer from relapses, and so cause diseases. Accordingly, account must also be taken of the condition of a body when the seasons come upon it.

XIV. South winds cause deafness, dimness of

¹ That is, the disturbance of the humours which causes naundice

² The sense apparently is that an autumnal disease, beginning in a premature winter, does not show continuously autumnal symptoms But A omits $\mu \dot{\eta}$ both before $\dot{\epsilon} \nu \, \ddot{\omega} \rho \eta$ and before $\sigma u \nu \epsilon \chi \, \dot{\epsilon} \omega s$, and the latter negative should be od. The true reading seems to be lost

HUMOURS, xiv.-xvi.

vision, headaches, heaviness, and are relaxing. When such winds prevail, their characteristics extend to sufferers from diseases. Sores are soft. especially in the mouth, the privy parts, and similar places. A north wind causes coughs, sore throats, constipation, difficult micturition accompanied by shivering, pains in the side and chest; such are the diseases that one must be prone to expect when this wind prevails Should its predominance be greater still, the fevers which follow drought and rain are determined by the conditions that preceded this predominance, by the physical condition produced by the previous season, and by the particular humour that prevails in the body Droughts accompany both south winds and north winds cause differences-and this too is important-in all other respects also. For humours vary in strength according to season and district, summer, for instance, produces bile, spring, blood, and so on in each case.

XV. It is changes that are chiefly responsible for diseases, especially the greatest changes, the violent alterations both in the seasons and in other things. But seasons which come on gradually are the safest, as are gradual changes of regimen and temperature, and gradual changes from one period of life to another

XVI. The constitutions of men are well or ill adapted to the seasons, some to summer, some to winter; others again to districts, to periods of life, to modes of living, to the various constitutions of diseases. Periods of life too are well or ill adapted to districts, seasons, modes of living and constitutions of diseases. So with the seasons vary modes of

living, foods and drinks. In winter no work is done and foods are ripe and simple—an important point; in autumn work is done, exposure to the sun is beneficial, drinks are frequent and foods varied, with wine and fruits

XVII. As it is possible to infer diseases from the seasons, so occasionally it is possible from diseases to forecast rains, winds and droughts; for example, north winds and south winds. For he who has noticed symptoms carefully and accurately has evidence on which to work; certain skin diseases, for instance, and pains at the joints are irritating when rain threatens, to quote one example out of many.

XVIII. Rains occur every other day, or every day, or at other intervals; some are continuous. Winds sometimes last for many days, and are opposed to one another; others are shorter, some, like rains, are These have resemblances to the seasonal constitutions, though less marked. If the year, having had a certain character to a marked degree, has given this character to the constitution, the diseases too have this character to a marked degree and are more severe, in this way have arisen very serious diseases, very widespread and lasting a very long period of time. After the first rains, when rain is coming after a long drought, it is possible to predict dropsies; and when the other slight signs appear at a period of calm, or at a change, one must infer

what diseases are typical of the various rains or winds, and must listen to anyone who knows the nature of the spring or summer that will follow a winter of such and such a character.

XIX. Complexions vary with the seasons; they are not the same in north winds as in south winds; individuals differ, and the same individual varies in complexion as he grows older. Judge of complexions by their permanent characteristics, realising that ages resemble seasons in colour as in character.

XX Sufferers from hemorrhoids are attacked neither by pleurisy, nor by pneumonia, nor by spreading ulcer, nor by boils, nor by swellings, nor perhaps by skin-eruptions and skin-diseases. However, unseasonably cured, many have been quickly caught by such diseases, and, moreover, in a fatal manner. All other abscessions, too, such as fistula, are cures of other diseases. So symptoms that relieve complaints if they come after their development, prevent the development if they come before. Suspected places cause relief, by acting as receptacles owing to pain, weight, or any other cause. In other cases

¹ The reading of A is a corruption of the reading of Epidemics VI 3, 23 and means, "Places receiving (peccant humours) from another place, through pain, weight or any other cause, bring relief." A "suspected" place is one in which we might expect a morbid affection to arise, and pain here, or an accumulation of humours, might relieve affections elsewhere. The phenomenon is common enough in certain forms of neuralgia, the pains of which often jump from place to place in such a way that one pain seems to relieve another.

HUMOURS, xx.

there is the sympathetic action. The issue, through the flow, ceases to be one of blood, but the patients spit up matter connected with the humour. In some such cases seasonable blood-letting is possible, but in other cases blood-letting, as sometimes in the former cases, is not suitable but only a hindrance. Blood-spitting may be caused by the season, by pleurisy, or by bile. When swellings by the ear do not suppurate at a crisis, 1 a relapse occurs when the swelling softens: when the relapse follows the normal course of relapses, the swelling rises again and remains, following the same periods as occur when fevers relapse. In such cases expect an abscession to the joints Thick, white urine, as in the case of the slave of Antigenes, sometimes is passed on the fourth day in prostrating fevers, and saves the patient from the abscession, and this is especially so if in addition there is a copious flow of blood from the nostrils. The patient whose right bowel was painful became easier when arthritis supervened, but when this symptom was cured the pains became worse.2

¹ Or, "occur at a crisis but do not suppurate"

² Chapter XX is the same as Epidemics VI 3, 24 to 4, 3. The variations of reading are not very important, but we may note that ἐτέρων ἄκος appears in Epidemics as ἢ ἔτεραισκώνs. See the Introduction to the present treatise.

APHORISMS

FIRST SECTION

I. Life is short, the Ait long, opportunity fleeting, experience treacherous, judgment 2 difficult. The physician must be ready, not only to do his duty himself, but also to secure the co-operation of the

patient, of the attendants and of externals.

II. In disorders of the bowels, and in vomitings that are spontaneous, if the matters purged be such as should be purged, the patient profits and bears up well. If not, the contrary. So too artificial evacuations, if what takes place is what should take place, profit and are well borne. If not, the contrary. So one ought to have an eye to season, district, age and disease, to see if the treatment is, or is not, proper in the circumstances.

III. In athletes a perfect condition that is at its highest pitch is treacherous ³ Such conditions cannot remain the same or be at rest, and, change for the better being impossible, the only possible change is

1 Or, "deceptive."

3 Or, "dangerous."

² It is just possible that κρίσις here means the crisis of a disease, and that the aphorism refers to the danger attending a crisis, and to the need for prompt and skilful treatment at such times

for the worse. For this reason it is an advantage to reduce the fine condition quickly, in order that the body may make a fresh beginning of growth. But reduction of flesh must not be carried to extremes, as such action is treacherous 1; it should be carried to a point compatible with the constitution of the patient. Similarly, too, evacuations carried to extremes are treacherous, 1 and again new growths, when extreme, are treacherous. 1

IV. A restricted and rigid regimen is treacherous, in chronic diseases always, in acute, where it is not called for. Again, a regimen carried to the extreme of restriction is perilous; and in fact repletion too, carried to extremes, is perilous.

V. In a restricted regimen the patient makes mistakes, and thereby suffers more; for everything that occurs is more serious than with a slightly more liberal regimen. For this reason in health too an established regimen that is rigidly restricted is treacherous, because mistakes are more hardly borne.

1 Or, "dangerous."

APHORISMS, I. v.-xi.

For this reason, therefore, a rigidly restricted regimen is treacherous ¹ generally as compared with one a little more liberal.

VI. For extreme diseases extreme strictness of treatment is most efficacious.

VII. Where the disease is very acute, immediately, not only is the pain extreme, but also it is essential to employ a regimen of extreme strictness. In other cases, where a more liberal regimen is possible, relax the strictness according as the disease is milder than the most extreme type

VIII. It is when the disease is at its height that it

is necessary to use the most restricted regimen.

IX. Take the patient too into account and decide whether he will stand the regimen at the height of the disease; whether his strength will give out first and he will not stand the regimen, or whether the disease will give way first and abate its severity.

X. When the disease reaches its height immediately, regimen must be restricted immediately. When the height comes later, restrict regimen then and a little before then; before, however, use a fuller regimen, in order that the patient may hold out.²

XI. Lower diet during exacerbations, for to give

1 Or, "dangerous,"

² So Littre; and, as V omits ầν, it is probable that the ancient interpretation took és to be final. But it is perhaps better to take és as meaning "how" or "in such a way that," in which case the translation will be "restricting it not more than the patient's strength permits"

food is harmful; lower diet too during the exacerbations wherever a disease is exacerbated

periodically.

XII. Exacerbations and constitutions will be made plain by the diseases, by the seasons of the year, and by the correspondence of periods to one another, whether they come every day, every other day, or at a longer interval. Moreover, there are supervening symptoms; for example, in pleurisy, if expectoration supervene immediately on the commencement of the disease, it means a shorter illness, if afterwards, a longer one. Urine, stools, sweats, by the manner in which they supervene, show whether the disease will have a difficult crisis or an easy one, whether it will be short or long.

XIII. Old men endure fasting most easily, then men of middle age, youths very badly, and worst of all children, especially those of a liveliness greater

than the ordinary.

XIV. Growing creatures have most innate heat, and it is for this reason that they need most food, deprived of which their body pines away. Old men have little innate heat, and for this reason they need but little fuel; much fuel puts it out. For this reason too the fevers of old men are less acute than others, for the body is cold.

XV. Bowels are naturally hottest in winter and in spring, and sleep is then longest; so it is in these seasons that more sustenance is necessary. For the

APHORISMS, I. xv.-xxi.

innate heat being great, more food is required; witness the young and athletes.

XVI. A sloppy diet is beneficial in all fevers, especially in the case of children and of those used to such a diet.

XVII. To some, food should be given once, to others, twice; in greater quantity or in less quantity; a little at a time. Something too must be conceded to season, district, habit, and age.

XVIII. In summer and in autumn food is most difficult to assimilate, easiest in winter, next easiest

in spring.

XIX. When the patient is suffering from a periodic exacerbation, offer nothing and force nothing, but lessen the nourishment before the crisis ²

XX. Do not disturb a patient either during or just after a crisis, and try no experiments, neither with purges nor with other irritants, but leave him alone.

XXI What matters ought to be evacuated, evacuate in the direction to which they tend, through the appropriate passages.

1 The reading in this aphorism is more than dubious. The strong evidence for τοῖσιν, which makes no possible grammar with the rest of the sentence, is almost proof positive that the true text has been lost Fortunately the general sense is quite plain.

² As Galen says, "crisis" here may mean either the exacerbation, or the summit of the disease, or the crisis in the strict sense of the word. The aphorism is so like XI that some editors think it is an interpolation, though an early

one.

12 After βέπη C' has ή φύσις.

3 άχοι Urb. QS. 4 C' has γινόμενα before μάλλον.

¹ An orgasm is literally a state of excitement, and in this aphorism signifies that the humours are "struggling to get out," as Adams says

APHORISMS, I. xxn.-II. v.

XXII. Purge or otherwise disturb concocted, not crude, humours, and avoid the onset of a disease, unless there be orgasm, which in most cases does not occur.¹

XXIII. Judge evacuations, not by bulk, but by their conformity to what is proper, and by the ease with which the patient bears them. Where occasion calls for purging until the patient faints, do even this, if the patient's strength be sufficient.

XXIV. In acute diseases use purgatives sparingly and at the onset, and then only after a thorough

examination.

XXV. If the matters purged be such as should be purged, the patient benefits and bears up well; otherwise, the patient is distressed.²

SECOND SECTION

I. A disease in which sleep causes distress is a deadly one; but if sleep is beneficial, the disease is not deadly.³

II. When sleep puts an end to delirium it is a

good sign.

III Sleep or sleeplessness, in undue measure,

these are both bad symptoms.

IV. Neither repletion, nor fasting, nor anything else is good when it is more than natural.4

V. Spontaneous weariness indicates disease.

² Most of Aphorisms XIX.-XXIV. will be found in Humours VI. The order of the propositions is not quite the same, and there are several interesting variant readings, which, however, do not seriously affect the sense

Deadly "means here only "very dangerous"
 Perhaps, "too great for the constitution,"

VI. 'Οκόσοι, πονέουτές τι τοῦ σώματος, τὰ πολλὰ ¹ τῶν πόνων μὴ ² αἰσθάνονται, τούτοισιν ἡ 3 γνώμη νοσεῖ.

VII. Τὰ ἐν πολλῷ χρόνῳ λεπτυνόμενα σώματα

2 νωθρώς ἐπανατρέφειν, τὰ δὲ ἐν ὀλίγω, ὀλίγως.3

VIII. *Ην ἐκ νούσου τροφὴν λαμβάνων τις 4 μὴ ἰσχύῃ, σημαίνει τὸ σῶμα ὅτι πλείονι τροφῇ χρῆται. ἡν δὲ τροφὴν μὴ λαμβάνοντος τοῦτο 4 γίνηται, σημαίνει ⁶ ὅτι κενώσιος δεῖται.

ΙΧ. Τὰ σώματα χρή, ὅκου ἄν τις βούληται 8

2 καθαίρειν, θεύροα ποιείν.

Χ. Τὰ μὴ καθαρὰ τῶν σωμάτων, 10 ὁκόσον 11 ἄν 2 θρέψης μᾶλλον, βλάψεις.

APHORISMS, II. vi.-xiv.

VI. Those who, suffering from a painful affection of the body, for the most part are unconscious of the pains, are disordered in mind.

VII. Bodies that have wasted away slowly should be slowly restored; those that have wasted quickly

should be quickly restored.

VIII. If a convalescent while taking nourishment¹ remains weak, it is a sign that the body is being overnourished, if there be weakness while he takes none,¹ it is a sign that evacuation is required.

IX Bodies that are to be purged must be rendered

fluent,2

X. Bodies that are not clean,3 the more you nourish the more you harm.

XI. It is easier to replenish with drink than with

food.

XII. Matters left behind in diseases after the crisis are wont to cause relapses.

XIII. When a crisis occurs, the night before the exacerbation is generally 4 uncomfortable, the night after more comfortable.

XIV. In fluxes of the bowels, changes in the

² That is, ready to evacuate. The ancients gave various

prescriptions to make bodies eupoa See p 213.

3 That is, free from impurities, disordered or redundant

ώs ἐπὶ τὸ πολὸ goes with the whole sentence and not with
 εὐφορωτέρη only

¹ The commentators from Galen have been worried by this phrase and the apparent inconsequence of the second part of the proposition. It is plain that $\tau \rho \rho \phi h \nu \lambda a u \beta d \nu \epsilon i \nu$ means "to take nourishment readily and with appetite."

^{12 €}v omitted by C'

¹³ Two late MSS. (and Galen) have ὑποστροφώδεα instead of ὑποστροφὰς ποιεῖν εἴωθεν.

των διαχωρημάτων ωφελέουσιν, ην μη ές πονηρα

3 μεταβάλλη.

Χν. "Οκου φάρυγξ νοσεῖ, ἢ φύματα ἐν τῷ σώματι¹ ἐκφύεται,² σκέπτεσθαι τὰς ἐκκρίσιας ἢν γὰρ χολώδεες ἔωσι, τὸ σῶμα συννοσεῖ· ἢν δὲ ὅμοιαι τοῖσιν ὑγιαίνουσι γίνωνται, ἀσφαλὲς τὸ σῶμα τρέφειν.

ΧVΙ. "Οκου λιμός οὐ δεῖ πονείν.

XVII. "Οκου ἂν τροφὴ πλείων παρὰ φύσιν 2 ἐσέλθη, τοῦτο νοῦσον ποιεῖ, 3 δηλοῖ δὲ ἡ ἴησις.

ΧΥΙΙΙ. Τῶν τρεφόντων ἀθρόως καὶ ταχέως,

2 ταχείαι καὶ αἱ διαχωρήσιες γίνονται.

XIX. Των δξέων νοσημάτων οὐ πάμπαν ἀσφαλέες αἱ προαγορεύσιες, οὕτε τοῦ θανάτου, οὕτε τῆς 3 ὑγιείης.

ΧΧ. 'Οκόσοισι νέοισιν έοθσιν αί κοιλίαι ύγραί εἰσι, τούτοισιν ἀπογηράσκουσι ξηραίνονται' δκόσοισι δὲ νέοισιν ἐοθσι ξηραίνονται, τούτοισιν ἐ ἀπογηράσκουσιν ύγραίνονται.

ΧΧΙ. Λιμον θώρηξις λύει.

ΧΧΠ. 'Απὸ πλησμονής δκόσα ἃν νοσήματα γένηται, κένωσις ἰῆται, καὶ δκόσα ἀπὸ κενώσιος, 3 πλησμονή, καὶ τῶν ἄλλων ἡ ὑπεναντίωσις.

XXIII. Τὰ ὀξέα τῶν νοσημάτων κρίνεται ἐν 2 τεσσαρεσκαίδεκα ἡμέρησιν.

2 ἐκθύει Rein.

3 For νοῦσον ποιεί MV have νοσοποιέει.

¹ For σώματι C' has τραχηλω with σω after it, the MS. being possibly imperfect at this point.

⁴ The MSS show a great variety of readings in this

APHORISMS, II. xiv.-xxiii.

excreta are beneficial unless they change to what is bad.

XV. When the throat is affected, or tumours rise on the body, examine the evacuations. If they are bilious, the whole body is affected; if they are such as they are in a state of health, it is safe to nourish the body.

XVI. When on a starvation diet a patient should

not be fatigued.

XVII. When more nourishment is taken than the constitution can stand, disease is caused, as is shown by the treatment.

XVIII. Of foods that nourish all at once and

quickly, the evacuations too come quickly.

XIX. In the case of acute diseases to predict

either death or recovery is not quite safe.2

XX. Those whose bowels are loose in youth get constipated as they grow old; those whose bowels are constipated in youth have them loose as they grow old.

XXI. Strong drink dispels hunger.

XXII. Diseases caused by repletion are cured by depletion; those caused by depletion are cured by repletion, and in general contraries are cured by contraries.

XXIII Acute diseases come to a crisis in fourteen days.

¹ The reading of C' seems to show that $\sigma \hat{\omega} \mu \alpha$ means here "the part of the body about the throat," that is, the neck. Swellings here may denote either a local or a general disorder. Possibly $\phi \hat{\nu} \mu \alpha \tau \alpha$ here means "eruptions"

2 Or, "not at all safe."

aphonism, and it is by some regarded as an interpolation It is here printed as given by C'.

* ὑπάρχει C' Urb. V ὑπάρχη several Paris MSS.: ∯ vulgate.

² After κινδυνεύουσιν many MSS. (including C') have of νοσέοντες

APHORISMS, II. xxxi.-xxxviii.

XXXI. When a convalescent has a good appetite without improving his bodily condition it is a bad

sign.

XXXII. Generally all sickly persons with a good appetite at the beginning, who do not improve, have no appetite at the end. But those get off better who at the beginning have a very bad appetite but later on have a good one ¹

XXXIII. In every disease it is a good sign when the patient's intellect is sound and he enjoys his

food 2; the opposite is a bad sign

XXXIV. In diseases there is less danger when the disease is more nearly related to the patient in respect of constitution, habit, age and season, than when there is no such relationship.

XXXV. In all diseases it is better for the parts about the navel and the abdomen to keep their fullness, while excessive thinness and emaciation is a bad sign. The latter condition makes it risky to administer purgatives.

XXXVI. Those with healthy bodies quickly lose strength when they take purges, as do those who

use a bad diet.

XXXVII Those who are in a good physical condition are troublesome to purge.

XXXVIII. Food or drink which, though slightly

¹ This aphorism is said by the commentators to apply to convalescents. The explanation seems to do some violence to oi φαύλως ἔχαντες, however much it may suit the sense of the passage Perhaps the phrase applies to all who, whether convalescent or not, are neither ill nor well. If so, πάντες has more point

2 Possibly προσφοραί includes treatment of all kinds, and

it certainly does not exclude drink.

⁵ καθαιρόμενοι omitted by C'. ⁶ σμικρόν Urb. V.

XLVII. Περὶ τὰς γενέσιας τοῦ πύου οἱ πόνοι 2 καὶ οἱ πυρετοὶ συμβαίνουσι μᾶλλον⁵ ἢ γενομένου.

1 πρεσβυτέροισι C' Urb.: πρεσβύτηισι MV.

² For ρηίδιον C' has ραδίως ³ κατὰ φύσιν omitted by V. ⁴ So Urb (with ὁραίων): C' M V omit καὶ τῶν τόπων. Littré with one MS. reads χωρίων, omitting καὶ τῶν τοπων. The variants seem due to the unusual meaning of μεταβολαὶ τῶν ὡρέων, not "changes of the seasons" but "change of climate." χωρέων Rein. omitting καὶ τῶν τόπων.

APHORISMS, II. XXXVIII.-XLVII.

inferior, is more palatable, is preferable to that which

is superior but less palatable.

XXXIX. Old men generally have less illness than young men, but such complaints as become chronic in old men generally last until death.

XL. Sore throats and colds of the very old are

not concocted.

XLI. Those who suffer from a frequent and extreme prostration without any manifest cause die suddenly.

XLII. It is impossible to cure a violent attack of

apoplexy, and not easy to cure a slight one.

XLIII. Those who are hanged and cut down before death do not recover if they foam at the mouth.

XLIV. Those who are constitutionally very fat are more apt to die quickly 2 than those who are thin.

XLV. Epilepsy among the young is cured chiefly by change—change of age, of climate, of place, of mode of life.

XLVI. When two pains occur together, but not in the same place, the more violent obscures the other.

XLVII. Pains and fevers occur when pus is forming rather than when it has been formed.

1 Or, "are in a fainting condition." A clever emendation is καταδυομένων, with which reading the aphorism would refer to persons immersed in water until nearly suffocated.

² That is, have less power successfully to resist a severe disease Adams' translation, "are apt to die earlier," would (wrongly) make ταχυθάνατοι refer to the average length of life.

⁵ μᾶλλον συμβαίνουσι C'.

 ΧLVIII. 'Εν πάση κινήσει τοῦ σώματος, δκόταν ἄρχηται πονεῖν, τὸ διαναπαύειν εὐθύς,
 ἄκοπον.

XLIX. Οἱ εἰθισμένοι τοὺς συνήθεας πόνους φέρειν, κἢν ὧσιν ἀσθενέες ἢ γέροντες, τῶν ἀσυνηθέων ἰσχυρῶν τε καὶ νέων ῥᾶον φέρου-4 σιν.

L. Τὰ ἐκ πολλοῦ χρόνου συνήθεα, κἂν ἢ χείρω τῶν ἀσυνηθέων, ἡσσον ἐνοχλεῖν εἴωθεν.

3 δεί δὲ καὶ ἐς τὰ ἀσυνήθεα μεταβάλλειν.

LI. Τὸ κατὰ πολὺ καὶ ἐξαπίνης κενοῦν, ἢ πληροῦν, ἢ θερμαίνειν, ἢ ψύχειν, ἢ ἄλλως ὁκωσοῦν τὸ σῶμα κινεῖν, σφαλερόν, καὶ πᾶν τὸ πολὺ τῷ φύσει πολέμιον τὸ δὲ κατὰ μικρόν, ἀσφαλές, καὶ ἄλλως τὸ ἐξ ἑτέρου μεταβαίνειν 6 ἐφ' ἔτερον.²

LII. Πάντα κατὰ λόγον ποιέοντι, μὴ γινομένων τῶν κατὰ λόγον, μὴ μεταβαίνειν ἐφ'

3 ετερον, μένοντος τοῦ δόξαντος ἐξ ἀρχῆς.

İΙΙΙ. Ὁ κόσοι τὰς κοιλίας ὑγρὰς ἔχουσιν, νέοι μὲν ἐόντες, βέλτιον ἀπαλλάσσουσι τῶν ξηρὰς ἐχόντων, ἐς δὲ τὸ γῆρας χεῖρον ἀπαλλάσσουσιν ξηραίνονται γὰρ ὡς ἐπὶ τὸ πολὺ τοῖσιν 5 ἀπογηράσκουσιν.

LÍV. Μεγέθει δὲ σώματος, ἐννεάσαι μέν, ἔλευθέριον καὶ οὐκ ἀηδές ³ ἐστιν· ἐγγηρᾶσαι δέ,

3 δύσχρηστον καὶ χεῖρον τῶν ἐλασσόνων.

Rein. puts the comma after χείρω.

² The text differs considerably from that of Littré. I have followed C' V Urb., except that the last has κατ' ὀλίγον and εἰs for ἐφ' before ἕτερον.

APHORISMS, II. XLVIII.-LIV.

XLVIII. In every movement 1 of the body, to rest at once when pain begins relieves the suffering.

XLIX. Those who are wont to bear accustomed labours, even if they be weak or old, bear them better than strong and young people who are not used to them

L. Things to which one has been used a long time, even though they be more severe than unaccustomed things, usually cause less distress. Nevertheless, change to unaccustomed things may be necessary.

LI. Excess and suddenness in evacuating the body, or in replenishing, warming, cooling or in any other way disturbing it, is dangerous; in fact all excess is hostile to nature. But "little by little" is a safe rule, especially in cases of change from one thing to another.

LII. When acting in all things according to rule, do not, when results are not according to rule, change to another course of treatment if the original

opinion remains.

LIII. Those who when young have relaxed bowels come off better than those who have hard; but in old age they come off worse, the bowels of the old being generally hard.

LIV. Size of body in youth is noble and not unpleasing; in old age it is inconvenient and less

desirable than a smaller stature.

¹ See p. 115, Aph XXIX

³ και οὐκ ἀηδές omitted by Urb. Erm reads ἀειδές after Galen.

APHORISMS, III. 1.-VII.

THIRD SECTION

I. It is chiefly the changes of the seasons which produce diseases, and in the seasons the great changes from cold or heat, and so on according to the same rule.

II. Of constitutions some are well or ill adapted to summer, others are well or ill adapted to winter.

III. Certain diseases and certain ages are well or ill adapted to certain seasons, districts and kinds of regimen.

IV. During the seasons, when on the same day occurs now heat and now cold, you must expect

diseases to be autumnal.

V. South winds cause deafness, dimness of vision, heaviness of the head, torpor, and are relaxing. When such winds prevail, their characteristics extend to sufferers from illnesses. A north wind causes coughs, sore throats, constipation, difficult micturition accompanied by shivering, pains in the sides and chest; such are the symptoms one must expect in illnesses when this wind prevails.

VI When summer proves similar to spring you must expect copious sweats to occur in fevers.

VII. In droughts occur acute fevers; and if the year be particularly dry, according to the constitu-

⁷ For χρή Urb, and several other MSS. have δεῖ.

 $^{^{5}}$ $\hat{\eta}$ is omitted by two inferior MSS, as it is in *Humours* XIV.

^{*} προσδέχεσθαι χρή is omitted by V, which has δεῖ προσδέχεσθαι after τοιαῦτα.

⁸ Littre reads with many MSS. τοιουτέον έδν; neither C' nor Urb has έδν, which appears to be a case of dittography.
9 δκοίην και C' Urb. V, Littre with some authority οἶην.

πολύ καὶ τὰ νοσήματα τοιαῦτα δεῖ προσδέ-

5 χεσθαι.

VIII. Έν τοῖσι καθεστεῶσι καιροῖσι, καὶ ὡραίως τὰ ὡραῖα ἀποδιδοῦσιν,¹ εὐσταθέες καὶ εὐκρινέες² αἱ νοῦσοι γίνονται, ἐν δὲ τοῖσιν 4 ἀκαταστάτοισιν ἀκατάστατοι καὶ δύσκριτοι.³

ΙΧ. Ἐν φθινοπώρω ὀξύταται αί 4 νοῦσοι, καὶ θανατωδέσταται τοὐπίπαν, ἢρ δὲ ὑγιεινότατον,

3 καὶ ηκιστα θανατώδες.

Χ. Τὸ φθινόπωρον τοῖσι φθίνουσι κακόν.

ΧΙ. Περί δὲ τῶν ὡρέων, ἢν μὲν ὁ χειμὼν αὐχμηρὸς καὶ βόρειος γένηται, τὸ δὲ ἔαρ ἔπομβρον καὶ νότιον, ἀνάγκη τοῦ θέρεος πυρετοὺς ὀξέας, καὶ ὀφθαλμίας, καὶ δυσεντερίας γίνεσθαι, μάλιστα τῆσι γυναιξὶ καὶ τοῖς ὑγρὰς ἔχουσι τὰς

8 φύσιας.⁵

ΧΙΙ. *Ην δὲ νότιος ὁ χειμῶν καὶ ἔπομβρος καὶ εὕδιος ⁶ γένηται, τὸ δὲ ἔαρ αὐχμηρὸν καὶ βόρειον, αἱ μὲν γυναῖκες, ἦσιν οἱ τόκοι ⁷ πρὸς τὸ ἔαρ, ἐκ πάσης προφάσιος ἐκτιτρώσκουσιν· αι δ᾽ ἀν τέκωσιν, ἀκρατέα καὶ νοσώδεα τὰ παιδία τίκτουσιν, ὥστε ἢ παραυτίκα ἀπόλλυσθαι, ἢ λεπτὰ καὶ νοσώδεα ζῆν ἐόντα· τοῖσι δὲ ἄλλοισι δυσεντερίαι καὶ ὀφθαλμίαι ξηραὶ γίνονται, τοῖσι δὲ πρεσβυτέροισι κατάρροοι συντόμως ἀπολ-10 λύντες.

4 MV omit ai.

The vulgate text (with M and Urb.) has ħν ωραίως ἀποδιδώσιν. Erm. omits καλ ἀποδιδοῦσιν. Rein. has ἡν/κα ωραίως αἱ ωραι τὰ ωραῖα ἀποδιδόασιν.

² εὐκρινέστατοι C'V; εὐκρινέσταται Urb.; εὐκρινέες Littlé. 2 Urb. has ἀκατάστατα καὶ δύσκριτα καὶ τὰ νοσήματα χίγνονται.

APHORISMS, III. vii.-xii.

tion it has produced, such for the most part will be the diseases that must be expected.

VIII. In seasons that are normal, and bring seasonable things at seasonable times, diseases prove normal and have an easy crisis; in abnormal seasons

diseases are abnormal and have a difficult crisis. IX. It is in autumn that diseases are most acute

and, in general, most deadly; spring is most healthy and least deadly.

X. Autumn is bad for consumptives.

XI. As for the seasons, if the winter be dry and northerly and the spring wet and southerly, of necessity occur in the summer acute fevers, eye diseases and dysentery, especially among women and those with moist constitutions.2

XII. But if the winter prove southerly, rainy and calm, and the spring dry and northerly, women whose confinement is due in the spring suffer abortion on the slightest provocation, or, if they do bear children, have weak and unhealthy offspring, so that they either die at once or live with puny and unhealthy bodies. Among the rest prevail dysentery and dry diseases of the eyes, and, in the case of the old, catarrhs that quickly prove fatal.3

² See Airs, Waters, Places, X. (I. p 98). 3 See Airs, Waters, Places, X (I. p. 100).

7 τόκοι most MSS.; τοκετοί C'.

παθεστεῶσι is difficult to translate. It means "having a regular κατάστασις (constitution)," just as ἀκατάστατος means "having no regular constitution." "Fixed," "established," "regular," are partial but imperfect equivalents.

⁵ So practically all the good MSS M, however, reads kal τοῖσιν ὑγροῖσι τὰς φύσιας.

So C'V. eddinds M; eddicinds Littré. 6 €ĎδιOS

ΧΙΙΙ. Ἡν δὲ τὸ θέρος αὐχμηρὸν καὶ βόρειον γένηται, τὸ δὲ φθινόπωρον ἔπομβρον καὶ νότιον, κεφαλαλγίαι ές του χειμώνα και βήχες, καί 4 Βράγγοι, καὶ κόρυζαι, ενίοισι δε καὶ φθίσιες.

ΧΙΝ. "Ην δὲ βόρειον η ι καὶ ἄνυδρον, τοῖσι μεν ύγροισι τὰς φύσιας 2 καὶ τῆσι γυναιξὶ σύμφορον τοισι δε λοιποισιν ὀφθαλμίαι ἔσονται ξηραί, καὶ πυρετοὶ ὀξέες, καὶ κόρυζαι, ενίοισι 5 δὲ καὶ μελαγχολίαι.

3 νότεροι, καὶ ήσσον 4 θανατώδεες.

ΧVΙ. Νοσήματα δὲ ἐν μὲν 5 τῆσιν ἐπομβρίησιν ώς τὰ πολλά γίνεται, πυρετοί τε μακροί, καὶ κοιλίης ρύσιες, καὶ σηπεδόνες, καὶ ἐπίληπτοι, καὶ ἀπόπληκτοι, καὶ κυνάγχαι ἐν δὲ τοῖσιν αὐχμοῖσι, φθινάδες, ὀφθαλμίαι, ἀρθρίτιδες, 6 στραγγουρίαι, καὶ 6 δυσεντερίαι.

ΧVII. Αί δὲ καθ' ἡμέρην καταστάσιες, αί μὲν βόρειοι τά τε σώματα συνιστάσι, καὶ εὐτονα καὶ εὐκίνητα καὶ εὖγροα ταὶ εὐηκοώτερα ποιέουσι, καὶ τὰς κοιλίας ξηραίνουσι, καὶ τὰ ὅμματα δάκνουσι, εκαὶ περί τὸν θώρηκα ἄλγημα ήν τι

1 % is omitted by C' Urb.

4 For hogov C' has heigta.

Some good MSS., including C', have την φύσιν.
 After κόρυζαι V Urb. and many other MSS. have χρόνιαι: some have πολυχρόνιοι. As the parallel passage in Aire, Waters, Places has πολυχρόνιοι instead of κόρυζαι, some editors would adopt that reading here. But, as Littré points out, the commentary of Theophilus implies κόρυζαι. Evidently there have been efforts to assimilate the text of Aphorisms to that of Airs, Waters, Places. Rein. has defes καλ χρόνιοι, καλ κόρυζαι χρόνιαι

APHORISMS, III. xiii.-xvii.

XIII. If the summer prove dry and northerly, and the autumn rainy and southerly, headaches are common in the winter, with coughs, sore throats, colds and, in some cases, consumption.¹

XIV. But if (the autumn) be northerly and rainless it is beneficial to those with moist constitutions and to women. To the others will come dry eye diseases, acute fevers, colds and, in some cases, melancholia ²

XV. Of the constitutions 3 of the year droughts are, in general, more healthy and less deadly than wet weather.

XVI. The diseases which generally arise in rainy weather are protracted fevers, fluxes of the bowels, mortifications, epilepsy, apoplexy and angina. In dry weather occur consumption, eye diseases, diseases of the joints, strangury and dysentery.

XVII. Of daily constitutions, such as are northerly brace the body, giving it tone and agility, and improving the complexion and the sense of hearing, dry up the bowels and make the eyes tingle, besides

¹ Airs, Wa'ers, Places, I p. 102.

² Arrs, Waters, Places, I p 102. "Melancholia" includes all forms of depression, from true melancholia to mere nervousness

3 The καταστάσιες of a year are those periods which

exhibit definite, well-marked characteristics.

⁴ Galen and Theophilus tell us that many commentators took φθνάδεs as an adjective qualifying δφθαλμίαι, "eye diseases resulting in destruction of the eyes." This is linguistically better than making φθνάδεs equivalent to φθθσεs. M has φθνάδεα

6 kal is omitted by C'M.

⁵ μèν is omitted by many MSS., including Urb.

For εὕχροα V has εὐχροώτερα.
 For δάκνουσι C' has δακρύουσι.

προϋπάρχη, μᾶλλον πονέουσιν αἱ δὲ νότιοι διαλύουσι τὰ σώματα καὶ ὑγραίνουσι, καὶ καρη-βαρίας καὶ βαρυηκοίας καὶ ἰλίγγους ἐμποιέουσιν, ἐν δὲ¹ τοῖσιν ὀφθαλμοῖσι καὶ τοῖσι σώμασι

10 δυσκινησίην, καὶ τὰς κοιλίας ὑγραίνουσιν.

XVIII. Κατὰ δὲ τὰς ὅρας, τοῦ μὲν ἡρος καὶ ἄκρου τοῦ θέρεος, οἱ παίδες καὶ οἱ τούτων ἐχόμενοι τῆσιν ἡλικίησιν ἄριστά τε διάγουσι καὶ ὑγιαίνουσι μάλιστα τοῦ δὲ θέρεος καὶ τοῦ φθινοπώρου, μέχρι μέν τινος οἱ γέροντες τὸ δὲ λοιπόν,² καὶ τοῦ χειμῶνος, οἱ μέσοι τῆσιν τ ἡλικίησιν.

ΧΙΧ. Νοσήματα δὲ πάντα μὲν ἐν πάσησι τῆσιν ὥρησι γίνεται, μᾶλλον δ' ἔνια κατ' ἐνίας

3 αὐτέων καὶ γίνεται καὶ παροξύνεται.

ΧΧ. Τοῦ μὲν γὰρ ἦρος, τὰ μελαγχολικά, καὶ τὰ μανικά,³ καὶ τὰ ἐπιληπτικά, καὶ αἵματος ρύσιες, καὶ κυνάγχαι, καὶ κορύζαι, καὶ βράγχοι, καὶ βῆχες, καὶ λέπραι, καὶ λειχῆνες, καὶ ἀλφοί, καὶ ἐξανθήσιες ἐλκώδεες πλεῦσται, καὶ φύματα, 6 καὶ ἀρθριτικά.

ΧΧΙ. Τοῦ δὲ θέρεος, ἔνιά τε τούτων, καὶ πυρετοὶ συνεχέες, καὶ καῦσοι, καὶ τριταῖοι πυρετοί,⁴ καὶ ἔμετοι, καὶ διάρροιαι, καὶ ὀφ-θαλμίαι, καὶ ὅτων πόνοι, καὶ στομάτων ἑλκώσιες, 5 καὶ σηπεδόνες αἰδοίων, καὶ ἵδρωα.⁵

2 Rein adds τοῦ φθινοπώρου.

3 In M. μελαγχολικά and μανικά are transposed, and there are several minor variants in the less important MSS., the order of the diseases showing considerable confusion.

⁴ This is the reading of C'. Madds καὶ τεταρταίοι, which words, apparently, were not in the texts known to Galen. 128

 $^{^1}$ C' omits 5è, and many MSS., including Urb. V, read $\tau\epsilon.$ Rein has $\tau\epsilon$ 5è.

APHORISMS, III. xvii.-xxi.

aggravating any pre-existing pain in the chest; southerly constitutions relax and moisten the body, bring on heaviness of the head, hardness of hearing and giddiness, make the eyes and the whole body slow to move, and the bowels watery.

XVIII. As for the seasons, in spring and early summer children and young people enjoy the greatest well-being and good health; in summer and part of autumn, the aged; for the remainder of autumn and in winter, the middle-aged.

XIX All diseases occur at all seasons, but some diseases are more apt to occur and to be aggravated at certain seasons.

spring occur melancholia, madness, XX. In epilepsy, bloody flux, angina, colds, sore throats, coughs, skin eruptions and diseases,1 eruptions turning generally to ulcers, tumours and affections of the iounts.

XXI. In summer occur some of the diseases just mentioned, and also continued fevers, ardent fevers, tertians,2 vomiting, diarrhea, eye diseases, pains of the ears, ulcerations of the mouth, mortification of the genitals, sweats.

It is not possible to translate the Greek terms for the various skin diseases, as the modern classification is so different from the ancient We may be sure, however, that $\lambda \epsilon \pi \rho z$ included many diseases besides leprosy.

With the reading of V, "very many tertians."

See Littie's note. V and many other MSS. read maeioros,

which Littré adopts.

5 There are many interesting variants in the latter part of this aphorism. C' has και αιδύων ήδρωτες, and Urb και αίδοίων ίδρωα, with a colon at σηπεδόνες. It gives quite good sense to take these words together, but Galen took aidolwy with σηπεδόνες. V reads ίδρωτες for ίδρωα M omits καί before both σηπεδόνες and ίδρωα, and so supports the other strong testimony that αἰδοίων should go with ίδρωα

ΧΧΙΙ. Τοῦ δὲ φθινοπώρου, καὶ τῶν θερινῶν τὰ 1 πολλά, καὶ πυρετοὶ τεταρταῖοι, καὶ πλανῆτες, καὶ σπλῆνες, καὶ ὕδρωπες, καὶ φθίσιες, καὶ στραγγουρίαι, καὶ λειεντερίαι, καὶ δυσεντερίαι,² καὶ ἰσχιάδες, καὶ κυνάγχαι,³ καὶ ἄσθματα, καὶ εἰλεοί, καὶ ἐπιληψίαι, καὶ τὰ μανικά, παὶ τὰ μελαγχολικά.

XXIII. Τοῦ δὲ χειμῶνος, πλευρίτιδες, περιπλευμονίαι, λήθαργοι, κόρυζαι, βράγχοι, βῆχες, πόνοι 5 πλευρέων, στηθέων, ὀσφύος, κεφαλαλγίαι,

4 ίλιγγοι, ἀποπληξίαι.

XXIV. Έν δε τῆσιν ἡλικίησι τοιάδε συμβαίνει. τοισι μεν σμικροισι και νεογνοισι παιδίοισιν, ἄφθαι, ἔμετοι, βῆχες, ἀγρυπνίαι, 4 φόβοι, ὀμφαλοῦ φλεγμοναί, ἄτων ὑγρότητες.

XXV. Πρὸς δὲ τὸ οδοντοφυεῖν προσάγουσιν, οὕλων ὸδαξησμοί, πυρετοί, σπασμοί, διάρροιαι, μάλιστα ὅταν ἀνάγωσι τοὺς κυνόδοντας, καὶ τοῖσι παχυτάτοισι τῶν παίδων, καὶ ετοῖσι τὰς κοιλίας σκληρὰς ἔχουσιν.9

ΧΧVΙ. Πρεσβυτέροισι δὲ γενομένοισι, παρίσθμια, σπονδύλου τοῦ κατὰ τὸ ἰνίον εἴσω ἄσιες, ¹ο ἄσθματα, λιθιάσιες, ἔλμινθες ¹¹ στρογγύλαι, ἀσ-

1 τà is omitted by V.

3 For κυνάγχαι C' has βράγχαι.

5 πόνοι πλευρέων στηθέων C'V: πόνοι στηθέων πλευρέων.

Urb. and M. M has a colon at πόνων.

² Urb. omits καὶ λειεντερίαι καὶ δυσεντερίαι, and V omits καὶ δυσεντερίαι

Many MSS omit λήθαργοι, and it is not commented on by Galen. It is placed by some MSS, before κόρυζαι, by others after, while a few omit κόουζαι.

⁶ For τοιάδε συμβαίνει V has συμβαίνει τὰ τοιαῦτα.

⁷ For κυνόδοντας C' has καλουμένους κοινοδόντας.

APHORISMS, III. xxii.-xxvi.

XXII. In autumn occur most ¹ summer diseases, with quartans, irregular fevers, enlarged spleen, dropsy, consumption, strangury, lientery, dysentery, sciatica, angina, asthma, ileus, epilepsy, madness, melancholia.

XXIII. In winter occur pleurisy, pneumonia, lethargus, colds, sore throat, coughs, pains in the sides, chest and loins, headache, dizziness, apoplexy.

XXIV. In the different ages the following complaints occur: to little children and babies, aphthae, vomiting, coughs, sleeplessness, terrors, inflammation of the navel, watery discharges from the ears.

XXV. At the approach of dentition, irritation of the gums, fevers, convulsions, diarrhea, especially when cutting the canine teeth, and in the case of very fat children, and if the bowels are hard.²

XXVI. Among those who are older occur affections of the tonsils, curvature at the vertebra by the neck, asthma, stone, round worms, ascarides, warts,

1 With the reading of V, "many."

² That is, have a tendency to constipation. The reading of C' is very interesting. It obviously arose from the apparent inconsistency of saying that diarrhoea occurs in children naturally constipated. So some scribe or commentator changed σκληρὰs ("hard") to ὁγρὰs ("relaxed," "watery") But the point is that children usually constipated become very relaxed in certain circumstances.

^{*} καὶ is omitted by M. This reading would give the sense: "fat babies with a tendency to constipation."

⁹ So V and many other MSS. M has σκληράς before τὰς. Littré says that C' has τὰς κοιλίας σκληρὰς ἔχουσιν; it actually has τὰς κοιλίας ὑγρὰς ἔχουσιν.

¹⁰ For είσω ώσιες M has Ισώσιες and V Ισωώσηες.

¹¹ For έλμινθες C' has έλμινθαι.

καρίδες, ἀκροχορδόνες, σατυριασμοί, χοιράδες,1

5 καὶ τάλλα φύματα.2

ΧΧVII. Τοίσι δε 3 πρεσβυτέροισι καὶ προς την ηβην προσάγουσι, 4 τούτων τὰ πολλά, καὶ πυρετοὶ χρόνιοι μᾶλλον, καὶ ἐκ ῥινῶν αἵματος 4 ῥύσιες.

ΧΧΥΙΙΙ. Τὰ δὲ πλεῖστα τοῖσι παιδίοισι πάθεα κρίνεται, τὰ μὲν ἐν τεσσαράκοντα ἡμέρησι, τὰ δὲ ἐν ἐπτὰ ἔτεσι, τὰ δὲ ⁵ πρὸς τὴν ἤβην προσάγουσιν ὁκόσα ⁶ δ' ἄν διαμείνη τοῖσι παιδίοισι, ⁷ καὶ μὴ ἀπολυθῆ περὶ τὸ ἡβάσκειν, ἡ τοῖσι θήλεσι ⁸ περὶ τὰς τῶν 7 κατιμηνίων ῥήξιας, χρονίζειν εἴωθεν.

ΧΧΙΧ. Τοισι δε νεηνίσκοισιν, αίματος πτύσιες, φθίσιες, πυρετοι όξέες, επιληψίαι, και τάλλα

3 νοσήματα, μάλιστα δὲ τὰ προειρημένα.9

ΧΧΧ. Τοῖσι δὲ ὑπὲρ τὴν ἡλικίην ταὐτην, ἄσθματα, πλευρίτιδες, περιπλευμονίαι, λήθαργοι, φρενίτιδες, καῦσοι, διάρροιαι χρόνιαι, χολέραι, ξουσεντερίαι, λειεντερίαι, αἰμορροίδες.

ΧΧΧΙ. Τοΐσι δὲ πρεσβύτησι. 10 - δύσπνοιαι, κατάρροιαι 11 - χωδεες, στραγγουρίαι, δυσουρίαι, ρων πόνοι, νεφρίτιδες, ἴλιγγοι, ἀποπληξίαι,

Before χοιράδες M has στραγγουρίαι.

2 After φύματα Littré has μάλιστα δὲ τὰ προειρημένα (from aphorism XXIX?)

³ After δè M has ἔτι (and, after τούτων, τε).

4 Erm omits καὶ . . . προσάγουσι.

5 After δè C' Urb. add καὶ.
6 For ὁκόσα M has ὅσα.

⁷ After παιδίοισι V adds πάθεα.

* τοῖσι θήλεσι many MSS., including Urb. and V (with και for ħ): τῆσι θηλείησι Littré with two MSS.

For προειρημένα V has εἰρημένα.

APHORISMS, III. xxvi.-xxxi.

swellings by the ears,1 scrofula and tumours

generally.

XXVII. Older children and those approaching puberty suffer from most of the preceding maladies, from fevers of the more protracted type and from bleeding at the nose.

XXVIII Most diseases of children reach a crisis in forty days, in seven months, in seven years, at the approach of puberty. But such as persist among boys without ceasing at puberty, or, in the case of girls, at the commencement of menstruation, are wont to become chronic.

XXIX. Young men suffer from spitting of blood, phthisis, acute fevers, epilepsy and the other diseases, especially those mentioned above.

XXX. Those who are beyond this age suffer from asthma, pleurisy, pneumonia, lethargus, phrenitis, ardent fevers, chronic diarrhœa, cholera, dysentery, lientery, hemorrhoids.

XXXI. Old men suffer from difficulty of breathing, catarrh accompanied by coughing, stranguly, difficult micturition, pains at the joints, kidney

¹ σατυριασμός, the word given by all our MSS, is very difficult. None of the ancient commentators, with the exception of one scholast, refer to it. Littré thinks that it means the same as σατυρισμοί, a word explained in the Galenic Glossary as meaning tumours by the ears. I have adopted this explanation, but at the same time I am not at all sure that satyliasis is not referred to. So Lallemand and Pappas, who would transpose σατυρισσμοί and place it next to ἀσκαρίδες, on the ground that the latter often cause the former.

11 κατάρροιαι C'V: κατάρροοι οτ κατάρροι most MSS.

¹⁰ For πρεσβύτησι many MSS., including C', read πρεσβυτέροισι.

καχεξίαι, ξυσμοί τοῦ σώματος όλου, ἀγρυπνίαι, κοιλίης καὶ ὀφθαλμῶν καὶ ῥινῶν ὑγρότητες, 6 ἀμβλυωπίαι, γλαυκώσιες, βαρυηκοίαι.

XIII. Πρὸς τοὺς ἐλλεβόρους ⁵ τοῖσι μὴ ἡηιδίως ἄνω καθαιρομένοισι, πρὸ τῆς πόσιος προυγραίνειν

3 τὰ σώματα πλείονι τροφῆ καὶ ἀναπαύσει.

ΧΙΫ. Ἐπὴν πίη τις ἐλλέβορον, πρὸς μὲν τὰς κινήσιας τῶν σωμάτων μᾶλλον ἄγειν, πρὸς δὲ τοὺς ὅπνους καὶ τὰς ἀκινήσιας, ὅ ἤσσον Ἦχοις δὲ καὶ ἡ ναυτιλίη, ὅτι κίνησις τὰ σώματα 5 ταράσσει. 9

ΧV. Ἐπὴν βούλη μᾶλλον ἄγειν τὸν ελλέβορον,

² For δκόσοισι V has οίσι. This variation is very common

in Aphorisms and need not be noticed again

3 V has και οί περι δμφαλόν πόνοι.

¹ ὑποστέλλεσθαι is the reading of C'. Most MSS. have some form of the participle, and Littré follows slight MS. authority, supported, however, by Galen's comment, in adding τὰς ἄνω after ὑποστελλομένους. The authority against τὰς ἄνω is overwhelming; it is omitted by C'MV and most less important MSS. Urb has κάτω θέρεος τοὺς φθινώδεας ὑποστελλομένους. Rein. reads τὰς ἄνω with a comma at ὑτοστελλομένους.

V has πωs after άλλωs, and C' reads μήτε ὑπὸ άλλων.
 τοῖσι δι' ἐλλεβόρου Erm : πρὸς τοὺς δι' ἐλλεβόρου Rein

APHORISMS, IV. viii.-xv.

VIII. Be careful in purging those with a tendency

to consumption.

IX. By the same method of reasoning apply the opposite procedure to those who are of a melancholic temperament, and purge downwards freely.

X. In very acute cases purge on the first day should there be orgasm, for in such cases delay

causes harm.

XI. Those who suffer from colic, pains about the navel, and ache in the loins, removed neither by purging nor in any other way, finish with a dry dropsy.¹

XII. It is bad to purge upwards in winter those

whose bowels are in a state of lientery.

XIII In giving the hellebores, those who are not easily purged upwards should, before the draught, have their bodies moistened by increased food and rest.

XIV. When one has taken hellebore, one should be made to increase the movements of the body, and to include less in sleep and rest. Sailing on the sea too proves that movement disturbs the body.

XV. When you wish hellebore to be more efficacious, move the body; when you wish the

¹ See Coan Prenotions, 298 A "dry dropsy" is, apparently, the dropsy called "tympanites," so named "because in it the belly, when struck, sounds like a drum (tympanum)" (Adams)

⁷ For πρὸς μὲν . ἦσσον Rein, bas ἡν μὲν βούλη μᾶλλον ἄγειν τὸν ἐλλέβορον, κινεῖ τὸ σῶμα

9 C' has κίνησις πλείω τὸ σῶμα ταράσσει

⁶ τὰς ἀκινήσιας C'V and many other MSS The accent is sometimes written -ίας μὴ κινήσιας Littre and M.

⁸ Littre's L has vaurin (sea sickness), a reading noted by Galen

κίνει τὸ σῶμα· ἐπὴν δὲ παῦσαι,¹ ὕπνον ποίει, καὶ 3 μὴ κίνει.

ΧVI. Ἐλλέβορος ἐπικίνδυνος τοῖσι τὰς σάρκας

2 ύγιέας έχουσι, σπασμον γαρ έμποιεί.

XVII. 'Απυρέτω 'έόντι, 'ἀποσιτίη, καὶ καρδιωγμός, καὶ σκοτόδινος, καὶ στόμα ἐκπικρούμενον, 3 ἄνω φαρμακείης δεῖσθαι σημαίνει.

ΧVIII. Τὰ ὑπὲρ τῶν φρενῶν ὀδυνήματα ἄνω φαρμακείης δεῖσθαι² σημαίνει ὁκόσα δὲ κάτω,

3 κάτω.

XIX. 'Οκόσοι ἐν τῆσι φαρμακοποσίησι μὴ διψῶσι,³ καθαιρόμενοι οὐ παύονται πρὶν ἢ διψή-3 σωσιν.⁴

XX. `Απυρέτοισιν ἐοῦσιν, ἢν γένηται⁵ στρόφος, καὶ γονάτων βάρος, καὶ ὀσφύος ἄλγημα, κάτω

3 φαρμακείης δείσθαι σημαίνει.

2 φαρμακείης (or φαρμακίης) δέεσθαι (or δείσθαι) C'V and

many other MSS φαρμακίην (without δεῖσθαι) Μ. ³ διψῶσι MV · διψήσωσι C'

διψώσι Μ.Υ · διψήσωσι C'
 For διψήσωσιν V has διψήσουσιν

After alμα some MSS., with Uib., add μέλαν.

7 Erm Rein mark a hiatus at κάκιστα.

⁹ πλείω και V. C' Urb M omit.

¹ For παῦσαι C' has παύειν Rein has ἢν δὲ παύεσθαι 8ούλη for ἐπὴν . . . παῦσαι.

⁵ γένηται most MSS., including C' and Urb. . γίγνηται V . γίνηται Μ.

⁸ After χρώματα some MSS. add τῶν ὑποχωρημάτων.

APHORISMS, IV. xv.-xxi.

effects to stop, make the patient sleep and do not move him.

XVI. Hellebore is dangerous to those who have

healthy flesh, as it produces convulsions.

XVII. When there is no fever, loss of appetite, heartburn, vertigo, and a bitter taste in the mouth indicate that there should be upward purging.

XVIII. Pains above the diaphragm indicate a need for upward purging; pains below indicate a

need for downward purging.

XIX. Those who suffer no thirst while under the action of a purgative, do not cease from being purged

until they have become thirsty.

XX. In cases where there is no fever, should colic come on, with heaviness of the knees and pains in the loins, need is indicated of purging downwards.

XXI. Stools that are black like (black) blood, coming spontaneously, either with or without fever, are a very bad sign, and the more numerous and the more evil the colours, the worse the sign. When caused by a purge the sign is better, and it is not a bad one when the colours are numerous 2

¹ Even though μέλαν is omitted from the text, it is clear

that it must be understood

11 πλείω omitted by C' (χρώματα πλείονα V)

² Littré suggests that in this aphorism χρώματα does not mean "colours," but "shades of black." Such an interpretation makes the aphorism more homogeneous, but no ancient commentator mentions it.

¹⁰ η omitted by C' For κάκιον Rein has καl κανόν

¹² For πονηρόν M has πονηρά. Littré thinks that οὐ πονηρόν is a gloss.

ΧΧΠ. Νοσημάτων όκόσων ἀρχομένων, ἢν 1 2 χολη μέλαινα η άνω η κάτω 2 υπέλθη, θανάσιμον.

ΧΧΙΙΙ. 3 Οκόσοισιν έκ νοσημάτων όξέων ή 4 πολυχρονίων, $\mathring{\eta}$ $\dot{\epsilon}$ κ τραυμάτων, $\mathring{\eta}$ \mathring{a} λλως 5 λελεπτυσμένοισι ⁶ χολή μέλαινα ή ⁷ όκοιον αίμα 4 μέλαν ε ὑπέλθη, τῆ ὑστεραίη ἀποθνήσκουσιν.

8 M has μέλαν αίμα Rein. reads μέλαν αν.

* μελαίνης χολης V Urb S.

10 ein C'V and many other MSS.

11 καὶ is omitted by M and many other MSS. C' has τὰ δὲ μέλαινα. Rein. has ἢν ἢ μέλανα τὰ.
¹² For ὑποχωρέοντα C' has ὑποχωρήματα.

13 Dietz (from the reading ὁκοῖαι, which Littré has) suggests δκοΐον αί C' with many other MSS., including S and Q, have δκοῖον

14 C' has ὑποχωρέουσι Other readings are ὑποχωρῶσι and

ύποχωρέωσι.

15 After θανάσιμων C' adds οί ύπο τεταρταίων εχόμενοι ύπο

APHORISMS, IV. xxii.-xxviii.

XXII. Should black bile be evacuated at the beginning of any disease, whether upwards or down-

wards, it is a mortal symptom.

XXIII. When patients have become reduced 1 through disease, acute or chronic, or through wounds, or through any other cause, a discharge of black bile, or as it were of black blood, means death on the following day.²

XXIV. A dysentery beginning with black bile is

mortal.

XXV. Blood evacuated upwards, whatever be its nature, is a bad sign; but evacuated downwards it is a good sign, and so also black stools ³

XXVI. If a patient suffering from dysentery discharge from the bowels as it were pieces of flesh, it

is a mortal sign.

XXVII When in fevers from whatsoever source there is copious hemorrhage, during convalescence the patients suffer from loose bowels.

XXVIII. When the stools are bilious, they cease

1 "Attenuated" (Adams).

² There does not seem to be any reference, as Adams apparently thinks there is, to the "black vomit" of yellow

fever, a disease unknown to Hippocrates.

³ Galen, seeing the inconsistency of this apholism with No XXI, would interpret the latter half as referring to "bleeding piles." It is, however, quite possible that the two aphorisms come from different sources, and that the inconsistency is a real one

16 After πλήθος C' adds αίματος.

20 V has παύονται,

σπασμών οὐ πάνυ τι ἁλίσκονται εἰ δὲ καὶ ἁλίσκονται πρότερον καὶ ἐπιγένηται τεταρταῖος, παύονται.

4 ai C' Urb Q Most MSS. omit

⁵ Two MSS. at least omit this aphorism

V has (for δε ἀνισταμένοισιν) διανισταμένοισιν.
The MSS, show a great variety of readings. V has πονέει τι, Μ τί πονέσπι, C ήν τι πονήση, Q ήν τι πονήσωσιν.

s ai C'Q and many other MSS But many omit.

¹ C' omits καὶ το παύονται. V before παύεται has διαχωρη-

⁹ προπεπονηκός τι Urb προπεπονηκώς τί MV The reading of C' and of several other MSS, προπεπονηκώς τις, is very attractive, and may be right.

APHORISMS, IV. xxviii.-xxxv.

if deafness supervenes; when there is deafness, it ceases when bihous stools supervene.

XXIX. When rigors occur in fevers on the sixth

day the crisis is difficult

XXX. Diseases with paroxysms, if at the same time as the paroxysm ceases on one day it returns on the next, have a difficult crisis.¹

XXXI. When in fevers the patient is prostrated with fatigue, the abscessions form at the joints, especially at those of the jaws.

XXXII. If convalescents from diseases have pain

in any part, the abscessions form in that part.

XXXIII. But if previous to an illness a part be in a state of pain, the disease settles in that part

XXXIV. If a patient suffering from fever, with no swelling in the throat, be suddenly seized with

suffocation, it is a deadly symptom.

XXXV. If the neck of a fever patient suddenly become distorted, and to swallow be a matter of difficulty, there being no swelling, it is a deadly symptom.

¹ Galen adopts a different interpretation. He explains "the crisis is difficult if the paroxysm comes on regularly at the same hour, whatever be the hour at which it left off on the preceding day ($\hbar \nu \ \hbar \nu \ \delta \rho \eta \nu \ \delta \phi \hat{\eta}$)"

11 For ἐπιγένηται M has ἐπιστῆι.

13 ἀποστραφή Rein

15 C' omits this aphorism.

¹⁰ V has ή νοῦσος στηρίζει.

¹² εξαίφνης is omitted by V and many other MSS.

¹⁴ After corros most MSS, have ἐν τῷ τραχήλφ; Galen's commentary implies that he did not know this reading.

ΧΧΧVI. 'Ιδρώτες πυρεταίνοντι ἢν ἄρξωνται, ἀγαθοὶ τριταῖοι, καὶ πεμπταῖοι, καὶ ἐβδομαῖοι, καὶ ἐναταῖοι, καὶ ἐνδεκαταῖοι, καὶ τεσσαρεσκαιδςκαταῖοι, καὶ ἐπτακαιδεκαταῖοι, καὶ μιἢ καὶ εἰκοστἢ, καὶ ἔβδόμη καὶ εἰκοστἢ, καὶ τριηκοστἢ πρώτη, καὶ τριηκοστἢ τετάρτη. οὖτοι γὰρ οἱ ἱδρῶτες νούσους κρίνουσιν οἱ δὲ μὴ οὖτως γινόμενοι πόνον σημαίνουσι καὶ μῆκος νούσου 9 καὶ ὑποτροπιασμούς.²

XXXVII. Οἱ ψυχροὶ ἱδρῶτες, σὺν μὲν ὀξεῖ πυρετῷ γινόμενοι, θάνατον, σὺν πρηυτέρῳ δέ,3

3 μήκος νούσου σημαίνουσιν.

ΧΧΧΥΙΙΙ Καὶ ὅκου ἔνι τοῦ σώματος ίδρώς,

2 ἐνταῦθα φράζει τὴν νοῦσον.

ΧΧΧΙΧ. Καὶ ὅκου ⁴ ἔνι τοῦ σώματος θερμὸν

2 ή ψυχρόν, ἐνταῦθα ή νοῦσος.

ΧΙ. Καὶ ὅκου ἐν ὅλφ τῷ σώματι μεταβολαί,⁵ καὶ ἢν τὸ σῶμα ψύχηται, ἢ ⁶ αὖθις θερμαίνηται, ἢ χρῶμα ἔτερον ἐξ ἐτέρου γίνηται, πρῶκος νούσου 4 σημαίνει.

ΧΙΙ. Ίδρως πολύς εξ υπνου ἄνευ τινός αἰτίης φανερης γινόμενος, ετὸ σῶμα σημαίνει ὅτι πλείονι τροφη χρηται ἡν δὲ τροφην μη λαμβάνοντι 4 τοῦτο γίνηται, σημαίνει ὅτι κενώσιος δεῖται.

1 The MSS show several slight variations in the numbers, but no MS. mentions the fourth day, an important omission, as Galen notices Q has και είκοστοι έβδομοι και τριακοστοί πρώτοι και τριακοστοί έβδομοι και τεσσαραγοστοί

2 υποτροπιασμόν Uib. and many other MSS. υποστροφήν

τοῦ νοσήματος καὶ ἀνατροπιασμόν Č'

³ Urb. and many other MSS place δè after σύν

For δκου V has δπη.

5 For μεταβολαί C' has διαφοραί and omits καί.

⁶ For η VQ have καί C' reads εί.

APHORISMS, IV. xxxvi.-xli.

XXXVI. Sweats in a fever case are beneficial if they begin on the third day, the fifth, the seventh, the ninth, the eleventh, the fourteenth, the seventeenth, the twenty-first, the twenty-seventh, the thirty-first and the thirty-fourth, for these sweats bring diseases to a crisis Sweats occurring on other days indicate pain, a long disease and relapses.

XXXVII. Cold sweats, occurring with high fever, indicate death; with a milder fever they indicate a

protracted disease.

XXXVIII And on whatever part of the body there is sweat, it means that the disease has settled there.

XXXIX. And in whatever part of the body there

is heat or cold, in that part is the disease.

XL And where there are changes in the whole body, for instance, if the body grow cold, or, again, grow hot, or if one colour follow on another, it signifies a protracted disease.¹

XLI. Copious sweat, occurring after sleep without any obvious cause, indicates that the body has a surfeit of food But should it occur to one who is not taking food, it indicates need of evacuation.

¹ The sense is a little clearer if, with C', we omit $\kappa \alpha l$, and with ∇Q read $\kappa \alpha l$ for \hbar before $\alpha b \theta is$. "if the body grow cold and hot by turns."

η γένηται Urb · γίγνηται V. Other MSS, have γίγνοιτο or γίνοιτο

The MSS show many slight variations, some reading φανερής: others, among them M, έτερής: while V has άνευ τινός αlτίου γινομένου. Galen notes the variants φανερής, έτερής. Urb. has άνευ φανερής αlτίης έτέρης γινόμενος— φανερής (in another hand) over τινός. Rein has τροφήν λαμβάνοντι after γινόμενος.

ΧΙΙΙ. Ίδρως πολύς θερμός $\mathring{\eta}$ ψυχρός αἰεὶ ρέων, $\mathring{\delta}$ μέν $\mathring{\psi}$ ψυχρός, μέζω, $\mathring{\delta}$ δὲ $\mathring{\delta}$ θερμός,

3 ελάσσω 4 νούσον σημαίνει.

ΧΙΙΙΙ. Οἱ πυρετοὶ ὁκόσοι, μὴ διαλείποντες, διὰ τρίτης ἰσχυρότεροι γίνονται, επικίνδυνοι. ότω δ' αν τρόπω διαλείπωσι, σημαίνει ότι 4 ακίνδυνοι.

ΧLΙΥ. 'Οκόσοισι 6 πυρετοί μακροί, τούτοισι

2 φύματα ή ές τὰ ἄρθρα πόνοι έγγίνονται.

ΧLV. Οκόσοισι ή φύματα ές τὰ ἄρθρα ή πόνοι εγγίνονται εκ πυρετών, ούτοι σιτίοισι 3 πλείοσι χρέονται. XLVI. "Ην ρίγος ἐμπίπτη ⁸ πυρετῷ μὴ δια-

2 λείποντι, ηδη ασθενεί εόντι, 10 θανάσιμον.

ΧΕΝΙΙ. Αἱ ἀποχρέμψιες ἐν τοῖσι πυρετοῖσι τοίσι μη διαλείπουσιν, αι πελιδναί, και αίματώδεες, καὶ δυσώδεες, καὶ χολώδεες, 11 πᾶσαι 12 κακαί ἀποχωρέουσαι δὲ καλώς, ἀγαθαί καὶ κατὰ τὴν διαχώρησιν,13 καὶ κατὰ τὰ οὖρα· ἡν

1 MV omit μέν.

² For μέζω the MSS have μείζων, μείζω, πλείω, πλέον, πλείων.

3 δè is omitted by V.

⁴ For ἐλάσσω a very great number of MSS., including MVQ, read ἐλάσσων, the -ν coming from νοῦσον which follows. C' has ξλασσον.

5 Before ἐπικίνδυνοι C'Q have καί. 6 For δκόσοισι Urb. Q have δκόσοι

7 So C'. V has ἡ φύματα ἡ εἰς τὰ ἄρθρα πόνοι, Urb. φύματα ή πόνοι γίνονται, Μ φύματα ès τὰ ἄρθρα ή γίγνονται After πυρετών a few MSS. add μακρῶν (from Galen's commentary).

8 έμπίπτη Littré's A'L1 έμπίπτει C'V: έπιπίπτηι Μ· έπι-

TIATH Urb.

S C' has ἐν πυρετῶ μὴ διαλίποντι.

APHORISMS, IV. XLII.-XLVII.

XLII. Copious sweat, hot or cold, continually running, indicates, when cold, a more serious disease.

and when hot, a less serious one.

XLIII. Such fevers as, without intermitting, grow worse every other day, are dangerous; intermittence of any kind2 indicates that there is no danger.

XLIV. Sufferers from protracted fevers are

attacked by tumours or by pains at the joints.

XLV. Those who, after fevers, are attacked either by tumours or pains at the joints, are taking too much food.

XLVI. If rigor attack 3 a sufferer from a continued fever, while the body is already weak,4 it is a fatal

sign.

XLVII In continued fevers, expectorations that are livid, bloody, fetid, or bilious are all bad, but if properly evacuated they are favourable. It is the same with stools and urine; for if some suitable

1 These are malignant tertians, "semitertians," as they were called in ancient times.

² That is, malaria of the mild, intermittent type

3 Littré's view, that Galen's distinction between eminéon and ἐμπίπτη refers to the tenses rather than to the prefixes έπι- and έμ-, is probably right.

4 I have printed the harder reading, though the more regular reading of C' may be correct. The sense is the same in either case.

12 ἐπιστᾶσαι μέν Erm. · στᾶσαι Rein.

APHORISMS, IV. XLVII.-LIII.

excretion does not take place through these channels it is a bad sign.1

XLVIII. In continued fevers, if the external parts be cold but the internal parts burning hot, while the patient suffers from thirst, it is a fatal sign.²

XLIX. In a continued fever, if the patient's lip, eye, eye-brow or nose be distorted, if sight or hearing fail, while the body is already in a weak state—whatever of these symptoms show themselves, death is near.

L. When in a continued fever occur difficulty of breathing and delirium, it is a fatal sign.

LI. In fevers, abscesses that are not resolved at

the first crisis indicate a protracted disease.

LII When in fevers or in other diseases patients weep of their own will, it is nothing out of the common; but it is rather so when they weep involuntarily.

LIII. When in fevers very viscous matter forms on the teeth, the fevers become more severe.

¹ The reading noticed by Galen, which omits $μ_η$, would mean that if the secretions be substances that the body requires for health (τῶν συμφερόντων) evacuation will only do harm. The emendations of Ermerins and Reinhold remove the difficulties of meaning from this aphorism, and one or other is probably right. See VII lxx. The meaning would be . "are bad if suppressed, but if properly evacuated, etc."

² See Coan Prenotions, 115.

5 ἐνοχλουμένω MV. M places this aphorism after LVIII.

V omits αν. C' has ην. τοῖσι omitted by C'Q.

8 After νόσημα V has τὰ ἐν ἀρτίησιν ἡμέραις κρινόμεναι δύσκριτα καὶ φιλυπόστροφα. Μ τὰ ἐναρτίηισι κρινόμενα.

¹ βραχέαι C': βραχεία Urb. : βραχείαι S.

APHORISMS, IV. LIV.-LXII.

- LIV. Whenever in ardent ¹ fevers dry coughs persist, causing slight irritation, ² there is not much thirst.
- LV. Fevers following buboes are all bad except ephemerals.³
- LVI. Sweat supervening on fever, without the fever's intermitting, is a bad sign; for the disease is protracted, and it is a sign of excessive moisture.

LVII Fever supervening on a patient's suffering from convulsion or tetanus, removes the disease.

LVIII. A sufferer from ardent fever is cured by the supervening of a rigor.

LIX. An exact tertian reaches a crisis in seven periods at most.⁴

LX. When in fevers there is deafness, if there be a flow of blood from the nose, or the bowels become disordered, it cures the disease.

LXI. If a fever does not leave the patient on the

odd days it is usual for it to relapse.

LXII. When jaundice supervenes in fevers before seven days it is a bad sign, unless there be watery discharges by the bowels

1 "Ardent" fevers were a kind of remittent malaria

² Adams translates · "with a tickling nature with slight expectoration."

3 "Ephemerals" are fevers lasting only about a day.

⁴ The "exact" tertian is malaria with an access every other day. So the aphorism means that the tertian does not last more than a fortnight.

⁵ γένηται C' Urb V.: ἢι Μ.
6 For οὐκ ἀγαθόν Μ has κακόν.

⁷ This aphorism is omitted by C'.

⁸ This aphorism in Urb. and several other MSS. comes after LXVII.

APHORISMS, IV. LXIII.-LXX.

LXIII. Fevers in which a rigor occurs each day

are resolved each day.

LXIV. In fevers, when jaundice supervenes on the seventh day, on the ninth, on the eleventh, or on the fourteenth, it is a good sign, unless the right hypochondrium become hard. Otherwise it is not a good sign.

LXV. In fevers, great heat about the bowels and

heartburn are a bad sign

LXVI. In acute fevers, convulsions and violent pains in the bowels are a bad sign

LXVII. In fevers, terrors after sleep, or con-

vulsions, are a bad sign.

LXVIII. In fevers, stoppage of the breath is a

bad sign, as it indicates a convulsion.

LXIX When the urine is thick, full of clots, and scanty, fever being present, a copious discharge of (comparatively) thin urine coming afterwards gives relief. This usually happens in the case of those whose urine contains a sediment from the onset or shortly after it

LXX. In cases of fever, when the urine is turbid, like that of cattle, headaches either are, or will be, present

After πυρετοΐσιν C' adds τοῖs ὀξέσι.

11 This aphorism in M comes after LXV.

¹⁰ For φόβοι ή C' has πόνοι και σπασμοί. Galen mentions πόνοι as a variant of φόβοι, adding that either reading makes good sense

¹ V reads τῆ τετάρτη ἴσχει ἐπινέφελον καὶ ἐρυθρὸν τὸ οδρον καὶ τὰ ἄλλα Urb puts τῆ τετάρτη before ἐπινέφελον, and instead of τῆ τετάρτη C' has ἤ.

APHORISMS, IV. LXXI.-LXXVII.

LXXI. In cases that come to a crisis on the seventh day, the patient's urine on the fourth day has a red cloud in it, and other symptoms accordingly.

LXXII Transparent, colourless 1 urine is bad.

It appears mostly in cases of phrenitis.2

LXXIII. When there are swelling and rumbling in the hypochondria, should pain in the loins supervene, the bowels become watery, unless there be breaking of wind or a copious discharge of urine. These symptoms occur in fevers.

LXXIV. When an abscession to the joints is to be expected, the abscession may be averted by an abundant flow of thick, white urine, like that which in certain prostrating fevers begins on the fourth day.³ And if there is also nasal hemorrhage the disease is very quickly resolved.

LXXV Blood or pus in the urine indicates

ulceration of the kidneys or bladder

LXXVI. When the urine is thick, and small pieces of flesh-like hairs pass with it, it means a secretion from the kidneys 4

LXXVII. When the urine is thick, and with it is

¹ So Littré from the commentary of Galen. Perhaps, however, λευκά does mean "white."

² The reading ἡν ἐπιφαίνηται would mean "bad, especially

when it appears in cases of phrenitis."

3 Adams translates τεταρταίοισιν "quartans." The other meaning seems more probable here Adams takes γινόμενον with λευκόν, "becoming white."

4 Similar propositions occur in Nature of Man, XIV.

9 V has τὰ ἄρθρα and C' τἄρθρα

11 Kal C' Urb.

ιρεια ⁵ ἐκφύεται Ο΄

APHORISMS, IV. LXXVII.-LXXXIII.

passed as it were bran, this means psoriasis of the bladder.1

LXXVIII. When a patient has a spontaneous discharge of blood and urine, it indicates the breaking of a small vein in the kidneys.

LXXIX. When the urine contains a sandy sedi-

ment there is stone in the bladder.

LXXX. If there be blood and clots in the urine, and strangury be present, should pain attack the hypogastrium and the perineum, the parts about the bladder are affected.²

LXXXI. If the urine contain blood, pus and scales, and its odour be strong, it means ulceration of the bladder.

LXXXII. When tumours form in the urethra, should these suppurate and burst, there is relief.³

LXXXIII. When much urine is passed in the night, in means that the bowel-discharges are scanty.

¹ Similar propositions occur in Nature of Man, XIV.

² See Aphorisms, VII. xxxix.

³ Or, "it means a cure."

⁶ C' has ἐκ νύκτορ (perhaps as one word), Urb. ἐκ νύκτωρ, a few MSS ἐκ νυκτός.

⁷ Before σημαίνει Urb. has ἔσεσθαι

ТМНМА ПЕМПТОН

After σπασμὸς C' adds ħ λυγμός.

² For θανάσιμον C' has κακόν.

³ τις 1s placed here by Urb. M, but after μεθύων by C'V.

⁴ τέτρασιν C' Urb.
 ⁵ Several inferior MSS. omit τὰ πολλὰ, an omission noticed by Galen.

APHORISMS, V. 1.-x.

FIFTH SECTION

Convulsion after hellebore is deadly.¹

II. A convulsion supervening upon a wound is deadly 1

III. Convulsion or hiccough, supervening on a

copious flux of blood, is a bad sign.

IV Convulsion or hiccough supervening on ex-

cessive purging, is a bad sign

V. If a drunken man suddenly become dumb, he dies after convulsions, unless he falls into a fever, or unless he lives to the time when the effects of intoxication disappear, and recovers his voice

VI. Those who are attacked by tetanus either die

in four days or, if they survive these, recover.

VII. Fits that occur before puberty admit of cure,² but if they occur after the age of twenty-five they usually last until death.

VIII. Pleurisy that does not clear up in fourteen days results in empyema.

IX. Consumption³ occurs chiefly between the ages of eighteen and thirty-five

X. Those who survive angina, should the disease

2 Or "change," "modification"

🤻 φθίσις γίνεται Μ : φθίσηες μάλιστα γίγσονται V.

¹ The word θανάσιμον is said by the commentators to mean here "dangerous" In the next aphorism tetanus is obviously referred to, and θανάσιμον must mean at least "very often fatal."

³ Aphorisms IX.-XV. have close parallels in Coan Prenotions.

Our MSS show various readings—μεθίσταται, μεθίστανται, περίσταται, περίστανται. Littré reads καθίσταται.

πλεύμονα αὐτοῖσι τρέπεται,¹ ἐν ἑπτὰ ἡμέρησιν ἀποθνήσκουσιν ἡν δὲ ταύτας διαφύγωσιν, ἔμπυοι

4 γίνονται.

ΧΙ. Τοίσιν ὑπὸ τῶν φθισίων ἐνοχλουμένοισιν, ἢν τὸ πτύσμα, ὅ τι ἀν ἀποβήσσωσι, βαρὰ ὅζῃ ἐπὶ τοὺς ἄνθρακας ἐπιχεόμενον, καὶ αἱ τρίχες 4 ἀπὸ ² τῆς κεφαλῆς ῥέωσι, θανατῶδες.3

ΧΙΙ. Ὁκόσοισι φθισιῶσιν αὶ τρίχες ἀπὸ τῆς κεφαλῆς ρέουσιν, οὖτοι, διαρροίης ἐπιγενομένης,

3 ἀποθνήσκουσιν.

ΧΠΠ. 'Οκόσοι αΐμα ἀφρῶδες ἀναπτύουσι,4 2 τούτοισιν ἐκ τοῦ πλεύμονος ἡ ἀναγωγὴ γίνεται.⁵

ΧΙΥ. Υπό φθίσιος έχομένω διάρροια έπιγενο-

2 μένη, θανατῶδες.

XV. 'Οκόσοι ἐκ πλευρίτιδος ἔμπυοι γίνονται, ην ἀνακαθαρθώσιν ἐν τεσσαράκοντα ημέρησιν, ἀφ' ης ὰν ἡ ῥηξις γένηται, παύονται ἡν⁶ δὲ 4 μή, ἐς φθίσιν μεθίστανται.

XVI. Τὸ θερμὸν βλάπτει ταῦτα πλεονάκις χρεομένοισι, σαρκῶν ἐκθήλυνσιν, νεύρων ἀκράτειαν, γνώμης νάρκωσιν, αἰμορραγίας, λειπο-

4 θυμίας, ταθτα οἶσι θάνατος.8

XVII. Τὸ δὲ ψυχρόν, σπασμούς, τετάνους, 2 μελασμούς, ῥίγεα πυρετώδεα.

2 C' has êκ.
 3 C' has θανάσιμον
 4 For ἀναπτύουσι V has ἀνεμέουσι and Μ ἀνεμέωσι

⁶ For ħν V has εl.

¹ ès τὸν πνεύμονα τρέπεται αὐτέοισι καὶ C'. εἰς τὸν πνεύμονα τουτέοισι τρέπεται καὶ Urb: εἰς τὸν πλεύμονα αὐτέον τρέπεται καὶ V. ἐς τὸν πλεύμονα αὐτέον τρέπεται καὶ M. Littié with two inferior MSS transposes καὶ to before ἐς. Theophilus says that this alteration is necessary to the sense, and it seems to be the reading of Galeu.

⁵ V reads τουτέοισιν ή αναγωγή γίνεται έκ τοῦ πλεύμονος.

APHORISMS, V. x.-xvii.

turn to the lungs, die within seven days, or, should they survive these, develop empyema.¹

XI. In patients troubled with consumption, should the sputa they cough up have a strong ² smell when poured over hot coals, and should the hair fall off from the head, it is a fatal symptom.

XII. Consumptive patients whose hair falls off from the head are attacked by diarrhoea and die³

XIII. When patients spit up frothy blood, the discharge comes from the lungs.

XIV. If diarrhoea attack a consumptive patient it

is a fatal symptom.

XV. When empyema follows on pleurisy, should the lungs clear up within forty days from the breaking, the illness ends; otherwise the disease passes into consumption.

XVI. Heat produces the following harmful results in those who use it too frequently: softening of the flesh, impotence of the muscles, dullness of the intelligence, hemorrhages and fainting, death ensuing in certain of these cases.

XVII. Cold produces convulsions, tetanus, blacken-

ing, feverish rigors 4

¹ Or "become purulent." So Adams (in notes)

2 Or "offensive," "fetid '

³ So Littré, who says that to translate "if dialihoea supervenes" is inconsistent with XIV.

"Blackening" will include "mortification," but is not

to be limited to it.

7 After ταῦτα C' has τοῖσι, which Urb. places over πολλάκις, read by it for πλεονάκις. Rein. has a colon at ταῦτα.

8 Urb has γνώμης νάρκωσιν and ταῦτα οἶσι θάνατος in the margin. Galen nototices four variants for the end of this aphorism: τούτοισι θάνατος, ταῦτα, ἐφ' οἶς δ θάνατος, ταῦτα οἶσι θάνατος, ταῦτα εἰς θάνατον. Rein. ἐς θάνατον. Query: ἔστιν οἶσι

XVIII. Τὸ ψυχρὸν πολέμιον ὀστέοισιν, ὀδοῦσι, νεύροισιν, ἐγκεφάλφ, νωτιαίφ μυελῷ· τὸ δὲ 3 θερμὸν ἀφέλιμον.

ΧΙΧ. 'Οκόσα κατέψυκται, ἐκθερμαίνειν,¹ πλην

2 όσα αίμορραγείν μέλλει.2

ΧΧ. Έλκεσι το μεν ψυχρον δακνώδες, δέρμα περισκληρύνει, όδύνην άνεκπύητον ποιεί, με- 3 λαίνει, 3 ρίγεα πυρετώδεα, σπασμούς, τετάνους.

XXI. Έστι δὲ ὅκου ἐπὶ τετάνου ἄνευ ἔλκεος νέφ εὐσάρκφ, θέρεος μέσου, ψυχροῦ πολλοῦ κατάχυσις ἐπανάκλησιν θέρμης ποιεῖται· θέρμη

4 δè ταῦτα ⁵ ρύεται.

ΧΧΙΙ. Το θερμον εκπυητικόν, οὐκ επὶ παντὶ εκκεῖ, μεγιστον σημεῖον ες ἀσφακείην, δερμα μαλάσσει, ἰσχναίνει, ἀνώδυνον, ριγεων, σπασμῶν, τετάνων παρηγορικόν· τῶν δὲ εν κεφαλἢ καρηβαρίην λύει· πλεῖστον δὲ διαφέρει ὀστέων κατήγμασι, μᾶλλον δὲ τοῦσιν εψιλωμένοισι, τούτων δὲ μάλιστα, τοῦσιν εν κεφαλἢ ελκεα εχουσι· καὶ ὁκόσα ὑπὸ ψύξιος θνήσκει, ἡ ελκοῦται, καὶ ερπησιν εσθιομένοισιν, εδρη, αἰδοίφ, ὑστέρη, κύστει, τούτοισι τὸ θερμὸν φίλιον 11 καὶ κρῖνον, τὸ δὲ ψυχρὸν πολέμιον καὶ κτεῖνον.

1 ἐκθερμαίνει Μ.

3 μελασμούς has been suggested for μελαίνει.

5 Two MSS. read τοῦτον. Rein τετάνων. See Intr. p. xxxi

162

² αἰμορραγέει ἡ μέλλει Littré and several Paris MSS — perhaps rightly, as this is probably the correct reading in aphorism XXIII.

Littré reads ποιέει here, without quoting any authority for it, and I have not seen the word in any MS. I have collated. Dietz would place it after τετάνους. Though the meaning is clear, the exact reading has apparently been lost. The text, though ungrammatical, is the reading of all our good MSS.

APHORISMS, V. AVIII.-XVII.

XVIII. Cold is harmful to bones, teeth, sinews, brain, and spinal marrow, but heat is beneficial

XIX. Heat parts that are chilled, except where

hemorrhage threatens.1

XX Cold makes sores to smart, hardens the skin, causes pain unattended with suppuration; it blackens, and causes feverish rigors, convulsions, tetanus.

XXI. Sometimes in a case of tetanus without a wound, the patient being a muscular young man, and the time the middle of summer, a copious affusion of cold water brings a recovery of heat. Heat relieves these symptoms.²

XXII When heat causes suppuration, which it does not do in the case of every sore, it is the surest sign of recovery; it softens the skin, makes it 3 thin, removes pain and soothes rigors, convulsions and tetanus. It relieves heaviness of the head. It is particularly useful in fractures of the bones, especially when they are exposed, and most especially in cases of wounds in the head. Also in cases of mortification and sores from cold, of corroding herpes, for the seat, the privy parts, the womb, the bladder—for all these heat is beneficial and conduces to a crisis, while cold is harmful and tends to a fatal issue.

3 Perhaps, "the body generally."

μάλλον δέ V μάλλον C'. μάλιστα δέ Μ.

With Littre's reading "Where there is, or threatens to be, hemorrhage."

² The emendation τοῦτον is an attempt to get rid of the awkward plural Perhaps the sentence is a misplaced title of the next aphorism

 $^{^6}$ τὸ δὲ, ἐν κεφαλῆ καὶ καρη 3αμίην λύει, Urb The MSS. vary very much here, and Littré (combining the readings of several) has τὰ δὲ ἐν τῆ κεφαλῆ, καὶ καρηβαρίην λύει. The text represents C'MV.

ΧΧΙΙΙ. Ἐν τούτοισι δεῖ τῷ ψυχρῷ χρῆσθαι,
δκόθεν αἰμορραγεῖ, ἢ μέλλει, μὴ ἐπ' αὐτά, ἀλλὰ
περὶ αὐτά, ὁκόθεν ἐπιρρεῖ· καὶ ὁκόσαι φλεγμοναὶ
ἢ ἐπιφλογίσματα ἐς τὸ ἐρυθρὸν καὶ ὕφαιμον
ῥέποντα νεαρῷ αἵματι, ἐπὶ ταῦτα, ² ἐπεὶ τά γε

7 μενον, ἐπεὶ τό γε ἐλκούμενον βλάπτει.

XXIV. Τὰ ψυχρά, οἶον χιών κρύσταλλος,³ στήθει πολέμια, βηχέων κινητικά, αίμορροϊκά,

3 καταρροικά.

ΧΧν. Τὰ ἐν ἄρθροισιν οἰδήματα καὶ ἀλγήματα, ἄτερ ἔλκεος, καὶ ποδαγρικά, καὶ σπάσματα, τούτων τὰ πλεῖστα ψυχρὸν καταχεόμενον
πολὺ ⁵ ἡηίζει τε καὶ ἰσχναίνει, καὶ ὀδύνην λύει·⁶
5 νάρκη δὲ ⁷ μετρίη ὀδύνης λυτική.

ΧΧΝΙ. Τδωρ τὸ ταχέως θερμαινόμενον καὶ

2 ταχέως ψυχόμενον, κουφότατον.

ΧΧΥΙΙ. Όκόσοισι πιείν ὀρέξις νύκτωρ τοίσι

2 πάνυ διψωσιν, ην ἐπικοιμηθωσιν, ἀγαθόν.

XXVIII. Γυναικείων ἀγωγόν, ἡ ἐν ἀρώμασι πυρίη, πολλαχῆ 9 δὲ καὶ ἐς ἄλλα χρησίμη $αν^{10}$ ην, εἰ μὴ καρηβαρίας ἐνεποίει.

ΧΧΙΧ. Τὰς κυούσας φαρμακεύειν, ἢν ὀργά,

2 ἐπὶ ταῦτα omitted by Urb. V.

¹ MV have αἰμορραγέςιν μέλλει. So C', with μὴ before μέλλει. Galen apparently had ἡ μέλλει with the indicative before it. So Littré, following several MSS. Compare aphorism XIX.

³ κρύσταλλος χιών V. 4 στηθέων C'.

⁵ καταχεόμενον πολύ C' · πολλόν καταχεόμενον MV.

⁶ νάρκην γὰρ ποιέει Rein. for καὶ . . λύει.

⁷ δè MV: γὰρ C' and many other MSS. But δè often has the force of γάρ.

APHORISMS, V. XXIII.-XXIX.

XXIII. Cold should be used in the following cases: when there is, or is likely to be, hemorrhage, but it should be applied, not to the parts whence blood flows, but around them; in inflammations, and in inflamed pustules inclining to a red and blood-shot colour that is due to fresh blood; in these cases apply cold (but it blackens old inflammations), and when there is erysipelas without sores (but it does harm when there are sores)

XXIV. Cold things, such as snow or ice, are harmful to the chest, and provoke coughing, discharges

of blood and catarrhs.

XXV. Swellings and pains in the joints, without sores, whether from gout or from sprains, in most cases are relieved by a copious affusion of cold water, which reduces the swelling and removes the pain. For numbness in moderation removes pain.

XXVI. That water is lighest which quickly gets

hot and quickly gets cold.

XXVII. When there is a desire, caused by intense thirst, to drink during the night, should sleep follow,

it is a good sign.

XXVIII. Aromatic vapour baths promote menstruation, and in many ways would be useful for other purposes if they did not cause heaviness of the head.

XXIX. Purge pregnant women, if there be orgasm, from the fourth month to the seventh, but

⁹ C' Urb. have πολλαχοῦ, perhaps rightly.

10 C' omits &v, and Urb. &v Av.

⁸ δκόσοισι πιείν όρεξις ύδωρ ἐκ νυκτῶν τούτοισι διψώδεσιν V. Urb. has ὁκόσοισιν ὕδωρ πιεῖν ὅρεξις νύκτωρ τουτέοισι πάνυ διψώδεσιν.

τετράμηνα, καὶ ἄχρι έπτὰ μηνῶν ἦσσον· τὰ δὲ 3 νήπια καὶ πρεσβύτερα εὐλαβεῖσθαι.

XXX. Γυναικὶ ἐν γαστρὶ ἐχούση ὑπό τινος 2 τῶν ὀξέων νοσημάτων ληφθῆναι,¹ θανατῶδες.

ΧΧΧΙ. Γυνή ἐν γαστρὶ ἔχουσα, φλεβοτομηθεῖσα, ἐκτιτρώσκει· καὶ μᾶλλον ἦσι μεῖζον τὸ 3 ἔμβρυον.

ΧΧΧΙΙ. Γυναικὶ αΐμα ἐμεούση, τῶν κατα-

2 μηνίων ραγέντων, λύσις.2

ΧΧΧΙΙΙ. Των καταμηνίων ἐκλειπόντων, αἶμα 2 ἐκ τῶν ῥινῶν ῥυέν,³ ἀγαθόν.

ΧΧΧΙΥ. Γυναικί έν γαστρί έχούση, ήν ή

2 κοιλίη ρυή πολλάκις, κίνδυνος εκτρώσαι.

XXXV. Γυναικὶ ὑπὸ ὑστερικῶν ἐνοχλουμένη, 2 ἡ δυστοκούση, πταρμὸς ἐπιγινόμενος, ὁ ἀγαθόν.

XXXVI. Γυναικί τὰ ⁶ καταμήνια ἄχροα, καὶ μὴ κατὰ τὰ αὐτὰ ἀεὶ ⁷ γινόμενα, καθάρσιος 3 δεῖσθαι σημαίνει

XXXVII. Γυναικὶ ἐν γαστρὶ ἐχούσῃ, ἢν 2 ἐξαίφνης ⁸ μασθοὶ ἰσχνοὶ γένωνται, ἐκτιτρώσκει.

ΧΧΧΥΙΙΙ. Γυναικί ἐν γαστρὶ ἐχούση ⁹ ἢν δ ἕτερος μασθὸς ἰσχνὸς γένηται, δίδυμα ἐχούση, θάτερον ἐκτιτρώσκει· καὶ ἢν μὲν ὁ δεξιὸς ἰσχνὸς 4 γένηται, ¹⁰ τὸ ἄρσεν· ἢν δὲ ὁ ἀριστερός, τὸ θῆλυ.

1 C' has συλληθηναι

³ βυέν C' Urb : βυήναι MV
 ⁴ κοιλίη βυή πολλά V κοιλίη πολλά βυήι M : κοιλίη βυεῖ

πολλάκις C': κοιλίη πολλά ρυη Urb. C' has τοῦ ἐκτρῶσαι

5 ἐπιγινόμενος C'. ἐπιγενόμενος Urb. MV.

² Urb. joins together this aphorism and the next, thus: λύσις γίνεται τῶν δὲ καταμηνίων ἐκλειπόντων αἶμα ἐκ τῶν ρίνῶν ρύἐν ἀγαθόν. This reading explains the insertion of γυναικὶ in C' (which omits γίνεται) before τῶν.

⁶ τὰ omitted by Urb V

APHORISMS, V. XXIX,-XXXVIII.

less in the latter case; care is needed when the unborn child is of less than four months or of more than seven.¹

XXX. If a woman with child is attacked by one

of the acute diseases, it is fatal.2

XXXI. A woman with child, if bled, miscarries, the larger the embryo the greater the lisk.

XXXII When a woman vomits blood, menstrua-

tion is a cure

XXXIII. When menstruation is suppressed, a flow of blood from the nose is a good sign.

XXXIV. When a woman with child has frequen t

diarrhoea there is a danger of a miscarriage.

XXXV. When a woman suffers from hysteria³ or difficult labour an attack of sneezing is beneficial.

XXXVI. If menstrual discharge is not of the proper colour, and irregular, it indicates that purging 4 is called for.

XXXVII. Should the breasts of a woman with

child suddenly become thin, she miscarries.

XXXVIII. When a woman is pregnant with twins, should either bleast become thin, she loses one child. If the right breast become thin, she loses the male child; if the left, the female.

¹ This aphorism is omitted by C'V. See Aphorisms IV 1

² This aphorism C'V place after XXXI

3 Said by some commentators to refer to retention of the placenta Galen rejects this interpretation, but Littré seems inclined to accept it.

4 Or, "an emmenagogue"

8 M puts εξαίφνης after μασθοί

⁷ C' omits åεl and reads, I think, κατά τὸ αὐτὸ.

C' has ἐχούση δίδυμα, omitting these words below.
 ἰσχνὸς γένηται omitted by Urb (perhaps rightly)

XXXIX. "Ην γυνὴ μὴ κύουσα, μηδὲ τετοκυῖα, 2 γάλα ἔχη, ταύτης ¹ τὰ καταμήνια ἐκλέλοιπεν.

APHORISMS, V. XXXIX.-XLV.

XXXIX. If a woman have milk when she neither is with child nor has had a child, her menstruation is suppressed.

XL. When blood collects at the breasts of a woman, it indicates madness,1

XLI. If you wish to know whether a woman is with child, give her hydromel to drink [without supper]² when she is going to sleep. If she has colic in the stomach she is with child, otherwise she is not

XLII If a woman be going to have a male child she is of a good complexion; if a female, of a bad complexion.

XLIII. If a pregnant woman be attacked by erysipelas in the womb, it is fatal.

XLIV Women with child who are unnaturally thin miscarry until they have grown stouter.³

XLV. If moderately well-nourished women miscarry without any obvious cause two or three months

¹ Galen says he had never seen such a case, but Adams thinks that the aphorism may refer to rare cases of puerperal mana.

These words are omitted by our best MSS Littré keeps them, but points out that they are inconsistent with the commentary of Galen, who says that the woman must be well fed ($\kappa a i \pi \pi \pi \lambda n \rho \tilde{\omega} \sigma \delta a i \sigma r i \omega \nu$). He suggests, therefore, that we should either read obs $\delta \delta \epsilon i \pi \nu \varphi$ in the text or $\mu h \pi \pi \pi \lambda n \rho \tilde{\omega} \sigma \theta a i$ in Galen.

³ The meaning of this aphorism seems plain enough, though Adams says it is not altogether confirmed by experience. The ancient commentators gave three explanations of the aphorism, and two of $\pi a \rho \dot{\alpha} \ \rho \dot{\nu} a \nu \nu$ Perhaps the meaning is "Women, who in pregnancy are unnaturally thin, miscarry before they can recover a better condition."

¹ This aphorism is omitted by C'.

² Urb. omits τὰ ἔμβρυα. ³ Urb. has γίνεται for ἔσται,

4 MV have διαφθείρει.

5 This aphorism is omitted by C'.

⁶ For λσχναίνονται C' and several other MSS, have θερμαίνονται.

7 C' has καl before ἄνευ, for which V reads ἄτερ.

 8 φανερής προφάσιος C'. 9 C' adds δκόσαι before έπὶ. 10 ην έπεγένηται omitted by M.

172

APHORISMS, V. LIL-LVIII.

child is sickly; but if the breasts be hard, it shows that the child is more healthy.1

LIII When women are threatened with miscarriage the breasts become thin. If they become hard again 2 there will be pain, either in the breasts or in the hip joints, eyes, or knees, and there is no miscarriage.

LIV. When the mouth of the womb is hard it

must of necessity be closed

LV When women with child catch a fever and become exceedingly thin, without (other) obvious cause, they suffer difficult and dangerous labour, or a dangerous miscarriage

LVI. If convulsions and fainting supervene upon

menstrual flow, it is a bad sign.

LVII. When menstruation is too copious, diseases ensue; when it is suppressed, diseases of the womb occur.

LVIII. On inflammation of the rectum and on that of the womb strangury supervenes; on suppuration of the kidneys strangury supervenes; on inflammation of the liver hiccough supervenes.

¹ Galen takes the sense to be that hard (and not milky) breasts indicate a healthy child Littré, thinking that this interpretation neglects the comparative ὑγμενότερον, understands the sense to be that while soft milky breasts indicate a sickly child, hard milky breasts indicate a more healthy one.

² Galen says that πάλω can mean either (1) "again" or (2) "on the other hand." He prefers the second meaning.

3 Or (with the reading of C') "feverish."

4 The phrase "without obvious cause" may also be taken with the preceding clause.

12 kal is omitted by C', and Urb. omits from sol to

έπιγίνεται.

¹¹ πλειόνων γενομένων C'. Some MSS. have γινομένων οτ γιγνομένων

LIX. Γυνη ήν μη λαμβάνη ἐν γαστρί, βούλη δὲ εἰδέναι εἰ λήψεται, περικαλύψας ἱματίοισι, θυμία κάτω¹ κὴν μὲν πορεύεσθαι² δοκῆ ἡ όδμη διὰ τοῦ σώματος ἐς τὸ στόμα καὶ ἐς τὰς ρῦνας,³ 5 γίνωσκε ὅτι αὐτὴ οὐ δι' ἐωυτὴν ἄγονός ἐστιν.⁴

LX. Γυναικὶ ἐν γαστρὶ ἐχούση ἢν αί το καθάρ σιες πορεύωνται, ἀδύνατον τὸ ἔμβρυον ὑγιαίνειν.

LXI. "Ην γυναικὶ αἰ καθάρσιες μὴ πορεύωνται, μήτε φρίκης, μήτε πυρετοῦ ἐπιγινομένου, ἀσαι δὲ αὐτῆ προσπίπτωσι, λογίζου ταύτην ἐν

4 γαστρὶ ἔχειν.9

LXII. LXIII. Παραπλησίως δὲ καὶ ἐπὶ τῶν ἀρρένων·¹⁴ ἡ γὰρ διὰ τὴν ἀραιότητα τοῦ σώματος ¹⁵

1 κάτωθεν V (Urb. has θ above the line)

MV transpose τὸ στόμα and τὰς ρῖνας
 Uɪb. adds (after ἐστιν) ἀλλὰ διὰ τὸν ἄνδρα

6 After γυναικί Urb. adds έν γαστρί έχούση.

8 After δέ three MSS. add αλλόκοτοι και ποικίλαι δρέξιες.

For έχειν C' has ἴσχειν.

² After πορεύεσθαι MV have σοι, Q and one other MS. of Urb. C' omit.

⁵ MV omit αi and transpose $\hat{\eta}\nu$ to the beginning of the aphorism. Urb. has $\hat{\eta}\nu$ at the beginning and retains αi .

η μη is omitted by C' and three MSS. have παίωνται for μη πορεύωνται

¹⁰ Urb. M. transpose πυκνάς and ψυχράς.

APHORISMS, V. LIX.-LXIII.

LIX. If a woman does not conceive, and you wish to know if she will conceive, cover her round with wraps and burn perfumes underneath. If the smell seems to pass through the body to the mouth and nostrils, be assured that the woman is not barren through her own physical fault.

LX. If a woman with child have menstruation, it

is impossible for the embryo to be healthy.

LXI. If menstruation be suppressed, and neither shivering nor fever supervenes, but attacks of nausea occur, you may assume the woman to be with child.

LXII. Women do not conceive who have the womb dense and cold; those who have the womb watery do not conceive, for the seed is drowned; those who have the womb over-dry and very hot do not conceive, for the seed perishes through lack of nourishment. But those whose temperament is a just blend of the two extremes prove able to conceive.

LXIII. Similarly with males. Either because of the rarity of the body the breath 3 is borne outwards

¹ Used in the old sense of the word. κρᾶσιε really means "blending," "compounding"

² As Galen says, four (not two) dispositions have been mentioned; but these can be taken in pairs, and so we get

the healthy mean with respect to (1) heat and (2) dryness.

3 Moving air in the body was called πνεθμα, which was not confined, as our word "breath" is, to air moving to and from the lungs. The writer of this aphorism was evidently a supporter of the Pneumatists, who tried to evolum health and disease by the action of air.

15 τοῦ σώματος omitted by C'.

¹¹ Kal . . . Kutokovow omitted by C'.

After περικαέας V has ἔχουσιν.
 συμμέτρως Urb
 άνδρῶν V.

το πνεθμα έξω φέρεται προς το μη παραπέμπειν 1 το σπέρμα ή δια την πυκνύτητα το ύγρον ου διαχωρεί έξω ή δια την ψυχρότητα ουκ έκπυροθται, ώστε άθροιζεσθαι προς τον τόπον τοθτον 7 ή δια την θερμασίην το αυτό τοθτο γίνεται.

LXIV. Γάλα διδόναι κεφαλαλγέουσι κακόν κακόν δὲ καὶ τοῖς πυρεταίνουσι, καὶ οἶσιν ὑποχόνδρια μετέωρα καὶ² διαβορβορύζοντα, καὶ τοῖσι διψώδεσι κακὸν δὲ καὶ οἶσι χολώδεες αἱ ὑποχωρήσιες³ ἐν τοῖσιν ὀξέσι πυρετοῖσιν,⁴ καὶ οἴσιν αἴματος διαχώρησις πολλοῦ γέγονεν ἀρμόζει δὲ φθινώδεσι μὴ λίην πολλῷ πυρέσσουσιν⁵ διδόναι δὲ καὶ ἐν πυρετοῖσι β μακροῖσι βληχροῖσι, μηδενὸς τῶν προειρημένων σημείων παρεόντος,² 10 παρὰ λόγον 8 δὲ ἐκτετηκότων.

LXV. Όκόσοισιν οἰδήματα ἐφ' ἔλκεσι φαίνεται, οὐ μάλα σπῶνται, οὐδὲ μαίνονται· τούτων δὲ ἀφανισθέντων ⁹ ἐξαίφνης, τοῖσι μὲν ὅπισθεν σπασμοί, τέτανοι, τοῖσι δὲ ἔμπροσθεν ¹⁰ μανίαι, ὀδύναι πλευροῦ ὀξεῖαι, ¹¹ ἢ ἐμπύησις, ἡ δυσεν-

6 τερίη, ην ερυθρά μᾶλλον η τὰ οἰδήματα

¹ Before τὸ Urb. adds τῶ στόματι reading also παρεμπίπτεν: other MSS. εἰς τὸ στόμα.

² Only three (inferior) MSS, have kal. Littré inserts it

following the commentary of Galen, which implies it.

3 After υποχωρήσιες Galen thought that a καl should be added for the sake of the sense One of our MSS (probably through the influence of Galen) reads καl.

4 έν τοισιν όξέσι πυρετοίσιν C' Urb. · ἐν όξέσι πυρετοίσ(ι)

ἐοῦσι ΜV.

5 ἡν μἡ λίην πολλῷ πυρέσσωσιν C'. Urb and some other MSS. omit πολλῷ, which word, as Galen says, seems otiose

For μακροῖσι C' has η. ⁷ παρεόντων C'V.

8 παραλόγως Urb.
9 ἀφανιζομένων C'.

APHORISMS, V. LXIII.-LXV.

so as not to force along the seed; or because of the density of the body the liquid does not pass out; or through the coldness it is not heated so as to collect at this place; or through the heat this

same thing happens.3

LXIV. To give milk to sufferers from headache is bad; it is also bad for fever patients, and for those whose hypochondria are swollen and full of rumbling, and for those who are thirsty. Milk is also bad for those whose stools in acute fevers are bilious, and for those who pass much blood. It is beneficial in cases of consumption when there is no very high fever. Give it also in protracted, low fevers, when none of the aforesaid symptoms is present, but when there is excessive emaciation.

LXV When swellings appear on wounds, there are seldom convulsions or delirium; but when the swellings suddenly disappear, wounds behind are followed by convulsions and tetanus, wounds in front by delirium, severe pains in the side, or suppuration, or dysentery, if the swellings are in-

clined to be red.4

1 τὸ δγρὸν here means τὸ σπέρμα.

² Galen notes that the writer leaves the "place" to be understood by the reader, but τοῦτον seems to refer to something already mentioned.

3 Galen objects to the last clause as inconsistent with the one preceding, and to the whole aphorism as an interpellation.

4 There are many difficulties of meaning in this aphorism, the chief being that wounds in front do not differ from wounds behind in their probable or possible after-effects, at any rate not to the extent mentioned in the text. See Littre's note.

¹⁶ εἰς τοϋμπροσθεν C'. Rein. has ὅτοισι for τοῖσι (twice).

⁷ οὐ πάνυ τι ὑπὸ σπασμῶν C' οὐ πάνυ τι ὑπὸ σπασμοῦ Urb. . ύπο σπασμον ου πάνυ τι Μ. ύπο σπασμών ου πάνυ τι V.

APHORISMS, V. LXVI,-LXXII.

LXVI. If swellings do not appear on severe wounds it is a very bad thing.

LXVII Softness 1 is good, hardness 2 is bad.

LXVIII. Pains at the back of the head are relieved

by opening the upright vein in the forehead.

LXIX. Rigors in women tend to begin in the loins and pass through the back to the head. In men too they begin more often in the back of the body than in the front; for example, in the forearms or thighs. The skin too is rare, as is shown by the hair.³

LXX. Those who are attacked by quartans are not very liable to be attacked by convulsions. But if they are first attacked by convulsions and a

quartan supervenes, the convulsions cease.

LXXI. Those whose skin is stretched, hard and parched, die 4 without sweat. Those whose skin is loose and rare die 4 with sweat.

LXXII. Those subject to jaundice are not very subject to flatulence.

1 That is, in swellings, etc.

² On "crudity."

³ Littré thinks that the last sentence is a separate aphorism, contrasting the bodies of women and of men. Commentators mostly think that there is a reference to the fact that the front parts are more hairy than the back, this shows the less rarity of the latter, 2 e their greater coldness and liability to rigors.

⁴ Perhaps τελευτώσιν refers to the termination of any disease, not of fatal diseases only. So Theophilus

8 For σκληρά Urb. has ξηρά

^{*} δκόσοισι δέ . . τελευτώσιν omitted by C'.

6 After κύστω Urb. and many other MSS. add ἀλγήματα.

7 For έργωδως C' Urb. read δυσχερως

s olδηματα is strongly supported by the MSS. (including C' and Urb), and is mentioned by Theophilus. It is not mentioned by Galen, and Littré omits it from his text. τὰ μετὰ ἀλγημάτων ὀδυνήματα, Rein. Perhaps a case of hendiadys

APHORISMS, VI 1.-VIII.

SIXTH SECTION

I. In cases of chronic hentery, acid eructations supervening which did not occur before are a good

sign.

II. Those whose nostrils are naturally watery, and whose seed is watery, are below the average when in health; those of an opposite character are above the average when in health.¹

III. In cases of prolonged dysentery, loathing for

food is bad; if fever be present, it is worse.

IV. Sores, when the hair about them falls off, are

malignant.

V. One should observe about pains, in the sides, in the breast and in the other parts, whether they show great differences.²

VI. Kidney troubles, and affections of the bladder, are cured with difficulty when the patient is aged.

VII. Pams and swellings³ of the belly are less serious when superficial, more severe when deep-seated.

VIII. Sores on the body of dropsical persons are

not easily healed.

With the reading of M, "are (generally) more healthy." Littré, relying on Epidemics, Π, § 7 (end), where this aphorism occurs in an expanded form, would understand τὰς ὅρας after μέρεσιν, making the genitive τῶν ὁδωνέων depend upon it, and would make "the patients" (understood) the subject of διαφέρουσι. He reads ἡν... διαφέρωσι.

3 This word is doubtful, as it does not suit very well the

predicates κουφότερα and lσχυρότερα

For κουφότερα MV have κοῦφα
 For γινόμενα V has ἐπιγινόμενα.

ΙΧ. Τὰ πλατέα έξανθήματα, οὐ πάνυ τι

2 κνησμώδεα.

 \dot{X} . Κεφαλὴν πονέοντι καὶ περιωδυνέοντι, πῦον, $\mathring{\eta}$ ὕδωρ, $\mathring{\eta}$ αΐμα 1 ρυὲν κατὰ τὰς ρίνας, $\mathring{\eta}$ κατὰ 3 τὰ ὧτα, 2 $\mathring{\eta}$ κατὰ τὸ στόμα, λύει τὸ νόσημα.

ΧΙ. Τοίσι μελαγχολικοίσι καὶ τοίσι νεφρι-

2 τικοῖσιν αἱμορροίδες ἐπιγινόμεναι, ἀγαθόν.

XII. Τῷ ἰηθέντι χρονίας αἰμορροίδας, ἢν μὴ μία φυλαχθῆ, κίνδυνος ὕδρωπα ἐπιγενέσθαι ἢ 3 φθίσιν.

ΧΙΙΙ. Υπό λυγμοῦ ἐχομένφ πταρμός ἐπι-

2 γενόμενος λύει τὸν λυγμόν.

ΧΙΥ. Υπό ύδρωπος έχομένω,3 κατά τὰς φλέβας

2 ές την κοιλίην ΰδατος ρυέντος, λύσις.

ΧV. 'Υπὸ διαρροίης ἐχομένω μακρῆς ἀπὸ ταὐτομάτου ἔμετος ἐπιγενόμενος λύει τὴν διάρ 3 ροιαν.

ΧΙΧ. Έπην διακοπή όστέον, ή χονδρός, ή

¹ ħ αἷμα omitted by MV.

² τὰ ὧτα ἢ τὸ στόμα C'V · κατὰ τὰ ὧτα ἢ κατὰ τὸ στόμα Uɪb κατὰ τὸ στόμα ἢ κατὰ τὰ ὧτα Μ.

Rein. adds αὐτομάτου before κατὰ.
 ἐχομένφ in V appears before ħ.

δ δφθαλμιώντα Urb and several other MSS. One has δφθαλμιώνταs.

APHORISMS, VI. 1x.-x1x.

IX Broad exanthemata 1 are not very irritating.

X. When the head aches and the pain is very severe, a flow of pus, water or blood, by the nostrils, ears or mouth, cures the trouble.

XI. Hemorrhoids supervening on melancholic or

kidney affections are a good sign.2

XII When a patient has been cured of chronic hemorrhoids, unless one be kept,³ there is a danger lest dropsy or consumption supervene.

XIII. In the case of a person afflicted with hiccough, sneezing coming on removes the hiccough.

XIV. In the case of a patient suffering from dropsy, a flow of water by the veins into the belly removes the dropsy.

XV. In the case of a patient suffering from prolonged diarrhoea, involuntary vomiting supervening

removes the diarrhoea.

XVI. In the case of a patient suffering from pleurisy or pneumonia, diarrhoea supervening is a bad sign.

XVII. It is a good thing when an ophthalmic 4

patient is attacked by diarrhoea.

XVIII. A severe wound of the bladder, brain, heart, midriff, one of the smaller intestines, belly or liver, is deadly.

XIX. When a bone, cartilage, sinew, the slender

¹ It is not known what exanthemata are meant, probably the pustules of scabies

² Hemorrhoids were supposed to be one of Nature's ways

of removing impurities.

3 That is "left" Some MSS have καταλειφθη

⁴ Ancient "ophthalmia" included many eye diseases besides the one now known by this name

⁶ τι is placed by C' before τῶν ἐντέρων and Urb. omits τῶν.

νεῦρον, ἡ γνάθου τὸ λεπτόν, ἡ ἀκροποσθίη, οὕτε 3 αὔξεται, οὕτε συμφύεται.

ΧΧ. "Ην ές την 1 κοιλίην αίμα έκχυθη παρά

ΧΧΙ. Τοισι μαινομένοισι κιρσών ή αίμορ-

2 ροίδων ἐπιγινομένων, μανίης 3 λύσις.

XXII. 'Οκόσα ἡήγματα ' ἐκ τοῦ νώτου ἐς 2 τοὺς ἀγκῶνας καταβαίνει, φλεβοτομίη λύει.

ΧΧΙΙΙ. "Ην φόβος η δυσθυμίη πολύν χρόνον

2 διατελή, μελαγχολικόν τὸ τοιοῦτον.

ΧΧΙΝ. Ἐντέρων ἢν διακοπῆ τῶν λεπτῶν τι,

2 οὐ συμφύεται.

XXV. Ἐρυσίπελας ἔξωθεν καταχεόμενου δ ἔσω τρέπεσθαι οὐκ ἀγαθόν ἔσωθεν δὲ ἔξω, 3 ἀγαθόν.

ΧΧΥΙ. 'Οκόσοισιν αν έν τοισι καύσοισι

2 τρόμοι γένωνται, παρακοπή λύει.

ΧΧΥΙΙ. 'Οκόσοι ἔμπυοι ἢ ῦδρωπικοὶ τέμνονται ἢ καίονται? ἐκρυέντος τοῦ πύου ἢ τοῦ ὕδατος
αλθρόου, πάντως ελπόλλυνται.

1 τhν omitted by C'.

² ἐκποιηθῆναι ἀνάγκη ἡ διασαπῆναι C'. The alternative is an attempt to express the criticism of Galen, who says that ἐκπυηθῆναι here means, according to several interpreters, not transformation into pus, but "corruption"

³ Before μανίης Urb. V add της

⁴ For ἡηγματα three MSS have ἀλγήματα, a reading noticed by Galen. ἀλγήματα ἡ (και) ἡηγματα C' Urb.

⁵ καταχυθὲν V.

⁶ γίνονται C' and V (which omits αν).

⁷ καίονται ή τέμνονται Urb. Before ἐκρυέντος C' Urb. add τουτέοισι

8 πάντως αθρέως C'. For πάντως V has μείναντος and και for ή.

¹ This aphorism has been a puzzle to all commentators from Galen to Littré, as it is difficult to reconcile it with 184

APHORISMS, VI. xix.-xxvii.

part of the jaw, or the foreskin is severed, the part neither grows nor unites 1

XX. If there be an unnatural flow of blood into

the belly,2 it must suppurate.

XXI. Varicose veins or hemorrhoids supervening on madness³ remove it.

XXII. Ruptures 4 that descend from the back to the elbows are removed by bleeding.

XXIII. Fear or depression that is prolonged means melancholia.

XXIV. If one of the smaller intestines be severed it does not unite.

XXV. When erysipelas that spreads externally turns inwards it is not a good thing; but it is good when internal erysipelas turns outwards.

XXVI. Whenever tremors occur in ardent fevers,

delirium removes these tremors.5

XXVII. Whenever cases of empyema or dropsy are treated by the knife or cautery, if the pus or water flow away all at once, a fatal result is certain.

experience Perhaps all that is meant is that a severe cut $(\delta iako\pi \hat{\eta})$ is never completely restored, e g callus is not exactly bone.

² If the article την be omitted, "into a cavity."

* μανίη includes every state when a person is "out of his mind." It is uncertain to which of these many states reference here is made.

* Galen notices that some authorities read ἀλγήματα, "pains," a much more appropriate word in the context. Littréthinks that "referred" pains to the elbows are meant "les brisements dans le dos font sentir dans les coudes,"

The reading of C' combines both readings.

5 Galen thinks that this aphorism is an interpellation, but takes the meaning to be that delirium replaces the fever. It seems more natural to interpret it to mean that delirium replaces the tremors.

XXVIII. Εὐνοῦχοι οὐ ποδαγριῶσιν, οὐδὲ 2 φαλακροὶ γίνονται.

ΧΧΙΧ. Γυνή οὐ ποδαγριᾶ, εἰ μὴ τὰ κατα-

2 μήνια ἐκλέλοιπεν αὐτῆ.¹

ΧΧΧ. Παῖς οὐ ποδαγριὰ πρὸ τοῦ ἀφροδι-

2 σιασμοῦ.2

ΧΧΧΙ. 'Οδύνας ὀφθαλμῶν ἀκρητοποσίη, ἢ λουτρόν,ἢ πυρίη,ἢ φλεβοτομίη,ἢ φαρμακοποσίη³ 3 λύει.

ΧΧΧΙΙ. Τραυλοὶ ὑπὸ διαρροίης μάλιστα

2 άλίσκονται μακρής.

ΧΧΧΙΙΙ. Οι δξυρεγμιώδεες ου πάνυ τι

2 πλευριτικοί γίνονται.

ΧΧΧΙV. 'Οκόσοι φαλακροὶ, τούτοισι κιρσοὶ μεγάλοι οὐ γίνονται· δκόσοις ἂν φαλακροῖσι κιρσοὶ γένωνται πάλιν γίνονται δασέες. 5

ΧΧΧΥ. Τοίσιν ύδρωπικοίσι βήξ ἐπιγενομένη,

2 κακόν· τὸ δὲ προγεγονέναι ἀγαθόν.6

ΧΧΧΥΙ. Δυσουρίην φλεβοτομίη λύει, τάμνειν

2 δὲ τὴν εἴσω φλέβα.

ΧΧΧΥΠ. 'Υπὸ κυνάγχης ἐχομένφ οἴδημα ⁸ 2 γενέσθαι ἐν τῷ βρόγχφ ⁹ ἔξω, ἀγαθόν. ¹⁰

¹ The MSS. offer many readings $(\hat{\eta}\nu, \epsilon l, \hat{\epsilon}\kappa\lambda l\pi\eta, \hat{\epsilon}\pi\iota\lambda \hat{\epsilon}\lambda o\iota\pi\epsilon\nu, \lambda \hat{\epsilon}\lambda o\iota\pi\epsilon\nu, \hat{\epsilon}\kappa\lambda \hat{\epsilon}\lambda o\iota\pi\epsilon\nu, \hat{\epsilon}\kappa\lambda \hat{\epsilon}\lambda o\iota\pi\epsilon\nu, \hat{\epsilon}\kappa\lambda \hat{\epsilon}i\pi\eta, a\nu\hat{\tau}\hat{\eta}s, a\nu\hat{\tau}\hat{\eta}, a\nu\hat{\tau}\hat{\eta}\nu),$ all with approximately the same sense

² ἀφροδισιάζειν Urb V.
 ³ ἡ φαρμακοποσίη omitted by C' φαρμακείη V

⁴ The reading οὐ γίνονται has poor MS. support but is the one known to Galen. Otherwise one would adopt οὐκ

έγγίνονται.

In the second part of this aphorism I have adopted the text of V, which seems to be the simple original, altered by various hands to the fuller text found in our other MSS. The variants include $\delta \epsilon$ or δ before $\hbar \nu$, the omission of $\hbar \nu$, 186

APHORISMS, VI. xxviii,-xxxvii.

XXVIII. Eunuchs neither get gout nor grow bald.

XXIX. A woman does not get gout unless menstruation is suppressed.

XXX. A youth does not get gout before sexual

intercourse.

XXXI. Pains of the eyes are removed by drinking neat wine, by bathing, by vapour baths, by bleeding or by purging.

XXXII. Those with an impediment in their speech are very likely to be attacked by protracted

diarrhoea.

XXXIII. Those suffering from acid eructations are not very likely to be attacked by pleurisy.

XXXIV. Bald people are not subject to large varicose veins; bald people who get varicose veins grow hair again.

XXXV. A cough supervening on dropsy is a bad

sign. but if it precede it is a good sign.

XXXVI. Bleeding removes difficulty of mic-

turition; open the internal vein.1

XXXVII. In a case of angina it is a good thing when a swelling appears on the outside of the trachea.

¹ Galen suspects that this aphorism is an interpellation He says that to make good sense $\kappa \alpha$ must be understood before $\phi \lambda \epsilon \beta \sigma \tau o \mu i \eta$ "bleeding, among other things."

* τραχήλω Urb.

ἐουσι(ν) after φαλακροῖσι, μεγάλοι as epithet of κιρσοὶ, ἐπιγένωνται, οδτυι before or after πάλιν.

⁶ Several MSS, and Littré, omit τὸ δὲ . . . ἀγαθόν.

 ⁷ τὰς ἔσω Littré and Rem., and V adds φλέβας.
 ⁸ οἴδημα C' οἶδήματα Urb MV.

¹⁰ C' adds έξω γάρ τρέπεται το νόσημα.

ΧΧΧVIII. 'Οκόσοισι κρυπτολ καρκίνοι γίνονται, μη θεραπεύειν βέλτιον· θεραπευόμενοι γὰρ ἀπόλλυνται ταχέως, μη θεραπευόμενοι δὲ πολύν 4 χρόνον διατελέουσιν.

ΧΧΧΙΧ. Σπασμοί γίνονται 2 ή ύπὸ πληρώ-

2 σιος η κενώσιος 3 ούτω δε καὶ λυγμός.

 ΧΙ. Οκόσοισι περί τὸ ὑποχόνδριον πόνος γίνεται ⁴ ἄτερ φλεγμονής, τούτοισι πυρετὸς
 3 ἐπιγενόμενος λύει τὸν πόνον.⁵

ΧΙΙ. Ὁκόσοισι διάπυόν τι ἐν τῷ σώματι ἐὸν μὴ ἀποσημαίνει, τούτοισι διὰ παχύτητα τοῦ

3 πύου ἢ 6 τοῦ τόπου οὐκ ἀποσημαίνει.

2 γενέσθαι, πονηρόν.

ΧΙΙΠ. 'Οκόσοι σπληνώδεες ὑπὸ δυσεντερίης άλίσκονται, τούτοισιν, ἐπιγενομένης μακρῆς τῆς δυσεντερίης, ὕδρωψ ἐπιγίνεται ἡ λειεντερίη, καὶ 4 ἀπόλλυνται.

ΧLIV. 'Οκόσοισιν ἐκ στραγγουρίης εἰλεοὶ γίνονται, ἐν ἑπτὰ ἡμέρῃσιν ἀπόλλυνται,⁸ ἢν μὴ

3 πυρετοῦ ἐπιγενομένου ἄλις 9 τὸ οὖρον ῥυῆ.

ΧLV. Έλκεα δκόσα ένιαύσια γίνεται, η μακρότερον χρόνον ἴσχουσιν, 10 ἀνάγκη ὀστέον ἀφί-3 στασθαι, καὶ τὰς οὐλὰς κοίλας γίνεσθαι.

ΧLVΙ 'Οκόσοι ύβοὶ έξ ἄσθματος ἡ βηχὸς

2 γίνονται πρὸ τῆς ἥβης, ἀπόλλυνται.

1 C' has κρυπτοὶ καρκίνοι γίνονται twice.

2 σπασμός γίνεται C' Urb V.

3 C' Urb. transpose πληρώσιος and κενώσιος.

Some MSS have πόνοι γίνονται.
 For τὸν πόνον some MSS, have τὸ νόσημα.

6 Littré omits του πίου ἡ on the ground that the commentary of Galen implies two readings, one with τοῦ πύου

APHORISMS, VI. xxxviii.-xLvi.

XXXVIII. It is better to give no treatment in cases of hidden cancer; treatment causes speedy death, but to omit treatment is to prolong life.

XXXIX. Convulsions occur either from repletion

or from depletion. So too with hiccough,

XL. When pain in the region of the hypochondrium occurs without inflammation, the pain is removed if fever supervenes.

XLI. When suppurating matter exists in the body without showing itself, this is due to the thickness

either of the pus or of the part.

XLII. In jaundice, sclerosis of the liver is bad.

XLIII. When persons with enlarged spleens are attacked by dysentery, if the dysentery that supervenes be prolonged, dropsy or lientery supervenes with fatal results.

XLIV Those who, after strangury, are attacked by ileus, die in seven days, unless fever supervenes and there is an abundant flow of urine.

XLV. If sores last for a year or longer, it must be that the bone come away and the scars become hollow.

XLVI. Such as become hump-backed before puberty from asthma or cough, do not recover.

and the other with τοῦ τόπου. All our MSS give both phrases, a fact which Littré would explain as an attempt on the part of a scribe to include both of Galen's readings. Reinhold omits ἡ τοῦ τόπου

⁷ For τὸ . . . γενέσθαι Urb. (with many other MSS) has

ήν το ήπαρ σκληρόν γένηται.

8 οί τοιοῦτοι 1s added after ἀπόλλυνται by V, before ἀπόλλυνται by C' Urb

åλès Rem.

¹⁰ Toxet Lattre with several MSS. Toxwow V.

ΧLVII. 'Οκόσοισι φλεβοτομίη ἢ φαρμακείη συμφέρει, τούτους τοῦ ἢρος φαρμακεύειν ἢ φλεβο- τομεῖν.¹

ΧΙΙΙΙΙ. Τοίσι σπληνώδεσι δυσεντερίη έπιγε-

2 νομένη, ἀγαθόν.

3 ρησιν αποκαθίσταται.3

 L. 'Οκόσοισιν ἂν ὁ ἐγκέφαλος διακοπῆ, τούτοισιν ἀνάγκη πυρετὸν καὶ χολῆς ἔμετον 3 ἐπιγίνεσθαι.

LI. 'Οκόσοισιν ύγιαίνουσιν εξαίφνης όδύναι γίνονται εν τη κεφαλή, καὶ παραχρήμα ἄφωνοι γίνονται, αλά ρέγκουσιν, απόλλυνται εν έπτὰ

4 ημέρησιν, 5 ην μη πυρετός επιλάβη.

ΤΙΙ΄. Σκοπείν δε χρη και τας υποφάσιας των όφθαλμων εν τοίσιν υπνοισιν ην γάρ τι υποφαίνηται τοῦ λευκοῦ, συμβαλλομένων των βλεφάρων, μη εκ διαρροίης εόντι η φαρμακοποσίης, φλαῦρον τὸ σημείον και θανατώδες 6 σφόδρα

LIII. Αἱ παραφροσύναι αἱ μèν μετὰ γέλωτος γινόμεναι ἀσφαλέστεραι. αἱ δὲ μετὰ σπουδῆς 8

3 έπισφαλέστεραι.

LIV. Ἐν τοῖσιν ὀξέσι πάθεσι τοῖσι μετὰ 2 πυρετοῦ αἱ κλαυθμώδεες ἀναπνοαὶ κακόν.9

After φλεβοτομεῖν C' has χρή.
 After τεσσαράκοντα V has ὀκτὼ

³ ἀποκάθισται Μ Dietz, Littré: καθίσταται C' · καθίστανται several MSS.: ἀποκαθίστανται Urb V.

⁴ For γίνονται Littré (without giving authority) has the attractive reading κείνται.

APHORISMS, VI. xLvii.-Liv.

XLVII. Such as are benefited by bleeding or purging shall be purged or bled in spring.

XLVIII. In cases of enlarged spleen, dysentery

supervening is a good thing.

XLIX. In gouty affections inflammation subsides within forty days.

L Severe wounds of the brain are necessarily

followed by fever and vomiting of bile.

LI. Those who when in health are suddenly seized with pains in the head, becoming 2 forthwith dumb and breathing stertorously, die within seven days unless fever comes on.

LII. One should also consider what is seen of the eyes in sleep; for if, when the lids are closed, a part of the white is visible, it is, should diarrhoea or purging not be responsible, a bad, in fact an absolutely fatal, sign.3

LIII. Delirium with laughter is less dangerous,

combined with seriousness it is more so.

LIV. In acute affections attended with fever, moaning respiration is a bad sign.

¹ Cf, the forty-third aphorism of this section, where it is said that in such cases a protracted dysentery is followed by fatal results.

² The reading κείνται would mean "lie prostrate" This word is very appropriate in its context, as apoplectic seizures are referred to.

² In Urb this aphorism is joined to the preceding. It is

taken from Prognostic.

7 ἀσφαλέσταται and ἐπισφαλέσταται Urb

9 Kakal M.

δ ἀπόλλυνται after ἡμέρησιν C'.

⁶ Some MSS place τοῦ λευκοῦ after βλεφάρων.

3 τοῦ σώματος after σπασμόν Urb

4 σημαίνουσιν Littré One MS. has σημείωσιν. One MS. at least omits

5 αποπληκτηκοί C'

δοί C' - οί τῆ ἡλικίη V ἡλικίη τῆ Littré (ἡλικίη τῆι M): τῆσιν ἡλικίσου οι τοῖσιν ἡλικίοισιν many MSS.

7 After ἀποσαπηναι Urb. adds και ἀποπεσείν.

8 δχλουμένοις V: χρονίης is found after loχιάδος in some old editions.

¹ C' adds here μᾶλλον and some MSS. ὡς ἐπὶ τὸ πολύ (πουλύ) A few MSS. add καὶ τὰ μανικὰ before τοῦ ἦρος.

APHORISMS, VI. LV-VII. 1.

LV. Gouty affections become active in spring and in autumn.

LVI. In melancholic affections the melancholy humour is likely to be determined in the following ways: apoplexy of the whole body, convulsions, madness 1 or blindness.

LVII. Apoplexy occurs chiefly between the ages

of forty and sixty.

LVIII. If the epiploon protrude, it cannot fail to

mortify.2

LIX. In cases of hip-joint disease, when the hipjoint protrudes and then slips in again, mucus forms.

LX. In cases of chronic disease of the hip-joint, when the hip-joint protrudes, the leg wastes and the patient becomes lame, unless the part be cauterised.

SEVENTH SECTION.

I. In acute diseases chill of the extremities is a bad sign.

1 See note on p 185. The word oquaiver of the reading be

correct) will be almost impersonal, "it means."

² Galen and all commentators refer this aphorism to abdominal wounds through which the epiploon protrudes. The words added in Urb mean "and drop off." The epiploon is the membrane enclosing the intestines

Y omits. some MSS. (and Littré) ἐνοχλουμένοισι.
 Φθίνει V and many other MSS.

193

 $^{^{9}}$ μύξα γίγνεται V C' omits this aphorism M has εγγίνονται for επιγίνονται.

For η some MSS, nave και and M has η και
 After περιπλευμονίη M has ἐπιγινομένη

⁶ One MS has τραύμασιν for καύμασιν. Galen mentions both readings.

7 σπασμοί τέτανοι V

¹ ἀποσιτίη V. Atter ασιτίη M has καὶ ἄκρητοι ξμετοι.

For ἔλλυσις, ἔμετος M has ἔκκρισις αΐματος
 For ħ some MSS, have καὶ and M has ħ καὶ

⁵ κακόν according to Galen was omitted by certain ancient MSS.

APHORISMS, VII. 11.-XIII.

II. In a case of diseased bone, livid flesh on 1 it is a bad sign.

III. For hiccough and redness of the eyes to

follow vomiting is a bad sign.

 For shivering to follow sweating is not a good sign.

V. For madness to be followed by dysentery,

dropsy or raving,2 is a good sign.

VI In a protracted disease loss of appetite and uncompounded 3 discharges are bad.

VII Rigor and delirium after excessive drinking are bad symptoms.

VIII. From the breaking internally of an abscess result prostration, vomiting and fainting.

IX. After a flow of blood delirium or convulsions

are a bad sign.

X. In ileus, vomiting, hiccough, convulsions or

delirium are a bad sign.

XI. Pneumonia supervening on pleurisy is bad.⁴

XII. Phrenitis supervening on pneumonia is bad

XIII. Convulsions or tetanus supervening on severe buins are a bad symptom

It is difficult to decide how far the preposition $\ell \pi l$ in this and the following aphorisms means "after.' The common use of $\ell \pi \iota \gamma l \gamma \nu e \sigma \theta a \iota$ to signify one symptom supervening on another suggests that $\ell \pi l$ has somewhat of this force in all cases.

2 By έκστασιs is meant an increase of the maniacal symp-

toms, helping to bring the disease to a crisis.

Probably meaning "showing signs that κράσιs is absent."
 If κακὸν be omitted: "Pneumonia often supervenes on

pleurisy "

⁵ Phrenitis means here either (a) the form of malaria called by this name, or (b) some disease with similar symptoms

ΧΙΥ. Ἐπὶ πληγη ἐς τὴν κεφαλὴν ἔκπληξις ἡ

2 παραφροσύνη, κακόν.¹ ΧV. Ἐπὶ αἵματος πτύσει, πύου πτύσις. ΧVI Ἐπὶ πύου πτύσει, φθίσις καὶ ῥύσις. 2 έπην δε 2 το σίελον 3 ζοχηται, αποθνήσκουσιν.

ΧΧΙΙ. Έπι οδύνη πολυχρονίω των περι την

2 κοιλίην, ἐκπύησις.

ΧΧΙΙΙ. Έπι ἀκρήτω ὑποχωρήσει, 2 τερίη.

ΧΧΙΥ. Ἐπὶ ὀστέου διακοπῆ,5 παραφροσύνη,

2 ην κενεον λάβη.6

ΧΧΥ. Έκ φαρμακοποσίης σπασμός, θανα-2 τώδες.

ΧΧΥΙ. Ἐπὶ ὀδύνη ἰσχυρῆ τῶν περὶ τὴν 2 κοιλίην, ἀκρωτηρίων ψύξις, κακόν.

¹ κακόν omitted (according to Galen) by certain MSS.

² καὶ ἐπὴν for ἐπὴν δὲ Urb V.

3 πτύελον C' Urb

4 ή ἐκπύησις omitted by V After ἐκπύησις many MSS. add κακόν.

5 Before παραφροσύνη C' Urb. add ξκπληξις ή.

6 Rein. puts ην κενεόν λάβη with XXV

¹ If κακὸν be omitted: "Stupor or delirium follows a blow on the head."

APHORISMS, VII. xiv.-xxvi.

XIV. Stupor or delirium from a blow on the head is bad $^{\rm 1}$

XV After spitting of blood, spitting of pus.

XVI After spitting of pus, consumption and flux; 2 and when the sputum is checked the patients die.

XVII. In inflammation of the liver, hiccough is bad

XVIII In sleeplessness, convulsions or delirium is a bad sign

In lethargus trembling is a bad sign.

XIX. On the laying bare of a bone erysipelas is bad.

XX. On erysipelas, mortification or suppuration $\langle \text{is bad} \rangle$.

XXI. On violent throbbing in wounds, hemorrhage (is bad) 3

XXII. After protracted pain in the parts about

the belly, suppuration (is bad).3

XXIII On uncompounded stools, dysentery (1s bad) 3

XXIV. After the severing of bone, delirium, if

the cavity be penetrated.4

XXV. Convulsions following on purging are deadly, XXVI In violent pain in the parts about the belly, chill of the extremities is a bad sign.

 2 Galen says that $bb\sigma\iota s$ means either (a) the falling out of the hair or (b) diarrhoea

3 These words must be understood, as they easily can be in

a list of aphorisms giving "bad" symptoms.

4 Galen states that this aphorism applies, not to any bone, but to severe fractures of the skull piercing the membranes. I have done my best to use the most appropriate prepositions to translate ἐπὶ in aphorisms XVII to XXIV.

XXVII. Ἐν γαστρὶ ἐχούση τεινεσμὸς ἐπι-2 γενόμενος ἐκτρῶσαι ποιεῖ.

ΧΧΥΙΙΙ. "Ο τι αν όστέον, η χόνδρος, η νευρον 1

2 διακοπή 2 έν τῷ σώματι, οὐκ αὖξεται.3

ΧΧΙΧ "Ην ύπο λευκοῦ φλέγματος έχομένω

δ διεστηκότα after δ è MV.
 δ V has ἐπὶ and ἐφίστανται
 M has ἐφίστανται but not ἐπὶ
 C' Urb have ἐν and ὑφίστανται.

11 νεφριτικά MSS. : φρενιτικά Dietz, Some MSS, have σημαίνουσι

APHORISMS, VII, xxvii.-xxxiv.

XXVII. Tenesmus 1 in the case of a woman with child causes miscarriage.

XXVIII. Whatsoever bone, cartilege or sinew be

cut through in the body, it does not grow.2

XXIX. When in the case of a white phlegm³ violent diarrhoea supervenes, it removes the disease.

XXX. In cases where frothy discharges occur in

diarrhoea there are fluxes from the head.4

XXXI In fever cases sediments like coarse meal forming in the urine signify that the disease will be protracted.

XXXII. In cases where the urine is thin at the first, 5 and then becomes bilious, an acute illness

is indicated.

XXXIII. In cases where the urine becomes divided there is violent disburbance in the body.

XXXIV. When bubbles form in the urine, it is a sign that the kidneys are affected, and that the disease will be protracted 7

Straining at evacuations of stools

² A repetition of Aphorisms VI. xix

3 Ic, incipient anasarca

⁴ This medically obscure aphorism should be connected with the doctrines expounded in the latter part of Sacred Disease

Galen and Theophilus give this meaning to ἄνωθεν, and Adams adopts it Littré translates, "a la partie supétieure," but Galen says he had never seen uine watery above but bilious below.

⁶ The word διεστηκότα perplexed Galen, who took it to mean "not homogeneous", Adams thinks that it refers to a strongly marked line of distinction between the sediment

and the watery part.

7 Adams explains this as referring to albuminuria. Medically ἐφίστανται ("settle on the surface") is the better reading, as albuminous urine is frothy. But the MS. authority for ἐν and ὑφίστανται is strong

ΧΧΧΥ. 'Οκόσοισι δὲ λιπαρὴ ἡ ἐπίστασις 1 καὶ ἀθρόη, τούτοισι νεφριτικὰ 2 καὶ δέξα

3 σημαίνει.³

ΧΧΧΥΙ. 'Οκόσοισι δὲ νεφριτικοῖσιν ἐοῦσι τὰ προειρημένα σημεία συμβαίνει, πόνοι τε όξέες περί τούς μύας τούς βαχιαίους γίνονται, ην μέν περί τοὺς ἔξω τόπους γίνωνται, άπόστημα προσδέγου ἐσόμενον ἔξω· ἢν δὲ μᾶλλον οἱ πόνοι πρὸς 5 τούς έσω τόπους, καὶ τὸ ἀπόστημα προσδέχου 7 ἐσόμενον μᾶλλον ἔσω.

ΧΧΧΥΙΙ. 'Οκόσοι' αίμα έμέουσιν, ην μεν άνευ πυρετού, σωτήριον ην δε σύν πυρετώ, κακόν θεραπεύειν 8 δε τοίσι στυπτικοίσιν ή τοίσι

4 Ψυκτικοΐσιν.9

2 έκπυέονται έν ήμέρησιν είκοσι.

XXXIX. *Ην οὐρη αἶμα καὶ θρόμβους, καὶ στραγγουρίη ἔχη, καὶ ὀδύνη ἐμπίπτη ἐς τὸν περίνεον καὶ τὸν κτένα, τὰ περὶ τὴν κύστιν νοσείν 4 σημαίνει.¹⁰

1 ὑπόστασις C' Urb V: ἐπίστασις M. Galen mentions both readings, but prefers $\epsilon \pi l \sigma \tau \alpha \sigma \iota s$ because of the sense.

² Galen says that some would read φρενιτικά on the ground that the symptoms mentioned are not confined to nephritis

After σημαίνει Urb adds και όξείην την άρρωστίην έσεσθαι,

omitting καὶ ὀξέα C' has νεφριτικά σημαίνει ὀξέα.
⁴ ἢν μὲν περὶ . γίνωνται omitted by Urb

For πρὸς Urb. and several MSS have περί.

6 After τόπους many MSS have γίνωνται

C'V: Uib has the final - ow erased.

8 θεραπεύεται Urb Rein. has δλέθριον κάρτα for κακόν (so Urb.), omitting θεραπεύειν κ τ.ε.

⁹ V has τοῖσι στυπτικοῖσι only, adding τὰ ὀξέα τῶν νοσημά των κρίνεται έν τεσσαρεσκαίδεκα ήμέρησι τριταίος κρίνεται έν

APHORISMS, VII, xxxv.-xxxix.

XXXV. When the scum on the urine is greasy and massed together, it indicates acute disease of

the kidneys.1

XXXVI. When the aforesaid symptoms occur in kidney diseases, and acute pains are experienced in the muscles of the back, if these occur about the external parts, expect an external abscess; if they occur more about the internal parts, expect rather that the abscess too will be internal.

XXXVII. The vomiting of blood, if without fever, may be cured; 2 if with fever, it is bad. Treat it

with styptics or refrigerants.

XXXVIII. Catarrhs (fluxes) into the upper cavity3

suppurate in twenty days.

XXXIX. When a patient passes in the urine blood and clots, suffers strangury and is seized with pain in the perineum and pubes, it indicates disease in the region of the bladder.

² This meaning of σωτήριον (θεραπευθήναι δυνάμενον) is vouched for by Galen. The word should mean "salutary."

3 That is, the chest.

έπτα περιόδοισι τὸ μακρότατον. Μ has τριταῖοs . . μακρότατον τὰ ὀξέα τῶν νοσημάτων γίνεται κ.τ ε.

¹ The MS. authority for iπ δστασιs is very strong, but Galen's comment seems to be decisive. Some ancient commentators, realising that greasy urine is not necessarily a sign of kidney disease, would have altered the reading ιεφριτικά Galen would keep νεφριτικά, understanding δθρδη to refer to time, "scum on urine passed at short intervals." But it is the scum, and not the urine, which is called δθρδη.

¹⁰ Galen mentions two readings, τὰ περὶ τὴν κύστιν νοσέειν σημαίνει, and τὴν κύστιν νοσέειν σημαίνει. Μ has κτένα καὶ τὴν κύστιν. νοῦσον σημαίνει Urb. omits this aphorism

XL. *Ην ή γλῶσσα ἐξαίφνης¹ ἀκρατὴς γένηται, ἢ ἀπόπληκτόν τι τοῦ σώματος, μελαγχο-3 λικὸν τὸ τοιοῦτον.²

ΧΙΙ. Ἡν, ὑπερκαθαιρομένων τῶν πρεσβυ-

2 τέρων, λύγξ ἐπιγένηται, οὖκ ἀγαθόν.4

XLII. *Ην πυρετὸς μὴ ἀπὸ χολῆς ἔχῃ, ὕδατος ⁵ πολλοῦ καὶ θερμοῦ κατὰ τῆς κεφαλῆς καταχεο- 3 μένου, λύσις γίνεται τοῦ πυρετοῦ.⁶

ΧΙΙΙΙ. Γυνή ἀμφιδέξιος οὐ γίνεται.

XLIV. 'Οκόσοι έμπυοι τέμνονται' η καίονται, ην μεν το πῦον καθαρον ρυή καὶ λευκόν, περιγίνονται ην δε βορβορώδες καὶ δυσώδες, ἀπόλ-4 λυνται.

XLV. Ὁ κόσοι ⁹ ἡπαρ διάπυον καίονται ἡ τέμνονται, ἡν μὲν τὸ πῦον καθαρὸν ἡυῆ καὶ λευκόν, περιγίγνονται (ἐν χιτῶνι γὰρ τὸ πῦον τούτοισίν ἐστιν)· ἡν δὲ οἶον ἀμόργη ἡυῆ, ἀπόλ-5 λυνται.

XLVI. 'Οδύνας ὀφθαλμῶν, 10 ἄκρητον ποτίσας 2 καὶ λούσας πολλῷ θερμῷ, φλεβοτόμει.

1 εξαίφνης γλώσσα Urb 2 το τοιοῦτο γίγνεται V.

3 πρεσβυτάτων V. Rein. has datives in -φ.

4 κακον C'

5 δδατος C' Urb . ίδρῶτος MV. Galen mentions both readings, preferring the former.

6 For του πυρετού V has της κεφαλής. Query της κεφαλαλ-

yins?

΄ ^η κέονται ή τέμνονται Urb τέμνονται ή καίονται C'. ή τέμνονται omitted by MV

8 After δε Littré has, following slight authority, υφαιμον

⁹ δκόσοι ήπαρ διὰ πύον καίονται V δκόσοις ήπαρ διὰ πύον καίονται ή τέμνονται Urb, δκόσοι τὸ ήπαρ διάπυον καίονται M. C' omits this aphorism.

10 ὀφθαλμῶν ὀδύνας λύει λουτρὸν καὶ ἀκρατοποσίη λούσας πολλῶ

θερμώ φλεβοτόμησον. C'.

APHORISMS, VII. xL.-xLvi.

XL. If the tongue is suddenly paralysed, or a part of the body suffers a stroke, the affection is melancholic.¹

XLI. If old people, when violently purged, are seized with hiccough, it is not a good symptom.

XLII. If a patient suffers from a fever not caused by bile, a copious affusion of hot water over the head removes the fever.²

XLIII A woman does not become ambidexterous.3

XLIV. Whenever empyema is treated by the knife or cautery, if the pus flow pure and white, the patient recovers: but if muddy and evil-smelling, the patient dies.

XLV. Whenever abscess of the liver is treated by cautery or the knife, if the pus flow pure and white, the patient recovers, for in such cases the pus is in a membrane; but if it flows like as it were lees of oil, the patient dies.

XLVI. In cases of pains in the eyes, give neat wine to drink, bathe in copious hot water, and bleed.

¹ The ancient commentators are at a loss to understand why paralysis is "melancholic," *i.e.* caused by black bile. Perhaps, as μελαγχολία may mean merely "nervousness," the aphorism means that persons of a nervous temperament are peculiarly subject to "strokes."

² The reading of V suggests, "relieves the healache."

* Some ancient commentators took this aphorism literally, others thought that it referred to the position of the female embryo in the womb; others to the belief that a female is never an hermaphrodite.

οδύνας οφθαλμών ακρητοποσίη ή λουτρόν ή πυρίη. ή φλεβο-

τομίη λύει Μ

These three readings throw light upon the history of the Hippocratic text. They could not possibly be descendants of a single text copied with the ordinary copyist's blunders.

όφθαλμῶν ὀδύνας ἄκρατον ποτίσας καὶ λούσας πολλῶ θερμῶφλεβοτόμει. Urb. So V, but with ἄκρητον.

XLVII. 'Υδρωπιῶντα ἡν βὴξ ἔχῃ,¹ ἀνέλπιστός 2 ἐστιν.²

ΧΙΙΙΙΙ. Στραγγουρίην καὶ δυσουρίην θώρηξις

2 καὶ φλεβοτομίη λύει τέμνειν δὲ τὰς ἔσω.3

ΧΙΙΧ. Υπό κυνάγχης έχομένω οἴδημα ἡ ἐρύθημα ἐν τῷ στήθει ἐ ἐπιγενόμενον, ἀγαθόν· ἔξω 3 γὰρ τρέπεται τὸ νόσημα.

L. Ὁκόσοισιν ἂν σφακελισθŷ ὁ ἐγκέφαλος, ἐν τρισὶν ἡμέρŋσιν ἀπόλλυνται ἢν δὲ ταύτας διαφύ-

3 γωσιν, ύγιέες γίνονται.

II. Πταρμὸς γίνεται ⁵ ἐκ ⁶ τῆς κεφαλῆς, διαθερμαινομένου τοῦ ἐγκεφάλου, ἢ διυγραινομένου ⁷ τοῦ ἐν τῆ κεφαλῆ κενεοῦ ⁸ ὑπερχεῖται οὖν ὁ ἀὴρ ὁ ἐνεών, ⁰ ψοφεῖ δέ, ὅτι διὰ στενοῦ ἡ διέξοδος αὐτῷ 5 ἐστιν.

LIΙ 'Οκόσοι ήπαρ περιωδυνέουσι, τούτοισι

2 πυρετός 10 επιγενόμενος λύει την δδύνην.

LIII. 'Οκόσοισι συμφέρει αΐμα ἀφαιρεῖν ἀπὸ 2 τῶν φλεβῶν, τούτους τοῦ ἦρος χρῆ φλεβοτομεῖν.¹¹

LÍV. 'Οκόσοισι μεταξὺ τῶν Φρενῶν καὶ τῆς γαστρὸς φλέγμα ἀποκλείεται, 12 καὶ ὀδύνην παρέχει, οὐκ 13 ἔχον διέξοδον ἐς οὐδετέρην 14 τῶν κοιλιῶν,

² For ἐστιν V has γίνεται

3 τέμνειν δη την είσω φλέβα C'. Urh adds φλέβας

4 ἐν στήθεσιν C'. 5 πταρμοί γίνονται V.

For ἐκ C' Urb. have ἀπὸ.

7 Before τοῦ C' has ἡ διαψυχραινομένου and V ἡ ψυχομένου.

8 After κενεοῦ M has πληρουμένου

9 After ἐνεών Urb M have ἔξω C' reads ἐὼν ἔσω λεπτὸς ἔξω.

10 After πυρετός V has πρώτος.

¹¹ I have followed C' closely in deciding the text of this aphorism. Urb. omits it and also the preceding. V reads:

¹ ύδρωπιέοντι ην βηξ ἐπιγένηται C'.

APHORISMS, VII. XLVII.-I.IV

XLVII. There is no hope for a dropsical patient

should he suffer from cough.

XLVIII. Strangury and dysuma are removed by drinking neat wine and bleeding; you should open the internal veins.

XLIX. In cases of angina, if swelling or redness appear on the breast, it is a good sign, for the

disease is being diverted outwards.

L When the brain is attacked by sphacelus, the patients die in three days; if they outlive these,

they recover.

L1. Sneezing arises from the head, owing to the brain being heated, or to the cavity in the head being filled with moisture (or becoming chilled). So the air inside overflows, and makes a noise, because it passes through a narrow place.

LII. When there is severe pain in the liver, if

fever supervenes it removes the pain

LIII. When it is beneficial to practise venesection,

one ought to bleed in the spring.

LIV In cases where phlegm is confined between the midriff and the stomach, causing pain because it has no outlet into either of the cavities.³ the disease

² In brackets is a translation of the words found in C'

and V.

3 I.e. chest and bowels

12 αποκλείεται C'MV αποκλύεται Urb. αποκείται many MSS.

¹ Sphacelus is incipient mortification, said by some commentators to include curves of the bone.

αίμα άφαιρέεσθαι άπό των φλεβίων τουτέους ξαρι δεί φλεβοτομέεσθαι Μ αίμα άφαιρέειν άπό των φλεβων τουτέοισι ξυμφέρει προς φλεβοτομείσθαι.

¹³ For οὐκ Urb. has μη. 14 οὐδ' ès (els M) ἐτέρην MV.

3 θαι 12 παραχρημα.

LX. Τοισι σώμασι¹³ τοισιν ύγρὰς τὰς σάρκας¹⁴ ἔχουσι λιμὸν ἐμποιεῖν λιμὸς γὰρ ξηραίνει τὰ

3 σώματα.

LIX. "Ην ὑπὸ πυρετοῦ ἐχομένω, οἰδήματος μὴ ἐόντος ἐν τῆ φάρυγγι, ¹⁵ πνὶξ ἐξαίφνης ἐπιγένηται, καὶ καταπίνειν μὴ δύνηται, ἀλλ' ἢ μόλις, ¹⁶ 4 θανάσιμον.

1 υδατος εμπλησθέν Urb.: εμπλησθέν υδατος V: υδατος

πλησθέν C'Μ.

² τὸν ἐπίπλουν C'MV τὸν ἐπίπλοον Urb (this MS has ραγη̂ before εἰs). Littré (with one MS cited) has τὸ ἐπίπλοον.

² Galen says that some MSS ungrammatically gave the nominatives ἀλύκη, χάσμη, φρίκη. Littré restores these, against all our MSS Ungrammatical sentences are not uncommon in the Hippocratic Corpus

4 tows elow M. C' too has tows

5 After λύει many MSS add την νοῦσον, C' has ταῦτα.

6 For γίνεται C' has ἐκφύεται.

7 δαγέντος C'.

δ λύσις γίνεται C' one MS. λύεται ἄνθρωπος ἐκ τοῦ πόνου. Urb. omits this aphorism.

⁹ δ' åν Μ.

APHORISMS, VII. LIV.-LIX.

is removed if the phlegm be diverted by way of the veins into the bladder.

LV. In cases where the liver is filled with water and bursts into the epiploon, the belly fills with water and the patient dies.

LVI. Distress, yawning and shivering are removed by drinking wine mixed with an equal part of

water.

LVII. When tumours form in the urethra, if

they suppurate and burst, the pain is removed.

LVIII. In cases of concussion of the brain from any cause, the patients of necessity lose at once the power of speech.

LX Starving should be prescribed for persons

with moist flesh; for starving dries bodies.

LIX. In the case of a person suffering from fever, there being no swelling in the throat, should suffocation suddenly supervene, and the patient be unable to drink, or drink only with difficulty, it is a mortal symptom.¹

1 See Aphorisms IV. xxxiv.

¹¹ V has ἄφωνον, a grammatical error said by Galen to be found in some MSS

12 γίνεσθαι V.

13 τοις σώμασι omitted by C'

14 ύγρας Εχουσι τας φύσιας C': ύγρας τας σάρκας Εχουσιν.

Urb.: ὑγρὰs after σάρκας V.

15 For εν τη φάρυγγι C' has εν τω τραχήλω: εν τω φάρυγγι

πυλξ έξαίφνης έγγένηται έκ τοῦ φάρυγγος V.

16 άλλὰ μόλις MV: καὶ καταπίνειν μόγης δύνηται θανάσιμου C'

¹⁰ C' has ἀπὸ for ὑπὸ, and Urb. has ὑπό τινος προφάσιος in the margin.

The numbering of this and of the two next aphorisms is an attempt to reconcile the order in Galen with that of our vulgate, which omits LIX and places LX after LIX bis.

LIX bis. *Ην ύπὸ πυρετοῦ ἐχομένῳ ὁ τράχηλος ἐπιστραφῆ, καὶ καταπίνειν μὴ δύνηται, οἰδήματος

3 μη εόντος εν τῷ τραχήλφ, θανάσιμον.1

LXI. "Οκου ἐν ὅλῷ τῷ σώματι μεταβολαί, καὶ ἢν τὸ σῶμα ψύχηται, καὶ πάλιν θερμαίνηται, ἢ χρῶμα ἔτερον ἐξ ἑτέρου μεταβάλλη, μῆκος νούσου 4 σημαίνει.²

LXII.3 'Ιδρώς πολύς, θερμός ἡ ψυχρός, αἰεὶ ρέων, σημαίνει πλείου ὑγρόν ἀπάγειν οὖν τῷ

3 μεν Ισχυρφ ἄνωθεν, τῷ δε ἀσθενεῖ κάτωθεν 4

LXIII. Οι πυρετοί οι μη διαλείποντες, ην ισχυρότεροι διὰ τρίτης γίνωνται, ἐπικίνδυνοι· ὅτφ δ' ὰν τρόπφ διαλείπωσι, σημαίνει ὅτι 4 ἀκίνδυνοι.⁵

LXIV. 'Οκόσοισι ⁶ πυρετοί μακροί, τούτοισιν 2 φύματα, καί ⁷ ες τὰ ἄρθρα πόνοι εγγίνονται.⁸

1 C' omits this aphorism.

2 δκου ἐν ὅλω τῶ σώματι διαφοραὶ καὶ ἢν τὸ σῶμα ψύχεται ἢ αδθις θερμαίνηται ἢ χρῶμα ἔτερον ἐξ ἐτέρου μεταβάλλει μήκος γούσου δηλοῖ C'.

καὶ ὅκου ἐν ὅλω τῶ σώματι μεταβολαὶ καὶ τὸ σῶμα ψύχηται καὶ πάλιν θερμαίνηται ἡ χρῶμα ἔτερον ἐξ ἔτέρου μεταβάλληται.

νούσου μηκος σημαίνει 🗸

καὶ δκου ην $\hat{\epsilon}$ ν δλωι τῶι σώματι μεταβολαί· καὶ τὸ σῶμα καταψύχηται καὶ πάλιν θερμαίνηται $\hat{\eta}$ χρ $\hat{\omega}$ μα ἔτερον $\hat{\epsilon}$ ξ ἔτέρου μεταβάλληι μηκος νούσου σημαίνει $\hat{\mathbf{M}}$

This is another series of variants that cannot possibly be

due to ordinary "corruption"

³ ίδρὸς πολῦς ἀεῖ ἡεων θερμὸς ἡ ψυχρός σημαίνει πλεῖον ὑγρὸν

ἀπάγειν τῶ μὲν ἰσχυρω ἄνωθεν τῶ ἀσθενη κάτωθεν C'.

ίδρως πολύς θερμός ἡ ψυχρός ἀεὶ ῥέων σημαίνει πλεῖον τὸ ὑγρὸν ὑπάγειν τῶ μὲν ἰσχυρῶ ἄνωθεν. τῶ δὲ ἀσθενεῖ κάτωθεν Urb., which ends here

ίδρως πολύς θερμός ή ψυχρός αξί ρέων σημαίνει πλείον ύγρον

ύπάγειν ἰσχυρῶ μὲν ἄνωθεν ἀσθενεῖ δὲ κάτωθεν. V:

ίδρως πολύς ή θερμός ή ψυχρός βέων αίει σημαίνει πλείον

APHORISMS, VII. LIX.-LYIV.

LIX. bis. In the case of a person suffering from fever, if the neck be distorted, and the patient cannot drink, there being no swelling in the neck, it is a mortal symptom.¹

LXI. Where there are changes in the whole body, if the body is chilled, becoming hot again, or the complexion changes from one colour to another,

a protracted disease is indicated.2

LXII. Much sweat, flowing constantly hot or cold, indicates excess of moisture. So evacuate, in the case of a strong person, upwards, in the case of a weak one, downwards ³

LXIII. Fevers that do not intermit, if they become more violent every other day, are dangerous; but if they intermit in any way, it indicates that they are free from danger.⁴

LXIV In protracted fevers, tumours and pains at the joints come on.⁵

1 See Aphorisms IV xxxv.

2 See Aphorisms IV. xl.

* The words added in our best MSS. mean: "Much sweat signifies disease, cold sweat greater disease, hot sweat less"

* See IV. xliv.

* See IV. xliv.

ύγρόν· ἀπάγειν οὖν τὸ μὲν ἴσχυρὸν. ἄνωθεν· τῶ δὲ ἀσθενεῖ κάτωθεν Μ.

Galen is inclined to think this aphorism interpolated

4 After LXII C' adds ίδρδε πολύε νόσον σημαίνει ὁ μεν ψυχρόε πολῦν ὁ δε θερμος ἔλαττον V ίδρως πολύε νοῦσον σημαίνει· ὁ ψυχρόε πολλήν. ὁ θερμόε ἐλάσσω. Μ ίδρῶε πουλύε. νοῦσον σημαίνει· ὁ ψυχρόε. πολλήν ὁ θερμόε. ἐλάσσω.

δ όκόσοι πυρετοί μή διαλείποντες διά τρίτης ἰσχυρώτεροι γίνονται και ἐπικίνδυνοι όκοῖω δ' ὰν τρόπω διαλίπασιν σημαίνει ότι ἀκίνδυνοι Ο': πυρετοι ὁκόσοι μή διαλείποντες διά τρίτης ἰσχυρότεροι γίγγονται και ἐπικίνδυνοι ὅτω δ' ὰν τρόπω διαλίπωσιν ἀκίνδυνοι ἔσονται V: οἱ πυρετοι ὁκόσοι μή διαλείποντες διά τρίτης ἰσχυρότεροι γίνονται ἐπικίνδυνοι ὅτω δ' ὰν. τρόπωι διαλείπωσι. σημαίνει δτι ἀκίνδυνοι Μ.

6 δκόσοι C'. ΄΄ ή φύματα ή MV. ΄΄ βγίγνονται V

LXV. 'Οκόσοισι φύματα καὶ ¹ ἐς τὰ ἄρθρα πόνοι ἐγγίνονται ² ἐκ πυρετῶν, οὖτοι σιτίοισι 3 πλείοσι χρέονται.

LXVI. "Ην τις πυρέσσοντι τροφην διδφ, ην ύγιει, τφ μεν ύγιαίνοντι ισχύς, τφ δε κάμνοντι 3 νούσος.3

LXVII. Τὰ διὰ τῆς κύστιος διαχωρέοντα ὁρῆν δεῖ, εἰ οἶα τοῖς ὑγιαίνουσιν ὑποχωρεῖται. τὰ ⁸ ἥκιστα οὖν ὅμοια τούτοισι, ταῦτα νοσερώτερα, τὰ δ' ὅμοια τοῖσιν ὑγιαίνουσιν, ἥκιστα νοσερά.

APHORISMS, VII. LXV.-LXIX.

LXV. In cases where tumours and pains at the joints appear after fevers, the patients are taking too much food.¹

LXVI If you give to a fever patient the same food as you would to a healthy person, it is strength

to the healthy but disease to the sick.2

LXVII. We must examine the evacuations of the bladder, whether they are like those of persons in health, if they are not at all like, they are particularly morbid, but if they are like those of healthy people, they are not at all so

LXVIII. When the evacuations are allowed to stand and are not shaken, and a sediment of as it were scrapings is formed, in such cases it is beneficial slightly to purge the bowels. But if you give the barley gruel without purging, the more you give the more harm you will do.⁴

LXIX. When the alvine discharges are crude, they are caused by black bile; and the more copious the

3 Galen finds fault with the comparative, and thinks that

a superlative is wanted to contrast with \"\" kiota

⁴ Galen criticises this aphorism. The word ξύσιατα, he says, is inappropriate to urinary executations, while if it applies to stools, the aphorism does not tally with fact. Some old commentators would join this aphorism to the following by means of a κal . As Littré points out, the aphorisms in this part of the work, however just Galen's criticisms may be, were known at least as early as the age of Bacchius

¹ See IV vlv

² Galen says that there were two forms of this aphorism, but gives only one, which omits ην ὁγιεῖ, so that we can only guess what the other form was. He blames the way in which the meaning is expressed. This, however, is obvious enough, and is well illustrated in Regimen in Acute Diseases

¹⁰ δποχωρέη C' (not ἀποχωρέη, as Littré says).

APHORISMS, VII. LXXXIV.-LXXXVII.

LXXXIV. When in patients suffering from quartan 1 fevers there is bleeding at the nose, it is

a bad symptom.

LXXXV. Sweats are dangerous that do not occur² on the critical days, when they are violent and quickly forced out of the forehead, as it were in drops or streams, and are very cold and copious. For such a sweat must be attended with violence, excess of pain and prolonged pressure.

LXXXVI. In a chronic disease excessive flux from

the bowels is bad.

LXXXVII. Those diseases that medicines do not cure are cured by the kmfe. Those that the kmfe does not cure are cured by fire. Those that fire does not cure must be considered incurable.

In the MSS. C' and V, before the beginning of Prognosic, occur the following fragments, which Littré discusses in Vol. I. pp. 401 and following. He considers that most of the passage belongs to the work Sevens. The first sentence, not found in C', is Aphorisms V. ix. The interesting point about the addition of such fragmentary passages to the end of a book is, that compilations like Nature of Man and Humours may have grown by a repetition of a like process.

Consumption usually occurs between the ages of eighteen and thirty-five. The symptoms that normally 3 occur in consumption are all violent, while

¹ So Adams. Littré takes the Greek to mean "When in fevers the patient bleeds at the nose on the fourth day," etc.
² With the reading of M. "that occur on the critical days," etc

τὰ δὲ καὶ θανατώδεα. δεύτερον δέ, ἢν ἐν τῆ ώρη νοση, αὐτη ή ώρη 1 συμμαχεί τη νούσω, οίον καύσφ θέρος, ύδρωπικώ χειμών ύπερνικά γάρ τὸ φυσικόν. φοβερώτερον γάρ ἐστιν ἡ γλώσσα μελαινομένη καὶ πελίη καὶ αίματώδης. ότι αν ² τούτων απη των σημείων και το πάθος 10 ἀσθενέστερον δηλοί. περί θανάτων σημείων.3 ταῦτα μὲν ἐν τοῖς πυρετοῖς τοῖς ὀξέσι σημειοῦσθαι χρή, όπότε μέλλει ἀποθνήσκειν καὶ όπότε σωθήσεται. δ δρχις δ 4 δεξιδς ψυχόμενός τε καὶ άνασπώμενος, θανατώδες. ὄνυχες μελαινόμενοι καὶ δάκτυλοι ποδών ψυχροὶ καὶ μέλανες καὶ σκληροί και ἐγκύπτοντες εγγύς τὸν θάνατον δηλοῦσιν. 6 καὶ τὰ ἄκρα τῶν δακτύλων πελιδνὰ 7 καὶ χείλη πέλια ὑπολελυμένα 8 καὶ έξεστραμμένα θανατώδεα. καὶ σκοτοδινιῶν καὶ 10 ἀπο-20 στρεφόμενος, τη τε ήρεμία 11 ήδόμενος, καὶ ὕπνφ καὶ κώματι 12 πολλφ κατεχόμενος, ἀνέλπιστος. καὶ ὑπολυσσέων ἀτρέμα καὶ ἀγνοέων καὶ μὴ 13 ακούων μηδε συνιείς θανατώδες. 14 καὶ εμέων 15 διὰ δινών ὅταν πίνη θανατώδες. 16 μέλλουσί τε 17 ἀποθυήσκειν ταῦτα σαφέστερα γίνεται. εὐθέως ¹⁸ καὶ αί κοιλίαι ἐπαίρονται καὶ φυσώνται. ὅρος

2 So C'. V has φοβερώτερον δὲ σπληνί γλῶσσο μελαινομένη καὶ αἰματώδης ὅταν.

3 So C' as a title. V omits

5 So C'. V has ἐκκύπτοντες.

⁶ Here V has σημαίνουσι (a gloss).

APHORISMS, VII.

some are actually mortal. Secondly, if the patient be ill in the (kindred) season, the very season is an ally of the disease; for example, summer of ardent fever, winter of dropsy For the natural element wins a decisive victory. For a more fearful symptom is the tongue becoming black, dark and bloodstained. Whatever of these symptoms is not present, it shows that the lesion is less violent. The signs of These are the symptoms that in acute fevers must foretell the death or recovery of the patient. The right testicle cold and drawn up is a mortal sign. Blackening nails and toes cold, black, hard and bent forward show that death is near. tips of the fingers livid, and lips dark, pendulous and turned out, are mortal symptoms. The patient who is dizzy and turns away, pleased with quiet and oppressed by deep sleep and coma,2 is past hope he is slightly raving,3 does not recognise his friends, and cannot hear or understand, it is a mortal Vomiting through the nostrils when he drinks is a mortal symptom. When patients are about to die these clearer symptoms occur. mediately the bowels swell and are puffed up. The boundary of death is passed when the heat of the soul has risen above the navel to the part above

² I.e Summer heat makes the heat of fever worse and the wet of winter is bad for the water of dropsy.

Lattré 3 Can the MSS reading (καύματι) be correct? apparently adopts it.

¹ ὑπολυσσάω is not recognised by the dictionaries.

¹⁰ Here C' has ἀνθρώποις

¹³ καύματι C' V 14 V has θανατώδης.

¹⁶ V omits καὶ . . . θανατώδες

¹¹ ήρεμία (sic) C' V. 13 For μη V has μηδέ.

¹⁵ aluéwy C' 17 τε V: δè C'

¹⁸ V omits εὐθέως.

 $\delta \hat{e}^1$ $\theta a \nu a \tau o v$ $\hat{e} \pi \epsilon \iota \delta a \nu^2$ $\tau \hat{o}$ $\tau \hat{\eta}_S$ $\psi \upsilon \chi \hat{\eta}_S$ $\theta \epsilon \rho \mu \hat{o} \nu$ ἐπανέλθη ὑπὲρ τοῦ ὀμφαλοῦ ἐς τὸ ἄνω τῶν φρενών, 3 καὶ συγκαυθή τὸ ύγρὸν ἄπαν. ἐπειδὰν 30 δ πνεύμων καὶ ή καρδία την ἰκμάδα ἀποβάλωσιν 4 τοῦ θερμοῦ ἀθροοῦντος ἐν τοῖς θανατώδεσι τόποις, ἀποπνεῖ ἄθροον 5 τὸ πνεῦμα τοῦ θερμοῦ. οθενπερ συνέστη τὸ όλον, ἐς τὸ όλον πάλιν. τὸ μὲν διὰ τῶν σαρκῶν τὸ δὲ διὰ τῶν ἐν τῆ 6 κεφαλή ἀναπνοέων, ὅθεν τὸ ζην καλέομεν. ἀπολείπουσα δέ⁷ ή ψυχὴ τὸ τοῦ σώματος σκῆνος 8 τὸ ψυγρὸν καὶ τὸ θνητὸν εἴδωλον ἄμα καὶ χολή καὶ αίματι καὶ φλέγματι καὶ σαρκὶ 39 παρέδωκεν.9

⁸ Here V adds Kal.

⁹ C' has είδωλον αίμα και χολήν και φλέγμα και σάρκας.

APHORISMS, VII.

the diaphragm, and all the moisture has been burnt up. When the lungs and the heart have cast out the moisture of the heat that collects in the places of death, there passes away all at once the breath of the heat (wherefrom the whole was constructed) into the whole again, partly through the flesh and partly through the breathing organs in the head, whence we call it the "breath of life." And the soul, leaving the tabernacle of the body, gives up the cold, mortal image to bile, blood, phlegm and flesh.

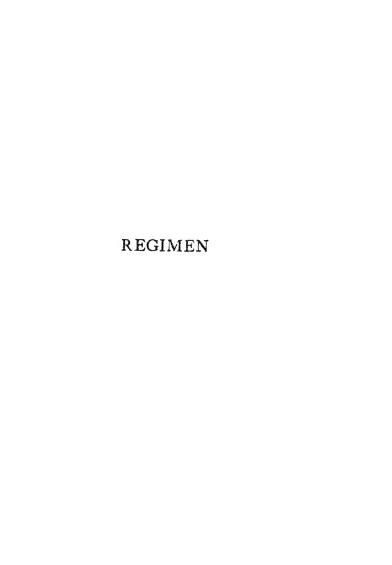

1 "The places of death" might mean either (a) the vital

parts or (b) the places fatally attacked by disease.

Is "the whole" the individual organism or the universe? The first instance of τὸ δλον seems to refer to the individual, the second to the universe. Perhaps the warm life of the individual is supposed to be re-absorbed into the cosmic warmth. See, however, the next note.

3 Is (ñν here supposed to be related to ζέω (boil)? Perhaps, however, both δθεν and ζῆν καλέομεν and (above) δθενπερ συνέστη τὸ δλον are glosses. At any rate their omission improves both the construction and the meaning of the whole sentence.

4 Notice the poetic language (τὸ τοῦ σώματος σκῆνος, τὸ ψυχρὸν καὶ τὸ θνητὸν εἴδωλον). The words σκῆνος and εἴδωλον suggest Orphic thought.

REGIMEN

BOOK I

I. If I thought that any one of my predecessors to write on human regimen in its relation to health had throughout written with correct knowledge everything that the human mind can comprehend about the subject, it would have been enough for me to learn what had been correctly worked out by the labours of others, and to make use of these results in so far as they severally appeared to be of use. As a matter of fact, while many have already written on this subject, nobody yet has rightly understood how he ought to treat it. Some indeed have succeeded in one respect and others in another, but nobody among my predecessors has successfully treated the whole subject. Now none of them is blameworthy for being unable to make complete discoveries; but all are praiseworthy for attempting the research. Now I am not prepared to criticise their incorrect statements; nay, I have resolved to accept what they have well thought out. The correct statements of my predecessors it is impossible for me to write correctly by writing them in some other way; as to the incorrect statements, I shall accomplish nothing by exposing their incorrectness. If, however, I explain how far each of their statements appears to me correct I shall set forth my wish. These preliminary remarks are made

ΠΕΡΙ ΔΙΑΙΤΗΣ

δὲ τὸν λόγον τοῦτον προκατατίθεμαι, ὅτι οἱ ¹ πολλοὶ τῶν ἀνθρώπων ὁκόταν τινὸς προτέρου ἀκούσωσι περί τινος ἐξηγευμένου, οὐκ ἀποδέχονται τῶν ὕστερον διαλεγομένων περὶ τούτων, οὐ γινώσκοντες ὅτι τῆς αὐτῆς ἐστὶ διανοίης γνῶναι τὰ ὀρθῶς εἰρημένα, ἐξευρεῖν τε τὰ μήπω εἰρημένα. ἐγὼ οὖν, ὥσπερ εἰπον, τοῖσι μὲν ὀρθῶς εἰρημένοισι προσομολογήσω τὰ δὲ μὴ ὀρθῶς εἰρημένα δηλώσω ποῖα ἐστιν' ὁκόσα δὲ μηδὲ ἐπεχείρησε μηδεὶς τῶν πρότερον δηλῶσαι, ἐγὼ ἐπιδείξω καὶ ταῦτα 32 οἶά ἐστι.

ΙΙ. Φημὶ δὲ δεῖν τὸν μέλλοντα ὀρθώς συγγράφειν περί διαίτης ανθρωπίνης 2 πρώτον μέν παντός φύσιν ανθρώπου γνώναι και διαγνώναι γνώναι μέν άπο τίνων συνέστηκεν εξ άργης. διαγνώναι δε ύπο τίνων μερών κεκράτηται είτε γὰρ τὴν ἐξ ἀρχῆς σύστασιν μὴ γνώσεται, ἀδύνατος έσται τὰ ὑπ' ἐκείνων γινόμενα γνῶναι. είτε μη γνώσεται το επικρατέον εν τώ σώματι, ούν ίκανὸς ἔσται τὰ συμφέροντα προσενεγκεῖν 10 τῷ ἀνθρώπω. ταῦτα μὲν οὖν δεῖ ⁸ γινώσκειν τὸν συγγράφοντα, μετὰ δὲ ταῦτα σίτων καὶ ποτῶν άπάντων, οἶσι διαιτώμεθα, δύναμιν ἥντινα ἔκαστα⁴ έχει καὶ τὴν κατὰ φύσιν καὶ τὴν δι' ἀνάγκην καὶ τέχνην ἀνθρωπίνην. δεῖ γὰρ ἐπίστασθαι τῶν τε ίσχυρῶν φύσει ὡς χρὴ τὴν δύναμιν ἀφαιρεῖσθαι, τοισί τε ἀσθενέσιν ὅκως χρη ἰσχὺν προστιθέναι διὰ τέχνης, ὅκου αν ὁ καιρὸς ἐκάστω 6 παραγένηται. γνοῦσι δὲ τὰ εἰρημένα οὔπω αὐτάρκης ή θεραπείη του άνθρώπου, διότι οὐ δύναται

of omitted by M.
 àνθρωπίης θ.
 δεῖ θ M: χρη Littré and vulgate.

REGIMEN, I. 1.-11.

for the following reasons: most men, when they have already heard one person expounding a subject, refuse to listen to those who discuss it after him, not realising that it requires the same intelligence to learn what statements are correct as to make original discoveries. Accordingly, as I have said, I shall accept correct statements and set forth the truth about those things which have been incorrectly stated. I shall explain also the nature of those things which none of my predecessors has even

attempted to set forth.

II. I maintain that he who aspires to treat correctly of human regimen must first acquire knowledge and discernment of the nature of man in general-knowledge of its primary constituents and discernment of the components by which it is controlled. For if he be ignorant of the primary constitution, he will be unable to gain knowledge of their effects; if he be ignorant of the controlling thing in the body he will not be capable of administering to a patient These things therefore the suitable treatment author must know, and further the power possessed severally by all the foods and drinks of our regimen, both the power each of them possessed by nature and the power given them by the constraint of human art For it is necessary to know both how one ought to lessen the power of these when they are strong by nature, and when they are weak to add by art strength to them, seizing each opportunity as it occurs. Even when all this is known, the care of a man is not yet complete, because

REGIMEN, I. 11.

eating alone will not keep a man well; he must also take exercise For food and exercise, while possessing opposite qualities, yet work together to produce health. For it is the nature of exercise to use up material, but of food and drink to make good deficiencies. And it is necessary, as it appears, to discern the power of the various exercises. both natural exercises and artificial, to know which of them tends to increase flesh and which to lessen it; and not only this, but also to proportion exercise to bulk of food, to the constitution of the patient, to the age of the individual, to the season of the year, to the changes of the winds, to the situation of the region in which the patient resides, and to the constitution of the year. A man must observe the risings and settings of stars, that he may know how to watch for change and excess in food, drink, wind and the whole universe, from which diseases exist among men. But even when all this is discerned, the discovery is not complete. If indeed in addition to these things it were possible to discover for the constitution of each individual a due proportion of food to exercise, with no maccuracy either of excess or of defect, an exact discovery of health for men would have been made. But as it is. although all the things previously mentioned have been discovered, this last discovery cannot be made. Now if one were present and saw, he would have knowledge 1 of the patient as he stripped and

¹ With the reading of Ermerins and Diels: "saw the patient as he stripped . . . he would know how it is necessary to keep him," etc.

REGIMEN, I. 11.-111.

practised his exercises, so as to keep him in health by taking away here and adding there. But without being present it is impossible to prescribe the exact amount of food and exercise, since how far it is possible to make discoveries I have already set forth. In fact, if there occur even a small deficiency of one or the other, in course of time the body must be overpowered by the excess and fall sick. Now the other investigators have attempted to carry their researches to this point, but they have not gone on to set them forth. But I have discovered these things, as well as the forecasting of an illness before the patient falls sick, based upon the direction in which is the excess. For diseases do not arise among men all at once; they gather themselves together gradually before appearing with a sudden spring. So I have discovered the symptoms shown in a patient before health is mastered by disease, and how these are to be replaced by a state of health. When to the things already written this also has been added, the task I have set before myself will be accomplished.

III. Now all animals, including man, are composed of two things, different in power but working together in their use, namely, fire and water. Both together these are sufficient for one another and for everything else, but each by itself suffices neither for itself nor for anything else. Now the power that

JOr, "but neither have these things been set forth (discovered)" The conjecture εύρηται would suggest that the writer had been successful in making a discovery which other authorities had unsuccessfully tried to reach.

⁵ άθρόον θ.

⁶ τελευτά θ: τελέεται M: finem accipit P

έγει τοιήνδε τὸ μὲν γὰρ πῦρ δύναται πάντα διὰ παντὸς κινήσαι, τὸ δὲ ὕδωρ πάντα διὰ παντὸς 10 θρέψαι ἐν μέρει δὲ ἐκάτερον κρατεῖ καὶ κρατεῖται ές τὸ μήκιστον καὶ ἐλάχιστον ιώς ἀνυστόν. οὐδέτερον γὰρ κρατήσαι παντελώς δύναται διὰ τόδε τὸ μέν πῦρ ἐπεξιὸν ἐπὶ τὸ ἔσχατον τοῦ ύδατος επιλείπει ή τροφή αποτρέπεται οὐν οκόθεν μέλλει τρέφεσθαι το δε ΰδωρ επεξιον έπὶ τὸ ἔσχατον τοῦ πυρός, ἐπιλείπει ἡ κίνησις. ίσταται οὖν ἐν τούτω ὁκόταν δὲ στῆ, οὐκέτι έγκρατές έστιν, άλλ' ήδη τω έμπίπτοντι πυρί ές την τροφην καταναλίσκεται. οὐδέτερον δὲ 20 διά ταθτα δύναται κρατήσαι παντελώς εἰ δέ ποτε κρατηθείη καὶ δκότερου πρότερου, 2 οὐδὲν ἂν εἴη τῶν νῦν ἐόντων ὅσπερ ἔχει νῦν οὕτω δὲ ἐχόν-των αἰεὶ ἔσται τὰ αὐτά, καὶ οὐδέτερα καὶ οὐδὲ ἄμα³ ἐπιλείψει. τὸ μὲν οὖν πῦρ καὶ τὸ ὕδωρ, ὥσπερ είρηταί μοι, αὐτάρκεά ἐστι πᾶσι διὰ παντὸς ἐς 26 τὸ μήκιστον καὶ τοὐλάχιστον ωσαύτως.

Some would read καὶ οὐδέτερον οὐδαμὰ, "and neither will fail altogether." This is very likely the correct reading

REGIMEN, I. III.-IV.

each of them possesses is this. Fire can move all things always, while water can nourish all things always; but in turn each masters or is mastered to the greatest maximum or the least minimum possible. Neither of them can gain the complete mastery for the following reason. The fire, as it advances to the limit of the water, lacks nourishment, and so turns to where it is likely to be nourished; the water, as it advances to the limit of the fire, find its motion fail, and so stops at this point. When it stops its force ceases, and hereafter is consumed to nourish the fire which assails it. Neither, however, can become completely master for the following reasons. If ever either were to be mastered first, none of the things that are now would be as it is now. But things being as they are, the same things will always exist, and neither singly nor all together will the elements fail. So fire and water, as I have said, suffice for all things throughout the universe unto their maximum and the minimum alike.

IV These elements have severally the following attributes. Fire has the hot and the dry, water the cold and the moist. Mutually too fire has the moist from water, for in fire there is moisture, and water has the dry from fire, for there is dryness in water also. These things being so, they separate off from themselves many forms of many kinds, both of seeds and of living creatures, which are like to one another neither in their appearance nor in their power.¹

¹ Probably δύναμις here means φύσις, "nature," "essence"

⁴ For έν πυρί M has ἀπό τοῦ ὅδατος.

REGIMEN, I. iv.

For as they never stay in the same condition, but are always changing to this or to that, from these elements too are separated off things which are necessarily unlike. So of all things nothing perishes, and nothing comes into being that did not exist before Things change merely by mingling and being separated. But the current belief among men is that one thing increases and comes to light from Hades, while another thing diminishes and perishes from the light into Hades For they trust eyes rather than mind, though these are not competent to judge even things that are seen. But I use mind to expound thus. For there is life in the things of the other world, as well as in those of this. If there be life, there cannot be death, unless all things die with it. For whither will death take place? Nor can what is not come into being. For whence will it come? But all things increase and diminish to the greatest possible maximum or the least possible minimum. Whenever I speak of "becoming" or "perishing" I am merely using popular expressions; what I really mean is "mingling" and "separating." The facts are these.
"Becoming" and "perishing" are the same thing, "mixture" and "separation" are the same thing; "increase" and "diminution" are the same thing, "becoming" and "mixture" are the same thing.

¹ The passage, "So of all things... and being separated," is almost verbally the same as a fragment (22 Schaubach) quoted by Simplicius (Phys. 163, 20). It runs το δὲ γίνεσθαι καὶ ἀπόλλυσθαι οὐκ ὀρθῶς νομίζουσιν οἱ "Ελληνες οὐδὲν γὰρ χρῆμα γίνεται οὐδὲ ἀπόλλυται, ὰλλ' ἀπό ἐόντων χρημάτων συμμίσγεταί τε, καὶ διακρίνεται καὶ οῦτως ὰν ὀρθῶς καλοῖεν τό τε γίνεσθαι συμμίσγεσθαι καὶ τὸ ἀπόλλυσθαι διακρίνεσθαι.

[&]quot; ωs καl . . . ἐλάχιστον omitted by θ. Burnet in his Early Greek Philosophy suggests the following reading of the passage. ἡμέρη καὶ εὐφρόνη ἐπὶ τὸ μήκιστον καὶ ἐλάχιστον· τλιος, σελήνη επί το μήκιστον και ελάχιστον· πυρος εφοδος και υδατος. This is very Heracleitean, and may represent the passage of Heracleitus paraphrased by the author of mepi διαίτης

REGIMEN, I. IV.-V.

"perishing," "diminution" and "separation" are the same thing, and so is the relation of the individual to all things, and that of all things to the individual Yet nothing of all things is the same. For in regard

to these things custom is opposed to nature,1

V. But all things, both human and divine, are in a state of flux upwards and downwards by exchanges. Day and night, to the maximum and minimum; just as the moon has its maximum and minimum, the ascendancy of fire and of water, so the sun has its longest and its shortest courseall the same things and not the same things. Light for Zeus, darkness for Hades; light for Hades, darkness for Zeus-the things of the other world come to this, those of this world go to that, and during every season throughout every place the things of the other world do the work of this, and those of this world do the work of that. And what men work they know not, and what they work not they think that they know; and what they see they do not understand, but nevertheless all things take place for them through a divine necessity, both what they wish and what they do not wish. And as the things of the other world come to this, and those of this world go to that, they combine with one another, and each fulfils its allotted destiny, both unto the greater and unto the less. And destruction

attacks that are made For that which is not suitable cannot abide in regions not adapted to it. Now such wander without thought, but combining with one another they realise what they are joining. For the suitable joins the suitable, while the unsuitable wars and fights and separates itself. For this reason a man's soul grows in a man, and in no other creature. It is the same with the other large animals When it is otherwise, there is forcible separation from others

VII. I shall say nothing about the other animals, confining my attention to man. Into man there enters a soul, having a blend of fire and water,² a portion of a man's body. These, both female and male, many and of many kinds, are nourished and increased by human diet. Now the things that enter must contain all the parts. For that of which no part were present would not grow at all, whether the nutriment that were added were much or little, as having nothing to grow on to it. But having all, each grows in its own place, nutriment being added from dry water and moist fire, some things being forced inside, others outside. As carpenters saw the log, and one pulls and the

1 Diels' reading would mean: "They wander when at variance, but when they are of one mind they realise," etc

10 Before τὰ θ has καl.

² That soul is a mixture of fire and water, and that the character of soul is relative to that mixture, is doctrine directly derived from Heracleitus See p 493 "It is death to souls to become water"

^{*} $\hbar \nu$ is not in θ It could easily fall out before $a \hat{\nu} \xi \eta \theta e \hat{\eta} \eta$, on the other hand, potential optatives without $\hbar \nu$ are not infrequent in the Hippocratic Collection. Bywater puts a comma at $\hat{a} \rho \chi \hat{\eta} s$.

REGIMEN, I. vn.-vm.

other pushes, though they do the same thing. The one that presses below pulls the one above, otherwise the saw could not descend. If force be applied they will lose all. Such is the nutriment of a man. One part pulls, the other pushes; what is forced inside comes outside. But if untimely violence be

applied there is no success.1

VIII. Each keeps the same position until nourishment no longer receives it, and it has not sufficient room for the greatest possible extension; then it passes into larger room, female and male, driven along in the same manner by force and necessity. Such as first fill the allotted portion are the first to be separated, and at the same time they also commingle. For each separates first, and at the same time also commingles. And if, on changing position, they achieve a correct attunement, which has three harmonic proportionals, covering altogether the octave, they live and grow by the same things as they did before. But if they do not achieve the attunement, and the low harmonize not with the high in the interval of the fourth, of the fifth, or in the octave, then the failure of one makes the whole

¹ There is a kind of "one-way traffic" through the body. Interference with the circuit means disease or death

scale of no value, as there can be no consonance, but they change from the greater to the less before their destiny. The reason is they know not what

they do.

IX. As for males and females, later on in my discourse I shall explain why each severally come to be. But whichever of the two happens to come and achieves the attunement, it is moist and is kept in movement by the fire. Being in movement it gets inflamed, and draws to itself its nourishment from the food and breath that enter the woman. At first, while it is still rare, this occurs equally throughout; but owing to the movement and the fire it dries and solidifies, as it solidifies it hardens all round, and the fire being imprisoned can no longer draw to itself its nourishment in sufficient quantity, while it does not expel the breath owing to the hardness of its envelope. So it consumes the available moisture inside Now the parts in the compacted, dry mass that are solid in substance are not consumed by the fire for its nourishment, but they prove powerful, and as the moisture fails they become compact, and are called bones and sinews. The fire, meanwhile, being moved 1 out of the moisture which was mixed with it, arranges the body according to nature through the following necessity. Through the hard and dry parts it cannot make itself lasting passages, because it has no nourishment; but it can through the moist and soft, for these are its nourishment. Yet in these too there is dryness not consumed by the fire.

¹ The MSS reading (κινουμένου or κινευμένου) will give the rendering: "out of the moisture mixed with it, and put in motion by it, arranges," etc.

τοῦ πυρός· ταῦτα δὲ συνίσταται πρὸς ἄλληλα.

² περιόδους ἐποιήσατο τρισσάς is placed by Diels after χωρίοισιν. Franch marks an hiatus after κοίλαι.

REGIMEN, I. ix. x.

and these dry parts become compacted one with another. So the fire shut up in the innermost part both is most abundant and made for itself the greatest passage. For there the moisture was most abundant, and it is called the belly. Therefrom the fire burst forth, since it had no nourishment, and made passages for the breath and to supply and distribute nourishment. The fire shut up in the rest of the body made itself three passages, the moistest part of the fire being in those places called the hollow veins. And in the middle of these that which remains of the water becomes compacted and

congeals. It is called flesh.

X In a word, all things were arranged in the body, in a fashion conformable to itself, by fire, a copy of the whole, the small after the manner of the great and the great after the manner of the small. The belly is made the greatest, a steward for dry water and moist, to give to all and to take from all, the power of the sea, nurse of creatures suited to it, destroyer of those not suited. And around it a concretion of cold water and moist, a passage for cold breath and warm, a copy of the earth, which alters all things that fall into it. Consuming and increasing, it made a dispersion of fine water and of ethereal fire, the invisible and the visible, a secretion from the compacted substance, in which things are carried and come to light, each

according to its allotted portion And in this fire made for itself three groups of circuits, within and without each bounded by the others: those towards the hollows of the moist, the power of the moon; those towards the outer circumference, towards the solid enclosure, the power of the stars; the middle circuits, bounded both within and without. The hottest and strongest fire, which controls all things, ordering all things according to nature, imperceptible to sight or touch, wherein are soul, mind, thought, growth, motion, decrease, mutation, sleep, waking. This governs all things always, both here and there, and is never at rest.

XI. But men do not understand how to observe the invisible through the visible. For though the arts they employ are like the nature of man, yet they know it not For the mind of the gods taught them to copy their 1 own functions, and though they know what they are doing yet they know not what they are copying. For all things are like, though unlike, all compatible though incompatible, conversing though not conversing, intelligent without intelligence. The fashion of each is contrary, though in agreement For custom and nature, by means of which we accomplish all things, do not agree though they do agree. For custom was settled by men for themselves without their knowing those things about which they settled the custom; but the nature of all things was

¹ Probably "the operations of their own bodies," but Littré translates · "les opérations divines"

⁶ θεὸς διεκόσμησεν θ, altered to θεοί διεκόσμησαν (or the reverse). Is the latter a Christian correction?

τὰ μὲν οὖν ἄνθρωποι διέθεσαν οὐδέποτε κατὰ τωὖτὸ ἔχει οὔτε ὀρθῶς οὔτε μὴ ὀρθῶς ὁκόσα δὲ θεοὶ διέθεσαν ἀεὶ ὀρθῶς ἔχει· καὶ τὰ ὀρθὰ καὶ τὰ μὴ ὀρθὰ τοσοῦτον διαφέρει.

REGIMEN, I. xi.-xii.

arranged by the gods. Now that which men arrayed never remains constant, whether right or wrong; but whatsoever things were arranged by the gods always remain right. So great the difference between

the right and the wrong.

XII. But I will show that arts are visibly like to the affections of man, both visible and invisible. Seercraft is after this fashion. By the visible it gets knowledge of the invisible, by the invisible knowledge of the visible, by the present knowledge of the future, by the dead knowledge of the living, and by means of that which understands not men have understanding—he who knows, right understanding always, he who knows not, sometimes right understanding, sometimes wrong. Seercraft herein copies the nature and life of man. A man by union with a woman begets a child; by the visible he gets knowledge of the invisible that so it will be invisible human intelligence, getting knowledge of the visible, changes from childhood to manhood; by the present it gets knowledge of the future. corpse is not like a living creature, by the dead he knows the living. The belly is without consciousness, yet by it we are conscious of hunger and thirst. The characteristics of seercraft and of human nature are these: 1 for those who know, always rightly interpreted; 2 for those who know not, sometimes rightly and sometimes not.

Or (with ταὐτά) "the same."

² The grammar is curious With ὀρθῶs some participle (or verb) must be understood, perhaps γινωσκόμενα or γινώσκεται The ἀεὶ before ἄλλοτε is suspicious.

XIII. Iron tools. Craftsmen melt the iron with fire, constraining the fire with breath; they take away the nourishment it has already; when they have made it rare, they beat it and weld it, and with the nourishment of other water it grows strong. Such is the treatment of a man by his trainer By fire the nourishment he has already is taken away, breath constraining him. As he is made rare, he is struck, rubbed and purged. On the application of water from elsewhere he becomes strong.

XIV. This do also the fullers. They trample, strike and pull, by maltreating they make stronger; by cutting off the threads that project, or by weaving them in, they beautify. The same happens to a

man.

XV Cobblets divide wholes into parts and make the parts wholes, cutting and stitching they make sound what is lotten. Man too has the same experience. Wholes are divided into parts, and from union of the parts wholes are formed. By stitching and cutting, that which is rotten in men is healed by physicians. This too is part of the physician's art: to do away with that which causes pain, and by taking away the cause of his suffering to make him sound. Nature of herself knows how to do these things. When a man is sitting it is a labour to rise; when he is moving it is a labour to come

to rest. In other respects too nature is the same as

the physician's art.

XVI. When carpenters saw, one pushes and the other pulls, in both cases doing the same thing. [When boring, one pulls and the other pushes.] When they press the tool, this goes up, that goes down.¹ When they diminish they increase They are copying the nature of man. This draws breath in, that expels it; in both cases the same thing is done. Some parts of the food are pressed down, some come up. From one soul when divided come more and less, greater and smaller.

XVII. Builders out of diverse materials fashion a harmony, moistening what is dry, drying what is moist, dividing wholes and putting together what is divided. Were this not so, the result would not be what it should. It is a copy of the diet of man; moistening the dry, drying the moist, they divide wholes and put together what is divided. All these

being diverse are harmonious.

XVIII. [First there must be an instrument of music, whereby to set forth what is intended.] From the same notes come musical compositions that are not the same, from the high and from the low, which are alike in name 2 but not alike in

2 I e. they are all called "notes"

8 After συμφέρει M adds τῆι φύσει.

¹ Probably this means that as the saw goes down the log appears to come up and vice versa. Perhaps, however, τὸ δὲ applies to a different action of the saw, "When they press, it first goes up, then down."

^{*} άρμονίη συντάξιες Μ: άρμονίης σύνταξιε θ. The words Μουσικής. . . βούλεται should probably be deleted as a marginal note which has been incorporated into the text.

sound. Those that are most diverse make the best harmony; those that are least diverse make the worst. If a musician composed a piece all on one note, it would fail to please. It is the greatest changes and the most varied that please the most.

Cooks prepare for men dishes of ingredients that disagree while agreeing, mixing together things of all sorts, from things that are the same, things that are not the same, to be food and drink for a man. If the cook make all alike there is no pleasure in them; and it would not be right either if he were to compound all things in one dish. The notes struck while playing music are some high, some The tongue copies music in distinguishing, of the things that touch it, the sweet and the acid, the discordant from the concordant. Its notes are struck high and low, and it is well neither when the high notes are struck low nor when the low are struck high. When the tongue is well in tune the concord pleases, but there is pain when the tongue is out of tune.

XIX Curriers stretch, 1ub, comb and wash. Children are tended in the same way. Basket-makers turn the baskets round as they plant them; they end at the place from which they begin. The circuit in the body is the same; it ends where it begins.

XX. Men work on gold, beat it, wash it and melt it. With gentle, not strong, fire it is compacted. When they have wrought it they use it for all purposes. So a man beats corn, washes it,

grinds it, applies fire and then uses it. With strong fire it is not compacted in the body, but

with gentle fire.

XXI. Statue-makers copy the body without the soul, as they do not make intelligent things, using water and earth, drying the moist and moistening the dry. They take from that which is in excess and add to that which is deficient, making their creations grow from the smallest to the tallest. Such is the case of man He grows from his smallest to his greatest, taking away from that which is in excess, adding to that which is deficient, moistening the dry and drying the moist.

XXII. Potters spin a wheel, which shifts neither forwards nor backwards, yet moves both ways at once, therein copying the revolution of the universe. On this wheel as it revolves they make pottery of every shape, and no two pieces are alike, though they are made from the same materials and with the same tools. Men and the animals too are in the same case. In one and the same revolution they make all things, without two being alike, from the same materials and with the same tools, making dry from moist and moist from dry.

XXIII The art of writing is of this sort: the putting together of figures, symbols of human voice, a power to recall past events, to set forth what must be done. Through seven figures 1 comes

REGIMEN, I. xxiii.-xxiv.

knowledge. All these things a man performs, both he who knows letters and he who knows them not. Through seven figures come sensations for a man; there is hearing for sounds, sight for the visible, nostril for smell, tongue for pleasant or unpleasant tastes, mouth for speech, body for touch, passages outwards and inwards for hot or cold breath.

Through these come knowledge or lack of it.

XXIV. The trainer's art is of this sort. they teach how to transgress the law according to law, to be unjust justly, to deceive, to trick, to rob, to do the foulest violence most fairly. He who does not these things is bad; he who does them is good. It is a display 1 of the folly of the many. They behold these things and judge one man out of all to be good and the others to be bad Many admire. few know. Men come to the market-place and do the same things; men deceive when they buy and sell. He who has deceived most is admired When drinking and raving they do the same things. They run, they wrestle, they fight, they trick, they deceive One out of them all is judged. The actor's art deceives those who know. They say one thing and think another, they come on and go off, the same persons yet not the same. A man too can say one thing and do another; the same man can be not the same; he may be now of one mind, now of

REGIMEN, I. xxiv.-xxvi.

another. So all the arts have something in common with the nature of man.

XXV. The soul of man, as I have already said, being a blend of fire and water, and the parts of man, enter into every animal that breathes, and in particular into every man, whether young or old. But it does not grow equally in all, but in young bodies, as the revolution is fast and the body growing, it catches fire, becomes thin and is consumed for the growth of the body; whereas in older bodies, the motion being slow and the body cold, it is consumed for the lessening of the man. Such bodies as are in their prime and at the procreative age can nourish it and make it grow. Just as a potentate is strong who can nourish 1 very many men, but is weaker when they desert him, even so those bodies are severally strongest that can nourish very many souls, but are weaker when this faculty has departed.2

XXVI. Whatever enters into something else does not grow; but whatever enters a woman grows if it meets with the things that suit it. And all the limbs are separated and grow simultaneously, none before or after another; although those by nature

¹ τρέφειν can mean "to keep ' pets or servants, as well as "to nourish" the body.

² ἀπελθόντων δὲ τούτων is strange To what does it refer? And how can a body nourish many souls?

larger become visible before the smaller, yet they are formed none the earlier. Not all take the same time to form; some take less time, some longer, according as they severally meet with fire and nourishment. Some have everything visible in forty days, some in two months, some in three months and others in four. Similarly also some are formed before others; those that grew quicker are fully formed in seven months, those that grew more slowly in nine months; and they appear in the light with the same blend as they will have always.

XXVII. Males and females would be formed, so far as possible, in the following manner. Females, inclining more to water, grow from foods, drinks and pursuits that are cold, moist and gentle. Males, inclining to fire, grow from foods and regimen that are dry and warm. So if a man would beget a girl, he must use a regimen inclining to water. If he wants a boy, he must live according to a regimen inclining to fire. And not only the man must do this, but also the woman. For growth belongs, not only to the man's secretion, but also to that of the woman, for the following reason. Either part alone has not motion enough, owing to the bulk of its moisture and the weakness of its fire, to consume and to solidify the oncoming water. But when it happens that both are emitted together to one place, they conjoin, the fire to the fire and the

water likewise. Now if the fire fall in a dry place, it is set in motion, if it also master the water emitted with it, and therefrom it grows, so that it is not quenched by the onrushing flood, but receives the advancing water and solidifies it on to what is there already. But if it fall into a moist place, immediately from the first it is quenched and dissolves into the lesser rank ¹ On one day in each month it can solidify, and master the advancing parts, and that only if it happen that parts are emitted from both parents together in one place.

XXVIII Male and female have the power to fuse into one solid, both because both are nourished in both and also because soul is the same thing in all living creatures, although the body of each is different. Now soul is always alike, in a larger creature as in a smaller, for it changes neither through nature nor through force. But the body of no creature is ever the same, either by nature or by force, for it both dissolves into all things and also combines with all things. Now if the bodies secreted from both happen to be male, they grow up to the limit of the available matter, and the babies become men brilliant in soul and strong in body, unless they be harmed by their subsequent diet. If the secretion from the man be male and that of the woman female, should

REGIMEN, I. xxviii.-xxix.

the male gain the mastery, the weaker soul combines with the stronger, since there is nothing more congenial present to which it can go For the small goes to the greater and the greater to the less, and united they master the available matter. The male body grows, but the female body decreases into another part. And these, while less brilliant than the former, nevertheless, as the male from the man won the mastery, they turn out brave, and have rightly this name. But if male be secreted from the woman but female from the man, and the male get the mastery, it grows just as in the former case, while the female diminishes. These turn out hermaphrodites ("men-women") and are correctly so called. These three kinds of men are born, but the degree of manliness depends upon the blending of the parts of water, upon nourishment, education and In the sequel I shall discuss these matters habits. also.

XXIX In like manner the female also is generated. If the secretion of both parents be female, the off-spring prove female and fair, both to the highest degree. But if the woman's secretion be female and the man's male, and the female gain the mastery, the girls are bolder than the preceding, but nevertheless they too are modest. But if the man's secretion be female, and the woman's male,

1 Or, "destiny."

and the female gain the mastery, growth takes place after the same fashion, but the girls prove more daring than the preceding, and are named "mannish" If anyone doubts that soul combines with soul, let him consider coals. Let him place lighted coals on lighted coals, strong on weak, giving them nourishment. They will all present a like substance, and one will not be distinguished from another, but the whole will be like the body in which they are kindled. And when they have consumed the available nourishment, they dissolve into invisibility. So too it is with the soul of man.

XXX. How twins are born my discourse will explain thus. The cause is chiefly the nature of the womb in woman. For if it has grown equally on either side of its mouth, and if it opens equally, and also dries equally after menstruation, it can give nourishment, if it conceive the secretion of the man so that it immediately divides into both parts of the womb equally. Now if the seed secreted from both parents be abundant and strong, it can grow in both places, as it masters the nourishment that reaches it. In all other cases twins are not formed. Now when the secretion from both parents

¹ Or, with Littré's reading, "unlighted" But it seems more natural, if the male soul be the strong burning coal, for the female soul to be represented by a weak burning coal. When combined, the two coals burn with one flame, with that flame, in fact, appropriate "to the substance in which they are kindled"

³ So M. θ has άπαν παρεσχηκότος καὶ οὐ διάδηλον έτερον τοῦ στεροῦ Peck reads πᾶν παρασχήσεται καὶ οὐ διάδηλον τὸ ἔτερον τοῦ ἐτέρου—perhaps rightly

REGIMEN, I. XXX.-XXXII.

is male, of necessity boys are begotten in both places; ¹ but when from both it is female, girls are begotten. But when one secretion is female and the other male, whichever masters the other gives the embryo its sex. Twins are like one another for the following reasons. First, the places are alike in which they grow; then they were secreted together; then they grow by the same nourishment, and at birth they reach together the light of day.

XXXI. Superfetation occurs in the following way. When the womb is naturally hot and dry, and the woman is also such, and the seed that enters it is dry and hot, there is no superfluous moisture in the womb to master the seed that enters. Therefore, though it congeals at first and lives, yet it cannot last, but destroys as well the embryo already there,

as the same things do not suit both.

XXXII. (1) The finest water and the rarest fire, on being blended together in the human body, produce the most healthy condition for the following reasons. At the greatest changes in the seasons of the year neither is fulfilled to the extreme limit; the water is not fulfilled to the densest limit at the onsets of the water, nor is the fire at the onsets of the fire, whether these be due to alterations in age or to

¹ If we accept the reading of θ M the grammar is peculiar; we have $\gamma \epsilon \nu \nu \hat{\alpha} \sigma \theta \alpha$ as though $\hat{\alpha} \nu \hat{\alpha} \gamma \kappa \eta$ (and not $\hat{\epsilon} \xi$ $\hat{\alpha} \nu \hat{\alpha} \gamma \kappa \eta s$) had preceded

REGIMEN, I. XXXII.

the foods and drinks that comprise diet. For both (finest water and rarest fire) can admit the amplest generation and fullness. It is the softest and rarest bronze that admits of the most thorough blending and becomes most beautiful; even so is it with the finest water and the rarest fire, when they are blended together. Now those who have this nature continue in good health all the time till they are forty years of age, some of them till extreme old age, while such of them as are attacked by some illness after the age of forty do not generally die of it.2 (2) Such bodies as are blended of the strongest fire and the densest water turn out strong and robust physically, but need great caution. For they are subject to great changes in either direction, and fall into illnesses at the onsets of the water and likewise at those of the fire. Accordingly it is beneficial for a man of this type to counteract the seasons of the year in the diet he follows, employing one inclined to fire when the onset of water occurs, and one inclined to water when the onset of fire occurs. changing it gradually as the season itself changes (3) When the thickest water and the finest fire have been blended in the body, the results are such that we must discern a nature cold and moist.

¹ Referring apparently to the ξφοδω of water or of fire that may take place at the change from one period of life to

another, or through peculiarities of diet.

² The $\delta\iota\alpha\phi\nu\gamma\gamma\dot{\alpha}\nu\sigma\upsilon\sigma\iota$ of M ("rarely escape death") is an obvious correction based upon a misunderstanding of the argument. The verb applies not to the average man over forty, who may be "a bad life," but to the man whose elements are a happy blend of "the finest water and the rarest file" Such a man, the writer asserts, is "a good life" all his days. This passage is a clear proof of the general superiority of θ over our other MSS.

ύγρήν ταῦτα τὰ σώματα ἐν τῷ χειμῶνι νοσερώτερα ἡ ἐν τῷ θέρει, καὶ εν τῷ ἡρι ἡ ἐν τῷ φθινοπώρω, των ήλικιέων, ύγιηρότατοι των τοιούτων οί παίδες, δεύτερον νεηνίσκοι, νοσε-40 ςώτατοι δε οί πρεσβύτατοι και οί έγγιστα, και ταχέως γηράσκουσιν αί φύσιες αθται. διαιτασθαί 2 δὲ συμφέρει τοίσι τοιούτοισιν δκόσα θερμαίνει καὶ ξηραίνει καὶ πόνοισι καὶ σίτοισι, καὶ πρὸς τὰ ἔξω τοῦ σώματος μᾶλλον τοὺς πόνους 3 ποείσθαι ή πρὸς τὰ είσω. εί δὲ λάβοι 4 πυρός τε τὸ ὑγρότατον καὶ ὕδατος τὸ πυκνότατον σύγκρησιν εν τῶ σώματι, τοισίδε γινώσκειν ύγρην καί θερμην φύσιν κάμνουσι μέν μάλιστα οί τοιοῦτοι ἐν τῷ ἦρι, ἤκιστα δὲ ἐν τῷ Φθινοπώρω. 50 ότι ἐν μὲν τῷ ἡρι ὑπερβολὴ τῆς ὑγρασίης, ἐν δὲ τῷ φθινοπώρῷ συμμετρίη τῆς ξηρασίης· τῶν δὲ ἡλικιέων νοσερώταται ὅσαι νεώταταί εἰσιν· αὔξεται δὲ τὰ σώματα ταχέως, καταρροώδεις δὲ οί τοιούτοι γίνονται. διαιτήσθαι δέ συμφέρει όσα ξηραίνοντα ψύχει καὶ σίτων καὶ ποτῶν καὶ πόνων, τοὺς δὲ πόνους τούτοις εἴσω τοῦ σώματος ποιείσθαι συμφέρει μάλλον. εί δε σύγκρησιν λάβοι πυρός τε τὸ ἰσχυρότατον καὶ ὕδατος τὸ λεπτότατον, ξηρή φύσις καὶ θερμή. νοῦσος μὲν 60 τοίσι τοιούτοισιν έν τησι τοῦ πυρὸς ἐφόδοισιν, ύγείη δὲ ἐν τῆσι τοῦ ὕδατος ἡλικίησιν ἀκμαζούσησι πρὸς σαρκὸς εὐεξίην νοσερώτατοι, ύγιηρότατοι δε οί πρεσβύτεροι και τα έγγιστα έκατέρων. δίαιται όσαι 6 ψύχουσι καὶ ύγραί-

bodies are more unhealthy in winter than in summer, and in spring more than in autumn. As for age, such persons are most healthy in childhood, next come youths, while the least healthy are the very old and the elderly; such constitutions age rapidly. Such persons ought to use a regimen that warms and dries, whether it be exercise or food, and their exercise should be directed more to the outside of the body than to the inner parts. (4) If the moistest fire and the densest water be blended in the body, from the following signs discern a nature moist and warm. Such persons are sick most in spring and least in autumn, because in spring there is excess of moisture, but in autumn a moderate amount of dryness. As for age, the youngest are the most un-Their bodies grow quickly, but such persons prove to be subject to catarrhs. Their regimen should consist of such things as dry and cool, both food, drink and exercise, and these persons profit more if their exercise be directed to the internal parts of the body. (5) If there be blended the strongest fire and the finest water, the constitution is dry and warm. Such persons fall sick at the onsets of fire, and are healthy at the onsets of water It is at the prime of life, and when the body is stoutest, that these fall sick most; the most healthy are the aged. It is the same with those nearest these ages. Regimen should be such

REGIMEN, I. XXXII.-XXXIII.

as cools and moistens, with such exercises as warm and dissolve least and produce the most thorough cooling Such natures have long life and a healthy old age. (6) Should there be a blending of the rarest fire and the driest water, such a nature is dry and cold, unhealthy in autumn and healthy in spring. "autumn" and "spring" denoting approximate periods. At the age of forty (more or less) they are unhealthy; childhood (and the periods just before and after) is the most healthy time. Regimen should be such as is warm and at the same time moistens. Exercise should be mild at first, gradually increasing, gently warming and not taking too much from the available strength. In this way then ought one to judge of the nature of the original constitution of a man.

XXXIII. The various ages stand thus in relation to each other. A child is blended of moist, warm elements, because of them he is composed and in them he grew. Now the moistest and warmest are those nearest to birth, and likewise those next to it, and these grow the most. young man is composed of warm and dry elements: warm because the onset of the fire masters the water, dry because the moisture from the child is already spent, partly for the growth of the body, partly for the motion of the fire, and partly through exercise. A man, when his growth is over, is dry and cold, because the onset of the warm no longer has the mastery, but stands, and the body, now that

⁴ τὰ μὲν ἄρσενα is omitted by θ and M. Littré gives this reading on the authority of his MS. Κ΄.

REGIMEN, I. xxxIII.-xxxv.

it has rest from growth, is cooled. But the dryness from the younger age is still in him, and he is mastered by the dry elements because he has not yet got the moisture which advancing years and the onset of the water will bring. Old men are cold and moist, because fire retreats and there is an onset of water; the dry elements have gone and the moist have established themselves.

XXXIV. The males of all species are waimer and drier, and the females moister and colder, for the following reasons: originally each of them was born in such things and grows thereby, while after birth males use a more rigorous regimen, so that they are well warmed and dried, but females use a regimen that is moister and less strenuous, besides purging the heat out of their bodies every month.

XXXV. The facts are as follow with regard to what are called the intelligence² of the soul and the want of it. The moistest fire and the driest water, when blended in a body, result in the most intelligence, because the fire has the moisture from the water, and the water the dryness from the fire. Each is thus most self-sufficing. The fire is not in

¹ The reading of θ , "older men are mastered by cold elements," is less adapted to the context than that of M, but may possibly be right.

² φρόνησις seems to mean the power of the soul to perceive things, whether by the mind or by the senses. "Intelligence" is not a satisfactory rendering, nor yet is "sensitiveness," which has been suggested as an equivalent. Perhaps "quick at the uptake" Peck thinks that sensations only, not mind, are referred to, and would translate everywhere "sensitive" and "sensitiveness."

τὸ πῦρ τῆς τροφῆς ἐνδεέστερον ἐπὶ πολὸ φοιτᾳ, ούτε τὸ 1 ὕδωρ τῆς κινήσιος δεόμενον κωφοῦται. αὐτό τε οὖν ἐκάτερον οὕτως αὐταρκέστατόν ἐστι 10 πρὸς ἄλληλά τε κρηθέντα. ὅ τι γὰρ ἐλάγιστα τῶν πέλας δείται, τοῦτο μάλιστα τοίσι παρεοῦσι προσέχει, πυρός τε τὸ ἥκιστα κινεόμενον μὴ ὑπ' ἀνάγκης, καὶ ὕδατος τὸ μάλιστα μὴ ὑπὸ βίης. έκ τούτων δὲ ἡ ψυχὴ συγκρηθεῖσα φρονιμωτάτη καὶ μνημονικωτάτη εἰ δέ τινι ἐπαγωγῆ χρεομένη τούτων οκοτερονούν αὐξηθείη η μαραίνοι, ἀφρονέστατον αν γένοιτο, διότι ούτως έχοντα αὐταρκέστατα. εί δὲ πυρὸς τοῦ είλικρινεστάτου καὶ ὕδατος³ σύγκρησιν λάβοι, ἐνδεέστερον δὲ τὸ πῦρ εἴη τοῦ 20 ὕδατος ὀλίγον, φρόνιμοι μὲν καὶ οὖτοι, ἐνδεέστεροι δὲ τῆς προτέρης, διότι κρατεόμενον τὸ πῦρ ὑπὸ τοῦ ὕδατος καὶ 4 βραδείην τὴν κίνησιν ποιεόμενον, νωθρότερον προσπίπτει πρὸς τὰς αἰσθήσιας. παραμόνιμοι δ' είσλν επιεικέως αί τοιαθται ψυχαλ πρὸς ὅ τι ἀν προσέχωσιν· εἰ δὲ ὀρθῶς διαιτῶτο,5 καὶ φρονιμώτερος καὶ ὀξύτερος γένοιτο 6 παρά την φύσιν. συμφέρει δε τώ τοιούτω τοίσι πρός πυρὸς διαιτήμασι μᾶλλον χρησθαι καὶ μη πλησμονήσι μήτε σίτων μήτε πομάτων. δρόμοισιν οθν 30 γρησθαι ὀξέσιν, ὅκως τοῦ τε ὑγροῦ κενῶται τὸ σωμα καὶ τὸ ύγρὸν ἐφιστήται 7 θασσον πάλησι

REGIMEN, I. xxxv.

want of nourishment so as to wander far, nor is the water in such need of motion as to be dulled. each is thus most self-sufficing by itself, as are both when blended with one another. For that which has least need of its neighbours attends most closely to the things at hand, as is the case with such fire as moves the least and not by necessity, and by such water as moves the most and not by force. The soul blended of these is most intelligent and has the best memory. But if by the influence of some addition one or the other of these grow or diminish, there will result something most unintelligent, because things blended in the original way are most selfsufficing.1 If there be a blend of the purest fire and water, and the fire fall a little short of the water, such persons too are intelligent, but fall short of the former blend, because the fire, mastered by the water and so making slow motion, falls rather dully on the senses. But such souls are fairly constant in their attention, and this kind of man under night regimen may become more intelligent and sharper than natural endowment wairants. Such a one is benefited by using a regimen inclining rather towards fire, with no surfeit either of foods or of drinks. he should take sharp runs, so that the body may be emptied of moisture and the moisture may be stayed

⁷ ἐφιστῆται Littré ἐφίσταται Mack: ἐπίσταται Μ.

¹ It is difficult to be satisfied with this sentence, although the MS tradition shows no important variants. Can τικ ἐπαγωγή χρεομένη, with no expressed object, be right? "By an addition which uses them," Littré's "par l'usage de quelque addition," seems very strange One might conjecture (without much confidence) χρεόμενον οτ ἐρχομένη.

⁶ Before $\pi a p \hat{a}$ Zwinger adds $\hat{a}v$, but in the *Corpus* the plain optative is often equivalent to the optative with $\hat{a}v$.

δὲ καὶ τρίψεσι καὶ τοῖσι τοιούτοισι γυμνασίοισιν οὐ συμφέρει χρησθαι, ὅκως μη κοιλοτέρων τῶν πόρων γινομένων πλησμονης πληρώνται, βαρύνεσθαι γὰρ ἀνάγκη τῆς ψυχῆς τὴν κίνησιν ὑπὸ τοιούτων· τοίσι περιπάτοισι γρησθαι καὶ ἀπὸ δείπνου καὶ ὀρθρίοισι καὶ ἀπὸ τῶν δρόμων, ἀπὸ δείπνου μέν, ὅκως τροφὴν ξηροτέρην ή ψυχή δέχηται από των εσιόντων, 40 δρθρου δέ, ὅκως αι διέξοδοι κενῶνται τοῦ ὑγροῦ καὶ μὴ φράσσωνται οἱ πόροι τῆς ψυχῆς, ἀπὸ δὲ των γυμνασίων, δκως μη έγκαταλείπηται έν τώ σώματι τὸ ἀποκριθὲν ἀπὸ τοῦ δρόμου, μηδὲ Ευμμίσηηται τη ψυχή, μηδὲ ἐμφράσση τὰς διεξόδους, μηδε συνταράσση την τροφήν. συμφέρει δὲ καὶ ἐμέτοισι χρησθαι, ὅκως ἀποκαθαίρηται τὸ σῶμα, εἴ τι ἐνδεέστερον οἱ πόνοι διαπρήσσονται, προσάγειν δὲ ἀπὸ τῶν ἐμέτων, κατά μικρου προστιθέντα τούτοισι πλείονας 50 ημέρας η 2 τέσσαρας τὰς ἐλαγίστας. γρίεσθαι δὲ συμφορώτερον ἡ λούεσθαι, λαγνεύειν δὲ ὕδατος έφόδων γινομένων, εν δε τησι τοῦ πυρὸς 4 μεῖον. εἱ δέ τινὶ δενδεεστέρην τὴν δύναμιν τὸ πῦρ λάβοι τοῦ ὕδατος, βραδυτέρην 6 ἀνάγκη ταύτην είναι, καὶ καλέονται οι τοιοῦτοι ήλίθιοι άτε γάρ βραδείης ἐούσης τῆς περιόδου, κατὰ βραχύ τι προσπίπτουσιν αι αισθήσιες, όξειαι ἐοῦσαι, και ἐπ' δλίγον συμμίσγονται διά βραδυτήτα τής περιόδου. αί γὰρ αἰσθήσιες της ψυχης δκόσαι μὲν δι' όψιος

REGIMEN, I. xxxv.

sooner. But it is not beneficial for such to use wrestling, massage or like exercises, for fear lest, the pores 1 becoming too hollow, they be filled with surfeit. For the motion of the soul is of necessity weighed down by such things. Walks, however, are beneficial, after dinner, in the early morning and after running; after dinner, that the soul may receive drier nourishment from the things that enter, in the early morning, that the passages may be emptied of moisture and the pores of the soul may not be obstructed; after exercise, in order that the secretion from running may not be left behind in the body to contaminate the soul, obstruct the passages and trouble the nourishment. It is beneficial also to use vomiting, so that the body may be cleansed of impurities left behind owing to any failure of exercise to purify, and after the vomiting gradually to increase the amount of food for more than four days at least. Unction is more beneficial to such persons than baths, and sexual intercourse should take place when the onsets of water occur, less, however, at the onsets of fire. If in any case fire receive a power inferior to that of water, such a soul is of necessity slower, and persons of this type are called silly. For as the circuit is slow, the senses, being quick, meet their objects spasmodically, and their combination is very partial owing to the slowness of the circuit. For the senses of the soul that act through sight or hearing are quick; while

¹ The word $\pi\delta\rho$ os means any "passage" or "way" in the body, and is not limited to the pores of the skin

those that act through touch are slower, and produce a deeper impression. Accordingly, persons of this kind perceive as well as others the sensations of cold, hot and so on, but they cannot perceive sensations of sight or hearing unless they are already familiar with them. For unless the soul be shaken by the fire that strikes it, it cannot perceive its character. Souls of such a kind have this defect because of their coarseness. But if their regimen be rightly regulated, even these may improve. The regimen that benefits is the same as in the former case, with food drier and less, and with exercise more in amount and more vigorous Vapour baths too are beneficial, as is the use of vomiting after them, and the food after the vomiting should be increased at longer intervals than in the former case; following such a regimen will make such men more healthy and more intelligent. But if the fire should be mastered to a greater extent by the water in the soul, we have then cases of what are called by some "senseless" people, and by others "grossly stupid." Now the imbeculty of such inclines to slowness; they weep for no reason, fear what is not dreadful, are pained at what does not affect them, and their sensations are really not at all those that sensible persons should feel These persons are benefited by vapour baths followed by purging with hellebore, the diet to be the same as before duction of flesh and drying are called for. But if the power of the water prove insufficient, and the

REGIMEN, I. xxxv.

a way as to empty the body with a minimum of To reduce the flesh of such persons conduces to their intelligence; for abundance of flesh cannot fail to result in inflammation of the blood, and when this happens to a soul of this sort it turns to madness, as the water has been mastered and the fire attracted. Such persons are also benefited if they eat a meal before they go about their duties, instead of doing them without food, as their soul is more stable when it is mixed with its appropriate nourishment than when it lacks nourishment. But if in any case the water be yet more mastered by the fire, such a soul is too quick, and men of this type inevitably suffer from dreams. They are called "half-mad"; their condition, in fact, is next door to madness, as even a slight untoward inflammation results in madness. whether arising from intoxication, or from overabundance of flesh, or from eating too much meat. Such persons ought to abstain from all these things and from surfeit of every kind, as well as from violent forms of exercise; their diet should consist of unkneaded barley bread, boiled vegetables (except those that purge), and saidines, while to drink water only is best, should that be possible, otherwise the next best thing is a soft white wine There should be plenty of walking in the morning, but after dinner

⁶ ἀνάγκη Κ΄: M omits ⁷ οἱ δέ, ὑπομαίνεσθαι M: αὐτοὺς ὑπομαινομένους Littré, from second hand in H The first hand reads τὸ ὑπομαίνεσθαι, and Littré's E has ὑπομαίνεσθαι after ὑπομαινομένους. The reading of M ("others (give) ὑπομαίνεσθαι") is a note which has crept into the text

REGIMEN, I. xxxv.-xxxvi.

only just enough to unbend the limbs; the object is to empty the body by the morning walk, but not to dry the food as the result of walking after dinner. Preferable to unction is a tepid shower-bath. It is also beneficial to have in summer a short, occasional siesta, to prevent the body being dried up by the season. In spring it is a good thing to purge with hellebore after a vapour bath; then the usual diet should be restored gradually, as this type of man, like the preceding, must not go about duties fasting. With this treatment such a soul may be highly intellectual

XXXVI. It is this blending, then, that is, as I have now explained, the cause of the soul's intelligence or want of it; regimen can make this blending either better or worse. When the fire prevails in his courses, it is doubtless possible to add to the water, and, when the water prevails in the blend, to increase the fire. These things are the source of greater or less intelligence in souls. But in the following cases the blend is not the cause of the characteristic:-irascibility, indolence, craftiness, simplicity, quarrelsomeness and benevolence. In all these cases the cause is the nature of the passages through which the soul passes. For such dispositions of the soul depend upon the nature of the vessels through which it passes, upon that of the objects it encounters and upon that of the things with which it mixes. It is accordingly impossible to change the above dispositions through regimen, for invisible nature cannot be moulded differently. Similarly, the nature of voice too depends

³ οὐ A. L. Peck: οὖν Μ. γοῦν Littré ἀδύνατον (for οὖν δυνατὸν) Linden, Mack.

τής φωνής δκοίη τις αν ή, οί πόροι αἴτιοι του πνεύματος. δι δκοίων γάρ αν τινων κινήται δ 20 ή ηρ καὶ πρὸς δκοίους τινὰς προσπίπτη, τοιαύτην ἀνάγκη τὴν φωνὴν εἶναι. † καὶ ταύτην 4 μὲν δυνατὸν καὶ βελτίω καὶ χείρω ποιεῖν, διότι λειοτέρους καὶ τραχυτέρους τους πόρους τῷ πνεύματι δυνατὸν ποιῆσαι, κεῖνο δὲ ἀδύνατον 25 ἐκ διαίτης ἀλλοιῶσαι. †

6 Query: κεΐνα.

REGIMEN, I. XXXVI.

upon the passages of the breath. The character of voice inevitably depends upon the nature of the passages through which the air moves, and upon the nature of those it encounters. In the case of voice, indeed, it is possible to make it better or worse, because it is possible to render the passages smoother or rougher for the breath, but the aforesaid characteristics cannot be altered by regimen.¹

APPENDIX

In Chapter VII both θ and M give $\tau \rho \nu \pi \hat{\omega} \sigma \iota$, though a second hand in θ has written over it $\pi \rho i \zeta o \nu \sigma i$. In Chapter XVI occurs the sentence τρυπῶσιν, ὁ μὲν ἔλκει, ο δε ωθεί, which some editors bracket. an auger seems an impossible action to represent by ελκει and ωθεί, and so these editors regard the words as a stupid note which has crept into the text. But the MS. authority is very strong, and causes misgivings. Dr. Peck thinks that a horizontal auger could be worked up and down by a leather thong. But though you can pull a thong you cannot push it. Perhaps there is a reference to the working of an auger by means of a bow, the string of which was twisted round the top of the auger, and then the bow was worked just as a saw. See the Dictionary of Antiquities, s. v. terebrum. I do not, however, feel confident enough to adopt the reading τρυπῶσι, though it is quite possible that it is right. Diels' reading of the next sentence in VII will mean: "As they press below, up it comes, for it could not admit of going down at a wrong time," with reference to παρὰ καιρὸν lower down. Timely force works well, untimely force spoils everything. βιαζόμενα, βιάζωνται and βιαζόμενον are probably passives, although a meaning might be wrung out of the middle voice.

REGIMEN, II. XXXVII.-XXXVIII.

its own nourishment, having nothing moister to assail in order to nourish itself therefrom. In places where mountains are situated to the south, the south winds that blow are parching and unhealthy; where the mountains are situated to the north, there northern winds occasion disorders and sickness. Where there are hollows on the north side of a town. or where it is faced by an island to the north, such a district becomes hot and sickly with the summer winds, because no north wind blows across to bring a pure current of air, nor is the land cooled by the summer winds. Islands which are near the mainland have very severe winters; but those which are further out to sea are milder in winter. The reason is because the snow and ice on the mainland remain, and send cold winds to the neighbouring islands; but islands situated in mid-ocean have remaining in the winter.

XXXVIII. You may distinguish the nature and power of every particular wind in the following way. All winds have a power of moistening and cooling both animal and vegetable bodies for this reason; because all these winds must come either from snow or ice or places severely frozen, or from rivers or lakes, or from moist and cold land. The stronger winds come from these conditions when widely extended and strongly intensified, weaker winds from these conditions less widely extended and less intensified. As there is breath in the animals, so there is in

τοῖσι μὲν ἔλασσον, τοῖσι δὲ¹ κατὰ μέγεθος. φύσιν μὲν οὖν ἔχει ψύχειν καὶ ὑγραίνειν τὰ πνεύματα πάντα. διὰ θέσιν δὲ χωρίων καὶ τόπους, δι ὧν παραγίνεται τὰ πνεύματα ἐς τὰς χώρας ἐκάστας, διάφορα γίνεται ἀλλήλων, ψυχρότερα, θερμότερα, ύγρότερα, ξηρότερα, νοσερώτερα, ύγιεινότερα. την δε αἰτίην εκάστων 20 ὧδε χρη γινώσκειν ο μεν βορέας ψυχρός καὶ ύγρὸς πνεῖ, ὅτι ὁρμᾶται ἀπὸ τοιούτων χωρίων, πορεύεται τε διὰ τοιούτων τόπων, οὕστινας ὁ ήλιος οὐκ ἐφέρπει, οὐδ' ἀποξηραίνων τὸν ἡέρα έκπίνει την ικμάδα, ώστε παραγίνεται έπι την οίκεομένην, την έωυτοῦ δύναμιν έχων, δκου μή διὰ τὴν θέσιν τῆς χώρης διαφθείρεται καὶ τοῖσι μὲν οἰκέουσιν ἔγγιστα ψυχρότατος, τοῖσι δὲ προσωτάτω ἥκιστα. ὁ δὲ νότος πνεῖ μὲν ἀπὸ τῶν ὁμοίων τὴν φύσιν τῷ βορέᾳ· ἀπὸ γὰρ τοῦ 30 νοτίου πόλου πνέων, ἀπὸ χιόνος πολλῆς καὶ κρυστάλλου καὶ πάγων ἶσχυρῶν ὁρμώμενος, τοῖσι μὲν ἐκεῖσε πλησίον αὐτοῦ οἰκέουσιν ἀνάγκη τοίον πυείν δκοίόν περ ήμιν δ βορέας. ἐπὶ δὲ πασαν χώρην οὐκ ἔτι ὅμοιος παραγίνεται διὰ γαρ των εφόδων του ήλίου και υπό την μεσημβρίην πνέων, έκπίνεται τὸ ύγρὸν ὑπὸ τοῦ ἡλίου. ἀποξηραινόμενος δὲ ἀραιοῦται διὸ ἀνάγκη θερμὸν αὐτὸν καὶ ξηρὸν ἐνθάδε παραγίνεσθαι. ἐν μὲν οὖν τοῖσιν ἔγγιστα χωρίοισιν ἀνάγκη τοιαύτην 40 δύναμιν ἀποδιδόναι θερμὴν καὶ ξηρήν, καὶ ποιεῖ τοῦτο ἐν τῆ Λιβύη· τά τε γὰρ φυόμενα ἐξαυαίνει,2 καὶ τοὺς ἀνθρώπους λανθάνει ἀποξηραίνων ἄτε γὰρ οὐκ ἔχων οὕτε ἐκ θαλάσσης ἶκμάδα λαβεῖν οὖτε ἐκ ποταμοῦ, ἐκ τῶν ζώων καὶ ἐκ τῶν φυομένων 302

REGIMEN, II. XXXVIII.

everything else; some have less, some more according to size. Now all winds have a cooling and moistening nature But winds differ from one another according to the situation of the countries and places through which they come to the various regions, being colder, hotter, moister, drier, sicklier or healthier You may know the cause of each in the following way The north wind blows cold and moist, because it blows from such countries, and passes through places which the sun does not approach to dry the air and consume the moisture, so that it comes to the habitable earth with its own power, unless this be destroyed by the situation of the place. It is most cold to those who dwell nearest to these places and least to those who are farthest from them. The south blows sometimes from places that are of the same nature as the north: for when it blows from the south pole and starts from much snow, ice and severe frosts, it must of necessity blow to those who dwell there near it after the same manner as the north does to us. But it does not come the same to every country; for instance, when it blows through the approaches of the sun under the south, the moisture is absorbed by the sun. As it dries it becomes rare, and therefore of necessity it must reach here hot and dry. Therefore in the most adjacent countries it must impart such a hot and dry quality, as it does in Libya, where it parches the plants, and insensibly dries up the inhabitants. For as it cannot get any moisture either from sea or river, it drinks up the moisture of animals and

2 έξαυαίνεται Μ

έκπίνει τὸ ὑγρόν. ὅταν δὲ τὸ πέλαγος περαι-ώση, ἄτε θερμὸς ἐὢν καὶ ἀραιός, πολλής ὑγρασίης ἐμπίμπλησι τὴν χώρην ἐμπίπτων.¹ ἀνάγκη δὲ τὸν νότον θερμόν τε καὶ ὑγρὸν εἶναι, ὅπου μὴ τῶν χωρίων αἱ θέσιες αἴτιαί εἰσιν. ὡσαύτως 50 δὲ καὶ αἱ τῶν ἄλλων πνευμάτων δυνάμιες ἔχουσιν. κατά δὲ τὰς χώρας ἐκάστας τὰ πνεύματα ἔχει ώδε τὰ μὲν ἐκ θαλάσσης πνεύματα ἐς τὰς χώρας² ἐσπίπτοντα, ἡ ἀπὸ χιόνος ἡ πάγων ἡ λιμνέων ἡ ποταμῶν, ἄπαντα ὑγραίνει καὶ ψύχει καὶ τὰ φυτὰ καὶ τὰ ζῷα, καὶ ὑγείην τοῖσι σώμασι παρέχει όσα μη ύπερβάλλει ψυχρότητι καί ταθτα δὲ βλάπτει, διότι μεγάλας τὰς μεταβολὰς έν τοῖσι σώμασιν ἐμποιεῖ τοῦ θερμοῦ καὶ τοῦ ψυχροῦ· ταῦτα δὲ πάσχουσιν ὅσοι ἐν χωρίοις 60 οἰκέουσιν έλώδεσι καὶ θερμοῖσιν ἐγγὺς ποταμῶν ίσχυρών. τὰ δ' ἄλλα τῶν πνευμάτων ὅσα πνεῖ ἀπὸ τῶν προειρημένων, ὡφελεῖ, τόν τε ἡέρα καθαρου 3 και είλικρινέα παρέχουτα και τῷ τῆς ψυχῆς θερμῷ ἰκμάδα διδόντα. ὅσα δὲ τῶν πνευμάτων κατὰ γῆν παραγίνεται, ξηρότερα ἀνάγκη εἶναι, ἀπὸ τε τοῦ ἡλίου ἀποξηραινόμενα καὶ ἀπὸ τῆς γῆς οὐκ ἔχοντα δὲ τροφὴν δκόθεν έπαγάγηται, 4 τὰ πνεύματα, ἐκ τῶν ζώων ἕλκοντα τὸ ὑγρόν, βλάπτει καὶ τὰ φυτὰ καὶ τὰ ζώα. καὶ 70 δσα ύπερ τὰ δρεα ύπερπίπτοντα παραγίνεται ές τὰς πόλιας, οὐ μόνον ξηραίνει, ἀλλὰ καὶ ταράσσει τὸ πνεῦμα δ ἀναπνέομεν, καὶ τὰ σώματα τῶν ἀνθρώπων, ώστε νούσους έμποιείν. φύσιν μέν οθν καί δύναμιν έκάστων οΰτω χρη γινώσκειν· ὅπως δὲ χρη πρὸς έκαστα παρεσκευάσθαι, προιόντι τῶ 76 λόγω δηλώσω.

REGIMEN, II. XXXVIII.

plants. But when the wind, being hot and rare, has passed the ocean, it fills the country where it strikes with much moisture. The south wind must necessarily be hot and moist, where the situation of the countries does not cause it to be otherwise. The powers of other winds too are similarly conditioned. The properties of winds due to varieties of region are as follow. The winds which strike regions from off the sea, or from snow, frost, lakes or rivers, all moisten and cool both plants and animals, and are healthy unless they be cold to an excess, when they are hurtful by reason of the great changes of cold and heat which they make in bodies. Those are subject to these changes who inhabit marshy and hot places near great rivers. All other winds which blow from the foresaid places are beneficial, as they afford a pure and serene air, and a moisture to temper the heat of the soul. The winds which come by land must necessarily be drier, being dried both by the sun and the earth. These winds, not having a place whence to draw nourishment, and attracting moisture from living creatures, hurt both plants and animals The winds which pass over mountains to reach cities do not only dry, but also disturb the air which we breathe, and the bodies of men, so as to engender diseases. This is the way to judge of the nature and power of various winds. I will show in the subsequent discourse how we must provide against each.

REGIMEN, II. XXXIX.-XL.

XXXIX. The power of various foods and drinks, both what they are by nature and what by art, you should judge of thus. Those who have undertaken to treat in general either of sweet, or fat, or salt things, or about the power of any other such thing, The same power does not belong to are mistaken all sweet things, nor to all fat things, nor to all particulars of any other class. For many sweet things are laxative, many binding, many drying, many moistening. It is the same with all other kinds; some are astringent or laxative, diuretic: there are some that are neither. It is the same with things which are heating and with all other things, one has one power, another, another. Since therefore it is impossible to set forth these things in general, I will show what power each one has in particular

XL Barley in its own nature is cold, moist and drying, but it has something purgative from the juice of the husks. This is proved by boiling unwinnowed barley, the decoction of which is very purgative; but if it be winnowed, it is more cooling and astringent. When it is parched, the moist and purgative quality is removed by the fire, and that which is left is cool and dry. When, therefore, it is necessary to cool and dry, barley meal thus used will do it, no matter how the cake is prepared; such, in fact, is the power of the barley cake ¹ The meal together with the bran has less nourishment, but passes better by stool. That which is cleaned from

REGIMEN, II. xL.

the bran is more nourishing, but does not pass so well by stool. Barley cake made into a paste betimes,1 sprinkled with water but not well kneaded, is light, passes easily by stool, and cools. It cools because it is moistened with cold water; it passes by stool because that it is soon digested, and it is light because that a great part of the nourishment is secreted outside with the breath. For the passages, being too narrow for the nourishment, will not receive a new addition, and part of it is attenuated and secreted outside with the breath, while a part remains and causes flatulence; of this some is belched upwards, and some passes out downwards. A great part, therefore, of the nourishment passes out of the body. If you will give the barley cake as soon as it is mixed, it is drying, for the barley meal, being dry, and moist only by the water which is mixed with it, coming into the belly attracts its moisture being hot; for it is natural for the hot to attract the cold, and the cold the hot. The moisture of the belly being consumed it must necessarily grow dry, and when the water mixed with the barley cake has entered the belly it must grow cool.2 So when

¹ The base of cyceon was barley meal, mixed with water, wine or milk. To this was added honey, or salt or herbs.

REGIMEN, II. XL.-XLII.

it is necessary to cool or to dry a sufferer from diarrhœa or from any sort of inflammation, barley cake of this sort serves well. Barley cake that is dry and well kneaded does not dry so much, by reason that it is more tightly compressed, but it is very nourishing, because as it gently dissolves the passages admit the nourishment; so it passes slowly without occasioning wind either downwards or upwards. That which has been mixed beforehand and well kneaded nourishes less, but passes by stool and causes more wind.

XLI. Cyceon made with barley only 1 added to water cools and nourishes, with wine it heats, nourishes and is astringent. With honey it heats and nourishes less, but is more laxative unless the honey be unmixed; 2 with unmixed honey it is astringent. With milk all cyceons are nourishing; made with sheep's milk they are astringent, with goats' milk they are more laxative, with cows' milk less, but with mares' or asses' milk they are more laxative.

XLII. Wheat is stronger and more nourishing than barley, but both it and its gruel are less laxative. Bread made of it without separating the bran dries and passes; when cleaned 3 from the bran it nourishes more, but is less laxative. Of the various breads themselves the fermented is light and passes. It is light because the moisture is quickly used up owing to the acid of the leaven, and this is the nourishment. 4 It passes, because it is

REGIMEN, II. XLII.

soon digested; but that which is not fermented does not pass so well, but nourishes more. That which is mixed with wheat gruel is lightest, affords good nourishment, and passes. It nourishes because it is made of pure wheat. It is light because it is tempered with what is most light, and is fermented by it and baked. It passes because it is mixed with the sweet and laxative part of the wheat. themselves the largest are the most nourishing. because the moisture of these is least consumed by Those which are baked in an oven are more nourishing than those which are baked on the hearth or on a spit, because that they are less burnt by the fire Those which are baked in a pan or under the ashes are the most dry; the latter by reason of the ashes, the former by reason of the earthen pan which imbibes their moisture. The bread made of finest flour called similago is the most strengthening of all, except that which is made of groats, which is very nourishing, but does not pass so well by stool. Fine flour mixed with water and drunk is refreshing, and so is the water wherein flour of spelt has been washed over a fire. A decoction of bran when boiled is light and passes well by stool Meal boiled in milk passes better by stool than that boiled in water by reason of the whey, and especially if it is mixed with laxatives. All foods from meals boiled or fried with honey and oil are heating and windy; windy because they are very nourishing and do not pass by stool, heating because in one place are fat, sweet and ill-assorted ingredients, which should not be

cooked in the same way Similago and groats boiled are strengthening and very nourishing, but

do not pass by stool.

XLIII. The spelts 1 are lighter than wheat, and preparations therefrom are as light as 2 those from wheat, and more laxative. Oats, whether eaten or drunk as a decoction, moisten and cool.

XLIV. Freshly cooked meal and flour are drier than those which are stale, because they are nearer the fire with which they were prepared; for as they grow stale the heat exhales and the cold succeeds. Hot bread dries, cold dries less, yesterday's bread somewhat less, and causes a certain amount of leanness.

XLV. Beans afford an astringent and flatulent nourishment; flatulent because that the passages do not admit the abundant nourishment which is brought, astringent because that it has only a small residue from its nourishment. Peas are less windy and pass better by stool. The chick-pea, called ochrus, and the bean called dolchus pass better by stool than these, and are less windy but nourishing. The white chick-pea passes by stool and urine, and nourishes. The substantial part nourishes, the sweet passes by urine, and the saline passes by stool. Millet groats and husks are dry and binding; with figs they are strong nourishment for hard workers. Whole millet by itself boiled is

¹ Triticum monocoicum and triticum spelta.

² I am not satisfied with θ 's reading (in the text), nor with Littré's $\tau o \hat{i}s$ for $\delta \sigma \pi \epsilon \rho$ An old emendation, $\tau \hat{\omega} \nu$, has more to be said for it "preparations therefrom are similarly lighter than those from wheat."

nourishing, but it does not pass by stool. Lentils are heating and trouble the bowels; they are neither laxative nor astringent. Bitter vetches are binding, strengthening, fattening, filling, and give a person a good colour. Linseed is nourishing, astringent. and somewhat refreshing. Clary seed is much of the same nature as linseed. Lupins are in their nature strengthening and heating, but by preparation they become more light and cooling than they are naturally, and pass by stool. Hedge-mustard seed moistens and passes by stool. Cucumber seeds pass better by urine than by stool. Unwashed sesame seeds pass by stool, fill and fatten, they pass by stool by reason of their outward skins, they are fattening by reason of their substance; when washed they pass less by stool, but they fatten and fill more; they dry and heat because they are fat and oily Wild saffron passes by stool. Poppy is binding, the black more than the white, but the white also. It is nourishing, however, and strengthening. Of all these seeds the juices are more laxative than their substance When, therefore, you have a mind to dry, you must take care in preparation to remove their juices, and to make use of their substance; when you have a mind to loosen, to make use of more of their juices, less of their substance, and only of those that are very succulent

XLVI. As to animals which are eatable, you must know that beef is strong and binding, and hard of

digestion, because that this animal abounds with a gross thick blood. The meat is heavy to the body, the flesh itself, the milk and the blood. animals which have a thin milk, and the blood the same, have flesh too of the like nature. Goats' flesh is lighter than these, and passes better by stool. Swine's flesh affords more strength to the body than these and passes well by stool, because this animal has small anaemic veins, but much flesh. Lambs' flesh is lighter than sheep's, and kids' than goats', because they do not abound with so much blood, and are more moist. For animals too which are naturally dry and strong, when tender, pass by stool; but when they are grown up, not so much; it is just the same with veal compared to beef. But young pigs' flesh is heavier than pork; for this animal, abounding naturally in flesh and not in blood, has excess of moisture whilst young; so when the passages refuse the entering nourishment, it remains, grows hot, and deranges the belly. The flesh of asses passes by stool, and that of their foals still better, though horseflesh is somewhat lighter. Dogs' flesh dries, heats, and affords strength, but does not pass by stool. The flesh of puppies moistens and passes by stool, still more by urine. Wild boars' flesh is drying and strengthening, and passes by stool. Deer's flesh is drying and passes not so well by stool, but better by urine. Hares' flesh is dry and constipating, but is somewhat diuretic. Foxes' flesh is moister, and passes by urine. Hedgehogs' is diuretic and moistens.

XLVII With birds it is as follows. All birds almost are drier than beasts, for those creatures

κύστιν οὐκ ἔχει οὖτε οὐρεῖ οὖτε σιαλοχοεῖ ¹ διὰ θερμότητα τῆς κοιλίης· ἀναλίσκεται γὰρ τὸ ὑγρὸν ἐκ τοῦ σώματος ἐς τὴν τροφὴν τῷ θερμῷ, ὅστε οὖτε οὐρεῖται οὔτε σιαλοχοεῖ· ἐν οἵφ δὲ μὴ ἔνι τοιαύτη ὑγρασίη,² ξηρὰ εἶναι ἀνάγκη· ξηρότατον μὲν οὖν φαίνεται φάσσης, δεύτερον πέρδικος, τρίτον περιστερῆς καὶ ἀλεκτρυόνος καὶ 10 τρυγόνος· ὑγρότατον δὲ χηνός. ὅσα δὲ σπερμολογεῖ ξηρότατα τῶν ἐτέρων. νήσσης δὲ καὶ τῶν ἄλλων ὁκόσα ἐν ἔλεσι³ διαιτῆται ἡ ἐν ὕδασι,

which have no bladder neither make urine nor have spittle, by reason of the heat of the belly. For the moisture of the body is consumed to nourish the heat; wherefore they neither urinate nor spit. Therefore that which wants such moisture must necessarily be dry. The flesh of ringdoves is the driest, secondly partridges, thirdly pigeons, cocks and turtles. The flesh of geese is the most moist. Those which feed on seed are drier than the others. Ducks and other fowls that feed on marshes or waters are all moist.

XLVIII As to the flesh of fish, these are the The scorpion fish, dragon fish,1 the fish called callionymos, the piper, the grey fish, the perch, the fish called thrissa. The fish that frequent stony places are almost all light, as the thrush fish, the hake, the gudgeon and elephitis. These are lighter than those which move from place to place, for these remaining quiet have a rare and hight flesh, but those which wander and are wavetossed have a more solid and deeper flesh, being much battered by the toil The torpedo, skate, turbot and such-like are light. All those fish that feed in muddy and marshy places, as mullet, cestreus, eels and the like are heavier (of digestion), because they feed upon muddy water and other things which grow therein The air of which also, entering a person, hurts and oppresses him. The fish of rivers and ponds are heavier than these.

¹ The great weever.

polypus, cuttle and the like are neither light, as they are thought to be, nor do they pass by stool, but they dull the eyes. The broth of them, however, passes by stool Shell-fish, as the pinna, limpet, purple fish, trumpet and oysters, have a flesh that dries, but their broths pass by stool. Mussels, cockles and tellines pass better than these by stool; sea-nettles do so especially; fish that are cartilaginous moisten and pass by stool. The spawn of urchins and the juice of spiny lobsters pass by stool; arcos too and crabs, the river variety more than others, but also sea-crabs; they are also diuretic. Pickled fish are drying and attenuating; oily ones are gently laxative. The driest of pickled fish are those of the sea, the next those of the rivers, while the moistest are those of the lakes. Of pickled fish considered by themselves those are driest which are made from the driest fish.

XLIX. As to animals which are tamed, those which feed in the woods and fields are drier than those fed within doors, because their labours in the sun and the cold dry them, while they breathe an air that is drier. Wild beasts are drier than tame; small eaters than great eaters; hay eaters than grass eaters; fruit eaters than non-fruit eaters; small drinkers than

¹ This is evidently the sense of the sentence, but neither the $\chi\lambda\omega\rho\phi\dot{\phi}\gamma a$ of θ nor the $\kappa\alpha\rho\pi\phi\dot{\phi}\gamma a$ of M can bear the meaning "hay eating." Perhaps we should adopt the conjecture of Zwinger.

great drinkers; those which abound in blood than those which have little or no blood; those which are in their vigour than those which are very old or young; males than females; entire than gelded, the black than the white; the harry than those which have little or no hair. The opposite to these are more moist. As to the flesh of animals as a class, that is the strongest which labours most, abounds most in blood, and on which they lie. Those are lightest which have laboured least, have least blood, are most in the shade, and are placed most inwardly in the animal. Of the bloodless parts the brain and the marrow are the strongest; the lighest parts are the head, the feet, the region of the genitals and those that are tendinous.1 Of fish, the driest parts are the upper, the lightest those below the stomach; the head is more moist by reason of the fat and brain.

L. Birds' eggs are strong, nourishing and windy. An egg is strong because it is the origin of an animal; nourishing because it is the milk of the animal; windy, because from small bulk it expands to a great one.

LI. Cheese is strong, heating, nourishing and binding; it is strong because it is nearest to a creature's origin; it is nourishing because the fleshy part of the milk remains in it, it is heating because it is fat; binding, because it is coagulated by fig juice or rennet.

LII. Water is cooling and moist. Wine is hot and dry, and it has something purgative from its original substance. Dark and harsh wines are more dry, and

because it dissolves and consumes the moisture in the body, it is binding rather than laxative because it affords no nourishment and is sharp. Boiled-down wine warms, moistens and sends to stool. It warms because it is vinous, moistens because it is nutritious, and sends to stool because it is sweet and moreover boiled-down. Wine from grape-husks moistens, sends to stool and fills with wind, because must also does the same.

LIII Honey unmixed warms and dries; mixed with water it moistens, sends to stool those of bilious temperament, but binds those who are phlegmatic. Sweet wine too tends to send the phlegmatic to stool.

LIV The qualities of vegetables are as follow. Garlic warms, passes well by stool and by urine, and is good for the body though bad for the eyes. making a considerable purgation of the body it dulls the sight It promotes stools and urine because of the purgative qualities it possesses. When boiled it is weaker than when raw. It causes flatulence because it causes stoppage of wind. The onion is good for sight, but bad for the body, because it is hot and burning, and does not lead to stool, for without giving nourishment or help to the body it warms and dries on account of its juice. The leek warms less. but passes well by urine and by stool; it has also a certain purgative quality. It moistens and it stops heartburn, but you must eat it last. The radish moistens through melting the phlegm by its sharpness, but the leaves do so less The root is bad for arthritis, and it repeats and is hard to digest. Cress

6 θ has ό οἰνώδης φυσώδης ή δὲ ὀξια ψυκτικωτέρη οἱ δὲ πύρινες πάντων στάσιμον Μ has αἱ οἰνώδεες ἢσσον καυσώδεες αἱ δὲ ὀξεῖαι ψυκτικώτεραι οἱ δὲ πύρινες πάντων στάσιμοι. Littré reads αἱ οἰνώδεες τῶν ροιῶν φυσώδεες αἱ δὲ ὀξεῖαι ψυκτικώτεραι οἱ δὲ πυρῆνες πασέων στάσιμοι.

⁷ The text is that of θ. The reading of M is σικυοὶ ωμοὶ ψυχροὶ καὶ δύσπεπτοι Littré has the reading of M, and

continues. οἱ δὲ πέπονες οὐρέονται.

8 θ has διαχωρέουσι δὲ, Μ΄ διαχωρεῦνται.

REGIMEN, II. Lv.

Fruit generally is rather relaxing, more so when fresh than when dry. The properties of fruits shall now be given. Mulberries warm, moisten and pass easily by stool. Pears when ripe warm, moisten and pass easily by stool, but when hard they are binding. Wild winter pears when ripe pass easily by stool and purge the bowels, when unripe they are binding. Sweet apples are indigestible, but acid apples when ripe are less so. Quinces are astringent, and do not pass easily by stool. Apple juice stops vomiting and promotes urine. The smell too of apples is good for vomiting. Wild apples are astringent, but when cooked they pass more easily by stool. For orthopnœa their juice, and the apples themselves when a draught is made of them, are beneficial. Service berries, medlars, cornel bernes and such fruit generally are binding and astringent. The juice of the sweet pomegranate is laxative, but has a certain burning quality Vinous pomegranates are flatulent.2 The acid are more cooling. The seeds of all 3 are astringent. Unripe gourds 4 are indigestible; ripe gourds pass easily by urine and stool, but are flatulent. Grapes are warming and moist, passing easily by

2 With the reading of M, "less burning."

¹ ἐγκάρπιοs means literally, "containing seed within it." It may therefore mean here "with the seed formed," i.e. "ripe," as Littré takes it. I prefer, however, to make ἐγκάρπια = fruit generally, those things "whose seed is in themselves" The reading of θ (κάρπιμα) can scarcely be right, as κάρπιμος means "fruitful" or "fruit—bearing" It is possible that ἐγκάρπια refers to fruit as distinguished from nuts οπώρα includes both.

³ The reading πάντων has overwhelming authority Can it mean "of all fruits" (pomegranates included)?

Apparently the cucumber.

⁵ Apparently the melon

REGIMEN, II. LV.-LVI.

stool; white grapes are especially so Sweet grapes are very heating, because by the time they are sweet they have absorbed much heat. Unripe grapes are less warming, but a draught made from them is purgative. Raisins are burning, but pass well by stool. The green fig moistens, passes well by stool and warms; it moistens because it is juicy, warms and passes well because of its sweet juice. The first crop of figs is the worst, because such figs have most juice; the latest are the best Dry figs are burning, but pass well by stool. Almonds are burning but nutritious; burning because they are oily, and nutritious because they are fleshy. Round nuts 1 are similar. Flat nuts 2 are nutritious when ripe, pass easily by stool when peeled, and cause flatulence. Their skins, however, are binding. Ilex nuts and acorns are binding when raw, but less so when boiled.

LVI. Rich meats are burning, but pass well by stool. Meats preserved in wine are drying and nutritious; drying because of the wine, and nourishing because of the flesh. When preserved in vinegar they are less warming because of the vinegar, but they are quite nutritious. Meats preserved in salt are less nutritious, because the brine has deprived them of their moisture, but they attenuate, dry, and pass by stool quite well. The powers of foods severally ought to be diminished or increased in the following way, as it is known that out of fire and water are composed all things, both animal and

1 Ordinary nuts

vegetable, and that through them all things grow, and into them they are dissolved Take away their power from strong foods by boiling and cooling many times; remove moisture from moist things by grilling and roasting them; soak and moisten dry things, soak and boil salt things, bitter and sharp things mix with sweet, and astringent things mix with oily All other cases judge in accordance with what has been already said Foods grilled or roasted are more binding than raw, because the fire has taken away the moisture, the juice and the fat when they fall into the belly they drag to themselves the moisture from the belly, burning up the mouths of the veins, drying and heating them so as to shut up the passages for liquids. Things coming from waterless, dry and torrid regions are all drier and warmer, and provide the body with more strength. because, bulk for bulk, they are heavier, more compact and more nutritious i than those from moist regions that are well-watered and cold, the latter foods being moister, lighter and colder. Accordingly, it is necessary to know the property, not only of foods themselves, whether of corn, drink or meat, but also of the country from which they come. those who wish to give the body a stronger nourishment, without increasing the bulk of the food, must

REGIMEN, II. LVI.

use corn, drink and meat from waterless regions. When they need lighter and moister nourishment, they must use things from well-watered regions. Things sweet, or sharp, or salt, or bitter, or harsh, or fleshy are naturally heating, whether they are dry or Things that have in themselves a greater portion of the dry, these warm and dry, those that have a greater portion of the moist in all cases warm, moisten and pass by stool better than things that are dry; for being more nourishing to the body they cause a revulsion to the belly, and, moistening, pass readily by stool. Such foods or drinks as warm and dry, producing neither spittle nor urine nor stools, dry the body for the following reasons. The body growing warm is emptied of its moisture, partly by the foods themselves, while part is consumed in giving nourishment to the warmth of the soul, while yet another part, growing warm and thin, forces its way through the skin. Things sweet, or fat, or oily are filling, because though of small bulk they are capable of wide diffusion Growing warm and melting they fill up the warmth in the body and make it calm Things acid, sharp, harsh, astringent, +-+ and dry are not filling, seeing that they open and thoroughly cleanse the mouths of the veins, and some by drying, others by stinging, others by contracting, make the moisture in the flesh shiver and compress itself into a small bulk, and so the void in the body becomes great. So when you wish to fill with little food, or empty with more, use foods of

4 γαληνίζειν θ · γαληνιάζειν Μ

δ συγκομιστά M. δυσκόμιστα θ. The true reading has been lost, as we need a word meaning harsh or dry. συγκομιστός means "assorted" and δυσκόμιστος "intolerable."

70 τοιούτοισι χρήσθαι. τὰ πρόσφατα πάντα ἰσχὺν παρέχεται πλείω τῶν ἄλλων διὰ τόδε, ὅτι ἔγγιον τοῦ ζῶντός ἐστι· τὰ δὲ ἔωλα καὶ σαπρὰ διαχωρεῖ μᾶλλον τῶν προσφάτων, διότι ἔγγιον τῆς σηπεδόνος ἐστί. τὰ δὲ ἔνωμα στροφώδεα καὶ ἐρευγμώδεα, διότι ἃ δεῖ τῷ πυρὶ κατεργάζεσθαι, ταῦτα ἡ κοιλίη διαπρήσσεται ἀσθενεστέρη ἐοῦσα τῶν ἐσιόντων. τὰ δὲ ἐν τοῖσιν ὑποτρίμμασιν ὄψα σκευαζόμενα καυσώδεα καὶ ὑγρά, ὅτι λιπαρὰ καὶ πυρώδεα καὶ θερμὰ καὶ ἀνομοίους τὰς 80 δυνάμιας ἀλλήλοισιν ἔχοντα ἐν τῷ αὐτῷ ἵζει.¹ τὰ δὲ ἐν ἄλμη ἡ ὅξει βελτίω καὶ οὐ καυσώδεα.

REGIMEN, II. LVI.-LVII.

this kind. Fresh foods in all cases give more strength than others, just because they are nearer to the living creature. But stale and putrid things pass more readily by stool than do fresh because they are nearer to corruption. Raw things cause colic and belching, because what ought to be digested by the fire is dealt with by the belly, which is too weak for the substances that enter it. Meats prepared in sauces 1 are burning and moist, because there are united in one place things oily, fiery, warm, and with mutually opposite properties. Preparations in brine

or vinegar are better and are not burning

LVII. As to baths, their properties are these. Drinkable 2 water moistens and cools, as it gives moisture to the body. A salt bath warms and dries, as having a natural heat it draws the moisture from the body. Hot baths, when taken fasting, reduce and cool, for they carry the moisture from the body owing to their warmth, while as the flesh is emptied of its moisture the body is cooled. Taken after a meal they waim and moisten, as they expand to a greater bulk the moisture already existing in the body. Cold baths have an opposite effect. To an empty body they give a certain amount of heat; after a meal they take away moisture and fill with

² I e. what we call "fresh" water.

¹ The ὑπότριμμα (like the Latin *moretum*) was a piquant dish of various ingredients grated together.

έὸν τοῦ ὑπάρχοντος ξηροῦ Μ.

The text within daggers is Littre's, but does not claim to be the original, which probably will never be recovered Littre, however, is right when he says: "le sens est déterminé par opposition" Perhaps the reading originally was something like this, κενῷ μἐν τῷ σώματι δίδωσι θερμόν τι βεβρωκότος δὲ ἀφαιρεῖ ὑγροῦ ἐόντος καὶ πληροῖ ψυχροῦ ἐόντος τοῦ ὑπάρχοντος ἔρροῦ We should certainly expect, from the sentence ψυχρὰ δὲ λουτρὰ τοὐναντίον, a passage of which the correct summary is —

θερμὰ λουτρὰ

(α) νηστιν ίσχναίνει καὶ ψύχει

(b) βεβρωκότα θερμαίνει και ύγραίνει.

REGIMEN, II. LVII.-LIX.

their dryness, which is cold.¹ To refrain from baths dries, as the moisture is used up, and so does to refrain from oiling.

LVIII. Oiling warms, moistens and softens. The sun and fire dry for the following reason. Being warm and dry, they draw the moisture from the body. Shade and moderate cold moisten, for they give more than they receive. All sweats on their departure both dry and reduce, as the moisture of the body leaves it. Sexual intercourse reduces, moistens and warms. It warms owing to the fatigue and the excretion of moisture; it reduces owing to the evacuation; it moistens because of the remnant in the body of the matters melted by the fatigue

LIX. Vomitings reduce through the evacuation of the nourishment. They do not, however, dry, unless appropriate treatment be applied on the following day; they tend rather to moisten through the repletion 2 and through the melting of flesh caused by the fatigue. But if on the morrow one

See critical note on this passage.

(a) νηστιν πληροί καὶ θερμαίνει.
(b) βεβρωκότα ψύχει καὶ ξηραίνει.

* πλήρωσιν M: πικρωσι θ.

² The "repletion" must mean fulness caused by the added emetic. This does not give a very good sense, and one is tempted to think that the $\pi\iota\kappa\rho\omega\sigma\iota$ (i.e. $\pi\iota\kappa\rho\omega\sigma\iota\nu$) of θ is either the correct reading or at least a near corruption of it. Perhaps the sharp taste of certain emetics is referred to, which tends to extract moisture from glands. See p. 51.

⁽²⁾ ψυχρά λουτρά

I have in my translation given the general sense of the passage as I conceive it to have been originally written

[້] καὶ ἀναλυμιτι ώσαύτως θ καὶ ἀναληφίη ὧσαύτως Μ · ὧσαύτως δὲ καὶ ἡ ἀνηλευμίη Littré

ταθτα καταναλωθήναι τη δστεραίη ές την τροφήν τῷ θερμῷ, καὶ τῆ διαίτη ἡσύχως προσαγάγη, ξηραίνουσιν. κοιλίην δέ συνεστηκυΐαν διαλύει έμετος, και διαχωρούσαν μάλλον του καιρού 10 ίστησι, την μεν διυγραίνων, την δε ξηραίνων. 1 δκόταν μεν οθν στήσαι βούλη, την ταχίστην φαγόντα χρη έμειν, πριν αν ύγρον έον το σιτίον καταβιβασθή κάτω, εκαί τοίσι στρυφνοίσι καί τοίσιν αὐστηροίσι σιτίοισι μᾶλλον χρῆσθαι. δκόταν δὲ λῦσαι τὴν κοιλίην βούλη, ἐνδίατρίβειν έν τοίσι σιτίοισιν ώς πλείστον χρόνον συμφέρει, καὶ τοίσι δριμέσι καὶ άλμυροίσι καὶ λιπαροίσι 18 καὶ γλυκέσι σιτίοισι καὶ πόμασι χρῆσθαι.

LX. "Υπνοι δε νηστιν μεν ίσχυαίνουσι καί ψύχουσιν, ἡν μὴ μακροὶ ἔωσι, κενοῦντες τοῦ ὑπάρχοντος ὑγροῦ ἡν δὲ ³ μᾶλλον, ἐκθερμαίνοντές συντήκουσι την σάρκα, καὶ διαλύουσι τὸ σωμα, καὶ ἀσθενὲς ποιέουσι βεβρωκότα δὲ θερμαίνουτες ύγραίνουσι, τὴν τροφὴν ἐς τὸ σῶμα διαχέουτες ἀπὸ δὲ τῶν ὀρθρίων περιπάτων ύπνος μάλιστα ξηραίνει. ἀγρυπνίη δὲ ἐν μὲν τοισι σιτίοισι βλάπτει, οὐκ ἐῶσα τὸ σιτίον 10 τήκεσθαι· ἀσίτω δὲ ἰσχνασίην μέν τινα δίδωσι, βλάπτει δὲ ήσσον. ραθυμίη υγραίνει καὶ ἀσθενὲς τὸ σῶμα ποιεῖ. ἀτρεμίζουσα γὰρ ἡ ψυχὴ οὐκ ἀναλίσκει τὸ ὑγρὸν ἐκ τοῦ σώματος πόνος δὲ ξηραίνει καὶ τὸ σῶμα ἰσχυρὸν ποιεί. μονοσιτίη ἰσχυαίνει καὶ ξηραίνει καὶ τὴν κοιλίην ἴστησι, διότι τῷ τῆς ψυχῆς θερμῷ τὸ ὑγρὸν ἐκ τῆς

¹ ξηραίνων Littré · ἀντισπῶν θ Μ omits τὴν δὲ ξηραίνων. The arriomar of θ is possibly correct, and $\xi \eta \rho aiv \omega r$ a gloss.

REGIMEN, II. LIX.-LX.

lets the moisture be consumed by the warmth for its nourishment, and increase nourishment gradually, vomitings dry. Constipated bowels are relaxed by vomiting, and too relaxed bowels are bound thereby; it moistens the former and dries the latter. When, therefore, you wish to bind the bowels, take a meal and administer an emetic as quickly as possible, before the food can be moistened and drawn downwards; the food used should by preference be astringent and dry But when you wish to loosen the bowels, it is beneficial to keep the food as long as possible, and to take food and drink that are sharp, salt, greasy and sweet.

LX. Sleep when fasting reduces and cools, if it be not prolonged, as it empties the body of the existing moisture; if, however, it be prolonged, it heats and melts the flesh, dissolves the body and enfeebles it. After a meal sleep warms and moistens, spreading the nourishment over the body. It is especially after early-morning walks that sleep is drying Want of sleep, after a meal, is injurious, as it prevents the food from dissolving; to a fasting person it is less injurious, while it tends to reduce flesh. Inaction moistens and weakens the body; for the soul, being at rest, does not consume the moisture out of the body But labour dries and strengthens the body. Taking one meal 1 a day reduces, dries and binds the bowels, because, through the warmth of the soul the moisture

¹ The μονόσιτοι took the δε $\hat{\epsilon}$ πνον only; others took the ἄριστον as well.

3 After δè θ adds μακροὶ ἐῶσι.

² πρὶν διυγρηνθήναι τὸν σῖτον καὶ κατασπασθήναι κάτω M: πρὶν ἃν ὑγρὸν ἐὸν τὸ σιτίον καταβιβασθήι κάτωι θ.

κοιλίης καὶ τῆς σαρκὸς καταναλίσκεται. 1 ἄριστον δὲ τἀναντία διαπρήσσεται τῆ μονοσιτίη. ὕδωρ πόμα² θερμὸν ἰσχναίνει πάντα, καὶ ψυχρόν 20 ώσαύτως. τὸ δὲ ὑπερβάλλον ψυχρὸν καὶ πνεῦμα καὶ σιτίου καὶ ποτου πήγυυσι το ύγρου το έν τῷ σώματι καὶ τὰς κοιλίας συνίστησι τῆ πήξει καὶ ψύξει κρατεί γάρ τοῦ της ψυχης ύγροῦ. καὶ τοῦ θερμοῦ δὲ πάλιν αι ὑπερβολαὶ πηγνύουσι, καὶ ουτως ώστε μη διάχυσιν έχειν. όσα δέ θερμαίνοντα τὸ σῶμα, τροφὴν μὴ διδόντα, κενοῖ τοῦ ύγροῦ τὴν σάρκα μὴ ὑπερβολὴν ποιέοντα, πάντα ψύξιν τῷ ἀνθρώπφ παραδίδωσι κενουμένου γὰρ τοῦ ὑπάρχοντος ὑγροῦ, πνεύματος 30 ἐπακτοῦ πληρεύμενον ψύχεται.

LXI. Περὶ δὲ τῶν πόνων ἥντινα ἔχουσι δύναμιν διηγήσομαι. είσὶ γὰρ οί μὲν κατὰ φύσιν, οί δὲ διὰ βίης: οἱ μὲν οὖν κατὰ φύσιν αὐτῶν εἰσιν 3 όψιος πόνος, ακοής, φωνής, μερίμνης. όψιος μέν οὖν δύναμις τοιήδε 4 προσέχουσα ή ψυχὴ τῷ όρατῷ ⁵ κινεῖται καὶ θερμαίνεται· θερμαινομένη δὲ Επραίνεται, κεκενωμένου τοῦ ύγροῦ. διὰ δὲ τῆς άκοῆς ἐσπίπτουτος τοῦ ψόφου σείεται ἡ ψυχὴ καὶ πουεῖ, πουέουσα δὲ θερμαίνεται καὶ ξηραί-10 νεται. ὅσα μεριμνᾳ ἄνθρωπος, κινεῖται ἡ ψυχὴ

¹ καταναλίσκει θ καταναλίσκεται M.

² πόμα Μ: πολύ θ

³ Before όψιος θ has οἱ δè. 4 τοιῆδε θ. τοιαύτη Μ.

⁵ M has ὁρεομένωι, perhaps rightly.

¹ The word πόνος cannot always be represented by the same English equivalent. It may mean "toil" generally, voluntary toil (or "exercise"), or even the "pain" caused by toil (usually κόπος). The division of πόνοι into natural

REGIMEN, II. LX.-LXI.

is consumed from out the belly and the flesh. To take lunch has effects opposite to those of taking one meal only. Hot water as a drink is a general reducer of flesh, and cold water likewise. But excessive cold, whether of breath, food or drink, congeals the moisture in the body, and binds the bowels by the congealing and the cold; for it overpowers the moisture of the soul. Then again excess of heat too causes congealing, to such an extent as to prevent diffusion. Such things as warm the body without affording nourishment, and empty the flesh of its moisture, even when there is no excess, in all cases cause chill in a man; for, the existing moisture being emptied out, the body is filled with breath from outside and grows cold.

LXI. I will now discuss the properties of exercises. Some exercises are natural and some violent. Natural exercises are those of sight, hearing, voice and thought The nature of sight is as follows. The soul, applying itself to what it can see, is moved and warmed As it warms it dries, the moisture having been emptied out. Through hearing, when noise strikes the soul, the latter is shaken and exercised, and as it is exercised it is warmed and dried. By all the thoughts that come to a man the

² The word δύναμις means much the same thing as δύναμιν in the first sentence. The essential qualities are referred to in both cases, but it seems preferable to use different equivalents in the translation, as δύναμιν refers mostly to the qualities and δύναμις to the essence of exercises.

ύπο τούτων καὶ θερμαίνεται καὶ ξηραίνεται, καὶ τὸ ὑγρὸν καταναλίσκουσα πονεῖ, καὶ κενοῖ τὰς σάρκας, καὶ λεπτύνει τὸν ἄνθρωπον. ὁκόσοι δὲ πόνοι φωνῆς, ἢ λέξιες ἢ ἀναγνώσιες ἢ ώδαί,² πάντες οὖτοι κινέουσι τὴν ψυχήν κινεομένη δὲ θερμαίνεται καὶ ξηραίνεται, καὶ τὸ ὑγρὸν κατα-17 ναλίσκει.

LXII. Οἱ δὲ περίπατοι κατὰ φύσιν μὲν εἰσί, καὶ οὖτοι μάλιστα τῶν λοιπῶν, ἔχουσι δέ τι βίαιον. δύναμις δὲ αὐτῶν ἑκάστων 3 τοιήδε ὁ άπο δείπνου περίπατος ξηραίνει τήν τε κοιλίην καὶ τὸ σῶμα, καὶ τὴν γαστέρα οὐκ ἐᾳ πίειραν γίνεσθαι 4 δια τάδε κινευμένου τοῦ ἀνθρώπου, θερμαίνεται τὰ σιτία καὶ τὸ σῶμα· ἔλκει οὖν την ἰκμάδα ή σάρξ, καὶ οὐκ ἐᾳ περὶ τὴν κοιλίην συνίστασθαι τὸ μὲν οὖν σῶμα πληροῦται, ἡ δὲ 10 κοιλίη λεπτύνεται. ξηραίνεται δὲ διὰ τάδε· κινευμένου τοῦ σώματος καὶ θερμαινομένου, τὸ λεπτότατον της τροφής καταναλίσκεται, το μέν ύπὸ τοῦ συμφύτου θερμοῦ, τὸ δὲ σὺν τῷ πνεύματι άποκρίνεται έξω, τὸ δὲ καὶ διουρεῖται ὑπολείπεται δὲ τὸ ξηρότατον ἀπὸ τῶν σιτίων ἐν τῷ σώματι, 5 ώστε την κοιλίην αποξηραίνεσθαι καί τὴν σάρκα. καὶ οἱ ὄρθριοι περίπατοι ἰσχναί-νουσι, καὶ τὰ περὶ τὴν κεφαλὴν κοῦφά τε καὶ εὐαγέα 6 καὶ εὐήκοα παρασκευάζουσι, καὶ τὴν 20 κοιλίην λύουσιν ἰσχναίνουσι μὲν ὅτι κινεύμενον τὸ σῶμα θερμαίνεται, καὶ τὸ ὑγρὸν λεπτύνεται καὶ καθαίρεται, τὸ μὲν ὑπὸ τοῦ πνεύματος, τὸ δὲ μύσσεται καὶ χρέμπτεται, τὸ δὲ ἐς τὴν τροφὴν

¹ M transposes κενοί and λεπτύνει.

² So θ. M has λέξις η ἀνάγνωσις η ωδή.

REGIMEN, II. LXI.-LXII.

soul is warmed and dried; consuming the moisture it is exercised, it empties the flesh and it makes a man thin. Exercises of the voice, whether speech, reading or singing, all these move the soul. And as it moves it grows warm and dry, and consumes the moisture.

LXII. Walking is a natural exercise, much more so than the other exercises, but there is something violent about it. The properties of the several kinds of walking are as follow. A walk after dinner dries the belly and body, it prevents the stomach becoming fat for the following reasons. As the man moves, the food and his body grow warm. flesh draws the moisture, and prevents it accumulating about the belly. So the body is filled while the belly grows thin. The drying is caused thus. As the body moves and grows warm, the finest part of the nourishment is either consumed by the innate heat, or secreted out with the breath or by the urine. What is left behind in the body is the driest part from the food, so that the belly and the flesh dry up. Early-morning walks too reduce [the body, and render the parts about the head light, bright and of good hearing, while they relax the bowels. They reduce because the body as it moves grows hot, and the moisture is thinned and purged, partly by the breath, partly when the nose is blown and the throat cleared, partly being consumed by

REGIMEN, II. LXII.-LXIII.

the heat of the soul for the nourishment thereof. They relax the bowels because, cold breath rushing into them from above while they are hot, the heat gives way before the cold. It makes light the parts about the head for the following reasons. When the bowels have been emptied, being hot they draw to themselves the moisture from the body generally, and especially from the head; when the head is emptied sight and hearing are purged, and the man becomes bright ¹ Walks after gymnastics render the body pure and thin, prevent the flesh melted by exercise from collecting together, and purge it away.

LXIII. Of running exercises, such as are not double 2 and long, if increased gradually, have the power to heat, concoct and dissolve the flesh; they digest the power of the foods that is in the flesh, making the body slower and more gross than do circular runnings, but they are more beneficial to big eaters, and in winter rather than in summer. Running in a cloak has the same power, but heating more rapidly it makes the body more moist but less

² The "double" exercise consisted in running along a double track to a goal and back again to a starting-point. It was of a fixed length and could not be "increased gradually" as readily as could distances along a single track.

¹ It is tempting to give εὐαγής here and above an active sense, "with clear vision." It is not possible, however, to find a parallel, except perhaps Euripides, Supp. 652: ἔστην θεατής πύργον εὐαγή λαβών, where εὐαγή may mean, not "clearly seen," but "affording a clear view." "Affording a clear view," however, is not the same thing as "having good eyesight" So one has to fall back upon the general sense of "bright" or "clear." Perhaps "alert."

2 The "double" exercise consisted in running along a

⁶ M has μᾶλλον δὲ διαθερμαίνουσι καὶ

τερα δέ, διότι οὐκ ἀποκαθαίρει προσπῖπτον τὸ πνεῦμα τὸ εἰλικρινές, ἀλλ' ἐν τῷ αὐτῷ ἐγγυμνάζεται πνεύματι συμφέρει οὖν τοῖσι ξηροῖσι καὶ τοῖσι πολυσάρκοισιν, ὅστις καθελεῖν τὴν σάρκα βούλεται, καὶ τοῖσι πρεσβυτέροισι διὰ ψύξιν τοῦ σώματος. οἱ δὲ δίαυλοι καὶ ὑπηέριοι τὴν μὲν σάρκα ἤσσον διαχέουσιν, ἰσχναίνουσι δὲ μᾶλλον, διότι τοῖς εἴσω τῆς ψυχῆς μέρεσιν οἱ πόνοι ὄντες ἀντισπῶσιν ἐκ τῆς σαρκὸς τὸ ὑγρὸν το καὶ τὸ σῶμα λεπτύνουσι καὶ ξηραίνουσιν. οἱ δὲ τρόχοι τὴν μὲν σάρκα ἤκιστα διαχέουσιν, ἰσχναίνουσι δὲ καὶ προσστέλλουσι τήν τε σάρκα καὶ τὴν κοιλίην μάλιστα, διότι ὀξυτάτῳ τῷ πνεύματι χρώμενοι τάχιστα τὸ ὑγρὸν ἔλκουσιν 25 ἐφ' ἑωυτούς.

1 This means that the body becomes thinner but less flabby. The δίαυλος was a καμπτὸς δρόμος of loughly 200 yards each way, 2-ε of 400 yards in all

² οἱ δὲ δἶαυλοι καὶ ὑπηέριοι θ: οἱ δε δίαυλοι καὶ ἤπειροι ἵπποι. Μ· οἱ δὲ δίαυλοι καὶ ὑπηέριοι ἵπποι Littré The ἵπποι of M is probably a corruption of ὑπηέριοι.

⁶ After έξαπίνης M adds οὐκ ἐπιτήδεια καὶ It also has διὰ τεθερμασμένον, while θ has τεθερμασμένον only. Littré reads διατεθερμασμένον.

² Both the reading and the interpretation of this sentence are uncertain. Probably the mental strain of the "quartermile" is referred to; it is the most stremous of the foot races, and may well be said to be concerned with the "inner

REGIMEN, II. LXIII.-LXIV.

tanned, because this is not cleansed by meeting the rush of pure air, but remains in the same air while it is exercised. So this kind of running is beneficial to those who have a dry body, to those who have excess of flesh which they wish to reduce, and, because of the coldness of their bodies, to those who are getting on in years. The double course, with the body exposed to the air, dissolves the flesh less, but reduces the body more,1 because the exercises, being concerned with the inner parts 2 of the soul, draw by revulsion the moisture out of the flesh, and render the body thin and dry. Running in a circle dissolves the flesh least, but reduces and contracts the flesh and the belly most, because, as it causes the most rapid respiration, it is the quickest to draw the moisture to itself.

LXIV. Swinging the arms, for persons of dry flesh, and when jerky, is inexpedient, as it causes sprains, in the following way. The body having been warmed, this swinging makes the skin consider-

parts of soul." Probably the reading $\xi\xi\omega$ is an attempt to connect psychologically this mental strain with the profuse perspiration caused by the $\delta(au\lambda os)$. I believe that $7\pi\pi o\iota$ is a mere corruption of $\delta\pi\eta\dot{\epsilon}\rho\iota o\iota$, but its adoption may have been encouraged by a desire to explain the introduction of "mental exercises"; the comparative maction of riding suggests an active mental factor.

3 This sentence appears to contain such an undoubted instance of a nominatives pendens that it renders less likely my substitution (in Chapter LXII) of θερμἢ ἐούση for θερμὴ ἐούσα in order to avoid such an anacoluthon One way out of the grammatical difficulty would be to take as the subject τεθερμασμένον τὸ σῶμα, in the sense of "bodily heat," but it seems too violent to say σῶμα λεπτύνει Another way would be to read διὰ τεθερμασμένον (with M). The chief objection to this is that local διὰ with the accusative appears to be confined to the poets. Fortunately the general sense is clear, that the flesh becomes hot, dry and brittle.

ισχυρώς λεπτύνει, την δè σάρκα ήσσον συνίστησι τῶν τρόχων, κενοῖ δὲ τὴν σάρκα τοῦ ὑγροῦ. τὰ δὲ ἀνακινήματα καὶ ἀνακουφίσματα τὴν μὲν σάρκα ήκιστα διαθερμαίνει, παροξύνει δε καί τὸ σῶμα καὶ τὴν ψυχήν, καὶ τοῦ πνεύματος κενοῖ. πάλη δὲ καὶ τρῖψις τοῖσι μὲν ἔξω τοῦ 10 σώματος παρέχει τὸν πόνον μᾶλλον, θερμαίνει δὲ τὴν σάρκα καὶ στερεοῖ καὶ αἔξεσθαι ποιεῖ διὰ τόδε τὰ μὲν στερεὰ φύσει τριβόμενα συνίστησι, τὰ δὲ κοῖλα αὔξεται, ὅσαι φλέβες είσί θερμαινόμεναι δε αί σάρκες και ξηραινόμεναι έλκουσιν έφ' έωυτας την τροφην δια των πόρων, είτα αύξονται, αλίνδησις παραπλήσια πάλη διαπρήσσεται, ξηραίνει δε μαλλον διά την κόνιν και σαρκοί ήσσον. ακροχειρισμος 4 ίσχναίνει καὶ τὰς σάρκας ἔλκει ἄνω, καὶ κωρυ-20 κομαχίη καὶ χειρονομίη παραπλήσια διαπρήσσεται. πνεύματος δε κατάσχεσις τους πόρους διαναγκάσαι καὶ τὸ δέρμα λεπτῦναι καὶ τὸ

Τὰ ἐν κόνει καὶ τὰ ἐν ἐλαίῳ ⁵ γυμνάσια διαφέρει τοσόνδε· κόνις μὲν ψυχρόν, ἔλαιον δὲ θερμόν· ἐν μὲν τῷ χειμῶνι τὸ ἔλαιον αὐξιμώτερον, διότι τὸ ψῦχος κωλύει φέρειν ἀπὸ τοῦ σώματος· ἐν δὲ τῷ θέρει τὸ ἔλαιον ὑπερβολὴν θερμασίης ποιεῦν ⁶ τήκει τὴν σάρκα, ὅταν ὑπὸ τῆς ὥρης ἐκθερμαίνηται καὶ τοῦ ἐλαίου καὶ τοῦ

M has διαθερμαίνουσιν and later κενοῦσι.

² After αύξεται M reads της γοῦν σαρκὸς τὸ μὲν πυκνὸν ριβόμενον ξωνίσταται τὰ δὲ κοῖλα αύξεται καὶ ὀκόσαι φλέβες εἰσί κ.τ.ξ. This appears to be an attempt to mend the grammar of the corrupt sentence preceding It has probably crept into the text from the margin.

REGIMEN, II. LXIV.-LXV.

ably thinner, but contracts the flesh less than running in a circle, and empties the flesh of its moisture. Sparring and raising the body 1 heat the flesh least, but they stimulate both body and soul, while they empty the body of breath. Wrestling and rubbing give exercise more to the exterior parts of the body, but they warm the flesh, harden it and make it grow, for the following reason Parts that are naturally hard are compressed by rubbing, while hollow parts grow, such as are veins. For the flesh, growing warm and dry, draws to itself the nourishment through the passages, and then it grows. Wrestling in the dust has effects like to those of ordinary wrestling, but it dries more because of the dust, and it increases flesh less. Wrestling with the fingers reduces and draws the flesh upwards; the punch-ball and arm exercises have like effects. Holding the breath has the property of forcing open the passages, of thinning the skin, and of expelling therefrom the moisture

LXV. Exercises in dust differ from those in oil thus. Dust is cold, oil is warm. In winter oil promotes growth more, because it prevents the cold from being carried from the body. In summer, oil, producing excess of heat, melts the flesh, when the latter is heated by the season, by the oil and by the

¹ Or, "the arms." The lexica neglect this word. I take it to refer either to raising the body from a prone position or to arm exercises.

REGIMEN, II. LXV.-LXVI.

exercise In summer it is exercise in dust that promotes growth more, for by cooling the body it prevents its being heated to excess. But in winter dust is chilling, or even freezing. To remain in the dust after exercise in summer benefits by its cooling property, if it be for a short time; if it be for long, it dries the body to excess and renders it hard as wood. Rubbing with oil and water softens the body,

and prevents its becoming over-heated.

LXVI. The fatigue pains that arise in the body are as follow. Men out of training suffer these pains after the slightest exercise, as no part of their body has been inured to any exercise; but trained bodies feel fatigue pains after unusual exercises, some even after usual exercises if they be excessive. These are the various kinds of fatigue pains; their properties are as follow. Untrained people, whose flesh is moist, after exercise undergo a considerable melting, as the body grows warm. Now whatever of this melted substance passes out as sweat, or is purged away with the breath, causes pain only to the part of the body that has been emptied contrary to custom; but such part of it as remains behind causes pain not only to the part of the body emptied contrary to custom, but also to the part that has received the moisture, as it is not congenial to the body but hostile to it. It tends to gather, not at the fleshless, but at the fleshy parts of the body, in

such a way as to cause them pain until it has passed out. Now as it has no circulation, it remains still and grows hot, as do also the things that touch it. Now if the secretion prove abundant it overpowers even that which is healthy, so that the whole body is heated and a high fever follows. For when the blood has been attracted and heated, the things in the body set up a rapid circulation, and the body generally is cleansed by the breath, while the collected moisture, becoming warm, is thinned and forced outwards from the flesh to the skin, and is called "hot sweat." When the secretion of this is . over, the blood is restored to its natural motion, the fever subsides, and the fatigue pains cease about the third day. Pains of this sort should be treated thus. Break up the collected humour by vapour baths, and by hot baths, and make firm the reduced flesh 2 by gentle walks, in order to effect purgation, by restricted diet and by practices that cause leanness; it is beneficial to apply oil gently to the body for a long time, that the heating be not violent, to use sudorific unguents, and to he on a soft bed. Those in training suffer fatigue pains from unaccustomed exercises for the following reasons.

¹ I retain θ's κείνησι (ι c. κίνησιν) If correct it throws light upon the early history of the circulation of the blood.

But M's σύστασιν is quite probably correct

² Littré says "on soutient la réduction de la chair," but this can scarcely represent συνιστάναι The whole of this sentence is grammatically loose, it is difficult, for instance, to decide how far συμφέρει extends its influence, and what infinitives (if any) are imperatival.

REGIMEN, II. LXVI.

unexercised part of the body must of necessity have its flesh moist, just as persons out of training are moist generally throughout.1 So the flesh must of necessity melt, secrete itself and collect itself, as in the former case Beneficial treatment of such cases as follows. Accustomed exercises should be practised, so that the collected humour may grow warm, become thin, and purge itself away, while the body generally may become neither moist nor yet unexercised It is beneficial to employ hot baths in these cases also, with rubbing as before. But there is no need of vapour baths, as the exercises, being warming, are sufficient to thin and purge away the humour that has collected. Fatigue pains from accustomed exercises arise in the following way. Moderate toil is not followed by pain; but when immoderate it dries the flesh overmuch, and this flesh, being emptied of its moisture, grows hot, painful and shivery, and falls into a longish fever, unless proper treatment be applied. First the patient should be washed in a bath not too copious nor vet over-hot; then after the bath give him to drink a soft wine; he should eat as heartily as possible of a many-coursed dinner, and drink copiously of a soft

¹ This is the general sense of the passage, with the reading $\tau \delta m \nu$. It must be confessed, however, that the accusative is strange to express (with $\pi \rho \delta s$) "place where," and grammatically the reading $\pi \delta \nu \sigma$ is superior. But how can flesh be "moist in relation to one particular exercise"? If for ε $l\nu a$ the MSS had $\gamma \epsilon \nu \delta \sigma \delta a$ one would without hesitation read $\pi \delta \nu \sigma \nu$, and translate: "whatever be the unusual exercise, the flesh must become moist with this exercise, just as persons out of training become moist with any exercise."

wine, well diluted: then he should let a longish interval pass, until the veins become filled and inflated. Then let him vomit, and, having gone a short stroll, sleep on a soft bed. Then increase gradually his food and usual 1 exercises for six days, in which you must restore him to his usual food and drink. The treatment has the property of moistening without excess the body which has been dried to excess. Now if it were possible to discover the amount of the excess and cure it by an appropriate amount of food, all would be well thus. But as it is, this is impossible, but the other course is easy For the body, in a state of dryness, after the entrance of all sorts of food, draws to itself what is beneficial from the several foods for the several parts of the body; on being filled and moistened, the belly having been emptied by the emetic, it casts away the excess, while the belly, being empty, exercises a revulsion So the flesh rejects the excessive moisture, but it does not cast away that which is of an appropriate amount, unless it be under the constraint of drugs, of exercises,2 or of some revulsion. By employing gradation, you will restore the body gently to its old regimen.

REGIMEN III

LXVII. As I have said above, it is impossible to treat of the regimen of men with such a nicety as to make the exercises exactly proportionate to the amount of food. There are many things to prevent First, the constitutions of men differ; dry constitutions, for instance, are more or less dry as compared with themselves or as compared with one another. Similarly with moist constitutions, or with those of any other kind. Then the various ages have different needs. Moreover, there are the situations of districts, the shiftings of the winds, the changes of the seasons, and the constitution of the year. Foods themselves exhibit many differences: the differences between wheat and wheat, wine and wine, and those of the various other articles of diet, all prevent its being possible to lay down rigidly exact rules in writing. But the discovery that I have made is how to diagnose what is the overpowering element in the body, whether exercises overpower food or food overpowers exercises; how to cure each excess, and to insure good health so as to prevent the approach of disease, unless very serious and many blunders be made In such cases there is

need of drugs, while some there are that not even drugs can cure. So as far as it is possible to make discoveries, to the utmost limit my discoveries have been made, but absolute accuracy has been attained

by nobody.

LXVIII. Now first of all I shall write, for the great majority of men, the means of helping such as use any ordinary food and drink, the exercises that are absolutely necessary, the walking that is necessary, and the sea-voyages required to collect the wherewithal to live—the persons who suffer heat contrary to what is beneficial and cold contrary to what is useful, making use of a regimen generally irregular. These are benefited by living as follows, so far as their circumstances allow. I divide the year into the four parts most generally recognisedwinter, spring, summer, autumn. Winter lasts from the setting of the Pleiads to the spring equinox, spring from the equinox to the rising of the Pleiads, summer from the Pleiads to the rising of Arcturus, autumn from Arcturus to the setting of the Pleiads. Now in winter it is beneficial to counteract the cold and congealed season by living according to the following regimen. First a man should have one meal a day only, unless he have a very dry belly; in that case let him take a light luncheon. articles of diet to be used are such as are of a drying

nature, of a warming character, assorted 1 and undiluted, wheaten bread is to be preferred to barley cake, and roasted to boiled meats; drink should be dark, slightly diluted wine, limited in quantity: vegetables should be reduced to a minimum, except such as are warming and dry, and so should barley water and barley gruel. Exercises should be many and of all kinds; running on the double track increased gradually; wrestling after being oiled, begun with light exercises and gradually made long, sharp walks after exercises, short walks in the sun after dinner; many walks in the early morning, quiet to begin with, increasing until they are violent, and then gently finishing It is beneficial to sleep on a hard bed and to take night walks and night runs, for all these things reduce and warm; unctions should be copious. When a bath is desired, let it be cold after exercise in the palaestra; after any other exercise, a hot bath is more beneficial. Sexual intercourse should be more frequent at this season, and for older men more than for the younger. Emetics are to be used three times a month by moist constitutions, twice a month by dry constitutions, after a meal of all sorts of food; after the emetic three days should pass in slowly increasing the food to the

¹ συγκομιστὸς is rendered here by Littré "de substances giossières," by Liddle and Scott (after Foes) "mixed." I suppose that the objection to this translation is its apparent inconsistency with ἀκρήτοιαν But συγκομιστὸς applies to foods and ἄκρητος to wine. My own objection to translating συγκομιστὸς (with Littré) "coarse," "of unbolted meal" (as in Ancient Medicine), is that it limits too much the foods to which it applies. I think (with Foes) that "a mixed diet," as we term it, is referred to

usual amount, and exercises should be lighter and fewer during this time. Emetics are beneficial after beef, pork, or any food causing excessive surfeit; also after excess of unaccustomed foods, cheesy, sweet or fat. Further, it is better to take an emetic after drunkenness, change of food or change of residence One may expose oneself confidently to cold, except after food and exercise, but exposure is wise in early-morning walks, when the body has begun to warm up, in running, and during the other times, though excess should be avoided. For it is not good for the body not to be exposed to the cold of winter, just as trees that have not felt winter's cold can neither bear fruit nor themselves be vigorous. During this season, take also plenty of all sorts of exercise. For there is no risk of excess, unless fatigue-pains follow; this is the sign that I teach laymen, and the reason I will now proceed to explain. As the season is cold and congealed, animals too have the qualities of the season. So the body perforce warms up slowly under exercise, and only a small part of the available moisture is excreted. Then the time devoted to exercise is little, and that devoted to rest is much, as in winter days are short and nights are long For these reasons neither the length nor the character of the exercise can be excessive. So in this way should this season be

passed, for forty-four days, from the setting of the Pleiads to the solstice. Near the solstice itself the greatest possible caution is required, and for the same number of days after the solstice the same regimen should be adopted. After this interval it is now time for the west wind to blow, and the season is milder; so for fifteen days regimen should be assimilated to the season. Then Arcturus rises. and it is now the season for the swallow to appear; from this time onwards live a more varied life for thirty-two days until the equinox. It is accordingly right to assimilate regimen to the season, varying it with the milder and lighter foods and exercises, with a gentle gradation until spring comes. the equinox has come, the days are now milder and longer, the nights shorter, the coming season is hot and dry, the actual season is nourishing and temperate. Accordingly, just as trees, which have no intelligence, prepare for themselves growth and shade to help them in summer, even so man, seeing that he does possess intelligence, ought to prepare an increase of flesh that is healthy. It is accordingly necessary, in order that regimen may not be changed suddenly, to divide the time into six parts of eight

days apiece. So in the first portion one ought to lessen the exercises, and such as one adopts should be of a milder type, with foods softer and purer, and drinks more diluted and whiter, with wrestling in the sun, the body oiled. In each season the various items of regimen should be changed gradually. Walks should be lessened, those after dinner more. early-morning walks less Take barley cake instead of wheaten bread, and eat boiled vegetables; make boiled meats equal to roast; use baths; have a little luncheon; use sexual intercourse less, and also your emetics. At first vomit twice instead of thrice, in the same period,1 then at longer intervals, so as to furnish the body with permanent pure flesh, while regimen should be mild during this period until the rising of the Pleiads. Then it is summer, and hereafter regimen should be adapted to that season when that constellation has risen, eat softer, purer and less food, more barley-cake than wheaten bread, and that well-kneaded but not of finely crushed barlev 2; drink soft, white, diluted wines; take little luncheon, and only a short sleep after it; avoid as

¹ Namely, one month See page 371.

² Either the text is wrong or else the dictionaries are at fault, for they give opposite meanings to προφυρητὸς and ἀτριπτος. The various readings may represent attempts to smooth away the difficulty. Perhaps προφυρητὸς refers to the kneading of the dough and ἄτριπτος to the coarseness of the flour. So apparently Littre

ποιέεσθαι M Littré does not record the reading of θ. Perhaps τοὺs ἐμέτουs should be read; if not, Littré's punctuation must be changed.

⁴ δεί θ: χρη Μ

⁵ M has προφυραιτῆι, and Littré records προσφύραι τῆ, πορφύραι τῆ, προφυρετῆ,

¹ For τῷ ποτῷ ἰκανῷ M has τῶν ποτῶν ἰκανῶs. Possibly ἰκανῶs is correct.

² After καυσωδέων M adds και ξηρών

³ After θερμαντικών θ adds και των ξηραντικών και των.

⁴ ολίγοισι πουλύν χρόνοι καὶ τοῦσι περιπάτοισιν ἐν σκιῆι τῆι τε πάληι ἐν κόνει. ὅκως ἤκιστα διαθερμαίνοιτο ἡ γὰρ αλινδησις 378

REGIMEN, III. LXVIII.

far as possible surfeits of food, and drink plentifully with food. But during the day drink as little as possible, unless the body experience an imperious dryness. Eat boiled vegetables, except those that are heating; eat also raw vegetables, except such as are warming and dry Refrain from emetics, except in cases of surfeit. Sexual intercourse should be reduced to a minimum, and baths should be tepid. But the season's fruit is too strong for the human constitution. Accordingly, it is better to abstain from it: but if one should take it, by eating it with food the harm is reduced to a minimum. exercises, practice on the circular track and in the double stade should be infrequent and short, walking should be in the shade, and wrestling on dust, so as to avoid overheating as much as possible. For wrestling in the dust is preferable to circular running, as this dries the body by emptying it of its moisture After dinner walking should be restricted to a short stroll, but in the early morning walks should be taken; one should, however, beware of the sun and of morning and evening chills, such as are given off by rivers, lakes or snow. Keep to this regimen until the solstice, so as to cut out during this period everything dry, hot. black, or undiluted, as well as wheaten bread, except just a little for pleasure's sake. During the period

⁵ For δτφ M has ofσι.

REGIMEN, III. LXVIII.-LXIX.

that follows let regimen consist of things soft, moist, cooling, white and pure, for ninety-three days until the rising of Arcturus and the equinox. From the equinox regimen should be as follows, with a gradation during the autumn season to the winter, and with the use of a thick garment to guard against sudden changes of heat and cold. During this period, after some preliminary exercise in a cloak, have massage and practise wrestling with the body oiled, increasing the vigour gradually. Walks should be taken in the sun; baths should be warm; omit sleep in the day-time; food should be warmer, less moist, and pure,1 drinks darker, soft and not diluted, vegetables dry and less in quantity; in every respect adopt a regimen departing gradually from that of summer and embracing that of winter, avoiding extremes in such a way as to take the forty-eight days from the equinox to the setting of the Pleiads in reaching the closest possible approximation to the winter regimen

LXIX. Such is my advice to the great mass of mankind, who of necessity live a haphazard life without the chance of neglecting everything to concentrate on taking care of their health. But

¹ The present seems a suitable place to point out that it is impossible, owing to changes in habits, to find adequate English equivalents for the Greek vocabulary of foods and drinks. $\sigma\iota\pi\iota\alpha$, for instance, must for convenience be rendered "food," but does not include meat, vegetables or fruit , while $\kappa\alpha\theta\alpha\rho\delta$ s does not refer to hygienic purity but to freedom from admixture Finally, $\pi\delta\mu\alpha$ refers mainly to wine, practically the only drink favoured by the Greeks (they appear to have been less fond of milk than ourselves), and so $\mu\epsilon\lambda\alpha$ s will refer to what we call "red" wines, while $\mu\alpha\lambda\theta\alpha\kappa\delta$ s will certainly not mean a "soft" drink, but a mild, gentle wine, not fiery, coarse or harsh

⁶ θ has προδιαγνώσεις and διαγνώσεις.

REGIMEN, III. LXIX.-LXX.

when a man is thus favourably situated, and is convinced that neither wealth nor anything else is of any value without health, I can add to his blessings a regimen that I have discovered, one that approximates to the truth as closely as is possible. it is I will set forth in the sequel. This discovery reflects glory on myself its discoverer, and is useful to those who have learnt it, but no one of my predecessors has even attempted to understand i it, though I judge it to be of great value in respect of 2 everything else. It comprises prognosis before illness and diagnosis of what is the matter with the body, whether food overpowers exercise, whether exercise overpowers food, or whether the two are duly proportioned. For it is from the overpowering of one or the other that diseases arise, while from their being evenly balanced comes good health. Now these different conditions 3 I will set forth, and explain their nature and their arising in men who appear to be in health, eat with an appetite, can take their exercise, and are in good condition and of a healthy complexion.

LXX The nostrils without obvious cause become blocked after dinner and after sleep, and they seem to be full without there being need to blow the nose. But when these persons have begun to walk in the

² Or "in comparison with."

¹ Or, with the reading of M, "to set it forth in a treatise," "to compose an essay about it."

³ Littré translates "formes." Professor A. E. Taylor (Varia Socratica) maintains that in the Corpus είδος has the meaning "physical shape or appearance." Such a sense could be attributed to the word here ("healthy or unhealthy looks"), but it hardly suits οἰά ἐστι καὶ γίνεται.

καὶ γυμνάζεσθαι, τότε μύσσονται καὶ πτύουσι, προϊόντος δὲ τοῦ χρόνου καὶ τὰ βλέφαρα βαρέα ἴσχουσι, καὶ τὸ μέτωπον ὥσπερ ξυσμὸς 1 λαμβάνει, των τε σίτων ήσσον απτονται,2 πίνειν τε ήσσον δύνανται, ἄχροιαι³ τε τούτοισιν ύπογίνον-10 ται, καὶ $\hat{\eta}^4$ κατάρροοι κινέονται $\hat{\eta}$ πυρετοὶ φρικώδεες, καθ' ὅ τι ἀν τύχη τοῦ τόπου ⁵ ἡ πλησμονή κινηθείσα. ὅ τι δ΄ αν τύχη ποιήσας κατά τούτον τὸν καιρόν, τούτο αἰτιῆται οὐκ αἴτιον ἐόν· τούτω γὰρ κρατεῦντα τὰ σιτία τοὺς πόνους, κατὰ σμικρον συλλεγομένη ή πλησμονή ές νοῦσον προήγαγεν.6 άλλ' ου χρη προίεσθαι μέχρι τούτου, άλλ' ὁκόταν γνῷ τὰ πρῶτα τῶν τεκμηρίων, εἰδέναι δτι κρατεί τὰ σιτία τοὺς πόνους κατὰ σμικρὸν συλλεγόμενα, ἢ πλησμονή ἐστι.⁷ μύξα 20 καὶ σίαλον πλησμονής έστὶ κρίσις. 8 ἀτρεμίζοντος μέν δή τοῦ σώματος, φραγνύουσι 9 τοὺς πόρους τοῦ πνεύματος, πολλής ένεούσης της πλησμονής. θερμαινόμενον δὲ ἀπὸ 10 τοῦ πόνου, ἀποκρίνεται λεπτυνόμενον. χρη δε του τοιούτον έκθεραπευθήναι ώδε έκπονήσαι έν τοίσι γυμνασίοισι τοίσιν είθισμένοισιν άκόπως, θερμώ λουσάμενον έξεμέσαι εὐθὺς σίτοισι χρησάμενον παντοδαποῖ-

REGIMEN, III. LXX.

morning or 1 to take exercise, then they blow the nose and spit; as time goes on the eyelids too are heavy, and as it were an itching seizes the forehead; they have less appetite for food and less capacity for drink; their complexion fades; and there come on either catarrhs or aguish fevers, according to the place occupied by the surfeit that was aroused. But the sufferer always lays the blame unjustly on the thing he may happen to do at the time of the illness. In such a case 2 food overpowers exercises, and the surfeit gathering together little by little brings on disease. One ought not, however, to let things drift to this point, but to realise, as soon as one has recognised the first of the signs, that exercises are overpowered by foods that gather together little by little, whereby comes surfeit.8 For mucus and saliva are the crisis 4 of surfeit. Now as the body is at rest, they block up the passages of the breath, the surfeit inside being considerable; but being warmed by exercise, (the humour) 5 thins and separates itself out. Such a patient should be treated thus. He must take his usual exercise thoroughly yet without fatigue, have a warm bath, and vomit immediately after eating a

1 Or, possibly, "and"

3 I have translated Littré's reading, with little belief in its correctness The \hat{y} . . . $\hat{\epsilon}\sigma\tau i$ is grammatically possible, but strange. Or. "test."

idiomatically strange.

5 So Littré, and probably rightly. But the grammar is curious, as the natural subject of ἀποκρίνεται is σώμα. If the middle could mean "gives off a secretion from itself," the sense would be excellent and the grammar normal not, however, find any support for this meaning of ἀποκρίνεται.

² Unless the MSS. reading be violently changed, this is an undoubted "nominative absolute." The scholar will accordingly be cautious in altering sentences containing this construction. See page 355.

very varied meal. 1 After vomiting flush the mouth and throat with a harsh 2 wine, so as to contract the mouths of the veins, and prevent any result of the vomiting from being drawn down afterwards. Then one should go out for a short walk in the sun. the next day one should take the same walks, but less and lighter exercise than before. One should take no luncheon if it be summer; if it be not summer, a light luncheon should be eaten. Reduce the usual dinner by one half. On the third day all usual exercises and walks should be resumed, and food should be gradually increased, until the usual food is restored on the fifth day from the vomiting. If as a result the patient's condition be satisfactory, let his treatment hereafter be to take less food and more exercise. But if the signs of surfeit do not disappear, let the patient wait for two days after the return to the usual dret, vomit again, and follow the same progressive increase. Even if a third vomiting be necessary, the patient should continue until he is rid of the surfeit.

LXXI. There are some men who, when exercise is overpowered by food, experience the following symptoms. At the beginning of the surfeit they

REGIMEN, III. LXXI.-LXXII.

have fall upon them long and pleasant sleeps, and they slumber for a part of the day. The sleep is the result of the flesh becoming moist 1; the blood dissolves, and the breath, diffusing itself, is calm. But when the body can no longer contain the surfeit, it now gives out a secretion inwards through the force of the circulation,2 which, being opposed to the nourishment from food, disturbs the soul. So at this period the sleeps are no longer pleasant, but the patient perforce is disturbed and thinks that he is struggling. For as the experiences of the body are. so are the visions of the soul when sight is cut off Accordingly, when a man has reached this condition he is now near to an illness. What illness will come is not yet known, as it depends upon the nature of the secretion and the part that it overpowers. The wise man, however, should not let things drift, but as soon as he recognises the first signs, he should carry out a cure by the same remedies as in the first case, although more time is required and strict abstinence from food

LXXII. The symptoms of surfeit are sometimes as follow. The body aches, in some cases all over, in others that part only of the body that happens to

REGIMEN, III. LXXII.

The ache resembles the pain of fatigue. be affected Accordingly, under the impression that they are suffering fatigue pains, these patients adopt a treatment of rest and over-feeding, until they fall into a Even then they fail to realise the true state of affairs, but indulging in baths and food they turn the illness into pneumonia, and fall into the direst peril But what is necessary is to exercise forethought before the diseases attack, and to adopt the following treatment. Take by preference gentle vapour baths, the next best thing being copious hot baths, so as to dilate the body as much as possible, and then, after meals, at first of harsh foods and very copious, afterwards of the other kinds 1 of food, there should be a thorough emptying of the body by vomiting; after this there should be taken a short stroll in the sun, followed by sleep. In the morning walks should be long 2, though short to begin with, and gradually increased; exercises should be light, and with the same gradual increases as in the former case a state requires severe reduction of flesh and plenty of walking exercise. And if through lack of forethought there is an attack of fever, nothing should be given for three days except water. If the fever go down in that time, well and good; if it does not, treat the patient with barley water, and on the fourth or the seventh day he will sweat and be quit of the

Or (with the reading άλυκοῖσιν), "of salt foods "

² So Littré It is doubtful in the Corpus whether πολθs refers to quantity or to number, an ambiguity that often occurs in Epidemics I and III. "Many" is a possible meaning here, as of course the treatment is spread over several days

M has δπόκειται, omits κακοί and reads δκηι.
 ταχυτερην θ ταχείην (before ποιεῖσθαι) Μ.

REGIMEN, III. LXXII.-LXXIII.

trouble.¹ It is good to use sudorific unguents at the approach of a crisis, as they bring on sweating.

LXXIII. In certain cases the sufferers from surfeit experience the following symptoms. The head aches and feels heavy; their evelids close after dinner; they are distressed in their sleep, they appear to be feverish, and occasionally the bowels are constipated. After sexual intercourse they seem to be for the moment more at ease, but afterwards the feeling of heaviness increases. In these cases the head, acting by revulsion on the surfest, makes the bowels constipated and itself becomes heavy. Nasty dangers threaten, and the surfeit infects that part where it has broken out. But forethought of the following kind is required. If the quicker treatment is desired, after a vapour bath purge with hellebore, and for ten days gradually increase light and soft foods, and meats that open the bowels, that the lower belly may overpower the head by the revulsion below. Practise slow runs, longish early-morning walks, and wrestling with the body oiled. Take luncheon and a short sleep after it. After dinner a stroll is sufficient. Use baths and unguents, the baths tepid. and abstain from sexual intercourse. This is the quickest method of treatment. But if the patient wish to avoid drug-taking,2 he should take a hot

¹ With the reading of Littré: "he will get rid of the trouble if he sweat"

² This refers to the hellebore mentioned earlier in the chapter. In the Corpus "drugs" are purges

REGIMEN, III. LXXIII.-LXXIV.

bath, and then vomit after eating foods that are sharp, moist, sweet and salt 1; after vomiting let him go for a short stroll. In the morning let him take gentle walks to begin with, and gradually increase them, and the exercises described above, for a period of six days. On the seventh day add a surfeit of like foods, and then vomit; after which make the same progressive increase. Follow this regimen for four weeks, for this is about the time required for a recovery. Then gradually increase food and exercise; increase the interval between vomitings; lessen the time taken in increasing food to the normal, so that the body may recreate itself, and restore the regimen to what is usual little by little.

LXXIV. Surfeitshows also the following symptoms. When the belly digests the food, but the flesh rejects it, the nutriment, remaining inside, causes flatulence. After luncheon, the flatulence subsides, for the lighter is expelled by the stronger, and the trouble seems to have been got rid of; but on the next day the symptoms recur much intensified. But when, owing to the daily growth, the surfeit becomes strong, what is already present overpowers the things added from without, generates heat, disturbs the whole body and causes diarrhoa. For such is the name given to

¹ Littré translates as though all four epithets applied to one food. The Greek suggests (a) foods sharp (acid) and moist, (b) sweet foods, (c) salt foods; perhaps (a) acid and moist, (b) sweet and moist, (c) salt and moist. At any rate the four qualities (which to a Greek of 400 B C were substances) had to be combined in one meal. As $\delta \rho \iota \mu \nu \delta s$ is generally opposed to $\gamma \lambda \iota \iota \iota s$ it is not surprising that the manuscript M omits two epithets

the disorder so long as the waste products 1 only of food pass by stool. But when, as the body grows hot, the purging becomes harsh, the bowel is scraped, ulcers form and the stools passed are bloody; this disorder is called dysentery, a difficult and dangerous disease. Precautions must be taken, lunch omitted and dinner lessened by one-third. Use more exercises, wrestling, running and walks, both after the gymnastic practice and in the early morning. When ten days are gone, add one half of the food that has been taken away, take an emetic, and gradually increase the food for four days. When another ten days are gone, add the food that is still lacking, take an emetic, and gradually increasing the food you will effect a cure in this interval of time. Such a case as this you can without fear exercise rigorously.

LXXV. There also occurs the following kind of surfeit On the following day the food is brought up undigested, without heartburn, copious stools are passed, but not proportionate to the food eaten, and there are no fatigue pains. In these cases the belly, being cold, cannot digest the food in the night. So when it is disturbed it brings up the food undigested. So for such a patient it is necessary to procure warmth for the belly both from regimen and from exercises. So first one should use warm, fermented bread,

crumbling it into dark wine or into pork broth. Also fish boiled in acrid brine. Use also fleshy meats, such as pig's feet well boiled and fat roast pork, but be sparing of sucking-pig, and the flesh of puppies and kids. Vegetables should be leeks and onions, boiled and raw, boiled blite and the pumpkin. Drink should be undiluted, and no luncheon should be taken at first. There should be sleep after exercises, running in the double course, increased gradually, gentle wrestling with the body oiled, few baths, more anointings than usual, plenty of early-morning walks, but only short ones after dinner. Figs with food are good, and neat wine therewith. This treatment brings recovery, in some cases rapid, in others slower.

LXXVI. In other cases the following symptoms are experienced. There is paleness, and acid belching shortly after food, the acid matter rising into the nose. In such cases the body is impure. For the flesh melted by the fatigue is greater than that purged away by the circulation. Now this excess, remaining in the body, is antagonistic to the nourishment, forces it along, and renders it acid. So the nourishment is belched up, and the excess is pushed out under the skin, causing in the patient paleness

REGIMEN, III. LXXVI.-LXXVII.

and dropsical diseases. The following precautions should be taken. The quicker method of treatment is to give a draught of hellebore and then to adopt the progressive diet that I have already described. The safer method, however, is by the following regimen. First a hot bath should be taken, then an emetic, and then the usual diet should be regained by a gradual increase spread over seven days. the tenth day after the emetic another should be taken, followed by the same gradual increase of food. The treatment should be repeated a third time. Short but sharp runs should be taken in the circular course, with arm exercises, massage, long practice in the gymnasium and wrestling in dust. Plenty of walking after exercises, after dinner, but especially in the early morning. The body should be anointed when covered with dust. When the patient wishes to bathe, let the water be hot. During this time no luncheon should be taken If recovery occur in a month, let the patient take hereafter the fitting treatment; but if the illness has not completely disappeared, let the patient continue the treatment.1

LXXVII. In some cases the morrow brings heartburn. When this is so, a secretion arises in the night from surfeit. Accordingly, when the body has moved after sleep, breathing more rapidly it forces

¹ The argument appears to be faulty treatment "follow complete recovery" Emerins, seeing the difficulty, would revive an old reading (or conjecture) and add πρότερον before $\theta \epsilon \rho \rho n \pi \epsilon i \eta$. This does not touch the difficulty of the clause $\theta \epsilon \rho \rho n \pi \epsilon i \eta$. This does not touch the difficulty of the clause $\theta \epsilon \rho \rho n \pi \epsilon i \eta$. It is just possible that this clause is merely a misplaced variant of $\chi \rho \rho \rho \eta \rho \eta \rho \eta \rho \eta \rho \eta \rho \eta \eta$, and in the original text there was an aposioness after $\kappa \alpha \theta \iota \sigma \eta \eta \eta n \eta$. "If the patient recover in a month, well and good; if not, continue the treatment."

out with the breath hot and acid matter.¹ From this come diseases, unless precautions be taken. In such cases it is beneficial to take the same treatment as that last described, but the patient must increase the amount of evercise.

LXXVIII. The following symptoms also occur. In persons of firm flesh, when the food warms and melts during first sleep, the flesh warming owing to the food and through the sleep, a copious secretion comes from the moist flesh. Then the flesh owing to its firmness will not receive the nourishment. while the secretion from the flesh, being opposed to the nourishment and forced out, warms and chokes the man until he has vomited it forth. follows the vomiting, and no pain is felt in the body though the complexion is pale. In course of time, however, pain and disease occur. Similar symptoms are experienced by those who, when out of training, suddenly take violent exercise, causing a copious melting of their flesh Such persons must be treated thus. Reduce their food by one-third. The food to be used should be acrid, dry, astringent, aromatic and diuretic Running should be mostly on double tracks, with the cloak worn, while the double stade and circular course should be run stripped; use massage, a little wrestling, and wrestling with the

REGIMEN, III. LXXVIII.-LXXIX.

hands (hand-wrestling and the punch-ball are more than usually valuable), with long walks after exercises, in the early morning and after dinner. Voice exercises are useful, for by evacuating the moisture they rarefy the flesh. It is beneficial to abstain from luncheon. Follow this treatment for ten days; then add half the food taken away, continue thus for six days and administer an emetic. After the emetic increase the food gradually for four days. When ten days have elapsed since taking the emetic, restore food to the full original amount, keeping, however, the exercises and the walks, and the patient will recover. A constitution of such a nature needs more exercise than food

LXXIX. The following symptoms are experienced by some patients. Their food passes watery and undigested; there is no illness like lientery to cause the trouble,² and no pain is felt. It is especially bowels that are cold and moist that show these symptoms. The coldness prevents digestion, and the moistness makes the bowels loose So the body wastes away through not receiving its proper nourishment, while the bowels become diseased and illnesses occur. Precautions ought to be taken. It is beneficial in this case to reduce food by one-

1 This sentence may be a marginal note that has crept into the text Ermerins' emendation is probably correct. "Hand-wrestling and punch-ball are better than $\pi d\lambda n$."

² The reading olov ἐκ λιεντερίης was probably due to a corrector who scented an inconsistency between οὐ διὰ νόσημα and ἐς νούσους τε ἐμπίπτουσιν later on. The true meaning of the passage is that, while the state of the bowels is not caused by one of the diseases that commonly do cause it, yet illnesses follow this disordered condition unless precautions be taken.

άφελείν τὸ τρίτον μέρος: ἔστω δὲ τὰ σίτα ἄρτοι συγκομιστοί άζυμοι, κλιβανίται, ή έγκρυφίαι, θερμοί ές οίνου αὐστηρον εμβαπτόμενοι, καὶ τῶν ἰγθύων τὰ νωτιαῖα καὶ οὐραῖα, τὰ δὲ κεφάλαια καὶ ὑπογάστρια ἐᾶν ² ὡς ὑγρότερα καὶ τοὺς μὲν έφθους εν άλμη, τους δε όπτους εν όξει και τοίσι κρέασι τεταριχευμένοισιν έν άλσι 3 και όξει. καὶ τοίσι κυνείοισιν όπτοίσι.4 καὶ φάσσης καὶ τῶν λοιπῶν τοιούτων ὀρνίθων, ἐφθοῖσι καὶ ὀπτοῖσι. 20 λαγάνοισι δὲ ὡς ἥκιστα· οἴνω δὲ μέλανι ἀκρητεστέρω αὐστηρώ. καὶ τοῖσι περιπάτοισιν ἀπό τε τοῦ δείπνου πολλοῖσι καὶ τοῖσιν ὀρθρίοισι, καὶ ἐκ τοῦ περιπάτου κοιμάσθω 6 δρόμοισι δὲ καμπτοίσιν έκ προσαγωγής. έστω δε καί τρίψις πολλή καὶ πάλη βραχείη καὶ ἐν τῷ ἐλαίῳ καὶ ἐν τῆ κόνει, ὅκως ὁ διαθερμαινομένη ἡ σὰρξ ἀποξηραίνηταί τε καὶ τὸ ὑγρὸν ἐκ τῆς κοιλίης άντισπα άλείφεσθαι δε συμφέρει μαλλον ή λούεσθαι· ἀνάριστος δὲ διαγέτω· ὅταν δὲ γένωνται 30 ήμέραι έπτά, προσθέσθω τὸ ήμισυ τοῦ σίτου τοῦ άφαιρεθέντος, καὶ ἔμετον ποιησάσθω,8 καὶ προσαγέτω ές τέσσαρας ημέρας τὸ σιτίου τη δὲ άλλη έβδόμη κομισάσθω άπαν καὶ ἔμετον πάλιν 34 ποιησάμενος προσαγέτω κατά τωὐτό.

 ³ Ermerins after ὀξηροῖσι adds καὶ τοῖσι ἀγρίοισι ἄπασι.
 This may be correct.

REGIMEN, III. LXXXI.

cannot attend to their duties. In course of time the belly by its heat draws the flesh to itself; pain is felt; there is loss of appetite, ulcers form in the belly, and hereafter the diarrhoa is difficult to arrest. Precautions should be taken early, with the knowledge that the belly is over-hot and over-watery, and that there has been excess of unsuitable exer-Regimen, accordingly, must be such as to cool and dry the belly. First, exercise should be reduced by one-half, food by one-third. Barley cake should be eaten, the grain ground and wellkneaded Fish of the driest kinds, that are neither rich nor salt, may be eaten boiled. They may also be grilled As to the flesh of birds, doves and pigeons should be boiled, partridges and chickens roasted, with seasoning. Eat hares boiled in water, and such wild vegetables as are cooling; beet thoroughly boiled and with vinegar 1 Wine should be dark and dry. Evercises to be sharp runs on the round track. Massage, but only a little, not much. No wrestling proper; but hand-wrestling, arm exercises, punch-ball and wrestling in the dust are suitable when not in excess Walks are to be taken after exercise that are adequate considering the fatigue; after dinner they should be as long as possible considering the food; in the morning they should be proportioned to the habit of body. The bath should be tepid and taken quietly. After ten days of this regimen restore half of the food and one-

¹ The text here is very uncertain, and I have done my best to make sense of the reading of θ . It is tempting to adopt the reading of Ermerins "vegetables that are cooling, such as beet . ., and all wild vegetables."

REGIMEN, III. LXXXI.-LXXXII.

third of the exercise. An emetic should be taken after a meal of dry and astringent food, which must not remain long in the stomach; in fact the emetic should follow with all speed. After the emetic for four days increase gradually by \(\)equal \(\)^1 portions food, drink and exercise. When ten days are passed, add the rest of food and drink, but not quite all the exercises. After an emetic proceed progressively, as has been described. It is beneficial to take during this period one meal only a day until health is restored.

LXXXII In some other cases the stools pass dry and burnt up, and the mouth becomes dry, in course of time becoming bitter also, while bowels and kidneys cease to act. For when the intestines have no moisture, they swell around the fæces and block up the passages, causing pain, while fever comes on and everything eaten or drunk is vomited. Finally, dung too is brought up. When this point is reached life may be despaired of. Precautions should be taken betimes, with the knowledge that the patient is overpowered by a dry heat. So his diet should consist of barley cake, well-kneaded and sprinkled, with buck-wheat bread fermented with the gruel of its bran. Vegetables should be taken except those that are acrid and dry, and they should be

¹ The word μερίζων, "dividing them," may merely emphasize the notion of progressive increase implied in προσαγέτω.

6 χυμῶι θ: χυλῶι Μ.

² The Greek admits the rendering, "but not quite enough to match the exercise." But the sense of the passage suffers.

between daggers and given a translation that represents the general sense.

² σιτίων M : λοιπῶν θ (perhaps rightly).

⁸ For ποιησάσθω θ reads ποιησάτω

REGIMEN, III. LXXXII.

boiled. Fish must be of the lightest and boiled. He may eat the heads of fish and of lobsters. Mussels, sea-urchins, crabs, soups from cockles, and cockles themselves of the most waterv kind. Among meats, pigs' fore-feet boiled, and flesh of kids, lambs and puppies, also boiled Fish from rivers and lakes. boiled. Soft wine, well-diluted Exercises neither long nor sharp, but gentle in all cases. Walks are to be taken in the morning, long enough for the habit of body, and, after exercise, proportioned to the fatigue; after dinner no walk must be taken. Baths should be taken, gentle sleep, and luncheon, but the sleep after luncheon should not be long. Moistening fruit should be eaten with food. Chickpeas should be taken when fresh; if dried let them be first soaked in water. This patient too must reduce, from the very first, his former exercise by one-half. Let him also take an emetic after a meal of sweet, rich, salt, fatty 1 foods; let this meal lie in the stomach as long as possible consistently with vomiting it up. Then let the patient increase the food for three days, not forgetting to take luncheon. After ten days let him resume gradually the greater part of the exercises If now after food there be experienced surfeit, or a disorder of the belly, let an emetic be taken. Otherwise, the same treatment should be continued for the rest of the time.

¹ The reading of M, $\pi\lambda\epsilon$ iόνων, "more than usually copious," may be right. It is hard to distinguish π iόνων from λ i π αρ $\hat{\omega}$ ν Perhaps the former is "fatty," the latter "sickly"

⁴ For πιόνων M reads πλειόνων

⁵ For προσαγέσθω M reads προσαγέτω.

LXXXIII. Γίνεται δὲ καὶ τοιάδε· φρίκαι ἀπὸ τῶν περιπάτων ἐγγίνονται τῶν ὀρθρίων,1 καὶ τὴν κεφαλὴν βαρύνονται τοσούτω ὁκόσω 2 πλείονες οί περίπατοι της συμμετρίης κενεόμενον δὲ τὸ σῶμα καὶ ἡ κεφαλή τοῦ ύγροῦ φρίσσει τε καὶ βαρύνεται προιόντος δὲ χρόνου ες πυρετον αφικνείται φρικώδεα. αλλ' ού χρη προίεσθαι ές τοῦτο, άλλ' έκθεραπεύεσθαι πρότερον ώδε. όταν γένηται τάχιστα τών τεκ-10 μηρίων τι, χρισάμενον καὶ ἀνατριψάμενον ὀλίγα, άριστον ποιήσασθαι πλέον τοῦ εἰθισμένου, καὶ πιείν ίκανὸν οίνον μαλακόν, είτα ύπνω χρησθαι⁸ άπὸ τοῦ ἀρίστου ἱκανῷ-4 ἐς τὴν ἐσπέρην δὲ κούφοισι χρησάμενον γυμνασίοισι θερμώ 5 λουσάμενον δειπνησαι τὸ είθισμένον περιπάτω δὲ μη χρησθαι ἀπὸ δείπνου, διατρίβειν δὲ χρόνον. τη δε ύστεραίη άφελέσθω των γυμνασίων πάντων και τών περιπάτων τὸ τρίτον μέρος, τοίσι δὲ σίτοισι χρησάσθω ώσπερ είθιστο. λουέσθω δὲ 20 χλιαρώ, και τώ έλαίω άλειφέσθω 6 ἐν τῷ ὕδατι· υπνοισί τε μαλακοίσι διαγέτω, εν ημέρησι δε 22 πέντε τοὺς πόνους προσαγέτω 7 κατὰ μικρόν.

¹ For δρθρίων M reads δρθραυ

² So θ M has βαρύνεται τούτωι πλείονες

³ For χρήσθαι M has χρήσασθαι.

For ἰκανῷ M has ἰκανῶς.
 For θερμῷ M has θερμῶς.

REGIMEN, III. LAXXIII.-LXXXIV.

LXXXIII. The following symptoms also occur. Rigors come on after the early-morning walk, with heaviness of the head proportionate to the excess of the walking over the proper amount. The reason for the rigors and the heaviness is because the body and the head are emptied of their moisture. course of time the patient falls into a fever attended by rigors Instead of letting things slide thus far, the following treatment should be carried out before the first appearance of the symptoms 1 let the patient have a little unction and a little massage, take a heartier luncheon than usual, with plenty of soft wine to drink, and then a long sleep after the luncheon. In the evening light exercises should be taken, a hot bath and the usual dinner. No walk after dinner; the patient should just pass away the time. On the next day reduce all the exercises and the walks by one-third, but the usual food should be Let the patient take his bath tepid, and in the water anoint himself with oil. He must take his sleep on a soft bed, and spend five days in resuming his exercises little by little

LXXXIV. Some have rigors as a result of 2 their exercises, that is to say, from the time they put off their clothes to the time they finish, and the rigors are renewed on cooling down. The teeth

2 O1 "after," in which case καl means "and." I take the clauses after καl to explain ἐκ τῶν γυμνασίων

¹ The τ_i seems to refer, not to one of the symptoms, but to their first appearance in a slight form "as soon as the symptoms appear at all" $\tau \hat{\omega}_{\nu} \tau \epsilon \kappa \mu \eta \rho (\omega \nu \tau_i)$, in fact, means, not "one symptom," but "something of the symptoms"

⁶ Μ omits των γυμνασίων · . . ἀλειφέσθω.

⁷ M omits πόνους and reads προσαγέσθω.

⁸ For ἐκδύσωνται M has ἐκδύηται.

βρυγμός τε τὸ σῶμα ἔχει ὑπνώσσει τε, ὅταν δὲ έξέγρηται, χασμάται πολλάκις έκ δὲ τοῦ ὅπνου τὰ βλέφαρα βαρέα προϊόντος δὲ τοῦ χρόνου καὶ πυρετοί ἐπιγίνονται ἰσχυροί, καὶ φλυαρεί. φυλάσσεσθαι οδυ χρη καὶ μη προίεσθαι 2 èς τοῦτο, άλλα εκδιαιτήσασθαι ώδε πρώτον μεν 10 γυμνασίων ἀφελέσθω πάντα ή τὰ ἡμίσεα τοῖσι δὲ σίτοισιν πᾶσι χρήσθω ὑγροτέροισί τε καὶ ψυχροτέροισι, καὶ τοῖσι πόμασι μαλακωτέροισι καί ύδαρεστέροισιν όκόταν δὲ παρέλθωσιν ἡμέραι πέντε, προσθέσθω των πόνων το τρίτον μέρος τῶν ἀφαιρεθέντων τοῖσι δὲ σίτοισι χρήσθω τοίσιν αὐτοίσι· πέμπτη δὲ ἄλλη ἡμέρη τοὺς ἡμίσεας τῶν λοιπῶν πόνων προσθέσθω· αὖθις δὲ πέμπτη μετὰ τοῦτο ἀπόδος τοὺς πόνους πάντας κουφοτέρους καὶ ἐλάσσονας, ὡς μὴ πάλιν 20 ύπερβολή γένηται.

LXXXV. Το ισι γὰρ πάσχουσι τα υτα τὰ τεκμήρια οι πόνοι κρέσσους εἰσι τον σιτίων ἀνισάζειν ουν χρή. ἔνιοι δὲ οὐ τα υτα πάντα πάσχουσιν, ἀλλὰ τὰ μέν, τὰ δ΄ οὔ. πάντων δὲ τούτων τῶν τεκμηρίων οι πόνοι κρατέουσι τῶν σίτων, καὶ θεραπείη ἡ αὐτή. συμφέρει δὲ τούτοι ι θερμολουτεῖν, μαλακευνεῖν, μεθυσθηναι ἄπαξ ἡ δίς, μὴ ἐς ὑπερβολήν ἀφροδισιάσαι τε ὅταν ὑποπίη. 10 πλην των 5 περιπάτων.

¹ For ἰσχυροί M has φαῦλοι

² προσίεσθαι θ πρόεσθαι M (which omits καί).

³ θ omits τοΐσι γάρ . εἰσὶ

⁴ So M θ reads ὑποπτῆι, omitting τε.

⁵ τῶι is omitted by M

REGIMEN, III. LAXXIV.-LXXXV.

chatter.1 The patient is sleepy, and after waking up he yawns frequently. After sleep the eyelids are heavy. In course of time high fever too comes on with delirium So care must be taken not to let things drift so far, and the following change of regimen should be adopted First drop all exercises or reduce them by one-half. All the food taken should be of the moister and more cooling sort, and the drink of the milder sort, well diluted. When five days are passed, let the patient add one-third of the exercises that have been dropped. The food taken should be the same. After another five days restore one-half of the remaining exercises After another five resume all the exercises, but let them be less strenuous and less prolonged, in order that excess may not recur.

LXXXV. When patients exhibit these symptoms exercises are in excess of food. Accordingly, a due correspondence must be restored. In some cases not all the symptoms are experienced, but only some of them. But with all these symptoms exercises overpower food, and the treatment is the same. These patients ought to take their baths warm, to sleep on a soft bed, to get drunk once or twice, but not to excess, to have sexual intercourse after a moderate indulgence in wine, and to slack off their exercises, except walking.

¹ Ermerns deletes $\tau \delta$ $\sigma \hat{\omega} \mu \alpha$, and the words are strange, although supported by all the MSS. Perhaps we should read $\tau \delta$ $\sigma \tau \delta \mu \alpha$. I am loth, however, to depart from the MSS., as we really know too little about Greek idioms of this type to be quite sure that the phrase $\tau \delta$ $\sigma \hat{\omega} \mu \alpha$ would be impossible in this context.

OR

DREAMS

LXXXVI. He who has learnt aright about the signs that come in sleep will find that they have an important influence upon all things. For when the body is awake the soul is its servant, and is never her own mistress, but divides her attention among many things, assigning a part of it to each faculty of the body—to hearing, to sight, to touch, to walking, and to acts of the whole body; but the mind never enjoys independence. But when the body is at rest, the soul, being set in motion and awake,1 administers her own household, and of herself performs all the acts of the body. For the body when asleep has no perception, but the soul when awake has cognizance of all things-sees what is visible, hears what is audible, walks, touches, feels pain, ponders In a word, all the functions of body and of soul are performed by

The reading of M would mean, "pervading the body." The words τλ πρήγματα, which θ has after ἐγρηγορέουπα, I take to be a note on τλν ἐωντῆς οἶκον which has crept into the text. The unusual form ἐγρηγορέουσα may possibly account for the disturbed state of the manuscript tradition.

3 So M. Some MSS. read ακριβή τέχνην

5 So M θ has τυγχάνουσι τὰ δ' οὐδετερα.

7 οὐδότι . οὐδότιθ

8 οιδων θ οί δ ών Diels 9 φυλάξασθαι Μ.

¹² In θ the -vs of τ oùs and θ eoùs has been erased.

¹ θ omits σοφίης ² θ omits $\mathring{\eta}$. . . προσημαίνει.

⁴ θ has η before ὁπερβολην, and so Diels would read προσημαίνει, η ὑπερβολην τῶν συμφότων κ τ λ, perhaps rightly. Ermeins for κενώσιος has κακώσιος, without authorities or comment

[&]quot; διότι οῦν θ Μ οὖν is omitted by the first hand in II.

¹⁰ εὕξασθαι Μ. In θ the - ˆισιν of θεοῖσιν has been erused.
¹¹ The vulgate has εὕχεσθαι πρέπον καὶ λίην ἐστὶν ἀγαθύν.
Μ has εὕχεσθαι δεῖ καὶ ἀγαθόν.

REGIMEN, IV LXXXVI.-LXXXVIII.

the soul during sleep. Whoever, therefore, knows how to interpret these acts aright knows a great

part of wisdom.

LXXXVII. Now such dieams as are divine, and foretell to cities or to private persons things evil or things good, have interpreters in those who possess the art of dealing with such things. But all the physical symptoms foretold by the soul, excess, of surfert or of depletion, of things natural, or change to unaccustomed things, these also the diviners interpret, sometimes with, sometimes with-But in neither case do they know out success. the cause, either of their success or of their failure. They recommend precautions to be taken to prevent harm,2 yet they give no instruction how to take precautions, but only recommend prayers to the gods. Prayer indeed is good, but while calling on the gods a man should himself lend a hand.

LXXXVIII. This is the truth of the matter. Such dreams as repeat in the night a man's actions or thoughts in the day-time, representing them as

The punctuation of this passage is uncertain I have taken παραινέοντες as a slight anacoluthon for παραινέονσι, but it might be better to put a colon or full-stop at ἀμάρτωσι and a comma at λάβη. So Littré and Ermerins

¹ The words within daggers I have omitted from my translation. Lattré translates "non causés par la faute des parties intéressées." But such a meaning can apply only to $\kappa \alpha \kappa \dot{\alpha}$, not to $\dot{\alpha} \gamma \alpha \theta \dot{\alpha}$ If the words be kept, $\alpha \dot{\nu} \tau \hat{\alpha} \nu$ must be emended to $\alpha \dot{\nu} \tau \hat{\alpha} \nu$ or $\dot{\epsilon} \omega \nu \tau \hat{\alpha} \nu$, otherwise the order of the words is wrong.

⁵ τάραχον θ ταραχὴν Μ

⁶ θ has καὶ ἡν ἰσχυρῶ ἰσχυρὸν τὸ σῶμα. Diels would read καὶ ἡν μὲν ἰσχυρή, ἰσχυρόν (sc τὸν τάραχον σημαίνει); this is quite possibly correct

⁷ Both θ and M omit δεῦ, which the vulgate places after μή M has οὅτε for εἔτε.

REGIMEN, IV. LXXXVIII.

occurring naturally, just as they were done or planned during the day in a normal 1 act-these are good for a man. They signify health, because the soul abides by the purposes of the day, and is overpowered neither by surfeit nor by depletion nor by any attack from without But when dieams are contrary to the acts of the day, and there occurs about them some struggle or triumph, a disturbance in the body is indicated, a violent struggle meaning a violent mischief, a feeble struggle a less serious mischief. As to whether the act should be averted or not I do not decide. but I do advise treatment of the body. For a disturbance of the soul has been caused by a secretion arising from some surfeit that has occurred Now if the contrast be violent, it is beneficial to take an emetic, to increase gradually a light diet for five days, to take in the early morning long, sharp walks, increasing them gradually, and to adapt exercises, when in training,2 so as to match the gradual increase of food. If the contrast be milder, omit the emetic, reduce food

1 The word δικαίφ is difficult. Littré's "dans une juste affaire," and Ermerins' "in ie iusta," hardly bring out the meaning, which has no reference to ethics, but only to the "sanity" of the act or thought

² The reading ἐπιγυμνάζεσθαι is the easier, as few Greeks were ever "out of training" It is hard, however, to discard the reading of so good a MS as θ , especially when we remember that "difficilior lectio potior."

9 δστις έτι γυμνάζεται θ: ἐπιγυμνάζεσθαι Μ

REGIMEN, IV. LXXXVIII.-LXXXIX.

by a third, resuming this by a gentle, gradual increase spread over five days. Insist on vigorous walks, use voice-exercises, and the disturbance will cease.

LXXXIX To see the sun, moon, heavens and stars clear and bright,1 each in the proper order, is good, as it indicates physical health in all its signs.2 but this condition must be maintained by adhering to the regimen followed at the time. But if there be a contrast between the dream and reality, it indicates a physical illness, a violent contrast a violent illness, a slighter contrast a lighter The stars are in the outer sphere, the sun in the middle sphere, the moon in the sphere next the hollow.3 When any one of the heavenly bodies appears to be disfigured, to disappear, or to be arrested in its revolution, if it be through mist or cloud, the malign influence is comparatively weak; if through iain also or hail, the influence is more powerful In any case it is indicated that a moist and phlegm-like secretion, arising in the body, has fallen to the outer circuit.4 It is beneficial for this man to make his runs long, wearing

2 "De la part de tout ce qui y est" Littré, "omniumque eius partium" Ermerins. τὸ ὁπάρχον in this book often

mean an apparition in a dream See p 431.

4 There is supposed to be a connection between the spheres in which the stars move and the "circuits" or circulations in

the body described in Regimen I.

³ The moon was supposed to be in the first and lowest of the eight concentric spheres, the sun in the fourth, the fixed stars in the eighth and outermost. $\tau \tilde{\alpha} \, \kappa o \tilde{\iota} \lambda \alpha$ means the concavity of the inmost sphere, by which we are surrounded. I owe this note to the kindness of Professor A. E. Housman

χρησθαι πολλοίσιν, έξ όλίγου προσάγοντα, 20 δπως έξιδρώση 1 ώς μάλιστα, καὶ τοῖσι περιπάτοισιν από του γυμνασίου πολλοίσι, καὶ ανάοιστον διάνειν· των τε 2 σίτων 3 άφελόμενον τὸ τρίτον μέρος προσάγειν ἐς πένθ' ἡμέρας εἰ δε δοκοίη Ισχυρότερον είναι καὶ πυρίη 4 χρησθαι. την γαρ κάθαρσιν δια του χρωτός συμφέρει ποιείσθαι, διότι εν τη έξω περιφορή εστί βλάβος τοίσι δὲ σίτοισι χρησθαι ξηροίσι, δριμέσιν, αὐστηροῖσιν, ἀκρήτοισι, καὶ τοῖσι πόνοισι τοῖσι ξηραίνουσι μάλιστα. εἰ δέ τι 30 τούτων ή σελήνη πάσχοι, είσω την αντίσπασιν ποιείσθαι συμφέρει, έμέτω τε 5 χρησθαι ἀπὸ τῶν δριμέων καὶ άλμυρῶν καὶ μαλακῶν σίτων τοῖσί τε τρόγοισιν 6 όξέσι καὶ τοῖσι περιπάτοισι τοισί τε της φωνης πόνοισι, και άναριστίησι. τού τε σίτου τη άφαιρέσει και προσαγωγή ώσαύτως. διὰ τοῦτο δὲ εἴσω ἀντισπαστέον. διότι πρὸς τὰ κοΐλα τοῦ σώματος τὸ βλαβερὸν έφάνη, εί δε ό ήλιος τοιοῦτό τι 7 πάσχοι, ἰσχυρότερον τοῦτο ήδη καὶ δυσεξαγωγότερον δεῖ δὲ 40 άμφοτέρως τὰς ἀντισπάσιας τοίσι δρόμοισι τοίσί τε καμπτοίσι καὶ τοίσι 8 τρόχοισι χρησθαι καὶ τοῖσι περιπάτοισι καὶ τοίσιν άλλοισι πόνοισι πάσι, τών τε σίτων τή άφαιρέσει καὶ τῆ προσαγωγῆ ώσαύτως

REGIMEN, IV. LXXXIX.

his cloak the while, to increase them gradually, that he may perspire as freely as possible, and after exercise to take long walks; luncheon should be left out. Reduce food by one-third, and take five days in gradually resuming the normal quantity. Should the trouble appear to be of the more potent kind, use also the vapour-bath; for, as the mischief lies in the outer circuit, it is expedient to make the purgation through the skin The foods employed are to be dry, acrid, astringent and unmixed; 1 the exercises such as are the most drving. But if it be the moon that shows these signs at all,2 it is beneficial to effect the revulsion inwards, and to administer an emetic after foods that are acrid, salt and soft. There should be sharp circular runs, walks. voice-exercises, omission of luncheon, the same reduction and gradual increase of food. nevulsion must be directed inwards because the harm showed itself at the hollow parts of the body But if it be the sun that manifests the phenomena, the malady is more potent, and harder to eliminate It is necessary to effect the revulsions in both directions, to employ running on the double track and on the round track, walks and all other exercises, the same reduction and gradual increase of food. After an emetic should come another

² Or "any one of the signs." See note 1, p. 417.

³ Littré omits τοῖσί τε τρόχοισι . περῖπάτοισι, on the ground that the revulsion is directed inwards. The articles I take to be generic, and the influence of ὡσαύτως to extend backwards only as far as τοῦ τε σίτου. The reading of θ looks like an attempt to extend this influence back to the beginning of the sentence, and to assimilate this prescription to the preceding, which, however, does not contain voice-exercises.

έξεμέσαντα αὖτις προσάγειν πρὸς τὰς πέντε. εί δὲ αἰθρίης ἐούσης θλίβεται, καὶ ἀσθενέα δοκεῖ είναι καὶ 2 ύπὸ της ξηρασίης της περιόδου κρατείσθαι, σημαίνει κίνδυνου ές νούσον έμπεσεῖν. 3 ἀλλὰ χρὴ τῶν πόνων ἀφαιρεῖν, τῆ τε 50 διαίτη τῆ ὑγροτάτη 4 χρῆσθαι, τοῖσί τε λου-τροῖσι καὶ ῥαθυμίη πλείονι, καὶ ὑπνοῖσι, μέχρι καταστή. εί δὲ πυροειδὲς τὸ ὑπεναντιούμενον δοκοίη είναι καὶ θερμόν, χολής ἀπόκρισιν σημαίνει εἰ μὲν οὐν κρατοίη τὰ ὑπάρχοντα, νοῦσον σημαίνει 5 εί δὲ καὶ ἀφανίζοιτο τὰ κρατεύμενα, κίνδυνος ές θάνατον έκ της νούσου έλθειν. εί δὲ τρεφθήναι δοκοίη ἐς φυγὴν τὸ ύπάργον, Φεύγειν δὲ ταχέως, τοὺς δὲ διώκειν, κίνδυνος μανήναι τον άνθρωπον, ην μη θερα-60 πευθή. συμφέρει δὲ τούτοισι πᾶσι μάλιστα μὲν έλλεβόρω καθαρθέντας διαιτήσθαι εί δὲ μή, τη προς ύδατος διαίτη συμφέρει χρησθαι, οΐνον δέ μη πίνειν, εἰ μη 6 λευκόν, λεπτόν, μαλακόν, ύδαρέα ἀπέχεσθαι δὲ θερμῶν, δριμέων, ξηραντικῶν, άλμυρῶν πόνοισι δὲ τοῖσι κατὰ φύσιν πλείστοισι χρήσθω καλ δρόμοισιν εν ίματίω πλείστοισι τρίψις δὲ μὴ ἔστω, μηδὲ πάλη, μηδὲ άλίνδησις ΰπνοισι πολλοίσι μαλακευνείτω. δαθυμείτω πλην έκ⁸ των κατά φύσιν πόνων· 70 ἀπὸ δείπνου περιπατείτω ἀγαθὸν δὲ καὶ πυριῆ-

1 θ has θλίθηται and δοκηι.

3 ένπεσείν θ: πεσείν Μ

4 ύγροτέρηι μαλακηι (without τηι) M.

6 μη θ: δè μη Μ: δ' οδν Littré, Ei merins.

² κal omitted by θ M. First added by Zwinger.

⁵ εἰ μὲν οὐ κρατοίη τὰ . σημαίνει θ. M omits, and Ermerins reads οδν for οὐ.

⁷ Μ omits θερμών, but has θερμαντικών after ξηραντικών.

REGIMEN, IV. LAANIA.

gradual increase spread over five days. But if in a clear sky the heavenly bodies are crushed seeming to be weak and overpowered by the dryness of the revolution,1 it indicates a danger of falling into a What is necessary is to reduce food, to employ the moistest regimen, baths and increased rest, and sleep, until there is a recovery If the hostile influence appear to be fiery and hot, a secretion of bile is indicated. Now if the force 2 win, a disease is indicated. If the vanquished be also annihilated, there is a danger that the disease uill have a fatal issue But if the force 2 seem to be put to flight, and to flee quickly, pursued by the stars, there is a danger that the patient will become delirious, unless he be treated. In all these cases it is most beneficial to be purged with hellebore before submitting to regimen. The next best course is to adopt a watery regimen, and to abstain from wine unless it be white, thin, soft and diluted There should be abstinence from things that are hot, acrid, drying and salt Let there be plenty of natural exercises and long runs with the cloak Let there be no massage, no ordinary wrestling, and no wrestling on dust. Long sleeps on a soft bed, rest except after 3 the natural exercises; let there be a walk after dinner. It is a good thing too to take a vapour-bath

3 O1 (with ἐκ omitted) "from.

¹ If with Ermerins we transpose κal to before σημαίνει, and read κρατείται, we must translate: "they are overpowered etc and it indicates"

² Would the word "Thing" (capital T) represent the mysterious influence suggested by τδ δπάρχον?

⁸ ἐκ is omitted by M.

σθαι καὶ ἐμεῖν ἐκ τῆς πυριῆς τριήκοντα δὲ ήμερέων μὴ πληρωθῆ· όκόταν δὲ πληρωθῆ, τρὶς έν τῶ μηνὶ ἐμεσάτω ἀπὸ τῶν γλυκέων καὶ ὑδαρέων καὶ κούφων. όκόσα δὲ τούτων πλανᾶται . ἄλλοις ἄλλως, ¹ ψυχής τάραξίν τινα σημαίνει ὑπὸ μερίμνης συμφέρει δε τούτω βαθυμήσαι την ψυγην τραπέσθαι 2 πρὸς θεωρίας, μάλιστα μὲν πρός τὰς γελοίας, εἰ δὲ μή, ἄλλας τινὰς ἃς ³ ο τι μάλιστα ήσθήσεται θεησάμενος, ήμέρας δυο 80 ή τρείς, καὶ καταστήσεται εί δὲ μή, κίνδυνος ές νοῦσον πίπτειν. ὅ τι δ' αν ἐκ τῆς περιφορῆς έκπίπτειν δοκή των ἄστρων, όκόσα μέν καθαρά καὶ λαμπρὰ καὶ πρὸς ἔω φέρεται, ὑγείην σημαίνει ὅ τι δ' αν ἐν τῷ σώματι καθαρὸν ἐνεὸν έκκρίνηται έκ της περιόδου κατά φύσιν άφ' έσπέρας πρὸς ἠῶ,4 ὀρθῶς ἔχει καὶ γὰρ τὰ ἐς την κοιλίην αποκρινόμενα και τα ές την σάρκα άπερευγόμενα πάντα έκ της περιόδου έκπίπτει. ο τι δ' αν τούτων μέλαν καὶ αμυδρον καὶ προς 90 έσπέρην δοκή φέρεσθαι, ή ές θάλασσαν ή ές την γην η 5 άνω, ταθτα σημαίνει τὰς νούσους. τὰ μὲν ἄνω φερόμενα κεφαλής ρεύματα ὅσα δὲ ές θάλασσαν, κοιλίης νοσήματα όσα δὲ ἐς γῆν,

2 M has τραπηναι και for τραπέσθαι

4 M reads δτι γάρ, ἐδν and προσηι.

¹ For the ἄλλοις ἄλλως of θ , M has ἄλλο $\tau \epsilon$ ἄλληι μὴ ὑπο ἀνάγκης, With τ ινὰ after ψυχῆς

³ M omits άλλας τινάς, perhaps rightly.

⁵ θ omits η and M has μᾶλλον after ἄνω

¹ Itake ἄλλοις ἄλλως to be an adverbial phrase independent syntactically of the rest of the sentence. I can discover no exact parallel for this, but that is no reason for rejecting the reading in a work in which a strict adherence to

REGIMEN, IV. LXXXIX.

vapour-bath an emetic is to be drunk. Until thirty days are gone the appetite should not be fully satisfied, and when the time has come for this full satisfaction, let an emetic be taken three times a month after a meal of sweet, watery and light Whenever the heavenly bodies wander about, some in one way and others in another,1 it indicates a disturbance of the soul arising from Rest is beneficial in such a case. soul should be turned to the contemplation of comic things, if possible, if not, to such other things as will bring most pleasure when looked at, for two or three days, and recovery will take place. Otherwise there is a risk of falling ill. Whenever a heavenly body appears to fall away from its orbit, should it be pure and bright, and the motion towards the east, it is a sign of health. For whenever a pure substance in the body is secreted from the circuit in the natural motion from west to east, it is right and proper. In fact secretions into the belly and substances disgorged into the flesh all fall away from the circuit. But whenever a heavenly body seems to be dark and dull, and to move towards the west, or into the sea, or into the earth, or upwards, disease is indicated the motion is upwards, it means fluxes of the head; when into the sea, diseases of the bowels; when

syntax is not always followed. Perhaps we should read, with the same sense, ἄλλοτε ἄλλως. M's reading would mean, "now in one direction and now in another." Perhaps ἄλλοις may refer to the dreamers: "in the way the particular dreamer may happen to see them.' Professor D S. Robertson assures me that the last interpretation is the only one consistent with ἄλλοις ἄλλως. But the Greek of Regimen is often abnormal.

120 χειμάζειν, ἀγαθόν· σημαίνει γὰρ σύμμετρον καὶ καθαρὸν τὸ πνεῦμα ἐκ τοῦ ἠέρος ἐληλυθέναι. εἰ δὲ τούτων τἀναντία, σφόδρα ὕεσθαι καὶ χειμῶνα καὶ ζάλην εἶναι, ὕδατί τε μὴ καθαρῷ, νοῦσον σημαίνει ἀπὸ τοῦ πνεύματος τοῦ ἐπακτοῦ· ἀλλὰ χρὴ καὶ τοῦτον ώσαύτως διαιτηθῆναι, σίτοισι δὲ ὀλίγοισι παντελῶς τοῦτον. περὶ μὲν οῦν τῶν οὐρανίων σημείων οὕτω γινώσκοντα χρὴ προμηθεῖσθαι καὶ ἐκδιαιτῆσθαι καὶ τοῖσι θεοῖσιν εὕχεσθαι, ἐπὶ μὲν τοῖσι ἀγαθοῖσι Ἡλίῳ, Διὶ 130 οὐρανίω, Διὶ κτησίω, ᾿Αθηνῷ κτησίη, Ἑρμῆ,

 $^{^2}$ I have followed M in this passage. θ has been "bowdlerized" by some Christian enthusiast, who has

REGIMEN, IV. LXXXIX.-XC.

downpour nor a terrible storm, it is a good sign; for it indicates that the breath has come from the air in just measure and pure. If the reverse occur, violent rain, storm and tempest, and the water be foul, it indicates disease from the breath that comes from without. In this case also the same regimen must be employed, and diet must be very strictly limited. So with this knowledge about the heavenly bodies, precautions must be taken, with change of regimen and prayers to the gods; in the case of good signs, to the Sun, to Heavenly Zeus, to Zeus, Protector of Home, to Athena, Protectress of Home, to Hermes and to Apollo; in the case of adverse signs, to the Averters of evil, to Earth and to the Heroes, that all dangers may be averted.

XC. The following too are signs that foretell health. To see and hear clearly the things on the earth, to walk surely, to run surely, quickly and without fear, to see the earth level and well tilled, trees that are luxuriant, covered with fruit and cultivated, rivers flowing naturally, with water that is pure, and neither higher nor lower than it should be, and springs and wells that are similar. All these indicate health for the dreamer, and that the body with all its circuits, diet and secretions are proper and normal But if anything be seen that is the reverse of these things, it indicates some harm in the body. If sight or hearing be impaired, it indicates disease in the region of the head. In addition to the preceding regimen the dreamer

erased the $-\sigma \iota \nu$ of $\theta \epsilon o \hat{\iota} \sigma \iota \nu$, and also about a line and a quarter $(i,\lambda \iota \varphi$. . ' $A\pi \delta \lambda \lambda \omega \nu \iota$ ') to avoid the heathen deities

⁸ $\delta \xi b$ omitted by M, which has $\tau \epsilon$ after $\tau a s$.
⁴ $\tau a \chi b$ omitted by M.

should take longer walks in the early morning and If it be the legs that are injured, the revulsion should be made with emetics, and in addition to the preceding regimen there should be more wrestling. For the earth to be rough indicates that the flesh is impure. So the walks after exercises must be made longer. trees signify corruption of the human seed. Now if the trees are shedding their leaves, the harm is caused by moist, cold influences; if leaves abound without any fruit, by hot, dry influences. In the former case regimen must be directed towards warming and drying; in the latter towards cooling and moistening. When rivers are abnormal they indicate a circulation of the blood; high water excess of blood, low water defect of blood. men should be made to increase the latter and lessen the former. Impure streams indicate disturbance of the bowels. The impurities are removed by running on the round track and by walks, which stir them up by accelerated respiration. and cisterns indicate some trouble of the bladder; it should be thoroughly purged by diaretics. A troubled sea indicates disease of the belly, it should be thoroughly purged by light, soit aperients. ling of the earth or of a house indicates illness when the dreamer is in health, and a change from disease to health when he is sick. So it is beneficial to change the regimen of a healthy dreamer. Let him first take an emetic, that he may resume nourish-

ment again little by little, for it is the present nourishment that is troubling all the body. A sick dreamer benefits by continuing the same regimen, for the body is already changing from its present condition To see the earth flooded by water or sea signifies a disease, as there is much moisture in the body. What is necessary is to take emetics, to avoid luncheon, to exercise and to adopt a dry diet Then there should be a gradual increase of food, little by little, and little to begin with. It is not good either to see the earth black or scorched, but there is a danger of catching a violent, or even a fatal disease, for it indicates excess of dryness in the flesh. What is necessary is to give up exercises and such food as is dry and acrid and diuretic. Regimen should consist of barley-water well boiled, light and scanty meals, copious white wine well diluted, and numerous baths. No bath should be taken on an empty stomach, the bed should be soft and test abundant. Chill and the sun should be avoided. Pray to Earth, Hermes and the Heroes. If the dreamer thinks that he is diving in a lake, in the sea, or in a liver, it is not a good sign, for it indicates excess of moisture. case also benefit comes from a drying regimen and increased exercises. But for a fever patient these dreams are a good sign, for the heat is being suppressed by the moisture.

REGIMEN, IV. xci.-xciii.

person that is normal, and for which the physique is neither too large nor too small, is a good sign for the health. To be wearing white clothes, and the most beautiful shoes, is also a good sign. But anything too large or too small for the limbs is not good. What is necessary is in the latter case to increase by regimen, in the former to diminish. Black objects indicate a worse and more dangerous disease; what is necessary is to soften and to

moisten. New objects indicate a change.

XCII. To see the dead clean 2 and in white cloaks is a good sign, and to receive something clean from them indicates both health of body and the healthiness of the things that enter it. For from the dead come nourishment, growth and seed, and for these to enter the body clean 2 indicates health. But if, on the contrary, one should see them naked, or clothed in black, or not clean, or taking something, or bringing something out of the house, the sign is unfavourable, as it indicates disease, the things entering the body being harmful. What is necessary is to purge them away by runs on the round track and by walks, and after an emetic gradually to increase a soft and light diet

XCIII. Monstrous bodies that are seen in sleep and frighten a man indicate a surfeit of unaccustomed food, a secretion, a bilious flux and a dangerous disease. What is necessary is an emetic, followed

idiomatic, though the sense is not materially altered: "neither too large nor too small for the physique."

² The word καθαρός is difficult, and to render it consistently by one English word is impossible Littré uses "pur" in both these cases; Ermerins has "nitidus" and "purus." 'Neat" or "tidy" seems to be the meaning in the first case, "pure" in the other.

πέντε σίτοισιν ώς κουφοτάτοισι, μη πολλοίσι μηδέ δριμέσι, μήτε τοίσι ξηροίσι μήτε τοίσι θερμοίσι, καὶ τῶν πόνων τοῖσι κατὰ φύσιν μάλιστα, πλὴν των ἀπὸ δείπνου περιπάτων γρησθαι δὲ καὶ 10 θερμολουσίη καὶ ραθυμίησιν ήλιον δὲ καὶ ψύχος φυλασσέσθω. δκόταν 1 δε εν τω υπνω εσθίειν δοκή ή πίνειν των συνήθων ποτών ή σιτίων,2 ένδειαν σημαίνει τροφής καὶ ψυγής άθυμίην † 3 κρέα δὲ τὰ μὲν ἰσχυρότατα, μεγίστης ὑπερβολής, τὰ δὲ ἀσθενέστερα ἦσσον ὥσπερ γὰρ ἐσθιόμενον άγαθόν, ούτω καὶ όρεόμενον άφαιρείν οθν των σιτίων συμφέρει τροφής γάρ ύπερβολήν σημαίνει: † 4 καὶ ἄρτοι τυρῷ καὶ μέλιτι πεποιημένοι ώσαύτως σημαίνουσιν. ύδωρ πινόμενον 20 καθαρὸν οὐ βλάπτει τὰ δὲ άλλα πάντα βλάπτει. όκόσα δὲ δοκεῖ ἄνθρωπος θεωρεῖν τῶν συνήθων, ψυχής ἐπιθυμίην σημαίνει. ὅσα δὲ φεύγει πεφοβημένος, ἐπίστασιν τοῦ αίματος σημαίνει ύπὸ ξηρασίης συμφέρει δὲ ψῦξαι καὶ ύγρηναι τὸ σῶμα. ὅσα δὲ μάχεται ἡ κεντείται η συνδείται ὑπ' ἄλλου, ἀπόκρισιν σημαίνει ύπεναντίην τἢ περιόδφ γεγονέναι ἐν τῷ σώματι. έμειν συμφέρει καὶ ἰσχναίνειν καὶ περιπατείν σίτοισι κούφοισι χρησθαι, καὶ προσάγειν ἐκ τοῦ

Littré would rewrite the passage between daggers. For μεγίστης ὑπερβολης he reads ἐνδείας ὑπερβολην; he adds οὐ before συμφέρει and ἐνδείας before ὑπερβολὴν.

REGIMEN, IV. xcIII.

by a gradual increase, for five days, of the lightest food possible, neither abundant nor acrid, neither dry nor hot, with such exercises as are most natural, excepting walks after dinner. The dreamer should take hot baths and rest, and avoid the sun and cold. Whenever in his sleep a man thinks he is eating or drinking his usual food or drink, it indicates a want of nourishment and depression of the soul. †Meats if they be very strong show a very great excess; if they be weaker, a less excess. For just as eating is good, so eating in a dream is a good sign. So it is beneficial to reduce the quantity of food, for an excess of nourishment is indicated. † 1 The meaning is the same when bread is eaten, prepared with cheese and honey. To drink clean water in dreams is no sign of harm, but it is to drink any other kind. Whenever a man thinks that he beholds familiar objects, it indicates a desire of the soul. Whenever he runs away in fear, it indicates that the blood is arrested by dryness. It is in this case beneficial to cool and moisten the body. Fighting, or to be pierced or bound by another, indicates that there has occurred in the body a secretion opposed to the circuit. It is beneficial to take an emetic, to reduce the flesh, to walk, to eat light foods, and after the

¹ It is easy to see that the passage within daggers, which is a translation of θ , cannot represent the original. But the bold emendations of Littré, although they yield a possible sense, are most unlikely to be correct. I cannot solve the difficulties satisfactorily, but a great many are removed by transposing the sentence $\kappa \rho \epsilon a$. . $\tilde{\eta} \sigma \sigma \nu \nu$ to after $\delta \rho \epsilon \delta \mu e \nu \sigma \nu \nu$. We then get the following sequence of ideas "To eat in dreams one's usual food is a good sign; but to dream one is eating strong meat indicates excess, and diet should be reduced."

- 30 ἐμέτου πρὸς ἡμέρας τέσσαρας. καὶ πλάνοι καὶ ἀναβάσιες χαλεπαὶ ταὐτὰ σημαίνουσιν. ποταμῶν διαβάσιες καὶ ὁπλῖται πολέμιοι καὶ ετέρατα ἀλλόμορφα νοῦσον σημαίνει ἡ μανίην. συμφέρει σίτοισιν ὀλίγοισι κούφοισι μαλακοῖσι χρῆσθαι καὶ ἐμέτοισι, προσάγειν ἡσυχῆ ἐς ἡμέρας πέντε, καὶ πόνοισι τοῖσι κατὰ φύσιν πολλοῖσι πλὴν ἀπὸ τοῦ δείπνου, θερμολουσίην, ράθυμίην, ψῦχος, ἤλιον φυλάσσεσθαι. τούτοισι χρώμενος ὡς γέγραπται, ὑγιανεῖ τὸν βίον, καὶ εὕρηταί μοι δίαιτα ὡς δυνατὸν εὑρεῖν ἄνθρωπον ἐόντα σὺν 41 τοῖσι θεοῖσιν.

REGIMEN, IV. ACIII.

emetic to increase food gradually for four days. Wanderings and difficult ascents have the same meaning. Crossing rivers, enemy men-at-aims and strange monsters indicate disease or raving. It is beneficial to take small meals of light, soft food, and emetics, and gently to increase food for five days, with plenty of natural exercise except after dinner; but hot baths, rest, cold and sun are to be avoided. Using these means in the way I have described a man will live a healthy life: in fact I have discovered regimen, with the gods' help, as far as it is possible for mere man to discover it.

HERACLEITUS

ON THE UNIVERSE

WITH AN ENGLISH TRANSLATION BY
W. H. S. JONES

Greek philosophy began in wonder at the repeated miracle of motion and change, and first manifested itself in an effort to discover the material $(\phi \dot{v} \sigma \iota s)$ out of which the universe is made, phenomena being regarded as the transient modifications of this permanent reality. It differed from earlier thought in that it discarded the myth, or fairy story, as an explanation, and substituted rational causation; it differed from later science in that it proceeded from an unproved postulate, upon which it built deductively, attaching little importance to observation of phenomena, and still less to experiment.

In considering the history of early philosophy we must remember that the age of mythology did not pass away suddenly and completely. Mythological figures, indeed, disappear, but the artistic spirit of the romancer, which demands a complete picture, led the Greek philosopher to indulge his imagination in supplying details for which he had no warrant from experience and observation. Another fact to be borne in mind is that the conception of im-

1 Called later on ὑπόθεσις.

Beracleitus seems freer from this fault than many other

early philosophers.

² Deductive science preceded inductive, probably because of the influence of mathematics, the first science to reach a high state of development.

material existence was as yet unformed; soul and mind were looked upon as matter. The sciences, too, of logic and grammar were still to be born, and consequently men were often deceived by false

analogies and verbal fallacies.

The first impulse to philosophic thought came, not unnaturally, from a contemplation of the earth and sky; cosmologies succeeded cosmogonies. Thales of Miletus (florust 585 B.C.) looked upon the world as water modifying itself; Anaximander 2 (560 B.C.) as "the Boundless" modifying itself in two opposite directions; Anaximenes 3 (546 B.C.) as air modifying itself in two directions by thickening and thinning. In Western Greece the Pythagorean brotherhood, founded in the latter part of the sixth century, began under the influence of mathematical studies to lay stress upon the dualities apparent in the world.

The Ionian school of material monists had their

¹ Observation of the sky was more common in days when there were no almanaes, no clocks, and no compass

² Also of Miletus. His "Boundless" (τὸ ἄπειρον) may

have been a kind of mist or cloud.

³ Also of Miletus. Pre-Socratic philosophy bears many traces of its Eastern birth, notably the religious tinge in its phraseology.

4 In other words, Anaximenes took a quantitative view of

change.

⁵ The Pythagoreans apparently began with the pair even)(odd. See Aristotle, *Metaphysics*, A 986a Other (perhaps later) members of the brotherhood increased the number of pairs.—

limit)(unlimited, odd)(even, one)(multitude, right)(left, male)(female, rest)(motion, straight)(bent, light)(darkness, good)(bad, square)(oblong.

last representative in Heracleitus of Ephesus. He is said to have flourished in the sixty-ninth Olympiad (504-500 BC.). We know practically nothing about his life, and the title of his writings, which have come down to us only in fragments, has not been preserved.

Heracleitus was called "the dark" by the ancients, who had all his work before them; to the moderns, who possess only isolated sentences, he is darker still. It is both confusing and depressing to read the treatises of Lassalle, Teichmuller and Pfleiderer, and to see how the most opposite and inconsistent conclusions can be drawn by learned and intelligent men from exactly the same evidence. But in spite of all this diversity of opinion there is gradually shaping itself a more stable view of the doctrine of Heracleitus in its main outlines, although the details are still obscure, and may, in fact, in some cases never be elucidated.

It seems reasonable to suppose, when we consider the period in which he lived, that the phenomenon of change was the primary interest of his researches. His contribution to the problem was to point out that change is constant and perpetual. For no two seconds together is a thing ever the same. There is no pause in change, it is as much a continuum as is time. All things are for ever passing into something else.

In this eternal flux the only really constant thing is the principle of change itself, yet in some way or other fire, according to Heracleitus, has an individuality of its own which gives it precedence over all other things. The world "was ever, is now, and ever shall be an ever-living Fire, in measures being

kindled and in measures going out." Nothing could be plainer than this declaration of the eternal nature of fire, and nothing could be more logically inconsistent with the doctrine of perpetual flux. Hence several scholars have held that the fire of Heracleitus is not the fire which burns and crackles, but warm vital force or something even more abstract still. Such a conception seems alien from the thought of the period, and the most recent research regards the Heracleitean fire as the ordinary fire of the every-day It is perhaps rash to hazard a guess when so many scholars have been baffled, but it may be that Heracleitus consciously or unconsciously identified fire and change. If so, there is less inconsistency in regarding fire as an eternal reality, though it is bad interpretation to twist facts in order to make a Greek philosopher self-consistent; we are not warranted in assuming that all early philosophy Perhaps the fragments of Herawas consistent cleitus do not support my guess, but the Heracleitean treatise Regimen I expressly states that the δύναμις of fire is to cause motion. In any case, symbolically or actually, fire is a good example of physical transformation. Fuel is supplied from below, the flames quickly alter its nature, and finally it rises as smoke and fumes. The most obvious and the most rapid changes with which we are familiar are all connected with fire; it destroys, it cleanses and it renews. The sun seems to be a great mass of the very best fire, and it is the sun that transforms, by its alternate advance and retreat, the face of the earth from

¹ Regimen I, ch. 111 In this treatise δύναμις often means essence, and the sentence referred to virtually identifies change and fire.

season to season and from day to day. The world is an ever-living fire; it is always becoming all things,

and all things are always returning into it.

There is thus a twofold way in nature, to fire and from fire, and this leads us to the most fundamental thought of Heracleitus, the "attunement" harmonious unity resulting from the strife opposites.1 There is a "road up" to fire and a "road down" from fire, and these two roads are "one and the same" If they are one and the same, there must be a perpetual strain resulting from two, as it were, opposite forces. The way up fights with the way down. It is like the tension in a bowstring or in the cord of a harp. The flight of the arrow, the note of the string, are due solely to opposite tension (παλίντονος άρμονίη) This conception of universal strife dominated the theory of Heracleitus to such an extent that it is sometimes pushed to illogical extremes 2 Each opposite is tending to turn into its opposite, and so in a sense each is the same as the other "God is day and night, winter and summer, war and peace, surfeit and hunger." What Heracleitus really meant, and should have said, is that day and night, with all other opposites, are two sides of the same process, inseparably conjoined like concavity and convexity. Neither is possible without the other Any ex-

Estrictly speaking, the two opposites should produce a third thing, as male and female produce the offspring, but there is no third thing produced by (say) night and day.

¹ See in particular Philo, Ret. Dir. Her 43 ° ἐν γὰρ τὸ ἐξ ἀμφοῖν τῶν ἐναντίων, οδ τμηθέντος γνώριμα τὰ ἐναντία. οὐ γὰρ τοῦτ' ἔστιν ὅ φασιν "Ελληνες τὸν μέγαν καὶ ἀοίδιμον παρ' αὐτοῖς 'Ἡράκλειτον κεφάλαιον τῆς αὐτοῦ προστησάμενον φιλοσοφίας αὐχεῖν ὡς ἐφ' εὐρέσει καινῆ;

planation of one will be the explanation of the other. It is "the common" that we should seek to know, that which manifests itself now as one thing and now as its opposite.

We are told by Diogenes Laertius that the book of Heracleitus was divided into three parts, one dealing with the universe, one with politics and one with theology. Bywater has attempted with fair success to arrange the fragments under these three heads, his sections being Nos. 1-90, 91-97, 98-130.

We have only a few fragments dealing with ethics and politics, and it is difficult to extract from them a definite ethical standpoint, but this was certainly dependent on the physical theory. Heracleitus lays great stress on "the common." By this he meant, in the case of the State, the law, but it is harder to conjecture what meaning he attached to it in the case of the individual. The most attractive explanation hitherto given is that of Patrick 2 holds that Heracleitus pleaded for unity with nature through obedience to the law of "the common." Communion with the fields and trees could teach men more than discussing virtue and justice. Heracleitus stood for the instinctive, the unconscious, the "The philosophy and ethics of Heracleitus, as we have seen, stood in vital opposition to "8 over self-consciousness, too much inwardness and painful self-inspection, absence of trust in our instincts and of the healthful study of nature. We may be sure,

¹ Diogenes Laertius, IX 5.

⁸ *Õp cit.* p 77.

² The Fragments of the Work of Heraclitus of Ephesus on Nature, by G. T. W. Patrick, Baltimore, 1889. See especially pp. 73-83.

too, that Heracleitus warned his readers not to expect too much. Perfect bliss is unattainable, for satisfaction is impossible without want, health implies disease, and rest implies painful effort.

The religious teaching of Heracleitus appears to have been directed against customs and ritual rather than against the immoral legends of Homer and He attacks idolatry, mystery-mongers and Hesiod purification through blood There is thus no evidence that he was a prophet of Orphism and the mysteries connected with that way of belief. God must have been the "ever-living Fire," but he appears to have believed that heroic men, who died through excess of fire (i.e. in battle or other brave struggle), and not through excess of water (i.e. through sottish habits or decay), became the guardians of the hving and of the dead. So gods "They live each and men are in a sense one. others' life and die each others' death."

Patrick lays stress, and rightly, upon the stern, prophetic character of many of the fragments Heracleitus is like a Hebrew seer. He despised all his contemporaries, both the common people and their would-be teachers. Hesiod, Pythagoras, Xenophanes and Hecataeus, all are attacked and condemned. As for the vulgar many, they are spoken of with contempt for their blindness, stupidity and grossness. "Thus the content of Heracleitus' message to his countrymen was ethical. It was a call to men everywhere to wake up, to purify their $\beta a \rho \beta \acute{a} \rho o v \psi v \acute{a} v \acute{a}$, and to see things in their reality." It was to this message, in all probability, that he

¹ Op cit., p 59.

refers in the word $\lambda \delta \gamma os$. Many commentators think that $\lambda \delta \gamma os$ means "reason" or "law." This was certainly the meaning attached to the word in the ethical system of the Stoics, but although this school borrowed largely from Heracleitus, they developed and indeed transformed his thought, adapting it to the more advanced conceptions of their own day. We are, in fact, tempted to look at Heracleitus through Stoic eyes, and so it is necessary to guard against this danger whenever we are dealing with an ancient statement about Heracleitus that comes from or through a Stoic source.

Our evidence for the doctrines of Heracleitus falls into two classes. We have first the fragments quoted by later writers, with their comments thereon. Then we have the so-called doxographies, or summaries of the views of philosophers. Several of these exist, but they are all derived, directly or indirectly, from a lost work of Theophrastus called $\Phi v \sigma \iota \kappa a i$ of $\delta t i$. In the case of Heracleitus our chief doxographical evidence is contained in the ninth book of the scrappy series of lives of philosophers that goes by the name of Diogenes Laertius. The compiler, whoever he was, probably lived in the third century AD.

I have followed Bywater in numbering the fragments, though occasionally I do not adopt his readings. Sincere thanks are due to the Delegates of the Oxford University Press for allowing me to use Bywater's numbering and references.

Heraclitus, son of Bloson or, according to some, of Heracon, was a native of Ephesus. He flourished in the 69th Olympiad.² He was lofty-minded beyond all other men,³ and over-weening, as is clear from his book in which he says: "Much learning does not teach understanding; else would it have taught Hesiod and Pythagoras, or, again, Xenophanes and Hecataeus" For "this one thing is wisdom, to understand thought, as that which guides all the world everywhere." And he used to say that "Homer deserved to be chased out of the lists and beaten with rods, and Archilochus likewise." 6

Again he would say: "There is more need to extinguish insolence than an outbreak of fire," 7 and "The people must fight for the law as for city-

² 504-500 B C

¹ Taken from R. D. Hicks' translation of Diogenes Laertius in the Loeb Classical Library. The spelling "Heraclitus" is retained "D." = Diels and "B." = Bywater.

³ The biographers used by our author laid evident stress on this characteristic of the Ephesian, for §§ 1-3 (excepting two fragments cited in § 2) dwell on this single theme. As to the criticism of Pythagoras cf. Clem. Alex Strom. 1. 129 s. f., who, dealing with chronology, says that Herachtus was later than Pythagoras, for Pythagoras is mentioned by him.

⁴ Fr. 40 D., 16 B ⁶ Fr 42 D., 119 B.

⁵ Fr 41 D., 19 B ⁷ Fr 43 D, 103 B.

walls." 1 He attacks the Ephesians, too, for banishing his friend Hermodorus: he says: "The Ephesians would do well to end their lives, every grown man of them, and leave the city to beardless boys, for that they have driven out Hermodorus, the worthiest man among them, saying, 'We will have who is worthiest among us; or if there be any such let him go elsewhere and consort with others."2 And when he was requested by them to make laws, he scorned the request because the state was already in the grip of a bad constitution. He would retire to the temple of Artemis and play at knuckle-bones with the boys: and when the Ephesians stood round him and looked on, "Why, you rascals," he said, "are you astonished? Is it not better to do this than to take part in your civil life?"

Finally, he became a hater of his kind and wandered on the mountains, and there he continued to live, making his diet of grass and herbs. However, when this gave him dropsy, he made his way back to the city and put this riddle to the physicians, whether they were competent to create a drought after heavy rain. They could make nothing of this, whereupon he buried himself in a cowshed, expecting that the noxious damp humour would be drawn out of him by the warmth of the manure. But, as even this was of no avail, he died at the age of sixty.

There is a piece of my own about him as follows 3:

Often have I wondered how it came about that Heraclitus endured to live in this miserable fashion and then to die. For a fell disease flooded his body with water, quenched the light in his eyes and brought on darkness.

¹ Fr 44 D., 100 B. ² Fr. 121 D., 114 B. ³ Anth Pal. vii. 127.

Hermippus, too, says that he asked the doctors whether anyone could by emptying the intestines draw off the moisture; and when they said it was impossible, he put himself in the sun and bade his servants plaster him over with cow-dung. Being thus stretched and prone, he died the next day and was buried in the market-place. Neanthes of Cyzicus states that, being unable to tear off the dung, he remained as he was and, being unrecognisable when so transformed, he was devoured by dogs.

He was exceptional from his boyhood; for when a youth he used to say that he knew nothing, although when he was grown up he claimed that he knew everything. He was nobody's pupil, but he declared that he "inquired of himself," and learned everything from himself. Some, however, had said that he had been a pupil of Xenophanes, as we learn from Sotion, who also tells us that Ariston in his book On Heraclitus declares that he was cured of the dropsy and died of another disease. And Hippobotus has the same story.

As to the work which passes as his, it is a continuous treatise On Nature, but is divided into three discourses, one on the universe, another on politics, and a third on theology. This book he deposited in the temple of Artemis and, according to some, he deliberately made it the more obscure in order that none but adepts should approach it, and lest familiarity should breed contempt. Of our philosopher Timon² gives a sketch in these words:³

² Fr. 43 D.

¹ Fr. 101 D., 80 B.

³ Cf. Il. 1. 247, 248.

In their midst uprose shrill, cuckoo-like, a mob-reviler, riddling Heraclitus.

Theophrastus puts it down to melancholy that some parts of his work are half-finished, while other parts make a strange medley. As a proof of his magnanimity Antisthenes in his Successions of Philosophers cites the fact that he renounced his claim to the kingship in favour of his brother. So great fame did his book win that a sect was founded and called the Heracliteans, after him,

Here is a general summary of his doctrines. All things are composed of fire, and into fire they are again resolved; further, all things come about by destiny, and existent things are brought into harmony by the clash of opposing currents; again, all things are filled with souls and divinities. He has also given an account of all the orderly happenings in the universe, and declares the sun to be no larger than it appears. Another of his sayings is: "Of soul thou shalt never find boundaries, not if thou trackest it on every path; so deep is its cause." 1 Self-concert he used to call a falling sickness (epilepsy) and eyesight a lying sense.2 Sometimes, however, his utterances are clear and distinct, so that even the dullest can easily understand and derive therefrom elevation of soul. For brevity and weightiness his exposition is incomparable.

Coming now to his particular tenets, we may state them as follows: fire is the element, all things are exchange for fire and come into being by rarefaction and condensation³; but of this he gives no clear explanation. All things come into being by conflict of opposites, and the sum of things flows like a stream. Further, all that is is limited and forms one world.

¹ Fr. 45 D , 71 B ² F. 46 D , 132 B. ³ Cf. Fr. 90 D , 22 B.

And it is alternately born from fire and again resolved into fire in fixed cycles to all eternity, and this is determined by destiny. Of the opposites that which tends to birth or creation is called war and strife, and that which tends to destruction by fire is called concord and peace. Change he called a pathway up and down, and this determines the birth of the world.

For fire by contracting turns into moisture, and this condensing turns into water; water again when congealed turns into earth. This process he calls the downward path. Then again earth is liquefied, and thus gives rise to water, and from water the rest of the series is derived. He reduces nearly everything to exhalation from the sea. This process is the upward path. Exhalations arise from earth as well as from sea; those from sea are bright and pure. those from earth dark. Fire is fed by the bright exhalations, the moist element by the others does not make clear the nature of the surrounding element. He says, however, that there are in it bowls with their concavities turned towards us. in which the bright exhalations collect and produce These are the stars. The flame of the sun is the brightest and the hottest; the other stars are further from the earth and for that reason give it less light and heat. The moon, which is nearer to the earth, traverses a region which is not pure. sun, however, moves in a clear and untroubled region, and keeps a proportionate distance from us. is why it gives us more heat and light. Eclipses of the sun and moon occur when the bowls are turned

upwards; the monthly phases of the moon are due to the bowl turning round in its place little by little. Day and night, months, seasons and years, rains and winds and other similar phenomema are accounted for by the various exhalations. Thus the bright exhalation, set aflame in the hollow orb of the sun, produces day, the opposite exhalation when it has got the mastery causes night; the increase of warmth due to the bright exhalation produces summer, whereas the preponderance of moisture due to the dark exhalation brings about winter. His explanations of other phenomena are in harmony with this. He gives no account of the nature of the earth, nor even of the bowls. These, then, were his opinions.

The story told by Ariston of Socrates, and his remarks when he came upon the book of Heraclitus, which Europides brought him, I have mentioned in my Life of Socrates.1 However, Seleucus the grammarian says that a certain Croton relates in his book called The Diver that the said work of Heraclitus was first brought into Greece by one Crates, who further said it required a Delian diver not to be drowned in it. The title given to it by some is The Muses,2 by others Concerning Nature; but Diodotus calls it 8

A helm unerring for the rule of life;

others "a guide of conduct, the keel of the whole

³ Nauck, T.G.F.², Adesp 287.

^{1 1}i. 22.

² Plato, alluding to Heraclitus, speaks of "Ionian Muses" (Soph. 242 E). He is followed by Clement of Alexandria (Strom v. 9, 682 P. al γοῦν Ἰάδες Μοῦσαι διαρρήδην λέγουσι), and possibly, as M. Ernout thinks, by Lucretius, i. 657, where "Musae" is the Ms. reading. But of. Lachmann, ad loc.

world, for one and all alike." We are told that, when asked why he kept silence, he replied, "Why, to let you chatter." Darius, too, was eager to make his acquaintance, and wrote to him as follows 1:

"King Darius, son of Hystaspes, to Heraclitus the

wise man of Ephesus, greeting.

"You are the author of a treatise On Nature which is hard to understand and hard to interpret. In certain parts, if it be interpreted word for word, it seems to contain a power of speculation on the whole universe and all that goes on within it, which depends upon motion most divine; but for the most part judgement is suspended, so that even those who are the most conversant with literature are at a loss to know what is the right interpretation of your work. Accordingly King Darius, son of Hystaspes, wishes to enjoy your instruction and Greek culture Come then with all speed to see me at my palace For the Greeks as a rule are not prone to mark their wise men; nay, they neglect their excellent precepts which make for good hearing and learning. my court there is secured for you every privilege and daily conversation of a good and worthy kind, and a life in keeping with your counsels"

"Herachtus of Ephesus to King Darius, son of

Hystaspes, greeting.

"All men upon earth hold aloof from truth and justice, while, by reason of wicked folly, they devote themselves to avarice and thirst for popularity. But

The request of Darius is mentioned by Clem Alex. Strom. 1. 65 οδτος βασιλέα Δαρεῖον παρακαλοῦντα ἤκειν εἰς Πέρσας ὑπερεῖδεν The story is not made more plausible by the two forged letters to which it must have given rise.

I, being forgetful of all wickedness, shunning the general satiety which is closely joined with envy, and because I have a horror of splendour, could not come to Persia, being content with little, when that little is to my mind."

So independent was he even when dealing with

a king.

Demetrius, in his book on Men of the Same Name, says that he despised even the Athenians, although held by them in the highest estimation; and, notwithstanding that the Ephesians thought little of him, he preferred his own home the more. Demetrius of Phalerum, too, mentions him in his Defence of Socrates 1; and the commentators on his work are very numerous, including as they do Antisthenes and Herachides of Pontus, Cleanthes and Sphaerus the Stoic, and again Pausanius who was called the imitator of Heraclitus, Nicomedes, Dionysius, and among the grammarians, Diodotus. The latter affirms that it is not a treatise upon nature, but upon government, the physical part serving merely for illustration 2

Hieronymus tells us that Scythinus, the satirical poet, undertook to put the discourse of Heraelitus into verse. He is the subject of many epigrams, and amongst them of this one ³

Heraclitus am I. Why do ye drag me up and down, ye illiterate? It was not for you I toiled, but for such as

¹ This work is again quoted in ix. 37 and ix 57, and is perhaps the source of the first sentence of § 52 also

² Apparently D L is using through another of his sources, the very same citation from Diodotus which he has given verbatim in § 12.

3 Anth Pal. vii. 128.

understand me. One man in my sight is a match for thirty thousand, but the countless hosts do not make a single one. This I proclaim, yea in the halls of Persephone.

Another runs as follows 1:

Do not be in too great a hurry to get to the end of Heraclitus the Ephesian's book: the path is hard to travel. Gloom is there and darkness devoid of light But if an initiate be your guide the path shines brighter than sunlight

Five men have borne the name of Heraclitus: (1) our philosopher; (2) a lyric poet, who wrote a hymn of praise to the twelve gods; (3) an elegiac poet of Halicarnassus, on whom Callimachus wrote the following epitaph².

They told me, Heraclitus, they told me you were dead, They brought me bitter news to hear and bitter tears to shed. I wept as I remembered how often you and I Had tired the sun with talking and sent him down the sky.

And now that thou art lying, my dear old Carian guest, A handful of grey ashes, long, long ago at rest, Still are thy pleasant voices, thy nightingales, awake, For Death, he taketh all away, but them he cannot take,³

(4) a Lesbian who wrote a history of Macedonia;
(5) a jester who adopted this profession after having been a musician.

¹ Anth. Pal. ix 540. ² Anth Pal. vii 80. ³ From Cory's lonica, p 7. In bare prose. "One told me of thy death, Herachitus, and moved me to tears, when I remembered how often we two watched the sun go down upon our talk. But though thou, I ween, my Halicarnassian friend, art dust long, long ago, yet do thy 'Nightingales' live on, and Death, that insatiate ravisher, shall lay no hand on them." Perhaps "Nightingales" was the title of a work. Laertius deserves our gratitude for inserting this little poem, especially on so slight a pretext.

ΗΡΑΚΛΕΙΤΟΥ ΕΦΕΣΙΟΥ

ΠΕΡΙ ΤΟΥ ΠΑΝΤΟΣ.

The order of the fragments is that of Bywater.

Ι. Οὐκ ἐμεῦ ἀλλὰ τοῦ λόγου ἀκούσαντας

2 όμολογέειν σοφόν έστι, εν πάντα είναι.

ΙΙ Τοῦ δὲ λόγου τοῦδ' ἐόντος αἰεὶ ἄξύνετοι γίνονται ἄνθρωποι καὶ πρόσθεν ἡ ἀκοῦσαι καὶ ἀκοῦσαντες τὸ πρῶτον. γινομένων γὰρ πάντων κατὰ τὸν λόγον τόνδε ἀπείροισι ἐοίκασι πειρώμενοι καὶ ἐπέων καὶ ἔργων τοιουτέων ὁκοίων ἐγὰ διηγεῦμαι, διαιρέων ἔκαστον κατὰ φύσιν καὶ φράζων ὅκως ἔχει. τοὺς δὲ ἄλλους ἀνθρώπους λανθάνει ὁκόσα ἐγερθέντες ποιέουσι, ὅκωσπερ 9 ὁκόσα εὕδοντες ἐπιλανθάνονται.

I. Hippolytus Ref. Haer. ix. 9: Ἡράκλειτος μὲν οὖν ⟨ἔν⟩ φησιν εἶναι τὸ πῶν, διαιρετὸν ἀδιαίρετον, γενητὸν ἀγένητον, θνητὸν ἀδιάνατον, λόγον αίῶνα, πατέρα υἰόν, θεὸν δίκαιον. Οὐκ ἐμοῦ ἀλλὰ τοῦ δόγματος ἀκούσαντας ὁμολογεῖν σοφόν ἐστιν, ἐν πάντα εἰδέναι, ὁ Ἡράκλειτός φησι καὶ ὅτι τοῦτο οὐκ Ἱσασι πάντες οὐδὲ ὁμολογοῦσιν, ἐπιμέμφεται ὧδέ πως Οὐ ξυνίασιν ὅκως διαφερόμενον ἐωντῷ ὁμολογέει παλίντροπος ἀρμονίη ὅκωσπερ τόξον καὶ λύσης

λόγου is a conjecture of Bernays, εἶναι a conjecture of Miller Bergk would reconstruct thus: δίκαιον οὐκ ἐμοῦ ἀλλὰ τοῦ δόγωτος ἀκούσαντας διρλογέειν ὅτι ἔν τὸ σοφόν ἐστιν, ἔν πάντα εἰδέναι The conjectures in the text do not arouse any strong confidence, though δόγματος might well be a gloss on λόγου But if εἶναι be correct, why should it have been corrupted to εἰδέναι Γ am on the whole inclined to think that Beigk's restoration is nearer to the actual words of Heiacleitus

HERACLEITUS

ON THE UNIVERSE

I. It is wise to listen, not to me but to the Word, and to confess that all things are one.

For λόγος see Henze, Lehre rom Logos, 1873; Zeller, 1 630; Aall, Gesch d. Logosidee 1806. "All things are one" because they are all resolved into fire and come from fire.

II. This Word, which is ever true, men prove as incapable of understanding when they hear it for the first time as before they have heard it at all. For although all things happen in accordance with this Word, men seem as though they had no experience thereof, when they make experiment with such words and works as I relate, dividing each thing according to its nature and setting forth how it really is. The rest of men know not what they do when awake, just as they forget what they do when asleep.

Aristotle was in doubt whether aid should be taken with δόντος or with άξύνεται γίνονται. See Rhetoric, III 5, 1407, b l4. δόντος means "true" in Ionic with words like λόγος. See Burnet, E. G. Ph note on Fragment II. I have tried in my translation to bring out the play on words in ἀπείροισι δοίκασι πειρώμενοι

H Hipp. Ref. Haer ix. 9; Aristotle Rhetoric in. 5; Sextus Empiricus adversus Mathematicos vii. 132, Clement of Alex. Strom. v. 14, p 716; Eusebius Praep. Er. xiii. 13, p. 680. The MSS (except those of Sextus) read τοῦ δεόντος

ON THE UNIVERSE

III. The stupid when they have heard are like the deaf; of them does the proverb bear witness that when present they are absent.

IV. Bad witnesses are eyes and ears to men, if they have souls that understand not their language.

This passage is not a general attack on the senses; it merely lays stress on the need of an intelligent soul to interpret the sense-impressions. The clever emendation of Bernays would mean: "when mud holds the soul," *i.e. when the soul is most, and therefore (on Heracleitean principles) dull and stupid.

V. Many do not interpret aright such things as they encounter, nor do they have knowledge of them when they have learned, though they seem to themselves so to do.

H. seems to be referring to (a) the correct apprehension of phenomena and (b) the difference between unintelligent learning and understanding

VI Knowing neither how to listen nor how to speak.

VII. If you do not expect it, you will not find out the unexpected, as it is hard to be sought out and difficult.

Heracleitus is laying stress upon the importance of the constructive imagination in scientific enquiry—what the early Christians might have called "faith"

VIII. Gold-seekers dig much earth to find a little gold.

IX. Critical discussion.

X. Nature is wont to hide herself.

φύσιs is not necessarily an abstraction here, but merely the truth about the Universe. It is easy, however, to see why the Stoics could maintain that their pantheism was founded on Heracleitus. See Fragments XIX, XCI, XCII.

XI. The Lord whose is the oracle in Delphi neither declares nor hides, but sets forth by signs.

ΠΕΡΙ ΤΟΥ ΠΑΝΤΟΣ

ΧΙΙ. Σίβυλλα δὲ μαινομένω στόματι ἀγέλαστα καὶ ἀκαλλώπιστα καὶ ἀμύριστα φθεγγομένη χιλίων ἐτέων ἐξικνέεται τῆ φωνῆ διὰ 4 τὸν θεόν.

ON THE UNIVERSE

XII. The Sibyl with raving mouth utters things mirthless, unadorned and unperfumed, but with her voice she extends over a thousand years because of the God.

In this and the preceding H. seems to be calling attention to his oracular style, which was in part due to the strong religious emotion of his age
In Aeschylus and Pindar.

XIII. The things that can be seen, heard and learnt, these I honour especially.

This and the following two fragments emphasise the importance of personal research, as contrasted with learning from authority Bywater's punctuation would make the meaning to be "Am I to value highly those things that are learnt by sight or hearing "—an attack upon the accuracy and value of the senses But H. does not distrust the senses, but only sense impressions interpreted in a stupid way.

XIV. Particularly at the present time, when all places can be reached by water or by land, it would not be right to use as evidence for the unknown the works of poets and mythologists, as in most things our predecessors did, proving themselves, as Heracleitus has it, unreliable supporters of disputed points.

XV. Eyes are more accurate witnesses than ears.

First-hand information is better than hearsay

XVI. Much learning does not teach understanding, or it would have taught Hesiod and Pythagoras, as well as Xenophanes and Hecataeus.

As is plain from the following fragment, this is an attack on confusing second hand information with true understanding and education. It is unfair to the mathematical achievements of Pythagoras and scarcely does justice to the theological acumen of Xenophanes, to say nothing of his wonderful

ΠΕΡΙ ΤΟΥ ΠΑΝΤΟΣ

XVII. Πυθαγόρης Μνησάρχου ἱστορίην ἤσκησε ἀνθρώπων μάλιστα πάντων. καὶ ἐκλεξάμενος ταύτας τὰς συγγραφὰς ἐποιήσατο ἑωυτοῦ 4 σοφίην, πολυμαθίην, κακοτεχνίην.

XVIII. 'Οκόσων λόγους ήκουσα οὐδεὶς ἀφικνέεται ἐς τοῦτο, ὥστε γινώσκειν ὅτι σοφόν ἐστι 3 πάντων κεχωρισμένον.

XIX. "Εν τὸ σοφόν, ἐπίστασθαι γνώμην ἢ 2 κυβερνᾶται πάντα διὰ πάντων.

ΧΧ. Κόσμον τόνδε τὸν αὐτὸν ἀπάντων οὔτε τις θεῶν οὔτε ἀνθρώπων ἐποίησε, ἀλλ' ἢν αἰεὶ καὶ ἔστι καὶ ἔσται πῦρ ἀείζωον, ἁπτόμενον μέτρα 4 καὶ ἀποσβεννύμενον μέτρα.

XXI. Πυρὸς τροπαὶ πρῶτον θάλασσα· θαλάσσης δὲ τὸ μὲν ἥμισυ γῆ, τὸ δὲ ἥμισυ 3 πρηστήρ.

XVII. Diogenes Laertius viii. 6 One MS, has ἐποίησεν and one ἐποίησατο. Bywatei reads ἐποίησε and Burnet ἐποίησατο

XVIII Stobaeus Flor. 111 81. XIX. Diogenes Laertius 1x 1

XX Clem Alex. Strom. v 14, p 711; cf Simplicius in Aristotle de Oaclo, p 132; Plutarch de Anim. Procreatione 5, p. 1014

ON THE UNIVERSE

anticipation of the modern doctrine of scientific progress. See Fragment XVI. (In Stob. Flor. 29, 41):

οὔ τοι ἀπ' ἀρχῆς πάντα θεοὶ θνητοῖς παρέδειξαν, ἀλλὰ χρόνφ ζητοῦντες ἐφευρίσκουσιν ἄμεινον.

XVII. Pythagoras, son of Mnesarchus, practised research more than any other man, and choosing out these writings claimed as his own a wisdom that was only much learning, a mischievous art.

An attack on book-learning that is merely the acquisition of second hand information Diels rejects the fragment as spurious, chiefly because it makes Pythagoras a writer of books But the reading ἐποιήσατο for ἐποίησεν does away with this objection.

XVIII. Of all those whose discourses I have heard, not one attains to this, to realise that wisdom is a thing apart from all.

This has been interpreted to mean that true wisdom is attained by none, or that general opinions do not contain real wisdom

XIX. Wisdom is one thing—to know the thought whereby all things are steered through all things.

That is, to understand the doctrine of opposites and of perpetual change.

XX. This world, which is the same for all, was made neither by a god nor by man, but it ever was, and is, and shall be, ever-living Fire, in measures being kindled and in measures going out.

The use of $\kappa\delta\sigma\mu$ os to mean "world" is Pythagorean. $\mu\dot{\epsilon}\tau\rho\alpha$ refers to the approximate correspondence between the things that are becoming fire and the things that are coming out of fire. The balance of nature is not disturbed by perpetual flux.

XXI. The transformations of Fire are, first, sea; of sea half is earth and half fiery storm-cloud.

This is the famous "road up and down" (or at any rate the best illustration of it) with its three stages—earth, water,

above, Bywater retains the old order XXVI. Hipp. Ref. Haer. ix 10.

XXVII Clem. Alex. Paedag ii 10, p. 229.

XXVIII. Hipp. Ref. Haer. ix. 10.

XXIX. Plutarch de Exil 11, p 604.

ON THE UNIVERSE

fire On the earth is the sea, above the sea is the sun. Sea is half composed of earth transforming itself to water and half of fiery cloud, the latter representing water on its way to become fire This explanation of $\pi\rho\eta\sigma\tau\eta\rho$ I owe to Burnet.

XXII. All things are exchanged for Fire and Fire for all things, even as goods for gold and gold for goods

XXIII. It is melted into sea, and is measured to the same proportion as before it became earth.

The subject is $\gamma \hat{\eta}$, and the whole fragment means that along the "road up" the proportion of the "measures" remains constant. The amount of earth in the universe remains approximately the same, because the "measures" of water turning to earth equal the "measures" of earth turning to water.

XXIV. Want . . . surfeit.

Eg. the "want" of earth for water to increase it equals the "surfeit' of earth which makes some of it turn to water

XXV. Fire lives the death of air, and air lives the death of Fire; water lives the death of earth, earth that of water

XXVI. Fire when it has advanced will judge and convict all things.

For the "advances' of fire see π epl δ iairns I, Chap III Such statements as the one above led the Stoics to develop their theory of $\epsilon_k\pi\nu'\rho_k\omega\sigma_{ls}$, the destruction of all things periodically by fire, to be followed by a re-birth and restoration of all things

XXVII How can you hide from that which never sets?

XXVIII The thunderbolt steers all things.

XXIX The sun will not overstep his measures; otherwise the Erinyes, helpers of Justice, will find him out.

See the notes to XX and XXIII

ΠΕΡΙ ΤΟΥ ΠΑΝΤΟΣ

XXX. Ἡοῦς καὶ ἐσπέρης τέρματα ἡ ἄρκτος, 2 καὶ ἀντίον τῆς ἄρκτου οὖρος αἰθρίου Διός.

ΧΧΧΙ. Εἰ μὴ ήλιος ην, ἔνεκα τῶν ἄλλων

2 ἄστρων εὐφρόνη ἂν ἢν.

ΧΧΧΙΙ. Νέος ἐφ' ἡμέρη ήλιος

ΧΧΧΙΙΙ. Δοκεί δε (scil. Θαλής) κατά τινας πρώτος ἀστρολογήσαι καὶ ἡλιακὰς ἐκλείψεις καὶ τροπὰς προειπεῖν, ὡς φησιν Εὐδημος ἐν τῆ περὶ τῶν ἀστρολογουμένων ἰστορία ὅθεν αὐτὸν καὶ Εενοφάνης καὶ Ἡρόδοτος θαυμάζει μαρτυρεῖ δ'

5 αὐτῷ καὶ Ἡράκλειτος καὶ Δημόκριτος 1

ΧΧΧΙΥ. Ο ὅτως οὖν ἀναγκαίαν πρὸς τὸν οὐρανὸν ἔχων συμπλοκὴν καὶ συναρμογὴν ὁ χρόνος οὐχ άπλῶς ἐστι κίνησις ἀλλ, ὥσπερ εἴρηται, κίνησις ἐν τάξει μέτρον ἐχούση καὶ πέρατα καὶ περιόδους. ὧν ὁ ἥλιος ἐπιστάτης ὧν καὶ σκοπός, ὁρίζειν καὶ βραβεύειν καὶ ἀναδεικνύναι καὶ ἀναφαίνειν μεταβολὰς καὶ ὥρας αὶ πάντα φέρουσι, καθ Ἡράκλειτον, οὐδὲ φαύλων οὐδὲ μικρῶν, ἀλλὰ τῶν μεγίστων καὶ 10 κυριωτάτων τῷ ἡγεμόνι καὶ πρώτῷ θεῷ γίνεται συνεργός.²

XXX. Strabo 1. 6, p 3.

XXXI. Plutarch Aquae et Ignis Comp. 7, p. 957, and de Fortuna 3, p. 98 Cf. Clem. Alex Protrept 11. p. 87

Bywater does not include the words ἔνεκα . . . ἄστρων in the text, but considers them to be a part of the narrator's explanation.

XXXII. Aristotle Meteor. 11. 2, p 355, α 9. See the comments of Alex. Aphrod. and of Olympiodorus. Also

Proclus in Timaeum, p. 334 B.

¹ Diogenes Laert. i. 23.

² Plutarch Qu. Plat. viii. 4, p 1007.

ON THE UNIVERSE

XXX. The limits of the East and West are the Bear, and opposite the Bear is the boundary of bright Zeus.

The "boundary of bright Zeus" is, according to Diels, the South Pole Burnet takes it to be the horizon, and the whole passage a protest against the Pythagorean view of a southern hemisphere

XXXI. If there were no sun, there would be night, in spite of the other stars.

XXXII. The sun is new every day.

This is because of the perpetual flux. One sun is extinguished at sunset, another is kindled at sunrise.

XXXIII Thales is supposed by some to have been the first astronomer and the first to foretell the eclipses and turnings of the sun, as Eudemus declares in his account of astronomical discoveries. For this reason both Xenophanes and Herodotus pay him respectful honour, and both Heracleitus and Democritus bear witness to him.

XXXIV. So time, having a necessary connection and union with the firmament, is not motion merely, but, as I have said, motion in an older having measure, limits and periods. Of which the sun, being overseer and warder, to determine, judge, appoint and declare the changes and seasons, which, according to Heracleitus, bring all things, is a helper of the leader and first God, not in trivial or small things, but in the greatest and most important.

ΠΕΡΙ ΤΟΥ ΠΑΝΤΟΣ

ΧΧΧΥ. Διδάσκαλος δὲ πλείστων 'Ησίοδος· τοῦτον ἐπίστανται πλείστα εἰδέναι, ὅστις ἡμέρην 3 καὶ εὐφρόνην οὐκ ἐγίνωσκε· ἔστι γὰρ ἕν.

ΧΧΧVI. 'Ο θεὸς ἡμέρη εὐφρόνη, χειμῶν θέρος, πόλεμος εἰρήνη, κόρος λιμός' ἀλλοιοῦται δὲ ὅκωσπερ πῦρ, ὁκόταν συμμιγῆ θυώμασι, ὀνομάζε-4 ται καθ' ἡδονὴν ἑκάστου.

XXXVII. Εἰ πάντα τὰ ὄντα καπνὸς γένοιτο, 2 ῥίνες ἃν διαγνοίεν.

ΧΧΧΥΙΙΙ. Αί ψυχαὶ ὀσμῶνται καθ' ἄδην.

ΧΧΧΙΧ. Τὰ ψυχρὰ θέρεται, θερμὸν ψύχεται,

2 ύγρὸν αὐαίνεται, καρφαλέον νοτίζεται.

ΧL. Σκίδνησι καὶ συνάγει, πρόσεισι καὶ 2 ἄπεισι.

ΧΙΙ. Ποταμοῖσι δὶς τοῖσι αὐτοῖσι οὐκ ἂν
 ἐμβαίης· ἔτερα γὰρ <καὶ ἔτερα> ἐπιρρέει ὕδατα.

XXXV. Hipp. Ref. Haer. ix. 10.

XXXVI. Hipp. Ref Haer. ix. 10. Diels reads δκωσπερ (πῦρ):

Bywater adds θύωμα after συμμιγή, with Bernays, and Zeller adds ἀήρ in the same place

XXXVII. Aristotle de Sensu 5, p. 443, a 21.

XXXVIII. Plutarch de Fac. in Orbe Lunae 28, p 943.

XXXIX. Scholast, Tzetzes ad Exeg. in Iliada, p. 126.

XL. Plutarch de El 18, p 392

XII. Plutarch Quaest. nat 2, p. 912, de sera Num. Vind. 15, p. 559; de EI 18, p. 392 See Plato Cratylus 402 A, and Aristotle Meta. iv. 5, p. 1010 a 13.

XLII. I omit this, as being obviously a corrupt form of XLI.

ON THE UNIVERSE

XXXV. The teacher of most men is Hesiod. They think that he knew very many things, though he did not understand day and night. For they are one.

In Theogony 124 Hesiod calls day the daughter of night. According to Heracleitus day and night, two opposites, are really one, or, as we should say, two aspects of the same thing

XXXVI. God is day and night, winter and summer, war and peace, surfeit and hunger. But he undergoes transformations, just as fire, when it is mixed with spices, is named after the savour of each.

"Unity of opposites" again Burnet renders ήδονη savour," and I have followed him, though with some hesitation, especially as the reading of the second sentence is dubious. καθ' ήδονην ἐκάστου could mean: "according to individual caprice," and I am not certain that this is not the meaning here.

XXXVII. If all existing things were to become smoke, the nostrils would distinguish them.

XXXVIII Souls smell in Hades

It is difficult to see what sense can be given to this fragment except that in Hades souls are a smoky exhalation, and so come under the sense of smell Pfleiderer suggested $\delta\sigma\iota\sigma\tilde{\nu}\nu\tau\alpha\iota$, "are made holy," a thought foreign to Heracleitus.

XXXIX. Cold things become warm, warmth cools, moisture dries, the parched gets wet.

XL. It scatters and gathers, it comes and goes.

XLI. You could not step twice into the same rivers, for other waters are ever flowing on to you.

ΧΙΙΙΙ. Καὶ Ἡράκλειτος ἐπιτιμῷ τῷ ποιήσαντι ὡς ἔρις ἔκ τε θεῶν καὶ ἀνθρώπων ἀπόλοιτο οὐ γὰρ ἄν εἶναι ἄρμονίαν μὴ ὄντος ὀξέος
καὶ βαρέος, οὐδὲ τὰ ζῷα ἄνευ θήλεος καὶ ἄρρενος,
5 ἐναντίων ὄντων.¹

XLIV. Πόλεμος πάντων μέν πατήρ έστι πάντων δὲ βασιλεύς, καὶ τοὺς μὲν θεοὺς ἔδειξε τοὺς δὲ ἀνθρώπους, τοὺς μὲν δούλους ἐποίησε 4 τοὺς δὲ ἐλευθέρους.

 ΧLV. Οὐ ξυνίασι ὅκως διαφερόμενον ἐωυτῷ όμολογέει· παλίντονος ἀρμονίη ὅκωσπερ τόξου
 καὶ λύρης.

ΧΙΝΙ. Καὶ περὶ αὐτῶν τούτων ἀνώτερον ἐπιζητοῦσι καὶ φυσικώτερον Εὐριπίδης μὲν φάσκων ἐρᾶν μὲν ὅμβρου γαῖαν ξηρανθείσαν, ἐρᾶν δὲ σεμνὸν οὐρανὸν πληρούμενον ὅμβρου πεσεῖν ἐς γαῖαν καὶ Ἡράκλειτος τὸ ἀντίξουν συμφέρον, καὶ ἐκ τῶν διαφερόντων καλλίστην 7 ἀρμονίαν, καὶ πάντα κατ' ἔριν γίνεσθαι.²

XLIII. See also Simplicius in Arist. Categ. p. $104 \, \Delta$, Eustathius on Iliad xviii p 107, and the Ven. A. Scholiast.

XLIV. Hipp. Ref Haer. ix 9, Plutarch de Iside, 48,

XLV. Plato Symposium 187 A, Sophist 242 D, Plutarch de Anim. Procreations 27, p. 1026, de Iside 45, p. 369, παλύντονος γὰρ ἀρμονίη κόσμου ὅκωσπερ λύρης καὶ τόξον καθ Ἡράκλειτον Burnet thinks (rightly) that Heracleitus could not have said both παλύντροπος and παλύντονος; he prefers the latter and Diels the former. The one refers to the shape of the bow, the latter to the tension in the bow-string. Bywater reads παλύντροπος (as in Plut. de An Pr. and Hipp Ref. Haer. ix 9)

XLIII. And Heracleitus rebukes the poet who says, "would that strife might perish from among gods and men." For there could be (he said) no attunement without the opposites high and low, and no animals without the opposites male and female.

XLIV. War is the father of all and the king of all; some he has marked out to be gods and some to be men, some he has made slaves and some free.

XLV. They understand not how that which is a variance with itself agrees with itself. There sit attunement of opposite tensions, like that of the bow and of the harp.

With the reading $\pi \alpha \lambda i \nu \tau \rho \rho \pi \sigma s$ the meaning is: "a harmony from opposite shapes"

XLVI. In reference to these very things they look for deeper and more natural principles. Euripides says that "the parched earth is in love with rain," and that "high heaven, with rain fulfilled, loves to fall to earth." And Heiacleitus says that "the opposite is beneficial," and that "from things that differ comes the fairest attunement," and that "all things are born through strife"

Burnet thinks that there is a reference to the medical theory of "like is cured by unlike" in the first of these quotations from Heracleitus (τὸ ἀντίξουν συμφέρον) See also Stewart on Aristotle, Είλ Νις. 1104, b16

¹ Aristotle, Eth Eud. vii 1, p. 1235a, 26

XLVII. 'Αρμονίη ἀφανὴς φανερῆς κρείσσων. XLVIII. Μὴ εἰκῆ περὶ τῶν μεγίστων συμβα-2 λώμεθα.

ΧΕΙΧ. Χρη εὖ μάλα πολλῶν ἵστορας φιλο-

2 σόφους ἄνδρας εἶναι.

L. Γναφέων όδὸς εὐθεῖα καὶ σκολιὴ μία ἐστὶ
 2 καὶ ἡ αὐτή.

LÍ. "Ονοι σύρματ' ἃν ἕλοιντο μᾶλλον ἢ χρυσόν. LIa. Heraclitus dixit quod si felicitas esset in delectationibus corporis boves felices diceremus, 3 cum inveniant orobum ad comedendum.¹

LII. Θάλασσα ὕδωρ καθαρώτατον καὶ μιαρώτατον, ἰχθύσι μὲν πότιμον καὶ σωτήριον,

3 ἀνθρώποις δὲ ἄποτον καὶ ὀλέθριον.

LIII. Siccus etiam pulvis et cinis, ubicunque cohortem porticus vel tectum protegit, iuxta parietes reponendus est, ut sit quo aves se perfundant: nam his rebus plumam pinnasque emendant, si modo credimus Ephesio Heraclito qui ait sues coeno, 6 cohortales aves pulvere (vel cinere) lavari.²

LIV. Athenaeus v. p. 178 F. Cf Clem. Alex. Protrept. 10, p. 75.

¹ Albertus Magnus de Veget. vi. 401, p 545 Meyer.

² Columella de R R. vin 4

XLVII. The invisible attunement is superior to the visible.

This apparently means that the attunement of opposites in the natural world is a superior "harmony" to that which we hear from musical instruments. apporta means "tune" rather than "harmony."

XLVIII. Let us not make random guesses about the greatest things.

XLIX. Men who love wisdom must have know-

ledge of very many things.

This is not inconsistent with $\pi \circ \lambda \circ \mu \alpha \theta i \eta \ r \circ \delta \circ \epsilon \chi \in \nu \circ \delta \circ \delta \delta \delta \delta \sigma \kappa \in \epsilon.$ Though $\pi \circ \lambda \circ \mu \alpha \theta i \eta$ is not enough, yet the true philosopher will have it.

L. The straight and the crooked way of the cloth-carders is one and the same.

This is a reference to the motion of the fuller's comb, which both revolved and also moved in a straight line

LI. Asses would prefer straw to gold.

LIa Heraclettus said that if happiness consisted in bodily delights we should call oxen happy when they find bitter vetches to eat.

LII. Sea-water is both very pure and very foul; to fishes it is drinkable and healthful, to men it is undrinkable and deadly.

Here we have the "unity of opposites" in a slightly different form.

LIII Dry dust also and ashes must be placed near the walls wherever the porch or roof protects the chicken-run, that the birds may have a place to sprinkle themselves; for with these things they improve their plumage and wings, if only we believe Heracleitus the Ephesian, who says. "pigs wash in mud and barnyard fowls in dust (or ash)."

LIV To delight in mud.

LV. Παν έρπετον πληγη νέμεται.

LVI. Παλίντονος άρμονίη κόσμου ὅκωσπερ 2 λύρης καὶ τόξου.

LVII. 'Αγαθον καὶ κακον ταὐτόν.

LVIII. Καὶ ἀγαθὸν καὶ κακόν (scil. ἔν ἐστι)·
οἱ γοῦν ἰατροί, φησὶν ὁ Ἡράκλειτος, τέμνοντες
καίοντες πάντη βασανίζοντες κακῶς τοὺς ἀρρωστοῦντας ἐπαιτιέονται μηδέν' ἄξιον μισθὸν
λαμβάνειν παρὰ τῶν ἀρρωστοῦντων, ταῦτα ἐργα6 ζόμενοι τὰ ἀγαθὰ καὶ †τὰς νόσους†.¹

LIX. Συνάψιες οὖλα καὶ οὐχὶ οὖλα, συμφερόμενον διαφερόμενον, συνậδον διάδον ἐκ πάντων 3 ềν καὶ ἐξ ἑνὸς πάντα.

LX. Δίκης οὔνομα οὖκ ἃν ἤδεσαν, εἰ ταῦτα 2 μὴ ἦν.

LV. Aristotle de Mundo 6, p. 401 a 8 (with the reading $\tau \eta \nu \gamma \eta \nu$); Stobaeus Ecl. 1. 2, p. 86 (with the reading $\pi \lambda \eta \gamma \hat{\eta}$). Zeller retains $\tau \eta \nu \gamma \hat{\eta} \nu$.

LVI. See Plutarch de Tranquell. 15, p 473; de Iside 45, p. 369, Porphyrius de Antro Nymph 29. It is unlikely that the aphorism occurred with both παλίντονος and παλίντροπος. See XLV.

LVII. Aristotle Phys. i. 2, p. 185 b 20, and Hipp. Ref.

Haer. 1x. 10.

LVIII. Many readings have been suggested for the corrupt τὰς νόσους—καὶ ⟨τὰ κακὰ⟩ τὰς νόσους, κατὰ τὰς νόσους and καὶ βασάνους See Bywater's note ἐπαιτέονται Bernays for the MS. reading ἐπαιτιῶνται

LIX. Aristotle de Mundo 5, p. 396 b 12; Stobaeus Ecl 1.

34. p. 690. συνάψιες Diels: συνάψειας MSS

LX. Clem. Alex. Strom. 1v. 3, p. 568.

¹ Hippolytus Ref. Haer ix. 10

LV. Every creature is driven to pasture with blows.

The reading την γεν, preferred by Zeller and Pfieiderer, will refer to the "crawling creatures" (worms) which feed on earth But of Aeschylus, Agamemnon 358 and Plato, Criticas 109 B, καθάπερ ποιμένες κτήνη πληγη νέμοντες See Diels in Berl. Sitzb 1901, p 188. Men do not know what is good for them, and have to be forced to it

LVI. The attunement of the world is of opposite tensions, as is that of the harp or bow.

See Fragment XLV.

LVII. Good and bad are the same.

This refers (a) to a thing being good for some and bad for others; (b) to goodness and badness being two aspects of the same thing.

LVIII. Goodness and badness are one At any rate doctors, as Heracleitus says, cut, burn, and cruelly rack the sick, asking to get from the sick a fee that is not their deserts, in that they effect such benefits † in sickness †

With ἐπαιτιῶνται the meaning is: "complain that the patients do not give them an adequate return" See Plato, Republic VI, 497B

LIX Couples are wholes and not wholes, what agrees disagrees, the concordant is discordant From all things one and from one all things.

The reading συνάψειας could be taken as a potential optative without ἄν Burnet renders συμφεράμενον διαφεράμενον 'what is drawn together and what is drawn asunder," and takes all thise to be explanatory of συνάψες.

LX. Men would not have known the name of Justice were it not for these things

That is, justice is known only through injustice

LXI. 'Απρεπές φασιν, εἰ τέρπει τοὺς θεοὺς πολέμων θέα. ἀλλ' οὐκ ἀπρεπές· τὰ γὰρ γενναῖα ἔργα τέρπει. ἄλλως τε πόλεμοι καὶ μάχαι ἡμῖν μὲν δεινὰ δοκεῖ, τῷ δὲ θεῷ οὐδὲ ταῦτα δεινά. συντελεῖ γὰρ ἄπαντα ὁ θεὸς πρὸς ἀρμονίαν τῶν ὅλων, οἰκονομῶν τὰ συμφέροντα, ὅπερ καὶ Ἡράκλειτος λέγει, ὡς τῷ μὲν θεῷ καλὰ πάντα καὶ ἀγαθὰ καὶ δίκαια, ἄνθρωποι δὲ ἃ μὲν 9 ἄδικα ὑπειλήφασιν, ἃ δὲ δίκαια.¹

LXII. Είδέναι χρή τὸν πόλεμον ἐόντα ξυνόν, καὶ δίκην ἔριν· καὶ γινόμενα πάντα κατ' ἔριν καὶ 3 †χρεώμενα†.

LXIII. *Εστι γὰρ είμαρμένα πάντως * * * *. LXIV. Θάνατός ἐστι ὁκόσα ἐγερθέντες ὁρέομεν,

2 οκόσα δὲ εὕδοντες ὕπνος.

LXV. Έν τὸ σοφὸν μοῦνον λέγεσθαι οὐκ ἐθέλει 2 καὶ ἐθέλει Ζηνὸς οὔνομα.

LXVI. Τοῦ βιοῦ οὔνομα βίος, ἔργον δὲ 2 θάνατος.

LXII. Origen contra Celsum vi 42, p. 312.

LXIII. Stobaeus Ecl 1. 5, p 178.

LXIV. Clem Alex. Strom in. 3, p. 520.

LXV. Clem. Alex Strem. v. 14, p. 718.

LXVI. Eustathius in Riad 1. 49; Elymol. magnum s.v sids; Schol. in Iliad 1 49 ap Cramer A P 111. p. 122.

¹ Schol. B. in Il. iv. 4, p. 120 Bekk.

LXI. They say that it is unseemly that the sight of wars delights the gods. But it is not unseemly, for noble deeds delight them. Wars and fighting seem to our thoughtlessness (?) terrible, but in the sight of God even these things are not terrible. For God makes everything contribute to the attunement of wholes, as he dispenses the things that benefit, even as Heracleitus says that to God all things are fair and good and just, but men have supposed that some things are unjust, other things just.

LXII. We must know that war is common to all and that strife is justice, and that everything comes

into being by strife and . . .

The corrupt χρεώμενα has been emended to καταχρεώμενα, to φθειρόμενα and κρινόμενα, but no reading commends itself as really probable.

LXIII. For there are things foreordained wholly.

LXIV Whatsoever things we see when awake are death, just as those we see in sleep are slumber.

Diels thinks that the original went on to say that "what we see when dead is life." The road up and down has three stages, Fire, Water, Earth, or, Life, Sleep, Death

LXV. The one and only wisdom is both unwilling and willing to be spoken of under the name of Zeus.

"Unum illud principium mundi est materia causa lex regimen $Z \epsilon \dot{v} s$, $\Delta i \kappa \eta$, $\sigma o \phi \delta v$, $\lambda \delta \gamma o s$: varia nomina, res non diversa. Idem significat illud . . . $\pi \hat{v} \rho a i \epsilon i \zeta \omega v$, unde manat omnis motus, omnis vita, omnis intellectus." Ritter and Preller, Hist. Phi os Gr § 40. note α . This is admirably said, and puts a great deal of Heracleitus' teaching into three sentences.

LXVI. The name of the bow is life, but its work is death

A pun on Bibs (bow) and Blos (life).

LXVII. 'Αθάνατοι θνητοί, θνητοὶ ἀθάνατοι, ζῶντες τὸν ἐκείνων θάνατον τὸν δὲ ἐκείνων βίον 3 τεθνεῶτες.

LXVIII. Ψυχησι γὰρ θάνατος ὕδωρ γενέσθαι, ὕδατι δὲ θάνατος γην γενέσθαι· ἐκ γης δὲ ὕδωρ

3 γίνεται, έξ ΰδατος δὲ ψυχή.

LXIX. 'Οδὸς ἄνω κάτω μία καὶ ώυτή.

LXX. Ευνον άρχη και πέρας.

LXXI. Ψυχής πείρατα οὐκ ὰν ἐξεύροιο πᾶσαν 2 ἐπιπορευόμενος ὁδόν οὕτω βαθὺν λόγον ἔγει.

LXXII. Ψυχησι τέρψις ύγρησι γενέσθαι.

LXXIII. 'Ανηρ δκότ' αν μεθυσθη, άγεται υπό παιδος ανήβου σφαλλόμενος, οὐκ ἐπαίων ὅκη βαίνει, ὑγρὴν τὴν ψυχὴν ἔχων.

LXXIV. Αὐη ψυχή σοφωτάτη καὶ ἀρίστη

LXVII. Hipp. Ref. Huer. 1x. 10. The fragment (or parts of it) are quoted by many authors See Bywater, Patrick or Diels.

LXVIII. Hipp Ref Haer v 16; Clem. Alex Strom vi 2, p. 746; Philo de Incorr Mundi 21, p 509; Proclus in

Trm 36 c.

LXIX. Hipp Ref. Haer. ix. 10; Diog. Laert. ix 8; Max. Tyr. xli. 4, p. 489; Cleomedes περὶ μετεώρων 1. p 75, Stobaeus Ecl. 1 41.

LXX. Porphyry ap. Schol B. II. xiv. 200, p 392 Bekk.

LXXI Diog Laert ix. 7

LXXII Numenius ap. Porphyr. de Antro Nymph 10.

LXXIII. Stobaeus Flor v 120

LXXIV. Plutarch Romulus 28; Stobaeus Flor. v. 120 (in the form aln ξηρή ψυχή σοφωτάτη και ἀρίστη, where ξηρή is a gloss) In several cases (e.g. Plutarch de Carn. Ενι 1 6, p 995; de Defectu Orac. 41, p. 432; Hermeias in Plato Phaedr. p 73, Ast) the fragment occurs in the form αὐγή ξηρή ψυχή σοφωτάτη και ἀριστη Another very old form, going back at least to Philo, is οδ γῆ ξηρή, ψυχή σοφωτάτη

LXVII. Immortal mortals, mortal immortals, one living the others' death and dying the others' life.

For the sake of symmetry in English I have translated reflectors rather inaccurately Being perfect in tense it strictly means "being dead," i e their being dead is the others' life

LXVIII For it is death to souls to become water, and death to water to become earth. But from earth comes water, and from water, soul.

The best commentary on this is Aristotle, de Anima I 2, 405 α, 25. και Ἡράκλειτος δὲ τὴν ἀρχὴν εἶναί φησι ψυχήν, εἴπερ τὴν ἀναθυμίασιν, ἐξ ἦς τἆλλα συνίστησιν.

LXIX. The road up and the road down is one and the same.

LXX. The beginning and end are common.

Heracleitus is referring to a point on the circumference of a circle.

LXXI. The limits of soul you could not discover though you journeyed the whole way, so deep a measure it has.

Burnet renders λόγον "measure," as in Fragment XXIII.

LXXII. It is delight to souls to become moist.

Perhaps because the change to moisture means death, and the rest of death is pleasant. Or, the way down to death is really a way to the joy of a new life. Or (finally), the passage cannot be altogether without a reference to the répus of intoxication. See the next fragment.

LXXIII. A man when he has become drunk is led by a meie stripling, stumbling, not knowing where he walks, having his soul moist.

LXXIV. A dry soul is wisest and best.

καὶ ἀρίστη The steps in the corruption seem to be αξη-αξη ξηρή-αξηή ξηρή-οξ γη ξηρή See Bywater's notes on LXXV and LXXVI.

LXXV. † Αὐγὴ ξηρὴ ψυχὴ σοφωτάτη καὶ 2 ἀρίστη.†

LXXVI. $\dagger O \hat{v}$ $\gamma \hat{\eta}$ $\xi \eta \rho \dot{\eta}$, $\psi v \chi \dot{\eta}$ $\sigma o \phi \omega \tau \acute{a} \tau \eta$ καλ 2 $\mathring{a} \rho \acute{a} \tau \eta$. \dagger

LXXVII. "Ανθρωπος, ὅκως ἐν εὐφρόνη φάος, 2 ἄπτεται ἀποσβέννυται.

LXXVIII. Πότε γὰρ ἐν ἡμῖν αὐτοῖς οὐκ ἔστιν οἱ θάνατος; καὶ ἡ φησιν Ἡράκλειτος, ταὐτ' εἶναι ζῶν καὶ τεθνηκός, καὶ τὸ ἐγρηγορὸς καὶ τὸ καθεῦδον, καὶ νέον καὶ γηραιόν τάδε γὰρ μεταπεσόντα ἐκεῖνά ἐστι κἀκεῖνα πάλιν μεταπεσόντα 6 ταῦτα.¹

LXXIX. Αἰὼν παῖς ἐστι παίζων πεσσεύων· 2 παιδὸς ἡ βασιληίη.

¹ Plutarch, Consol, ad Apoll 10, p 106.

LXXV. Dry light is the wisest and best soul.

LXXVI. Where earth 1s dry, the soul is wisest and best.

For LXXV and LXXVI see notes on the text

LXXVII. Man, like a light in the night, is kindled

and put out.

LXXVIII. For when is death not within our selves? And as Heracleitus says: "Living and dead are the same, and so are awake and asleep, young and old. The former when shifted are the latter, and again the latter when shifted are the former."

Burnet takes the metaphor in μεταπέσοντα to be the moving of pieces from one γραμμή of the draught-board to another.

LXXIX. Time is a child playing draughts; the kingship is a child's.

Cf Homer, Iliad XV. 362:

ώς ότε τις ψάμαθον πάις άγχι θαλάσσης, ός τ' ἐπεὶ οὖν ποιήση ἀθύρματα νηπιέησιν, ὰψ αὖτις συνέχευε ποσίν καὶ γερσίν αθύρων.

The changes of time are like the changes of the child's game.

LXXX. I searched my self.

See Ritter and Preller, § 48 Possibly it means "I inquired of myself, and did not trust others" See Fragments XV-XVIII. Some see a reference to γνῶθι σεαντόν, and it is possible that Heracleitus gave a new meaning to this old saying But Pfleiderer's theory, that H. sought for the τέλος in introspection, is a strangely distorted view.

LXXXI. Into the same rivers we step and do not step; we are and we are not.

LXXXII. Κάματός ἐστι τοῖς αὐτοῖς μοχθεῖν 2 καὶ ἄρχεσθαι.

LXXXIII. Μεταβάλλον αναπαύεται.

LXXXIV. Καὶ δ κυκεών διίσταται μη κινεό-2 μενος.

LXXXV. Νέκυες κοπρίων ἐκβλητότεροι.

LXXXVI. Γενόμενοι ζώειν ἐθέλουσι μόρους τ' ἔχειν μᾶλλον δὲ ἀναπαύεσθαι, καὶ παΐδας κατα-

3 λείπουσι μόρους γενέσθαι.

LXXXVII. Οἱ μὲν "ἡβῶντος" ἀναγινώσκοντες¹ ἔτη τριάκοντα ποιοῦσι τὴν γενέαν καθ 'Ηράκλειτον' ἐν ῷ χρόνῷ γεννῶντα παρέχει τὸν ἐξ αὐτοῦ

4 γεγεννημένον ὁ γεννήσας.2

LXXXVIII. 'Ο τριάκοντα ἀριθμὸς φυσικώτατός ἐστιν· δ γὰρ ἐν μονάσι τριάς, τοῦτο ἐν δεκάσι τριακοντάς. ἐπεὶ καὶ ὁ τοῦ μηνὸς κύκλος συνέστηκεν ἐκ τεσσάρων τῶν ἀπὸ μονάδος ἑξῆς τετραγώνων α΄, δ΄, θ΄, ις΄. ὅθεν οὐκ ἀπὸ σκοποῦ 6 'Ηράκλειτος γενεὰν τὸν μῆνα καλεῖ ³

LXXXIX. Ex homine in tricennio potest avus

2 haberi.

LXXXVI Clem Alex Strom. 111 3, p 516.

LXXXVII. Cf Censorinus de D N 17

LXXXIX. Philo Qu in Gen 11 5, p 82, Aucher.

LXXXII. It is toil to labour for the same masters and to be ruled by them.

I e change is restful. Cf. the next fragment.

LXXXIII. By changing it rests.

LXXXIV. The posset too separates if it be not stirred.

An example of change and motion giving existence and reality

LXXXV. Corpses are more fit to be thrown out than is dung.

LXXXVI. When born they wish to live and to have dooms—or rather to rest, and they leave children after them to become dooms.

LXXXVII. Some reading $\eta \beta \hat{\omega} \nu \tau \sigma_S$ in this passage make a generation to consist of thirty years, as Heracleitus has it, this being the time it takes a father to have a son who is himself a father.

LXXXVIII. The number thirty is one most intimately bound up with nature, as it bears the same relation to tens as three does to units. Then again the cycle of the moon is composed of the numbers 1, 4, 9, 16, which are the squares of the first four numbers. Wherefore Heracleitus hit the mark when he called the month (or moon) a generation.

LXXXIX. In thirty years a man may become a grandfather.

The Fragments LXXXVI-LXXXIX refer to the "cycle of life" The circle is complete when the son himself becomes a father.

XCII Sext Emp. adv. Math vii. 133 Bywater does not regard Διδ . . . ξυνφ̂ as Heracleitean and Burnet rejects τοῦ . ξυνοῦ

¹ M Antoninus vi 42.

ON POLITICS AND ETHICS

XC. We all work together to one end, some wittingly and with understanding, others unconsciously. In this sense, I think, Heracleitus says that even sleepers are workers and co-operators in the things that take place in the world.

XCI. Thought is common to all. Men must speak with understanding and hold fast to that which is common to all, as a city holds fast to its law, and much more strongly still. For all human laws are nourished by the one divine law. For it prevails as far as it wills, suffices for all, and there is something to spare

"The common" will be fire, which is the one true wisdom So men who have understanding must "keep their souls dry" and refuse to cut themselves off from the great principle of the universe by letting their souls grow moist. Introduction, p. 457. Passages like this were engerly seized upon by the Stoics when they elaborated their theory of a great κοινός λόγος animating the universe True virtue, they held, was for a man consciously and lovingly to follow this λόγος, which is really the will of God, and to try to associate himself with it What is crude and imperfect in Heracleitus became mature and complete in Stoicism Christianity seized upon this thought, and developed the adyos doctrine of St John and the early Fathers.

XCII. Therefore one must follow the common. But though the Word is common, the many live as though they had a wisdom of their own.

Burnet thinks that τοῦ λόγου δ' ἐόντος ξωνοῦ does not belong to Heracleitus, appealing to the MSS, reading de outos in support of his contention. He is chiefly influenced by his conviction that Adyos can mean only the message or gospel of Heracleitus. But at this early stage in the history of thought there could be no distinction made between (a) the message and (b) the truth which the message tries to explain It is the latter meaning that I think Adyos has in this passage

XCIII. * Ωι μάλιστα διηνεκέως δμιλέουσι, τούτφ 2 διαφέρονται.

ΧΟΙΝ. Οὐ δεῖ ωσπερ καθεύδοντας ποιεῖν καὶ

2 λέγειν.

XCV. 'Ο 'Ηράκλειτός φησι, τοῖς ἐγρηγορόσιν ἔνα καὶ κοινὸν κόσμον εἶναι, τῶν δὲ κοιμωμένων 3 ἔκαστον εἰς ἴδιον ἀποστρέφεσθαι.¹

ΧCVΙ. "Ηθος γαρ ανθρώπειον μεν οὐκ έχει

2 γνώμας, θείον δὲ ἔχει.

ΧCVII. 'Ανήρ νήπιος ήκουσε πρὸς δαίμονος

2 ὅκωσπερ παῖς πρὸς ἀνδρός.

ΧCVIII. *Η οὐ καὶ 'Ηράκλειτος ταὐτὸν τοῦτο λέγει, ὃν σὺ ἐπάγει, ὅτι ἀνθρώπων ὁ σοφώτατος πρὸς θεὸν πίθηκος φανεῖται καὶ σοφία καὶ κάλλει 4 καὶ τοῖς ἄλλοις πᾶσιν; ²

ΧCIX. [°]Ω ἄνθρωπε, ἀγνοεῖς ὅτι τὸ τοῦ Ἡρακλείτου εὖ ἔχει, ὡς ἄρα πιθήκων ὁ κάλλιστος αἰσχρὸς ἄλλφ γένει συμβάλλειν, καὶ χυτρῶν ἡ καλλίστη αἰσχρὰ παρθένων γένει συμβάλλειν, ὡς 5 φησιν Ἱππίας ὁ σοφός ⁸

XCIII and XCIV. M Antoninus iv 46. Diels adds λόγφ τῷ τὰ ὅλα διοικοῦντι, which Burnet rejects as belonging to M. Aurelius (Stoic idea).

XCVI and XCVII. Origen contra Cels. vi. 12, p. 291.

¹ Plutarch de Superst 3, p. 166.

XCIII. They are at variance with that with which they have most continuous intercourse.

XCIV. We ought not to act and to speak as

though we were asleep.

XCV. Heracleitus says that there is one world in common for those who are awake, but that when men are asleep each turns away into a world of his own.

Sleepiness to Heracleitus was the state of a man who allowed his soul to sink on the downward path into moisture or mud. See Fragments XCI and XCII. To be awake was to have one's soul dry, and to be in close connection with "the ever-hring fire" of the universe.

XCVI. Human nature has no understanding, but that of God has.

This fragment expresses in another way the thought that $\tau\delta~\xi\nu\nu\delta\nu$ is good, $\tau\delta~f\delta\iota\nu\nu$ evil

XCVII. Man is called a baby by the deity as a child is by a man.

ON RELIGION

XCVIII And does not Heracleitus too, whom you bring forward, say this very same thing, that the wisest of men compared with God will appear as an ape in wisdom, in beauty and in everything else?

XCIX. Sir, you do not know that the remark of Heracleitus is a sound one, to the effect that the most beautiful of apes is ugly in comparison with another species, and that the most beautiful of pots is ugly in comparison with maidenhood, as says Hippias the wise.

C. The people should fight for their law as for a wall.

This is because the law is $\xi \nu \nu \delta \nu$, is, in fact, but a reflection of the great $\xi \nu \nu \delta \nu$ of the natural world

CI. For greater dooms win greater destinies.

This refers to the "fiery deaths" of heroic men See Introduction, p 457, and also the following fragment.

CII Gods and men honour those who are killed in battle

CIII. You should put out insolence even more than a fire.

CIV. For men to get all they wish is not the better thing. It is disease that makes health a pleasant thing; evil, good; hunger, surfeit; and toil, rest.

CV. It is hard to contend against one's heart's desire; for whatever it wishes to have it buys at the cost of soul.

Burnet so translates $\theta\nu u ds$; the word covers a wider area than any English equivalent, but includes much of what we include under "instinct," "urge," "passionate claving" Aristotle understood $\theta\nu\mu bs$ to mean anger (*Ethic Nicom.* II. 2, 1105 α 8) To gratify $\theta\nu\mu bs$ is to allow one's soul "to become moist"

CVI. It is the concern of all men to know themselves and to be sober-minded

CVII. To be sober-minded is the greatest virtue, and wisdom is to speak the truth and to act it, listening to the voice of nature.

These two fragments (both are of doubtful authenticity) express positively what is stated in Fragment CV in a quasi-negative form

CVIII. It is better to hide ignorance, but it is hard to do this when we relax over wine.

CIX. †Κρύπτειν ἀμαθίην κρέσσον ἢ ἐς τὸ 2 μέσον φέρειν.†

CIX. To hide ignorance is preferable to bringing it to light.

CX. It is law too to obey the advice of one.

CXI. For what mind or sense have they? They follow the bards and use the multitude as their teacher, not realising that there are many bad but few good. For the best choose one thing over all others, immortal glory among mortals, while the many are glutted like beasts.

CXII. In Priene lived Bias, son of Teutamas, who

is of more account than the others.

CXIII. One man to me is as ten thousand, if he be the best.

Fragments CXI-CXIII show the aristocratic tendencies of the mind of Heracleitus His "common," of course, has nothing to do with "common-sense" or with general opinions. It refers to the law or principle of nature, which each man must apprehend for hinself. He who can do so best is a natural leader and lawgiver.

CXIV All the Ephesians from the youths up would do well to hang themselves and leave their city to the boys For they banished Hermodorus, the best man of them, saying, "We would have none among us who is best, if there be such an one, let him be so elsewhere among other people."

CXV. Dogs also bark at him they know not.

CXVI. He escapes being known because of men's unbelief.

"A prophet is not without honour save in his own city."
